As a result of this interest, Chairman SPARKMAN agreed to hold hearings on the subject of abandonment on July 23, 1970. Every witness testified that the abandonment process was a vexing problem and that Federal interest and action was long overdue.

Mr. Robert Embry, Commissioner of Housing and Community Development for the city of Baltimore, stated that the legislation was a "long overdue response to a low visibility problem." Neil Hardy, assistant administrator for programs and policy, Housing and Development Administration for New York and former Commissioner of FHA, stated that "Housing abandonment is one—problem—which has been ignored for too long," and that "no section of the country is immune." He also stated:

> It is essential that we fully understand its dynamics, if we are to undertake an effective program to combat the situation.

Dr. George Sternlieb, noted urban land specialist, stated:

> This is an emergency and we cannot afford to wait long.

He also predicted that older suburbs or "zones of emergence" were beginning to suffer the same abandonment problem as the inner city. Ivan Gluckman, deputy managing director of housing for the city of Philadelphia, said:

> I think the danger of the situation, the degree of its cancerous spread in this particular problem is sufficient to justify an emergency approach similar to the natural disaster program.

The overwhelming concern of these practiced and experienced housing specialists only reaffirmed my belief that the Congress should take action on the program this year.

THE GOODELL-BROOKE AMENDMENT

Senator BROOKE and I agreed to join our proposals and with the consent of the chairman to present this proposal as an amendment to the committee bill on the floor.

We have come up with a program which is not as ambitious as those of our original proposals. It will, however, forge a beginning in our attempt to understand and treat housing abandonment.

It would add a new section of title VI of S. 4368 which would authorize the Secretary to make grants available to selected cities for the purposes of demonstrating effective and prompt methods of fighting housing abandonment.

An authorization of $25 million would be made available for this purpose and the grants would subsidize 90 percent of the cost of the project. No more than one-third of the aggregate amount can be made to one locality, and these grants would only be available to those localities in which a substantial number of structures are abandoned or threatened with abandonment.

During hearings, many methods were discussed by which a local government could fight abandonment. We have directed the Secretary to experiment with as many of the approaches as possible including those presented in the abandonment legislation introduced by me and Senator BROOKE. They include: First, acquisition by negotiated purchase, lease, receivership, tax lien proceedings, of real property which is abandoned, deteriorated, or in violation of applicable code standards; second, the repair of streets, sidewalks, parks, playground, publicly owned utilities, public buildings to meet needs consistent with the revitalization and continued use of the area; third, the demolition of structures determined to be structurally unsound or unfit for human habitation or which contributes adversely to the physical or social environment of the locality involved; fourth, the establishment of recreational or community facilities including public playgrounds; fifth, the improvement of garbage and trash collection, street cleaning and other essential services necessary to the revitalization and maintenance of the area; sixth, the rehabilitation of privately and publicly owned real property by the locality; and seventh, the establishment and operation of locally controlled, nonprofit housing management corporations, and municipal repair programs.

Any property acquired through these demonstrations may be made available to nonprofit and limited dividend corporations, cooperations or public agencies for use as new or rehabilitated housing for occupancy by families of low or moderate income. In this way, we expect that the Secretary will, wherever possible, transfer ownership to tenants or owner-occupants who will have more incentive to maintain the property than absentee landlords.

At the end of these demonstrations we expect the Secretary will be able to report to the Congress as to which approaches can best be used to combat abandonment across the Nation.

I urge my colleagues to accept this amendment. It represents the first recognition in the Congress that the problem of abandonment needs immediate attention. The assistance will not result in paper studies that never see the light of day. It will create programs which can help the inner city residents while gathering more information for HUD. It will produce visible results of congressional concern about housing abandonment.

I believe this proposal represents a good beginning and I urge my colleagues to support it.

Mr. TOWER. Mr. President, would the Senator yield?

Mr. GOODELL. I yield.

Mr. TOWER. Mr. President, would the Senator consider perhaps one or two small amendments to his amendment? For example, would he consider changing, in the second line, the word "shall" to "may." That would make it read, "The Secretary may undertake . . ." rather than "shall." Rather than making it mandatory, I think we should make it discretionary on the part of the Secretary. I think that would remove a problem that might cause many objections.

Mr. GOODELL. Mr. President, I say to the Senator from Texas that there is considerable flexibility in the amendment. We have almost a disastrous situation in the cities with reference to abandoned housing. The amount of

money here is very small in proportion to the problem. The Secretary is only going to be able to undertake demonstration and experimental projects.

It is my understanding that HUD now has underway paper studies concerning what may have to be done. The cost of that is $100,000 or so.

They have laid the groundwork for moving. They want to move.

I do not feel strongly about the Senator's suggestion except that I have a feeling of urgency. I would not want the bureaucratic apparatus to feel that we are approaching this with any less urgency than is required.

We do want to move as soon as possible and we want the program to go forward.

It is not a massive program. It is not something in which a waste of money might be involved. We want them to go ahead on a demonstration basis so that as soon as possible they can come back to us and give us the results of this. Then we can undertake to solve the problem.

Mr. TOWER. Has the Senator given any consideration, rather than authorizing grants, to authorizing loans on favorable terms?

Mr. GOODELL. Mr. President, I would say to the Senator from Texas that we might when we undertake a major program. If I were talking about the massive amount of money I originally proposed—$300 million and which qualified witnesses proposed to the committee, we might consider long terms or substitute loans.

We would not have very much experimentation without grants. Unless there are grants, the money is not available in local areas to move forward with an experimental type program.

Mr. TOWER. Mr. President, let us see if we can tie down the language in section (c) on the second page of the copy of the amendment I have.

Down toward the end of the paragraph, it says, ". . . for purchase or lease at fair value for use by such purchaser or lessee."

Would the Senator object to adding the term "market" after the word "fair," so that it would become "fair market value" rather than "fair value"?

Mr. GOODELL. Mr. President, I do not believe I would have any objection to that. Would the Senator elaborate a little bit on what his view is of the difference?

Mr. TOWER. That is a specific guideline. We can term almost anything to be fair. I think a fair market value establishes a guideline for the Department to be able to make sure that no one gets a windfall out of this or that it is loosely administered. Of course, that term is used frequently throughout legislation.

Mr. GOODELL. The Senator is correct. I say that if the Senator will abandon the first two suggestions, I would accept the third.

Mr. TOWER. They say the third time is the charm.

Mr. GOODELL. Mr. President, I modify my amendment to make it the fair market value instead of the fair value.

The PRESIDING OFFICER (Mr. CASE). The amendment is so modified.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. GOODELL. I yield.

Mr. JAVITS. Mr. President, I shall be brief. I was contemplating offering a similar amendment to that of the junior Senator from New York (Mr. GOODELL).

I ask unanimous consent that it may be printed in the RECORD as part of my remarks.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

On page 85, between lines 14 and 15, insert the following new section:

"GRANTS TO ENCOURAGE THE UTILIZATION OF CERTAIN UNUSED OR LOCALLY HELD LAND

"SEC. 742. (a) The Secretary is authorized to make grants to any locality for not to exceed two-thirds of the cost to the locality (1) of acquiring unimproved and abandoned real property and disposing of such property for a nominal consideration, and (2) of disposing for a nominal consideration of real property acquired by the locality as the result of code enforcement activities or otherwise, in any case where the disposition of such property is made to a private nonprofit corporation or other private nonprofit entity, a limited dividend corporation or other limited dividend entity, or a cooperative housing corporation, which is receiving assistance under any Federal, State, or local program in order to provide rental housing for persons of low and moderate income, and which has entered into a binding agreement with the locality to repair, rehabilitate, or improve such property so as to provide housing and related facilities for such persons.

"(b) In addition to grants under subsection (a), the Secretary is authorized to make grants to any locality equal to—

"50 per centum of the aggregate costs incurred by the locality in arresting decline in an area in which low- or moderate-income rental housing is to be provided with assistance under subsection (a), including any demolition and removal of improvements, or the installation, construction, or reconstruction of streets, sidewalks, utilities, or other facilities designed to enhance the livability of such area.

"AUTHORIZATION FOR APPROPRIATIONS

"SEC. 742. (b) There are authorized to be appropriated for grants under this section not to exceed $10,000,000 for the fiscal year ending June 30, 1972.

"Any amounts appropriated under this section shall remain available until expended, and any amounts authorized for any fiscal year but not appropriated may be appropriated for any succeeding fiscal year.

Mr. JAVITS. Mr. President, I am delighted to join in the amendment of the junior Senator from New York. He is a member of the committee. He has done a tremendous amount of work in this area.

We have 13,000 abandoned buildings in New York City involving 250,000 housing units.

During his recent tour of the city, the Senator from Connecticut (Mr. RIBICOFF) visited the section of the city referred to as Brownsville and called it a national disaster.

It is a singular, most striking devastation sight as one watches these yawning hulks of buildings where other people live and children play, where narcotics addicts set fires, where there is filth, and where every kind of degradation can be carried on with impunity.

I think one of the most critically important things we can do about correcting the slums is to adopt this program.

I hope that the Senate can see fit to accept the amendment.

Mr. SPARKMAN. Mr. President, I am glad the Senator has accepted the suggestion of the Senator from Texas and retained the fair market value provision. We often use that.

I would also like to join in the suggestion made by the Senator from Texas that this be made permissive by using "may" instead of "shall."

I think we can count on getting cooperation from HUD to carry on this program.

I would like to suggest further that instead of $25 million, which would have only until June 30 to run, we make that $10 million. This, after all, is experimental. I think it would be more realistic to set it at $10 million for the balance of this fiscal year.

Then, there is one other provision I would like to suggest, and as far as I am concerned, I would be perfectly willing to accept the amendment with these changes.

This is in the paragraph which would authorize public bodies to build section 221(d)(3) housing.

I understand the housing department opposes that provision. This proposal has come before us before and HUD is always having public bodies sponsor FHA 221(d)(3) housing. Before we go into something that does make a change such as that, I think we should study it in committee.

I am perfectly willing, insofar as I am concerned, to take the amendment with those very few modifications. I hope the Senator from New York agrees with me.

Mr. PERCY. Mr. President, will the Senator yield?

Mr. GOODELL. I shall yield in just a moment. First I would like to respond to the Senator from Alabama.

With respect to the suggestion of the distinguished chairman of the committee, I accept the amendment to change the word to "may." I am sure the Senator from Alabama will agree with me as a matter of legislative history that we are very anxious to go forward with this.

Mr. SPARKMAN. I agree, and I only propose that because I have confidence in the Department's desire to try out new methods and programs.

Mr. TOWER. Mr. President, I associate myself with the chairman of the committee in that respect.

Mr. SPARKMAN. When I made my statement with respect to the word "shall" I do not suggest that the language "shall make recommendations" be changed.

Mr. GOODELL. May I implore the chairman to think and consider a little bit further on the amount. This is a very small amount of money compared to the tremendous problem we have. I think it is urgent to go ahead in various types of programs as soon as possible. I would say to the Senator that the Committee on Appropriations is going to have to provide funds. If the Department comes forward and indicates they cannot spend $25 million authorized in this amendment, then clearly they will

not get the funds. But this program will need to have adequate funding authority for the new experimentation. I hope we will leave this money available.

An expert suggested to our committee that to begin making an impact now we need $200 million. We cut it back to $25 million on the basis that we want them to get started and give us real guidelines on how we can effectively meet the problem.

Mr. SPARKMAN. Mr. President, of course, I realize the truth in what the Senator has said. The Committee on Appropriations does have to consider this. My thought was that we have such a short time left in fiscal year 1971 in which to operate on this matter.

However, if the Senator feels it should remain at that amount and if he will modify his amendment, as far as I am concerned, I will be glad to take it, and I understand the Senator from Texas is agreeable also.

Mr. GOODELL. I thank the Senator with respect to the amount of money; and I appreciate the Senator's willingness to accept the higher figure.

The PRESIDING OFFICER. Will the Senator from New York state for the record the modifications he wishes to make in his amendment?

Mr. GOODELL. Yes, but first, to save time I yield to the Senator from Illinois.

The PRESIDING OFFICER. The Senator from Illinois is recognized.

Mr. PERCY. Mr. President, I thank the Senator. I wish to associate myself with the amendment. I remember the compelling and convincing testimony that the distinguished Senator from New York gave before our committee. He is a member of the committee but he testified on the problem at that time. I think the managers of the bill are very well advised to accept this with the modifications which have been made which I think are wise and prudent, and to accept the larger amount.

I visited with Mayor Lindsay more than a year ago, spending the day looking at housing in New York. I looked at rehabilitated housing and at abandoned buildings. The cost is great to correct our present deteriorating conditions but I think the return on the investment is potentially very high. When we have these abandoned buildings in the middle of a community they act as a cancer that spreads throughout the entire community.

Just as we see that rehabilitated buildings have a good effect on a community, so we are trying to prevent communities from being run down by these abandoned buildings.

I know every city in America will benefit from this amendment and not just the city of New York.

I thank the Senator.

Mr. GOODELL. I thank the Senator from Illinois.

Mr. President, I yield to the Senator from Massachusetts.

Mr. BROOKE. Mr. President, I also proposed legislation for abandoned housing and the proposal of the distinguished Senator from New York represents a sort of compromise between our two proposals.

This is a very grave problem not only in New York but in cities all across the country. We have come to the conclusion we do not have enough information and I think we can get far more congressional insight into the problems and what will be done through this experiment.

I wish to associate myself with what has been said by the Senator from New York. I commend the managers of the bill for accepting the compromise. I think it is something that is worthy and something that will benefit the Nation.

I thank the Senator.

The amendment, as modified, reads as follows:

On page 40 insert the following new section after line 16:

"DEMONSTRATIONS WITH RESPECT TO ABANDONED PROPERTIES

"Sec. 505. (a) In carrying out activities under Section 501, the Secretary may undertake programs to demonstrate the most feasible means of providing assistance to localities in which a substantial number of structures are abandoned or are threatened with abandonment for the purpose of arresting the process of housing abandonment in its incipiency or in restoring viability to blighted areas in which abandonment is pervasive. For this purpose, the Secretary is authorized to make grants, subject to the limitations of this section, to assist local public bodies in planning and implementing demonstration projects for prompt and effective action in alleviating and preventing such abandonment in designated demonstration areas.

"(b) In administering this section, the Secretary shall give preference to those demonstration projects which in his judgment can reasonably be expected to arrest the process of abandonment in the demonstration area within a period of two years and which provide for innovative approaches to combating the problem of housing abandonment. Such projects may include, but shall not be limited to—

"(1) acquisition by negotiated purchase, lease, receivership, tax lien proceedings, or other means authorized by law and satisfactory to the Secretary, of real property within the demonstration area or areas which is abandoned, deteriorated, or in violation of applicable code standards;

"(2) the repair of streets, sidewalks, parks, playgrounds, publicly owned utilities, public buildings to meet needs consistent with the revitalization and continued use of the area;

"(3) the demolition of structures determined to be structurally unsound or unfit for human habitation or which contribute adversely to the physical or social environment of the locality involved;

"(4) the establishment of recreational or community facilities including public playgrounds;

"(5) the improvement of garbage and trash collection, street cleaning and other essential services necessary to the revitalization and maintenance of the area;

"(6) the rehabilitation of privately and publicly owned real property by the locality; and

"(7) the establishment and operation of locally controlled, nonprofit housing management corporations and municipal repair programs.

"(c) Subject to such conditions as the Secretary may prescribe, real property held as part of a project assisted under this Act may be available to—

"(1) a limited dividend corporation, nonprofit corporation, or association, cooperative or public body or agency, or other approved purchaser or lessee, or

"(2) a purchaser who would be eligible for a mortgage insured under section 221(d)(3) or (d)(4), section 221(h)(1), section 235(i) or (j)(1), or section 236 of the National Housing Act, for purchase or lease at fair market value for use by such purchaser or lessee, as, or in the provision of, new or rehabilitated housing for occupancy by families or individuals of low or moderate income.

"(d) Grants under this section shall be in amounts which do not exceed 90 per centum of the net project cost as determined by the Secretary. There are authorized to be appropriated for demonstration grants under this section not to exceed $25,000,000 for the fiscal year ending June 30, 1971. Any amounts appropriated shall remain available until expended in amounts authorized but not appropriated may be appropriated for any succeeding fiscal year commencing prior to July 1, 1972. Not more than one third of the aggregate amount of grants made in any fiscal year under this section shall be made with respect to projects undertaken by one locality.

"(e) The provisions of sections 106, 114, and 115 of title I of the Housing Act of 1949, and section 312 of the Housing Act of 1964, may apply to projects assisted under this Act as if such projects were being carried out in urban renewal areas as part of urban renewal projects within the meaning of section 110 of the Housing Act of 1949.

"(f) The Secretary shall report annually to the Congress with respect to the status of demonstration projects funded by him and shall make such recommendations to the Congress as he deems necessary to further the purposes of this section."

Mr. GOODELL. Mr. President, I thank the Senator from Massachusetts.

Mr. President, at this time I would like to modify the amendment on line 2, to delete the word "shall" and insert the word "may". In subsection (e), the second line, delete the word "shall" and insert the word "may". Then, delete section (g)—subsection (g) entirely. I have already made the other modification in subsection (c) to insert after the word "fair" "market value."

Mr. SPARKMAN. Mr. President, I understand the Senator from New York has used up all of his time. I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back. The question is agreeing to the amendment of the Senator from New York, as modified (putting the question).

The amendment was agreed to.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from New York is recognized.

Mr. GOODELL. Mr. President, I shall be very brief. I send a technical amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The amendment was read, as follows:

On page 20, line 13, strike the period and insert in lieu thereof the following: "except that in their case not more than 10 per centum of the dwelling units in a project, other than dormitory-type rental housing shall be available for occupancy by such persons."

Mr. GOODELL. Mr. President, if I may explain the amendment I think we can take care of this matter in 2 minutes.

In committee we accepted the amendment I offered which would begin to make available a program for single room occupancy houses. Inadvertently a

limitation on this clause limiting this was not included in the amendment as it was adopted. This amendment merely would provide that under no circumstances may more than 10 percent of the dwelling units in a public housing project other than dormitory housing, be available for occupancy by such single room occupants.

The PRESIDING OFFICER. Who yields time?

Mr. TOWER. Mr. President, I yield myself 1 minute on the bill?

Mr. SPARKMAN. No; I yield 1 minute to the Senator on the amendment.

Mr. TOWER. Mr. President, I would suggest to the distinguished Senator from New York that he withhold that amendment for a moment until we have a chance to examine it.

Mr. GOODELL. Mr. President, I withdraw the amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

Mr. METCALF. Mr. President, I send to the desk an amendment.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk proceeded to read the amendment.

Mr. METCALF. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with and that the amendment be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered; and, without objection, the amendment will be printed in the RECORD.

The amendment, ordered to be printed in the RECORD, is as follows:

On page 105, beginning with line 8, strike out all through line 9 on page 106.

On page 106, line 11, strike out "1007" and insert "1006".

On page 107, line 7, strike out "1008" and insert "1007".

Mr. METCALF. Mr. President, the amendment strikes out section 1006 of the bill. Section 1006 is described in the committee report, and it is as succinct as I can describe it. It states that section 1006:

> Amends the Public Utility Holding Company Act of 1935 to authorize public utility holding companies to construct, own, or operate federally assisted low- and moderate-income housing either individually or in partnership with a national housing corporation created under Title IX of the Housing and Urban Development Act of 1968. The Securities and Exchange Commission would, under the bill, retain authority to regulate holding company activities.

This section repeals a specific provision of the Public Utility Holding Company Act that denies the utilities authority to go into activities other than a regulated activity. This proposal specifically overrules three decisions of the Securities and Exchange Commission. The decisions of the Securities and Exchange Commission were based, of course, on the Public Utility Holding Company Act of 1935.

The authors of that bill—Senator Wheeler on this side, a great and distinguished Senator from Montana, and Mr. Rayburn on the other side, who became Speaker of the House of Representatives—engaged in a long and hard debate to put that provision in the law. Senator Wheeler, who was manager of the bill in the Senate, emphasized "the principle that utility holding companies shall confine themselves to gas and electric service and not continue to mix into all manner of other businesses."

Later, of course, the U.S. Circuit Court, in United Gas Improvement Co. against SEC, reported at 138 Federal (2d) 1010 said:

> The obvious intention of Congress in enacting Section 11(b)(1) was to integrate public utility holding company systems and to compel holding companies subject to the Act to relinquish interests in unrelated utilities as well as unrelated nonutility companies. The myriad, promiscuous activities and investments of some of the holding company systems was a prime cause of investors' losses.

Of course, we all remember the Insul disgrace, when investors lost tremendous amounts of money as a result of holding companies.

When the Securities and Exchange Commission handed down these three decisions, a reporter asked Mr. Donald Cook, who was one of the outstanding spokesmen for the utility companies, what he was going to do about it. He said, "Well, I will get some statutory remedy." He went to the committee. There is not a word of testimony in these two volumes of hearings, almost 2,000 pages there is not a single line of evidence, in support of repealing a major section of the Public Utility Holding Company Act which has been a part of the legislation regulating and governing utilities since the act became law.

I testified before the Subcommittee on Antitrust and Monopoly. As a result of that testimony I wrote a letter, on the 16th of June 1970, to the Joint Committee on Internal Revenue Taxation, asking the chief of staff what the tax impact of this kind of procedure would be.

I have not yet received an answer. I do not believe it is the fault of the joint committee, because it has had some major problems.

I ask unanimous consent that my letter of June 16, 1970 be incorporated in the RECORD as a part of my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

JUNE 16, 1970.

Mr. LAURENCE N. WOODWORTH,
*Chief of Staff, Joint Committee on Internal Revenue Taxation, Longworth House Office Building, Washington, D.C.*

DEAR MR. WOODWORTH: In testimony Thursday, 11 June, before the Senate Antitrust and Monopoly Subcommittee I discussed tax features of housing built by utility subsidiaries.

According to the utility industry, participating companies earn more than 20 per cent annually on their equity through construction of housing through subsidiary corporations.

The property of the utility's housing subsidiary is depreciated in its entirety over a short period, producing a tax loss for consolidation with the parent company's return.

I would appreciate knowing how the true cost, to the taxpayer, of such housing compares with the cost of housing under other Federal programs.

It would appear that the inherent tax-loss feature of utility-sponsored housing may make the true cost of such units higher than the cost of housing otherwise financed.

Enclosed is my statement (and the article from Public Utilities Fortnightly) regarding utility housing, which I entered into the hearing record.

If there are questions, please call Vic Reinemer of my staff.

Very truly yours,

LEE METCALF.

Mr. METCALF. The only testimony that I know of that has been submitted on this legislation was that given before the subcommittee of which the Senator from Michigan (Mr. HART) is chairman, in which I objected to this procedure—not because I objected to the amendment of the statute. It may be that this is the only way to build houses. If allowing utilities to expand into this area is the only way to give housing to the poor, that is one thing, but there has not been a line of proof and not a word of testimony about it.

The utility companies themselves say, one, that they should be permitted to make at least 20 percent on their investment, and then at the end of ten years turn the investment over; and, two, this provision allows them to have a greater flexibility. But, as a condition of every single contract, according to a letter I have from another person who has been associated with this matter, they say that there has to be all electric heat or all gas appliances as the utility may represent their own interests.

Today, as we walk from the Senate Office Building to the Senate Chamber, we see that the buildings are in half darkness because the electric utilities cannot supply the kind of electrical reliability we should have. Yet, as a part of the contract, a gas company, if it is a gas company, would require all gas heat; and, if it is an electric company, it would require all electric heat. It would remove a most important part of competition in the utility industry.

Therefore, I urge that we have hearings on this proposition. I urge that the chairman of the committee, instead of adopting a major change in the Public Utility Holding Company Act, agree to have some hearings and discussions. It may be that this is the way to build houses. The chairman of the committee will have an agreement from the Senator from Montana, as well as others, if it is. But until the tax impact has been explored, until there has been an exploration of the impact of putting a regulated industry into a nonregulated business, I think this provision should be deleted from the bill.

I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. SPARKMAN. Mr. President, will the Senator yield?

Mr. METCALF. I yield to the Senator from Alabama.

Mr. SPARKMAN. Mr. President, the Senator from Montana spoke to me about this matter before we started consideration of the bill. He expressed considerable concern and even stated that he would not like to see the bill called up if this provision was going to stay in it.

I must admit that we did not have any hearings on it. We did have a presentation in the Senate by the distinguished Senator from Washington (Mr. MAGNUSON), who, as I recall, introduced the original bill. As I recall, he wrote me a letter on it.

Of course, I want the Senator from Montana to keep this fact in mind: We have been trying our hardest to get private enterprise to participate in housing programs, to become interested in them, and to invest money in them. The banks have done it. The insurance companies have done it. We have a provision now whereby we have partnership corporations in order to pull private enterprise into building housing.

It seemed to me there was no reason why utilities companies might not be used. However, I will say to the Senator it is true that we did not hold hearings on the provision.

In the event the matter is stricken from the bill, it will be my purpose, the next go-round, to hold hearings on this matter. I personally gave my commitment to the Senator that, if it was satisfactory for him to take up the bill, I would not oppose his motion to knock out that provision; but other Senators have indicated to me that they would oppose it.

Mr. METCALF. Let me say to the Senator from Alabama, who has contributed so greatly to the development of housing in the United States, that I congratulate him for all he has done for housing. I believe we should do everything we can to encourage every segment of private industry to participate in housing.

The lack of adequate housing is a national disgrace, and we should do everything we can to eliminate that disgrace. But I think we should be very careful when we say that the utilities shall have such a hold on and control over what goes into the housing, how the development is going to be, whether it is going to be all electric or all gas, or all those things. I think we should be very careful when we overrule a section of the law that was hard fought for, and has been put in in order to protect the public interest.

After hearings, it may well be that the Senator from Montana will agree that this provision should go in; but there certainly should be some determination of what the public interest is.

Mr. SPARKMAN. Mr. President, because of the fact that I do not oppose the Senator's amendment, I ask that the Senator from Texas control the time in opposition.

Mr. TOWER. Mr. President, I yield 2 minutes to the Senator from Michigan.

Mr. HART. Mr. President, I do not know whether this is the only way to provide decent housing for low- and middle-income groups, but I do know it is one way; and in fact tonight there are low-income families decently housed, in the city of Detroit, because a utility there—Michigan Consolidated, after having applied and been given approval by the Securities and Exchange Commission, did in fact construct urban renewal townhouses in an area known as Elmwood.

That same utility has started and now has under construction two other low- and middle-income housing developments in the city of Detroit and in the city of Inkster, which I understand will provide shelter for elderly citizens. So we know that this is a way to meet in part the unmet need for housing.

Secondly, I share with the able Senator from Montana a little sensitivity about giving a utility a handhold on the kind of fuel or energy that will be used in houses constructed by its housing subsidiary; but I call the attention of my colleagues to the fact that the housing construction will itself be subject to regulation, and the FHA requires—and I cite section 72962.5 of the FHA Valuation Analysis Manual and the underwriting reports and forms appendix in that manual, form 2264—

The utility in question in Detroit, a gas utility, has provided gas——

The PRESIDING OFFICER. The Senator's time has expired.

Mr. HART. May I have 1 more minute?

Mr. TOWER. I yield the Senator 1 additional minute.

Mr. HART. In the housing complex in the Elmwood area of Detroit certain of the energy units are provided through gas, others through electricity; and in each case, the reason was that the particular element delivered the energy at the lowest cost.

So there was no preferential or exclusive dealing hand-hold given in this case, and the FHA restrictions and regulations should forestall it in any case.

Finally, Mr. President, if we are going to zero in on urban centers, if we are to get new low-income housing in deteriorating centers of our cities, a utility is more likely to step forward and undertake participation in this kind of construction than other businesses. The construction itself is subject to a good bit of redtape and regulation through HUD. A utility is used to living with regulation. Other businesses are less willing to undertake the experience.

I hope very much that the action of the committee will be sustained.

The PRESIDING OFFICER. Who yields time?

Mr. TOWER. I yield 3 minutes to the junior Senator from Michigan (Mr. GRIFFIN).

Mr. GRIFFIN. Mr. President, I rise to associate myself with the remarks of my senior colleague from Michigan and to urge that the Senate sustain the committee's position by voting down the pending amendment.

If we do, we will be carrying out, not only the recommendation of the Department of Housing and Urban Development Secretary, but also that of the Securities and Exchange Commission, which supports the provision in the bill and is in accord with its objectives.

I would share the concern of the Senator from Montana if the provision in the bill were broader in scope and opened the door too wide to allow utility companies to engage in any and every activity. But the provision is very carefully limited, and the SEC would still have control. It merely gives certain authority to the SEC which it does not have now.

As the senior Senator from Michigan has pointed out, there are housing projects in the State of Michigan that await this legislation. There are housing projects in other parts of the country that await this legislation. Surely, we should be desirous of getting more private and nonpublic investment in the housing field. Utility companies have a unique interest in rehabilitating the inner city. Aside from whatever profit that might be associated with housing projects, the utility company has an overriding interest in making sure that the inner city does not decay.

It seems to me that we ought to take advantage of that motivation, that unique interest which binds the utility to the inner cities. And we ought to allow the leeway and flexibility so a utility company can build low- and middle-income housing.

The provision in this bill is a step in the right direction. I am very glad that the administration supports it, and I think the Senate would make an unfortunate mistake if we now were to strike this provision out by agreeing to the amendment of the Senator from Montana.

The PRESIDING OFFICER. Who yields time?

Mr. TOWER. Mr. President, I ask unanimous consent that I might suggest the absence of a quorum, without the time being charged to either side.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. TOWER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TOWER. Mr. President, I move that the amendment of the Senator from Montana (Mr. METCALF) be tabled.

The PRESIDING OFFICER. The motion of the Senator from Texas is not in order until all time is used or yielded back.

Mr. METCALF. Mr. President, will the Senator yield?

Mr. TOWER. The Senator can proceed on his own time.

Mr. METCALF. I have 4 minutes left, and I understand that the Senator from Texas has 9 minutes. I would suggest that he yield time back and let me use my 4 minutes.

Mr. HART. Mr. President, would the Senator reserve a half minute for me?

Mr. TOWER. I would like to reserve part of my time.

The PRESIDING OFFICER. Who yields time?

Mr. METCALF. The Senator from Montana, as the author of the amendment, would like to have a couple of minutes to close this debate.

Mr. TOWER. Time is available on the bill.

Mr. METCALF. The Senator from Texas already has indicated that he wants to close debate by attempting to

make a motion to table, which the Chair ruled was out of order.

Mr. TOWER. Mr. President, I yield back all but 1 minute of my time.

Mr. MANSFIELD. And that will be given to the Senator from Michigan (Mr. HART).

Mr. TOWER. The Senator from Montana would not want me to gag the Senator from Michigan, would he?

Mr. METCALF. I would be delighted to have the Senator from Michigan have as much time as possible. My delightful colleague and I already have had some colloquy on this matter in his own Subcommittee on Antitrust and Monopoly.

Mr. President, on September 25, 1969, in the Public Utilities Fortnightly, there was a suggestion to all the utility companies to go into this kind of housing business. Let me read a couple of paragraphs:

Niagara Mohawk would organize a wholly owned subsidiary for each project. Each project would have a 40-year, 90 percent FHA guaranteed mortgage.

That is after the subsidy—

While the subsidiary would be limited to a 6 per cent return on its 10 per cent equity, the property could be depreciated in its entirety (sum-of-the-years digits) over a ten-year period, producing in each year a tax loss for consolidation with Niagara Mohawk's own tax return. At the end of the depreciation period, the property could be sold at its cost or even given away to an eleemosynary institution. All this would produce an annual average return on equity over the ten-year period in excess of 20 per cent. While the dollars involved might be small in relation to utility operations, the financial integrity of the housing program would be assured.

So here is an open option, without consideration, without debate, without hearings, without a word of testimony, in order to give the utilities an extra tax break. It has not gone to the Committee on Finance; it has not gone to the Committee on Commerce. It emanated from the Committee on Banking and Currency as an amendment that appeared from somewhere, out of the dark, in a utility blackout on an irrelevant housing bill.

I want to read an excerpt from another letter. This is from the National Oil Fuel Institute, Inc., December 5, 1969, and I ask unanimous consent that the entire letter be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NATIONAL OIL FUEL INSTITUTE, INC.,
*New York, N.Y., December 5, 1969.*

Hon. LEE METCALF,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR METCALF: I have reviewed the reply of the FPC concerning the Franklin Real Estate Company in which they list the officials and directors and their remuneration.

I think the question and the FPC answer misses the major point.

The Franklin Real Estate Company is a Pennsylvania corporation, wholly owned by the Ohio Power Company. Their pattern of operation strongly suggests they are engaged in anti-competitive practices through a concerted effort to monopolize the market by restricting construction in new residential land development to electric energy.

For example, the Ohio Power has entered agreements with developers and contractors, as recorded in Volume 2941, Page 504 of the Stark County Records, in which said contractor was induced to agree to the following:

"Contractors will not erect or permit to be erected any house on the hereinafter described real estate which shall use any source of heat or space heating other than electricity."

The question which must be answered thus presents itself:

Is the Ohio Power Company through its wholly owned subsidiary incorporated under the laws of another state, using its legal monopoly franchise in one business (the electric) to extend its monopoly influence into an unregulated sector (real estate business)? And.

Is this practice of a utility, through its subsidiary of using a restrictive covenant to induce the installation of the utility's service on an exclusive basis a violation of the federal statutes?

A Pennsylvania electric utility engaged in a practice very similar to this announced its voluntary withdrawal from said practice when the Department of Justice became interested.

However, I don't believe we should have to ferret out individual cases and go through long drawn out procedure of sicing the Department of Justice on them.

What the consumer really needs is a clear statement by the Department of Justice that such practices by utilities are an invitation to prosecution.

Cordially,

ROBERT D. LYNCH,
*Vice President.*

Mr. METCALF. I refer to a portion of the letter. The Ohio Power Co., which is the complete owner of the Franklin Real Estate Co., a Pennsylvania corporation, has entered into agreements with developers and contractors in which the contractor was induced to agree to the following:

Contractors will not erect or permit to be erected any house on the hereinafter described real estate which shall use any source of heat or space heating other than electricity.

This is exactly what I am talking about. Here is a major provision of the statute that has been in operation since 1935, and with one gesture, without hearings, without a determination of what the overall impact is going to be, we are going to repeal that section of the statute and allow gas utilities or electric utilities to enter into such contracts as have been forbidden.

The Senator from Michigan has talked about a Michigan project. The Michigan project is already underway in the present law, and it will continue to operate.

I think that before we repeal this section, just with an outright repeal, and erase it with just a check point, we should either put restrictions on it, make some legislative history, and have some hearings, and then determine exactly what the impact of repeal will be. Again I say to the committee, and I say to my friend from Michigan, it may be that after proper hearings the Senator from Montana will agree that this is the only way we can build houses; but I say, right now, the housing situation is in sad shape if we have blindly to go out and repeal major landmark legislation in order to build houses.

Mr. HART. Mr. President, I ask unanimous consent that a letter dated August 18 to the Committee on Commerce, to the Senator from Washington (Mr. MAGNUSON) from Secretary of HUD George Romney, a letter to me dated July 8, from Hugh C. Daly, executive vice president of the Michigan Consolidated Gas Co., and an article published in the Detroit News entitled "Michigan Housing in Crisis—1,380,000 Dwell in Decay," written by Carl Konzelman, be printed in the RECORD, which make plain from which source this amendment came.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

AUGUST 18, 1970.

Hon. WARREN G. MAGNUSON,
*Chairman, Committee on Commerce, U.S. Senate, Washington, D.C.*

DEAR MR. CHAIRMAN: I am enclosing for consideration by the Senate Commerce Committee a bill which would enable public utility holding-company systems to participate in Federally-assisted programs to provide low and moderate income housing.

The bill would amend the Public Utility Holding Company Act of 1935 to permit such utilities to construct, own or operate Federally-assisted low and moderate income housing either individually or in partnership with a national housing corporation created or organized pursuant to Title IX of the Housing and Urban Development Act of 1968. Under the bill, the Securities and Exchange Commission would retain the authority to regulate the extent and nature of participation by holding company systems in these housing activities, thereby assuring continuing review by the Commission in the interests of the utility's consumers and investors.

The legislation is necessary because of a recent ruling by the S.E.C. that the Holding Company Act does not empower the S.E.C. to authorize utilities subject to the Act to participate in such housing activities. The decision of the S.E.C. did not suggest, however, that utility participation in low and moderate income housing programs is contrary to the interests of utility consumers or investors. The S.E.C. recognized the policy of the National Housing Act to assist private industry in housing programs but concluded by a 3-2 vote, that utility holding-company activity in this field was not contemplated by the Holding Company Act as originally enacted in 1935. This reversed a previous 3–1 S.E.C. decision which had authorized a utility subject to the Act to construct low and moderate income housing.

I am pleased to report that the S.E.C. has participated in the drafting of the subject bill and has stated that it has no objection to its passage.

I recognize that utility holding-company systems represent only a fraction of the nation's public utilities and that, in terms of dollar investment and number of housing units produced, their contribution to solving the critical housing needs of low and moderate income families might be deemed to be minimal. However, for some time this Department has recognized the unique and valuable role that public utility companies can play in providing low and moderate income housing in their service areas. These companies have a special social and economic interest in the stability and well-being of the communities in which they do business. They have the ability and resources to finance and construct low and moderate income housing, can work effectively with the branches of government involved in housing and, as business leaders of their communities, can play a catalytic role in involving

other business leaders in local housing and community development problems.

While many private businesses are unwilling to subject themselves to government controls and do not desire to participate in low and moderate income housing, we have found that a number of utility holding-company systems are willing and able to become involved in this much needed housing construction. The Department believes that they can make a contribution toward attaining our national housing goals and should be encouraged to do so.

I realize that there are many important matters before your Committee, but I sincerely hope that you may act upon this bill at the earliest possible date. The S.E.C.'s recent decision, which was noted above, has halted plans for the immediate construction of a number of low and moderate income housing units and has postponed planning for other projects.

Sincerely,

GEORGE ROMNEY.

---

MICHIGAN CONSOLIDATED GAS CO.,
*Detroit, Mich., July 8, 1970.*

Re Participation of Public Utility Holding Companies in Low and Moderate Income Housing.

Hon. PHILIP A. HART,
*U.S. Senator,*
*Senate Office Building,*
*Washington, D.C.*

DEAR SENATOR HART: I appreciate very much the time you and Mr. O'Leary gave to Mr. Seder and me on June 29 to discuss the role of utilities in the construction of low and moderate income housing. As we indicated to you, it is our understanding that HUD will recommend an amendment to the Public Utility Holding Company Act of 1935 authorizing the Securities and Exchange Commission to permit holding company systems to participate in these essential housing programs, and we earnestly request your support of this legislation.

In order to assist in your consideration of this matter, we thought it might be helpful to recapitulate some of the points raised at the meeting as well as providing the information requested by you or Mr. O'Leary.

The key question raised in our discussions was whether a utility, by constructing housing, has a captive market for its service without regard to the relative economics of other energy sources. The answer to that question, insofar as low and moderate income housing projects regulated by the FHA are concerned, is unequivocally no.

The FHA closely supervises and regulates every aspect of the construction and operation of housing units subject to its jurisdiction, including the utility services to be provided. For example, Section 72962.5 of the FHA Valuation Analysis Manual for multi-family housing provides in part:

"The utility systems and building components proposed must be examined to determine that they are the most economical and beneficial, in terms of low operating costs, and consequently low rents, to the project occupants."

Again, in the FHA Manual, Appendix Underwriting Reports and Forms, Form 2264—Basic Valuation Instructions, relating to fuel, provides as follows:

"Heating equipment and or systems selected in all proposed construction cases shall be that system which is most economical to operate from the standpoint of annual operating expenses. In those cases where the sponsor or its representatives insists on specifying a system which in the opinion of FHA does not meet the above requirements, the file of sponsor's justifying data shall be submitted to the director of appraisal and mortgage risk division for decision."

Thus, the adoption of a more expensive utility service than that available from another source, with consequent higher rents, clearly would not be tolerated by the FHA.

Michigan Consolidated has recognized from the outset that the choice of energy sources in its housing projects must be based strictly upon relative economics. As we indicated in our discussions, we have accordingly utilized gas for space heating, water heating and cooking in our housing projects but have used electricity purchased from the local electric utility for all other uses, including the installation of heavy-duty wiring and in-the-wall sleeves for electric air conditioning. We have not adopted the use of gas for on-site generation of electricity, nor were the gas appliances installed in our housing projects purchased from Michigan Consolidated. We have installed electric garbage disposals in the kitchen sinks and have not installed gas incinerators for the burning of garbage.

The attached sheets show the comparative costs of gas, electricity, fuel oil and coal (where applicable) for the respective uses for which gas was selected in the projects constructed by Michigan Consolidated Homes Corporation. Sheet 1, which was prepared from data published by the Detroit office of FHA, shows that the cost of heating apartment-size units in the Detroit area with fuel oil and coal is from 33% to 50% more expensive than with gas. Apparently because of its high cost for space heating, electricity is not included in the comparison.

Sheet 2 is a comparison prepared by Michigan Consolidated showing comparative costs for heating, water heating and cooking in its service area. The cost of heating with fuel oil or coal is shown to be 25% to 45% higher than gas, and electricity costs approximately 3½ times more than gas for space heating. Electricity costs 80% more than gas for water heating and three times as much as gas for cooking. Thus, the economic advantage of using gas for these purposes is clear and unquestionable. I might add that we have checked with the Foundation for Cooperative Housing, Inc., which has sponsored or manages approximately 15,000 multi-family living units in Michigan constructed under Section 221(d)(3) of the National Housing Act, and have been advised that none of those units is heated with electricity.

In summary, to the extent that a utility might attempt to prefer its own service to another energy source providing a lower cost to tenants—a course which we have never followed and would under no circumstances entertain—the FHA has both the authority and the expertise to protect the public interest against such actions.

Two somewhat related points raised in our discussions concern the effect of the proposed legislation on the S.E.C.'s continuing jurisdiction over holding company involvement in the housing field and the effect of such involvement on the company's ability to raise capital to provide utility service.

Under the contemplated legislation, as we understand it, the S.E.C. would have continuing jurisdiction over holding company proposals to construct low and moderate income housing projects and would thus have full authority to prevent the holding company from becoming predominantly a housing corporation or from jeopardizing its ability to raise capital for utility purposes. In fact, the S.E.C. would have all of the jurisdiction it possesses today to regulate the scope or extent of holding company participation in housing projects; the proposed amendment would simply eliminate the barrier to any participation in Government supported housing programs under the Holding Company Act as now interpreted by the S.E.C.

I should add in this connection that the possibility of our becoming involved in low and moderate income housing projects to a point that jeopardizes our System's ability to raise capital for utility purposes is remote and unrealistic under any reasonably foreseeable circumstances. For example, under Michigan Consolidated's present program of constructing approximately 500 dwelling units annually, its equity investment in such projects would total only $1,000,000 per year, since approximately 90% of the cost is provided by FHA insured mortgages. This compares with Michigan Consolidated's total equity of nearly $200,000,000 and an equity investment of over $450,000,000 for the American Natural system as a whole. Michigan Consolidated's total assets amount to over $600,000,000 and the American Natural system's assets to over $1.5 billion. Thus, the investment in housing contemplated by Michigan Consolidated's present program is *de minimis* relative to the total size of the company and the holding company system of which it is a part.

A third question raised at our meeting was, in essence, why it is either necessary or desirable for public utilities to participate in low and moderate income housing programs. We are convinced, and we believe that HUD shares our view, that participation by public utilities in Government assisted housing programs is of great significance in the effort to provide decent homes for low and moderate income families.

Because of the regulation of rate of return and rents and other restrictions necessarily imposed upon limited dividend corporations by the National Housing Act and FHA regulations, many businesses are unwilling to participate as sponsors of low and moderate income housing projects. However, the construction and operation of housing projects under FHA regulation is remarkably similiar to utility regulation. Rents, like utility rates, are set by a government agency and may only be increased upon a showing of higher operating costs. The rate of return on the company's investment in a housing development is regulated, again like return on utility operations. A uniform system of accounts is prescribed for the housing operation which is similar to that prescribed for utility companies. A limited dividend corporation must file detailed reports on its operations, much like the utility's periodic reports to state and federal regulatory bodies. In short, because utilities are accustomed to operating within the regulated framework required by the Federal housing laws, they are more willing to construct and operate Government supported housing projects than many other businesses.

Second, utility companies serving urban areas are necessarily committed to the long-range welfare of those areas. Unlike many other businesses, a utility cannot simply remove its plant and work force to an outlying area to avoid urban problems. A utility's investment in service facilities and its customers are located in the urban areas it serves. Its interest in the rebuilding and rehabilitation of those areas is direct and compelling. Thus, in addition to social incentives, the utility has an economic incentive in the rebuilding of the cities that makes it a logical and sometimes indispensable catalyst in the initiation and successful implementation of low and moderate housing programs.

Finally, utilities generally have the managerial and financial resources necessary to ensure efficient construction and operation of low and moderate income housing projects. Under circumstances where time is money, and the prompt construction of projects is essential to carry out housing programs, such expertise is of real value.

We would be very glad to provide any other information on this subject that you or your staff should desire.

Very truly yours,

HUGH C. DALY,
*Executive Vice President.*

MICHIGAN HOUSING IN CRISIS: 1,380,000 DWELL IN DECAY

(By Carl Konzelman)

Michigan's housing inventory has a high percentage of dilapidation and the prospects for improvement are slight.

In short, the state has a massive housing crisis.

These are conclusions to be drawn from a newly published study. "Michigan's Housing Conditions," conducted by Market Opinion Research for the Office of Planning Coordination in co-operation with the Michigan State Housing Development Authority.

Conducted to measure the physical condition of Michigan housing and to calculate the extent of Michigan housing needs, the study reflects some surprising elements. These include:

Item: Some 158,000 Michigan families live in "very poor" housing—homes that are dilapidated and ruined or close to ruin. Involved in these family units are at least 507,000 persons.

Another 273,000 households, including some 873,000 persons, are dwelling in "poor" and deteriorating conditions.

Conditions have been worsening, with "very poor" housing increasing from 85,425 units in 1960 to 158,000 in 1969 despite average annual housing starts of 60,500.

"Poor" housing declined slightly since the 1960 census but is expected to reach 318,600 units by 1975 because of the rapidly increasing housing that will be 40 years old in the next five years.

Item: Surprisingly dilapidation is not confined to inner city areas nor to poor people.

Roughly equal numbers of whites and blacks live under poor housing conditions.

Among families earning $10,000 or more annually, 53,900 lived in poor housing at the end of 1969. This figure was 13 percent of the "poor" housing total.

Among families earning $7,000–$10,000, 70,800 or 16 percent of the total, were poorly housed. In the $3,000–$7,000 group, there were 110,000 dwelling units, or 26 percent of the "poor" housing.

Some 102,300 households with family incomes under $3,000, or 24 percent, are in "poor" housing.

Item: Dissatisfaction with housing in common, as are hopes for improvement. Some 499,000 Michigan people in 156,000 homes live in poor housing and are involved in a search for better housing.

But, tragically, large numbers of Michigan families in poor housing do not have the economic means of bettering themselves.

This "noneffective demand," totaling 293,800 units, involves 940,000 people of all ages. Only 2 percent of those in poor housing have the financial and income capability to purchase on the open market without some form of government help.

Item: Analyzing state housing needs, the study notes need for 52,000 units at the very poorest level up to a maximum of 431,600 units in all levels of housing.

New residential construction is not keeping pace with the rate of decay and in fact is not even keeping up with the number of new families being formed.

"In short, the basic trends are not only unfavorable, the programs to date have not changed the patterns," said the study.

Item: Some 98 percent of those in poor housing are eligible for federal housing subsidy or for moderate income housing programs.

The minimum estimate of those eligible for federal aid is 293,800 households, while the new state moderate income subsidy program for those with incomes of $8,000-$12,000 would mean an additional 59,800 households were eligible.

The study was conducted as a guide for the state housing authority in planning help in solving the housing crisis. The authority has obtained $300 million in bonding capability for financing low and moderate-income dwellings.

Director William G. Rosenberg said recently that the authority now has the capacity to finance construction of 15,000 homes for 75,000 people. This will provide jobs for 22,000 building tradesmen.

The program is a major part of Gov. Milliken's housing development program, which envisions financing of 50,000 housing units at an estimated cost of $1 billion in this decade. The first $300 million in bonding authority—with the bonds to be liquidated out of revenues from the housing—is expected to be fully committed within three years.

Mr. HART. Mr. President, I hope very much that the position of the committee is protected.

I shall support the motion to table.

Mr. TOWER. Mr. President, I move to table the amendment of the Senator from Montana (Mr. METCALF).

The PRESIDING OFFICER (Mr. BYRD of Virginia). The question is on agreeing to the motion to table the amendment of the Senator from Montana (Mr. METCALF).

As many as favor the amendment will say "aye," opposed, "no."

The Chair is in doubt.

Mr. TOWER. Mr. President, I call for a division.

The PRESIDING OFFICER. A division is called for.

On a division, the motion to table the amendment of the Senator from Montana (Mr. METCALF) was agreed to.

Mr. JAVITS. Mr. President, I send an amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

On page 3, between lines 10 and 11, add the following new subsection:

(c) Section 236 (b) is amended by adding at the end thereof the following language:

"The term 'mortgage insurance premium', when used in this section in relation to a project financed by a loan under a state or local program includes such fees and charges approved by the Secretary, as are payable by the mortgagor to the state or local agency mortgagee to meet reserve requirements and administrative expenses of such agency."

The PRESIDING OFFICER. The Chair would inquire of the Senator from New York whether this is the amendment on which he has 1 hour.

Mr. JAVITS. No, Mr. President, this is the amendment on which there is one-half hour and I yield myself 5 minutes.

The PRESIDING OFFICER. The Senator from New York is recognized for 5 minutes.

Mr. JAVITS. Mr. President, if I could have the attention of the ranking minority member of the committee, in the absence of the chairman, and the attention of the Senator from Wisconsin (Mr. PROXMIRE) who has taken the manager's chair, this amendment is, really, an amendment to conform the law to a situation which we face, and which other States may face, concerning mortgages which have the benefit of the subsidy under section 236, where the Government subsidizes interest over 1 percent.

The facts are these: The amendment would make eligible for this subsidization a group of charges called "fees and charges" charged by the mortgagee, which is an official agency, in my case the Housing Finance Agency of the State of New York. The "fees and charges" include its administrative expenses and reserves, and so forth, which a bank, enjoying this guarantee, would, to use a bank term, load into its interest rate. However, the law of my State, and of other States likely to be in the same position, provides that the agency—to wit, the Housing Finance Agency—must pass on to the borrowers the exact interest rate which it gets when it floats its own bonds. The practice is for the Housing Finance Agency to aggregate the mortgages in its own hands of the various local housing authorities and agencies and, having aggregated them, to issue its own bonds. The bank dealing with the same situation would put its administrative charges, and so forth, into the interest rate.

The Housing Finance Agency and similar agencies do not do that. They must pass on to the borrower the same interest rate they pay on their bonds. Hence, merely because of the label of the charge, or the label of the cost, it is excluded from ability to get a section 236 subsidy. It does not include arbitrage, discounts, on anything resembling any such costs, but includes the administrative expenses and the reserves which, I repeat, briefly, a bank would normally include in its total interest rate.

Mr. WILLIAMS of Delaware. May I ask the Senator from New York, would that include attorneys' fees?

Mr. JAVITS. Only the closing fees, because this is an unusual proposition. They have their own lawyers, and so forth.

Mr. WILLIAMS of Delaware. But it would include the cost of the attorneys?

Mr. JAVITS. No. It could include the cost of the overhead and the fact is that

they employ lawyers, just as they employ clerks. It is not an attorney's fee, which is a cost charge. I want expressly, in stating the case, to exclude that.

Mr. WILLIAMS of Delaware. Because the attorney's fee has been a substantial part of the closing cost, and I am wondering whether they want a Government guarantee on the fees.

Mr. JAVITS. No. This is just strictly an in-house charge, the equivalent of what a bank puts into its interest rate, but because of the terms in the State of New York and other States which it may affect, they cannot call it anything but "fees and charges." Hence, merely because of the label, they are excluded from the benefit, if they can get one, of a subsidy under section 236.

Mr. PROXMIRE. May I ask the Senator from New York, would this, in effect, result in larger payments by the Federal Government?

Mr. JAVITS. It could result in some increased payments but no more than if the bank were involved. It would be exactly the same, except that these payments would be even less, because they borrow money at much lower rates than banks do. Their mortgage charges are less than those of the banks.

Mr. PROXMIRE. I understand that the Housing and Urban Development Department supports the amendment, or at least does not oppose it.

Mr. JAVITS. The reason they cannot formally support, although they actually support it, is that they have not had a chance yet to submit it to the Budget Bureau. They give their views, which I am at liberty to state. They certainly have no opposition to it, and see sense in it.

Mr. PROXMIRE. The Housing Subcommittee tells me that, in their view, this would probably cost HUD and the taxpayers more money.

Mr. JAVITS. I really do not see why. It might cost them less, because the aggregate amount of the interest rate which these agencies charge, plus costs and fees, is less than banks. That is why they are in business. The banks put into the interest rate the very same charges.

Mr. PROXMIRE. Are these State programs?

Mr. JAVITS. Yes; that is exactly right. They are State programs. It has brought about $1 billion worth of additional housing in our State because of the gifted nature of this particular program. However, because it carries the wrong label, it cannot participate as a bank does. HUD told us the amendment is fine with them.

I hope very much that the committee can take this amendment to conference, to see if there are any problems with it.

Mr. PROXMIRE. I have conferred with the Senator from Texas (Mr. TOWER). The committee will be happy to take the amendment to conference. Under those circumstances, meanwhile, we will talk with the Budget Bureau.

The PRESIDING OFFICER. Do Senators yield back their time on the amendment?

Mr. JAVITS. Mr. President, I yield back the remainder of my time.

Mr. PROXMIRE. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER (Mr. BYRD of Virginia). The question is on agreeing to the amendment of the Senator from New York.

The amendment was agreed to.

Mr. CASE. Mr. President, I send to the desk an amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read the amendment as follows:

On page 24, after Section 214, insert the following new sections:

SECTION 215. Section 221 (f) of the National Housing Act is amended by adding at the end thereof the following new sentence: "In any case in which it is determined in accordance with regulations of the Secretary that facilities which could appropriately be used for classroom purposes are available in any such property or project and that public schools in the community are overcrowded due in part to the attendance at such schools of residents of the property or project, such facilities may be used for such purposes to the extent permitted in such regulations (without being subject to any of the requirements of the proviso in section 220 (d) (3) (B) (iv) except the requirement that the project be predominantly residential)."

SECTION 216. Section 236(j) (5) of the National Housing Act is amended by adding at the end thereof (after and below subparagraph (C)) the following new sentence: "In any case in which it is determined in accordance with regulations of the Secretary that facilities which could appropriately be used for classroom purposes are available in any such property or project and that public schools in the community are overcrowded due in part to the attendance at such schools of residents of the property or project, such facilities may be used for such purposes to the extent permitted in such regulations (without being subject to any of the requirements of the first proviso in subparagraph (A) except the requirement that the project be predominantly residential)."

The PRESIDING OFFICER. How much time does the Senator yield himself?

Mr. CASE. Mr. President, I yield myself 5 minutes.

The PRESIDING OFFICER. The Senator from New Jersey is recognized for 5 minutes.

Mr. CASE. Mr. President, I offer this amendment on behalf of myself and my colleagues, the Senator from New Jersey (Mr. WILLIAMS) and the Senator from Pennsylvania (Mr. SCOTT). The purpose of the amendment is a very simple one.

It has come to my attention particularly because of a situation which has arisen in the city of Newark where we are increasingly faced with a situation involving a heavy concentration of school-age children in federally subsidized housing projects. The situation contributes directly to the overcrowding of certain of our schools.

In Newark, for example, an elementary school across the street from one such housing project is designed for 1,600 students. The school now has 1,800 students already enrolled. There are 2,300 youngsters in the neighborhood. In fact, the entire city of Newark has 10,000 more youngsters than it has classroom seats.

The housing law now permits nondwelling facilities, community facilities, and even some commercial facilities in federally subsidized housing projects. But the law contains no language specifically authorizing the use of federally subsidized housing projects for classroom facilities.

This amendment is intended to remedy that defect.

I might say here that the Newark Board of Education and the housing authority in Newark have come to an understanding about the facilities which can be used and can be leased by the board of education and be paid for with satisfactory rental pay.

The board of education, the mayor, and the school people came down to see the officials in HUD. They were sympathetically received, but were told that HUD was reluctant, without congressional authority in this matter of schools, to go ahead.

The amendment leaves the matter entirely at the discretion of the Secretary of Housing and Urban Development. It is not mandatory. HUD has full authority under the amendment, or would have, to establish the regulations which would have to be complied with.

Where schools are overcrowded because of the large number of children living in nearby federally subsidized housing projects, this amendment would permit the use of a portion of these housing facilities for classroom purposes.

The House Banking and Currency Committee, which is still considering the Housing Act of 1970 in executive session, has accepted this amendment and has written it into the final version of the bill.

I think there is no question about the importance of this not only in New Jersey, in the city of Newark, and other cities, but also in many places throughout the country.

I hope very much that the committee would be willing to accept the amendment. The exact language which I have offered here has been incorporated in the House bill, as I say.

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. CASE. I yield.

Mr. PROXMIRE. Mr. President, does the amendment provide or contemplate that in new housing construction, space would be provided under certain circumstances for classrooms?

Mr. CASE. Subject to regulations by HUD, the terms of the amendment could be fairly interpreted, I think to apply to existing housing and new housing.

Mr. PROXMIRE. So, the amendment would provide that if Secretary Romney decided that there was a classroom shortage in a particular area and a large housing project was about to be constructed there, he could specify regulations which would require that some of the space be set aside for classrooms.

Mr. CASE. He could, I believe, but the burden would be on local officials to prove the needs. I think I would say this, this is my own view. This, I know, would meet the situation we are trying to get at spe-

cifically in Newark. This could be done, not as a federally subsidized school, but only as a matter of convenience under arrangements under which the full value of the facilities would be paid for in rents by the local school district.

Mr. TOWER. Mr. President, will the Senator yield?

Mr. CASE. I yield.

Mr. TOWER. Mr. President, is this more or less on a space available basis?

Mr. CASE. Entirely on a space available basis. There is no intention to turn the housing program into an education program except in the narrowly limited situations that I have described.

Mr. TOWER. Mr. President, it is simply a matter of providing space that could be used for schoolrooms without equipping them or anything of that kind.

Mr. CASE. The Senator is correct.

Mr. PASTORE. Mr. President, who would pay for the equipment?

Mr. CASE. The board of education.

Mr. PASTORE. The money authority is up to the local authorities.

Mr. CASE. The Senator is correct.

The PRESIDING OFFICER. Who yields time?

Mr. TOWER. Mr. President, I yield myself 1 minute on the bill.

The PRESIDING OFFICER. The Senator from Texas is recognized for 1 minute.

Mr. TOWER. Mr. President, this would be space that would, in effect, be leased to the local school authority.

Mr. CASE. That is precisely what is proposed. So far as I know, arrangements of this sort would meet not only our needs but also the general needs. I think it ought to be done on that basis.

We, too, agree that we are not engaged in a school bill, but in a housing bill.

Mr. PROXMIRE. Mr. President, suppose there were a $5 million mortgage to construct a housing facility and the Secretary should find it would be very desirable to provide more classroom facilities. Would a certain proportion of those funds be devoted to this purpose—not to housing, but to space available for classrooms?

Mr. CASE. My view is that the Secretary would go very slowly so far as making this a regular program in the future, although the language would permit it if he thought well of it. I think as far as financing a building goes, I am not quite sure I understand the nature of the question.

Mr. PROXMIRE. What I am trying to find out is whether some of the funds which would be provided for housing would actually go for school purposes and, as the Senator from New Jersey said so well, confuse the two programs.

Mr. CASE. Mr. President, I agree that ought not to be done. As a matter of fact, the amendment does specifically provide that the project be predominantly residential, and that is my own view. I think it ought to be very clear that that is the way it would be done.

Mr. PASTORE. Mr. President, I asked the question whether any of the funding would be out of the Federal Treasury. The Senator said no, that it would all be from local money.

Mr. CASE. Mr. President, there is no question about that. The only question the Senator from Wisconsin had was whether the initial borrowing would include facilities for this purpose. The answer is "Yes," but the payments would be made by rental payments on whatever sound basis the Secretary approved.

Mr. PASTORE. Regardless of the merits of the amendment, is it not a practical fact that whatever money is allocated to this school would actually be taken away from further housing within the project?

Mr. CASE. I do not think we would have these problems in the first place if the environment conerning the education of the children was satisfactory.

Mr. PASTORE. I realize that. We ran into the same difficulty under title I where some people thought there should be clothing furnished to children who went to school. The argument was made by many local authorities that this proportionately took money away from the schools.

I wonder if we are not doing the same thing here again and taking the money away from housing and putting it in schools.

I am not against putting it in schools, I want that to be clearly understood.

The big question here is to see that we do not create some kind of attrition with respect to the housing program, as desirable as the school program may be.

Mr. CASE. It is essential that this be done. I think myself that it would be limited to those situations in which the need is so very great that no reasonable person could disagree. The regulations ought to be specific on that.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. PROXMIRE. Mr. President, I yield an additonal 5 minutes to the Senator.

Mr. TOWER. Will the Senator consider modifying his amendment to include only existing housing?

Mr. CASE. That would meet our peculiar need. There are two questions, of course.

Mr. TOWER. The reason I suggest it is that if the Senator would do that it would eliminate some confusion in our minds. It would help solve the Senator's immediate problem and we could hold hearings in the next session and I would like to have hearings.

Mr. CASE. I do accept that. It will meet our immediate purpose and also permit the conferees to have that difference in the language of the Senate bill and the House bill, and that may make it possible to come up with something better.

Mr. PROXMIRE. I appreciate that. I think the Senator from Texas has made a good suggestion.

Mr. President, I understand the Senator from New Jersey will modify his amendment to apply only to existing housing on a space available basis, and the Banking and Currency Committee will hold hearings on whether future legislation should be applied prospectively to new housing.

Mr. CASE. Will the Senator accept this language: "In any case in which it is determined * * * that facilities in existence or under construction on the date of enactment of this act."

Mr. PROXMIRE. Very good.

The PRESIDING OFFICER (Mr. BAKER). The amendment is so modified.

The amendment as modified reads as follows:

SEC. 215. Section 221(f) of the National Housing Act is amended by adding at the end thereof the following new sentence: "In any case in which it is determined in accordance with regulations of the Secretary that facilities in existence or under construction on the date of enactment of this Act which could appropriately be used for classroom purposes are available in any such property or project and that public schools in the community are overcrowded due in part to the attendance at such schools of residents of the property or project, such facilities may be used for such purposes to the extent permitted in such regulations (without being subject to any of the requirements of the proviso in section 220(d)(3)(B)(iv) except the requirement that the project be predominantly residential)."

SEC. 216. Section 236(j)(5) of the National Housing Act is amended by adding at the end thereof (after and below subparagraph (C)) the following new sentence: "In any case in which it is determined in accordance with regulations of the Secretary that facilities in existence or under construction on the date of enactment of this Act which could appropriately be used for classroom purposes are available in any such property or project and that public schools in the community are overcrowded due in part to the attendance at such schools of residents of the property or project, such facilities may be used for such purposes to the extent permitted in such regulations (without being subject to any of the requirements of the first proviso in subparagraph (A) except the requirement that the project be predominantly residential)."

Mr. PROXMIRE. I yield back the remainder of my time.

Mr. CASE. Mr. President, my time has expired.

The PRESIDING OFFICER. All remaining time has been yielded back.

Mr. CASE. Mr. President, I ask unanimous consent that a statement by the Senator from New Jersey (Mr. WILLIAMS) be printed in the RECORD at this point.

The PRESIDING OFFICER. Is there objection?

There being no objection, the statement of Mr. WILLIAMS of New Jersey was ordered to be printed in the RECORD, as follows:

LOCAL COMMUNITIES SHOULD BE TO PROVIDE SCHOOLS IN HOUSING PROJECTS

Mr. President, it is with great deal of pleasure that I support the amendment of my distinguished senior colleague from New Jersey, Senator Case. I am also pleased to join with him as a co-sponsor.

The pending amendment would include language in the National Housing Act permitting, under carefully determined circumstances, the utilization as classrooms of portions of housing projects financed under Section 221(d)(3) or 236 of the present Act.

Educators, city and county officials and community leaders have come to Washington to see what could be done to ease this terrible impaction of schools—impaction occasioned by the construction high-density residential units financed through programs administered by HUD.

This housing is needed and the communities welcome it and work to see that it remains both socially and economically successful. But, Mr. President, it is the contention of these citizens that for these large projects to render truly useful social service, there must be some provisions for their own and their neighbors' children to attend local schools that are not overcrowded.

The evidence favoring this amendment is not to be found in only one city. It is nation-wide. Officials of H.U.D. admitted the problem of school impaction confronts all the large cities of the Nation. Newark suffers, as do Chicago, New York, St. Louis, Kansas City, Los Angeles. The list is as long as the number of our metropolitan centers.

Present law permits the lower floors of housing projects to be used for various retail goods and service outlets. They provide the necessary full-community services that are necessary to the successful operation of high-rise and garden-type projects. Certainly, the schooling of the neighborhood's children serves a need second only to food and shelter. These parents want their children to receive proper schooling—schooling that cannot be provided in the overcrowded conditions that obtain in so many of our inner-city schools.

Mr. President, I urge the support of all Senators for this amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment, as modified.

The amendment, as modified, was agreed to.

Mr. PERCY. Mr. President, at the request of the minority leader, the Senator from Pennsylvania (Mr. SCOTT), I ask unanimous consent that his statement on the pending measure be printed in the RECORD.

There being no objection, the statement of Mr. Scott was ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR SCOTT

Mr. SCOTT. Mr. President, I support the pending bill, the Housing and Urban Development Act of 1970. This is an omnibus measure which includes new help for mass transit and for developers of so-called "new towns." My Commonwealth of Pennsylvania will particularly benefit from these two innovations.

Urban mass transportation in most of Pennsylvania's larger cities, especially Philadelphia and Pittsburgh, is now beginning to show some vital life signs after many years of deterioration. In Philadelphia, I was successful in obtaining over one hundred new commuter rail cars. In Pittsburgh, I was instrumental in securing approval for the highly innovative Skybus. We need much more assistance to our large cities in their efforts to provide public transportation. The pending bill will, for the first time, extend Federal aid to cover the deficits of local urban mass transit companies, mostly bus lines, to $750 million nationwide over the next five years.

The urban growth and new community development provision of the pending bill will assist in the revitalization of our rural areas and will assist public and private developers in creating new and revitalized communities to accommodate the overflow of larger cities. For each of these "new towns," the Senate bill provides $20 million in loans and guarantees for up to $50 million in developer's bonds. I am hopeful that Pennsylvania's community planners will take advantage of these new Federal incentives by creating "new towns" in some of the more highly congested areas of the Commonwealth.

Mr. President, megalopolis is upon us. We must do everything we can to assist in assuring new spirit of growth and balanced development in Pennsylvania to meet the pressing needs of our growing population.

Mr. GOODELL. Mr. President, I send two amendments to the desk and I ask unanimous consent that they be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendments will be stated.

The assistant legislative clerk proceeded to read the amendments.

Mr. GOODELL. Mr. President, I ask unanimous consent that further reading of the amendments be dispensed with; and that they be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered; and, without objection, the amendments will be printed in the RECORD.

The amendments, ordered to be printed in the RECORD, are as follows:

On page 10, after line 7, insert the following:

"INCREASES IN MORTGAGE CEILINGS FOR HIGH COST AREAS UNDER SUBSIDIZED MULTIFAMILY HOUSING PROGRAMS

"SEC. 109. Section 221(d)(3)(ii) of the National Housing Act is amended by striking out '45 per centum' and inserting in lieu thereof '60 per centum'."

Renumber succeeding sections accordingly.

On page 17, line 23, after "(a)" insert "(1)".

On page 18, line 10, strike out "(b) This section" and insert "(2) This subsection".

On page 18, after line 13, insert the following:

"(b) Until such time as prototype costs for any area have been determined in accordance with the amendment made by subsection (a), the cost limits for the construction and equipment of low-rent housing projects in such area shall be determined in accordance with the first sentence of section 15(5) of the United States Housing Act of 1937, as it existed immediately prior to the effective date of subsection (a); except that each of the dollar limitations specified in that sentence may be increased in the discretion of the Secretary by 20 per centum on the date of enactment of this Act."

Mr. CURTIS. Mr. President, will the Senator yield for a question?

Mr. GOODELL. Mr. President, I yield myself 5 minutes.

The PRESIDING OFFICER. The Senator is recognized for 5 minutes.

Mr. GOODELL. I yield to the Senator from Nebraska.

Mr. CURTIS. Mr. President, I wish to ask the Senator what section of the existing law this affects. Is it the 235 program?

Mr. GOODELL. No. I will explain briefly what these two amendments do.

These amendments would raise the cost limits for public housing and FHA-subsidized housing for low- and moderate-income housing.

As my colleagues are aware, cost limits govern the construction of federally assisted housing. If construction costs—the costs for labor, land, and materials—creep above the accepted statutory limits set by the Congress, then construction plans must be halted until Congress can respond by raising the cost ceilings.

This "stop and go" process has resulted in sporadic construction and at times, no construction of low and moderate income housing and more satisfactory. Last year I introduced legislation to provide a new method of computing cost ceilings. Under my bill, statutory room cost limits and mortgage limits would have been determined on the basis of cost indices approved by the Secretary of HUD. Application of this flexible, sliding scale would have produced construction cost limits which reflect actual construction needs and experience. With up-to-date cost limits, construction of low and moderate income housing would have continued unimpeded particularly in high cost areas.

I was grateful that the Banking and Currency Committee and the Senate accepted this new approach. Unfortunately, it was not accepted in the conference. Instead the conferees agreed upon a 15-percent increase in FHA-subsidized limits and a 20-percent increase in room cost limits for public housing. These increases were sufficient to cover the cost increases accumulated from 1965 to 1969 and construction of these Government-assisted projects could continue.

Since then, inflation has, once again, made cost limits out of date. Cost indices have risen 10 percent since June of 1969. Studies made by the Engineering News Record, have indicated that in the first 3 years of the 1970's, the construction dollar will shrink in value as much as it did in the whole decade of the 1960's.

The cost of labor, land and materials continues to rise. It has been predicted that labor costs will have increased between 12 and 25 percent, depending on the area, by the end of 1970. In fact, the wage settlements of the last quarter amounted to an 8.2 percent increase over the previous quarter—the most significant labor increase since 1948. The cost of materials will also rise during this year at a rate of between 4 to 10 percent, depending again on the area.

Most construction cost indices predict a general increase of costs from 5 percent a year to 1.5 percent a month, depending on the region. These increases are particularly severe in the cities. For example, the ENR Construction Cost Index—CCI—shows an eight-point increase in construction costs for the first quarter of 1970. In a similar CCI for the 20 largest cities, the first quarter showed an increase of 30 points. The greatest increases in descending order were in the following cities: Kansas City, Boston, Detroit, St. Louis, Los Angeles, Minneapolis, New York City, Denver, New Orleans, and Dallas.

These increases prompted the National Association of Housing and Redevelopment Officials—NAHRO—to conduct a survey of construction by local housing authorities and housing sponsors of FHA-subsidized housing across the Nation. More than 200 local housing authorities responded to the survey; 80 percent of these authorities indicated that the public housing construction cost limits adopted by the Congress in 1969 were inadequate, or would be inadequate in 1970. Of the more than 100 localities responding to the survey on FHA mortgage limits, over 82 percent indicated the present limits are inadequate or would be inadequate in 1970. I ask unanimous consent that the results of that study be included in the RECORD.

There being no objection, the mate-

rial was ordered to be printed in the RECORD, as follows:

STATUTORY MORTGAGE LIMITS IN FHA-INSURED HOUSING

The National Association of Housing and Redevelopment Officials undertook, in May 1970, a survey on Statutory Mortgage Limits in FHA-Insured Housing. It was felt that such a survey would be beneficial in determining the programs in serious financial difficulty; the adequacy of the 1969 statutory mortgage limits and the percent increase necessary to construct single and multi-family units. Questionnaires were sent to Urban Renewal Agencies. The following tabulations are indicative of the present financial situation affecting FHA insured housing:

I. Number of responses: 100.

II. Geographical distribution: 35 States.

III. Distribution by size of city:

| Population: | Number of cities responding |
|---|---|
| Over 1,000,000 | 1 |
| 500,000 to 1,000,000 | 7 |
| 250,000 to 500,000 | 9 |
| 100,000 to 250,000 | 12 |
| 50,000 to 100,000 | 19 |
| 25,000 to 50,000 | 12 |
| 10,000 to 25,000 | 19 |
| Under 10,000 | 16 |
| Total | [1] 95 |

IV. Findings of the Survey:

1. Sponsors in our local community have submitted cost estimates to construct FHA-insured low- and moderate-income housing since January 1969:

| | Percent |
|---|---|
| Yes | 91.0 |
| No | 9.0 |
| Total | 100.0 |

| Programs: | Percent |
|---|---|
| Section 235 Homeownership | 71.4 |
| Section 236 Rental Assistance | 87.3 |
| Section 221–d–3 Low and Moderate | 30.7 |
| Section 221–d–3 Rent Supplement | 28.5 |
| Section 221(h) Rehabilitation | 27.4 |

2. Mortgage limits adopted by the Congress in 1969 are:

| | Percent |
|---|---|
| Adequate for all programs | 17.2 |
| Adequate now, inadequate in 1970 | 50.5 |
| Inadequate now for all programs | 32.3 |
| Total | 100.0 |

3. Our community needs an increase in mortgage limits for the following programs—now:

| Multi-family, basic limits: | Percent |
|---|---|
| 10 percent | 19.3 |
| 15 percent | 20.4 |
| 20 percent | 16.0 |
| Multi-family, high cost: | |
| 10 percent | 12.5 |
| 15 percent | 13.6 |
| 20 percent | 18.2 |
| Total | 100.0 |
| Single-family, basic limits: | |
| 10 percent | 23.2 |
| 15 percent | 17.1 |
| 20 percent | 13.4 |
| Single-family, high cost: | |
| 10 percent | 9.8 |
| 15 percent | 15.8 |
| 20 percent | 20.4 |
| Total | 100.0 |

[1] The difference between the total number of cities responding (100) and the number of cities responding in the distribution by size of city category (95) is due to regional renewal agencies.

SURVEY ON STATUTORY CONSTRUCTION COST LIMITS FOR PUBLIC HOUSING

In April of 1970 the National Association of Housing and Redevelopment Officials initiated a survey on the adequacy of statutory construction cost room limits, as enacted by the Housing Act of 1969, for public housing. Questionnaires examining this situation were sent to local housing authorities. The resulting responses are indicative of the degree to which the local authorities have been able to take bids on new construction since January, 1969 and the adequacy of the existing construction cost limits.

I. Number of Responses to Date: 236.

II. Geographical Distribution: 45 States; Guam; District of Columbia.

III. Distribution by Size of City:

| Population: | Number of cities responding |
|---|---|
| Over 1,000,000 | 2 |
| 500,000 to 1,000,000 | 13 |
| 250,000 to 500,000 | 12 |
| 100,000 to 250,000 | 27 |
| 50,000 to 100,000 | 37 |
| 25,000 to 50,000 | 44 |
| 10,000 to 25,000 | 45 |
| Under 10,000 | 50 |
| Total | [1] 231 |

[1] The discrepancy that exists between the Total Number of Responses to Date (236) and the Total Number of Cities Responding (231) is due to the response of state and regional housing authorities, the District of Columbia and Guam.

IV. 1. Our local authority has taken bids on new construction since January, 1969:

| Response: | Number | Percent |
|---|---|---|
| Yes | 107 | [1] 47.7 |
| No | 117 | 52.3 |
| Total | 227 | 100.0 |

[1] A percentage breakdown of the 107 local authorities when responded they had taken bids on new construction since January 1969 resulted in findings similar to those shown in the chart IV, 2 and 3; 18.8 percent found current construction cost limits adequate; 50.4 percent indicated that the limits were adequate presently, but they would be inadequate in 1970; 31 percent found the limits inadequate to meet present costs. The increase suggested as necessary to meet construction costs in 1970 also closely paralleled those figures in No. 3.

| Basic limits: | Percent |
|---|---|
| 10 percent | 25.9 |
| 15 percent | 17.7 |
| 20 percent | 14.4 |
| High cost area limits: | |
| 10 percent | 16.4 |
| 15 percent | 9.2 |
| 20 percent | 16.4 |

2. We view the construction cost limits adopted in 1969 as:

| | Number | Percent |
|---|---|---|
| Adequate to meet current construction cost levels | 41 | 18.9 |
| Adequate presently, probably inadequate in 1970 | 118 | 54.4 |
| Inadequate even to meet present costs | 57 | 26.6 |
| Total | 216 | 110.0 |

3. Our authority would require an increase as follows to meet costs in 1970:

| | Total number | Percent |
|---|---|---|
| Basic limits (percent): | | |
| 10 | 43 | 23.8 |
| 15 | 37 | 20.4 |
| 20 | 22 | 12.2 |
| High cost area limits (percent): | | |
| 10 | 34 | 18.8 |
| 15 | 19 | 10.4 |
| 20 | 26 | 14.4 |
| Total | 181 | 100.0 |

Mr. GOODELL. Mr. President, the existing cost limits are now inadequate in many sections of the country, not only in the larger cities. Housing authorities and sponsors from countless localities have indicated that public housing cost limits and FHA-insured mortgages are inadequate to continue construction of Government-assisted housing.

I ask unanimous consent that the lists prepared by NAHRO indicating the names of communities finding the present cost limits out of date be included in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

LISTING OF LOCAL HOUSING AUTHORITIES INDICATING INADEQUACY OF STATUTORY CONSTRUCTION COST LIMITS

ALABAMA

1. Huntsville Housing Authority.
2. Sylacauga Housing Authority.
3. Childersburg Housing Authority.
4. Chickasaw Housing Authority.
5. Rainsville Housing Authority.
6. Boaz Housing Authority.
7. Centre Housing Authority.*
8. Crossville Housing Authority.

ARIZONA

1. Phoenix Housing Authority.

ARKANSAS

1. Housing Authority of the City of Little Rock.
2. Fayetteville Housing Authority.*
3. Housing Authority of the City of Clarendon.
4. North Little Rock Housing Authority.
5. Springdale Housing Authority.

CALIFORNIA

1. Housing Authority of the County of Santa Barbara.
2. Brawley Housing Authority.
3. Housing Authority of the City and County of Fresno.
4. Housing Authority of the City of Alameda.
5. Housing Authority of the County of Merced.
6. Housing Authority of the County of Kern.*
7. Sutter County Housing Authority.*
8. Housing Authority of San Buenaventura.
9. Sacramento Housing Authority.

COLORADO

1. Trinidad Housing Authority.*

CONNECTICUT

1. Housing Authority of the Town of East Hartford.
2. Waterbury Housing Authority.*
3. Milford Housing Authority.
4. Meriden Housing Authority.*
5. Citizens Action Council, Stamford.*
6. Stamford Housing Authority.*
7. Housing Authority of the City of Bridgeport.
8. New Haven Housing Authority.

*Indicates present inadequacy. Other listings denote inadequacy during 1970.

*Indicates present inadequacy. Other listings denote inadequacy during 1970.

Mr. GOODELL. The NAHRO survey indicates that an increase of 20 percent in the basic construction cost and mortgage limits is necessary in order that construction activity can continue through the year.

Clearly, our present method of establishing cost limits and mortgage limits is not working. The limits do not represent regional cost differences nor can they respond with efficiency and ease to changing construction patterns.

This year, the Banking and Currency Committee has recommended a new method of computing room cost limits for public housing—the prototype process. This concept, in similar form was proposed by the administration earlier this year. Under the new proposal, HUD would direct its regional offices to "cost-out" a prototype design of a public housing unit according to the prevailing costs in the difference regions of the country. This procedure would allow flexibility for the high cost areas such as New York and yet not raise the costs on those areas of the country where increases are not necessary.

Although the prototype concept has considerable merit, I expressed concern in committee that this new system would require some time before it became operational across the Nation. In the meantime, out-of-date cost limits would paralyze construction of public housing. At that time, I called up my bill S. 4093, which would have increased the limits by 20 percent on an interim basis. It would have been accepted in committee but there was a question in our minds on the last day as to how long it would take HUD to get the prototype program in operation.

Upon consensus in the committee I agreed to defer action on my bill until we could determine from HUD how long it would take before the prototype costs would be available and operative. Obviously, if the new cost limits would be available in 30 days or so there would be no need for interim increase in the 1969 statutory cost limits.

If however, those new limits would take some time to implement—several months or so—the committee felt that an interim increase in cost limits would be in order.

The distinguished chairman of the committee wrote to the Secretary requesting his view of when the prototype cost limits would be operational. I understand HUD reports that at least 4 months will be required to perfect, complete and implement this enormous task.

In the meantime, I believe emergency cost increases are needed to insure continued construction of public housing. In accordance with the committee decision I have introduced an amendment which would permit a 20-percent increase in the cost limits established by the 1969 Housing and Urban Development Act. These limits would only be in effect until the prototype limits are published and operational at which time they will expire. I hope the chairman will agree to accept this amendment.

The other amendment I have introduced would apply a 15-percent increase to mortgage limits for the section 236 program in high cost areas.

Currently, the section 221(d)(3) mortgages limits govern construction of the section 236 projects. These limits were increased last year by approximately 15 percent to meet the inflationary cost increases that had occurred since 1965. According to the statute these adjusted limits could be increased by 45 percent in high cost areas.

While these adjustments were adequate to meet construction costs in cities in December of 1969 when the bill was signed into law, this is no longer true. Projects are now being halted because of increased prices.

In New York City, for example, over 3,000 approved limits are now costing out at 4 to 12 percent above the 1969 mortgage limits. As a result, construction of these badly needed units cannot begin.

As I mentioned earlier the future only presents a gloomier picture. New York City housing officials estimate that of the 13,000 section 236 units now in the pipeline, at least 75 percent will be above the present mortgage limits.

This amendment would raise the cost limits in any geographical area where the costs require increases to permit construction. Yet, it would not tamper with

cost limits that are sufficient for the community's needs.

Mr. PROXMIRE. Mr. President, I wish the Senator had separated the two amendments because, as the Senator knows, they are different.

The difficulty we are having with the first amendment, the 236 subsidy amendment, providing that ceilings would go to 60 percent in high cost areas, I have a chart which shows that for nonelevator three-bedroom programs, the Goodell amendment would permit a subsidy for rental tenants of up to a $33,350-unit for four bedrooms; with four, it goes to $41,859.

I have great sympathy for the problem in New York because I know costs are high. But this type program, in our State, would be viewed as highly extravagant on its face. Few people can afford anything like a $35,000 to $40,000 home, only a tiny proportion of the population.

We are able to subsidize housing for only a small fraction of the population. We feel the subsidy should go to those with low incomes in moderate housing and not those living in relative luxury.

Mr. TOWER. Mr. President, I would like to associate myself with the remarks of the Senator from Wisconsin. We would be subject to very severe criticism, indeed, if we agree to this amendment. The administration is opposed to it. I hope it is rejected by the Senate this evening.

Mr. GOODELL. Mr. President, the administration is opposed to the provision in the bill; they want their own prototype approach. The administration, to my knowledge, has not taken a basic position against this amendment.

What it would do would be to give the Secretary of HUD the discretionary authority where he feels it is justified to raise the section 236 limits in high cost areas. It would be discretionary with the Secretary.

New York is not the only area needing an increase in mortgage limits. There is a very long list of communities that are involved, including one in Alabama, the housing authority in Americus, Ga., one in Hawaii, one in Colorado. This is not just the situation in New York. I do not think we want to put ourselves in a position where, for the next year, in selected areas—and quite a large number—housing construction will be halted because the ceilings have been set at unrealistically low levels in the bill.

I am not requiring the Secretary of the Department of Housing and Urban Development to do anything. It is in the discretion of the Secretary of the Department of Housing and Urban Development if he feels it is justified. He does not have to allow the full amount I have prescribed.

Mr. PROXMIRE. So for a three-bedroom house, it is $33,350 under the Goodell amendment and $41,379 for a four-bedroom.

It just seems to me that we discredit the program when we go that high. I realize the problem not only in New York but in many parts of the country. There is probably no region in the country that does not have a high-cost construction area.

I am not saying this is just a New York problem, but I am saying that we have here a difficult problem of getting appropriations from the Appropriations Committee, getting public suport for it, getting the House of Representatives to support it, and getting general support in the community. People resent it when they have to pay rent on a $15,000 or $20,000 home, and it is all they can possibly afford, and then see somebody getting support for rent in a home twice as high in cost.

Mr. TOWER. Mr. President, if the Senator will yield, I think this would be subsidizing higher costs. Certainly people back home are getting increasingly disenchanted with these high costs. At least that is the impression I get. I am not sure whether that is the Senator's impression.

Mr. PROXMIRE. It is.

Mr. GOODELL. I agree that people are getting very disenchanted about the high cost, but what do we do about it? Are we going to stop these programs that have done so much good in Texas, New York, Wisconsin, and a great many other areas? The high cost of construction in this type of unit and the limitation I am concerned about are affecting virtually every State in the country. This is not just New York or the building trade unions in New York, or anything of that nature.

I think we ought to understand that I am not talking about raising ceilings so as to cost the taxpayers millions and millions of dollars. We are facing a situation where, under the present provisions of the bill, we will have a complete standstill in these programs.

I do not think we want a complete standstill, so I am saying that we should give discretion to the Secretary of Housing and Urban Development, if the present ceilings are unrealistic, to raise them in accordance with what he thinks is necessary for public housing. It is not going to be an inducement for higher costs in the 4- or 5-month period. It is an interim provision, while the Secretary sets up a prototype unit by which he will establish regional ceilings this is a good plan. It was supported unanimously in the committee.

I hope Senators will understand the import of these two amendments. I put them together, but I can offer them separately. They relate to discretion for raising the room cost and mortgage ceilings where they have been set unrealistically low.

Mr. WILLIAMS of Delaware. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. PROXMIRE. Mr. President, I yield myself 2 minutes.

The Senator from New York is arguing that we should leave this matter in the discretion of the Secretary of Housing and Urban Development. As I understand it, the Secretary has not indicated that he wants this amendment. In fact, he has another program. At any rate, the present ceiling under the present law would be very high under any standard in most States, and, in fact, I think in New York City or Hawaii or anywhere else—$37,934 for a unit of four bedrooms with an elevator. We are being asked to increase that to $41,859. The Senator from New York says if we do not go that high, homes will not be constructed under this program.

It is very hard for me to believe that. We have worked hard on the committee. Many of us on the committee have talked to homebuilders in our States. I cannot believe that in New York City, Colorado, Wisconsin, or elsewhere units cannot be built for that sum or less.

It seems to me that there is much truth in what the Senator from Texas has said—if we go to $41,000, then the builders will find a way of getting up there. No matter how high we go, we will find that there are some areas in which they cannot construct this subsidized housing.

Mr. PERCY. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. PERCY. Mr. President, I intend to support the position of the committee and vote against the amendment. I think we have reached the point where enough is enough. I feel that exorbitant costs have been reached in many parts of our country without commensurate increases in productivity. It is time for us to exert some downward pressures. I do not think we should just keep raising costs and then expect Uncle Sam to step in and be the provider. I think enough is enough in this case.

For that reason, I cannot support the amendment. However, I sympathize with the problem the distinguished Senator from New York is trying to solve.

The PRESIDING OFFICER. Who yields time?

Mr. PROXMIRE. Mr. President, I am ready to yield back my time if the Senator from New York is.

Mr. GOODELL. Mr. President, I yield myself 1 minute further. I simply want to make it clear for the RECORD, when we are talking about the cost of $35,000 a unit in the areas affected, we are not talking about luxury housing. We are talking about low- and moderate-income housing.

I would like to see construction costs held in line. I would like to see the cost of land held in line. I would like to see the cost of materials held in line. Hopefully, we are going to have some breakthrough in the whole pattern of the construction of housing in this country soon.

But when Senators oppose this amendment they say, "Stop housing construction in every one of the areas listed"—many of them in their own States. The costs are too high, so stop the construction of housing.

I would be surprised if any Senator representing an urban State, or a State that has large city housing problems, said that, but that is the net effect of it. We are not going to have houses built in the cities. We are not subsidizing the increased cost of labor and housing; we are recognizing realistically what the situation is. If Senators want to say to the cities and housing authorities across the country that, because the cost of land

and the cost of materials and the cost of labor have gotten so high, we have got to stop building, very well.

That is the net effect of the arguments that have been raised here: We do not like the increased costs, therefore we stop building housing. We stop these programs that have been so effective.

Mr. President, the hour is late. I shall not take the time, because of the united opposition from the ranking minority member and the chairman, but if I were to read off the areas involved, Senators would be surprised. It is not only New York City alone; it is happening in Georgia, Alabama, Arkansas, and most of the Midwestern States.

Mr. President, because of the lateness of the hour I shall not pursue the matter further. I yield back the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. PERCY. Mr. President, may I have just 1 minute?

Mr. PROXMIRE. I yield the Senator 1 minute.

Mr. PERCY. I would respectfully suggest that this might be a good point for us to put pressure, under the circumstances, on HUD to go into more housing rehabilitation. We have fine potential structures all over this country, particularly in the urban areas, that, with a modest amount of money, can be rehabilitated into fine modernized housing. We have provided up to 30 percent for rehabilitation, and, as I understand it, only about 1 percent of available funds are being used. This might enable them to go into an activity that would provide the best return on investment that we can get, by taking the extra time and effort to rehabilitate those structures and bring them up to first-class condition.

Mr. PROXMIRE. Mr. President, I yield myself 1 minute.

The Senator from New York does raise a disturbing difficult problem, but what do we say to our constituents, 90 percent of whom live in houses that cost less than this, or rent homes at a lower monthly rent? Do we tell them, "We are going to have to tax you to subsidize homes that cost $35,000 or $40,000"?

I think their answer would be very simple and direct. They would say, "Let's don't have that program if it costs that much."

I think the Senator from Illinois is right; we have to draw the line somewhere. We did increase these ceilings only last year, in December of last year as I recall. To raise them once again, and from 45 to 60 percent, does seem to be too much.

Mr. President, I hope the amendment will be defeated.

The PRESIDING OFFICER. Does the Senator yield back the remainder of his time?

Mr. PROXMIRE. I yield back the remainder of my time.

The PRESIDING OFFICER (Mr. BAKER). All time having been yielded back, the question is on agreeing to the amendments, en bloc, of the Senator from New York (Mr. GOODELL). On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. EAGLETON (when his name was called). On this vote I have a pair with the Senator from New Jersey (Mr. WILLIAMS). If he were present, he would vote "yea." If I were permitted to vote, I would vote "nay." I withhold my vote.

The rollcall was concluded.

Mr. BYRD of West Virginia. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Indiana (Mr. BAYH), the Senator from Mississippi (Mr. EASTLAND), the Senator from North Carolina (Mr. ERVIN), the Senator from Tennessee (Mr. GORE), the Senator from Indiana (Mr. HARTKE), the Senator from Iowa (Mr. HUGHES), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Louisiana (Mr. LONG), the Senator from Washington (Mr. MAGNUSON), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Wyoming (Mr. MCGEE), the Senator from North Dakota (Mr. MCGOVERN), the Senator from New Mexico (Mr. MONTOYA), the Senator from Utah (Mr. MOSS), the Senator from Maine (Mr. MUSKIE), the Senator from Rhode Island (Mr. PELL), the Senator from Georgia (Mr. RUSSELL), the Senator from Mississippi (Mr. STENNIS), the Senator from Missouri (Mr. SYMINGTON), the Senator from Maryland (Mr. TYDINGS), the Senator from New Jersey (Mr. WILLIAMS), the Senator from Texas (Mr. YARBOROUGH), and the Senator from Ohio (Mr. YOUNG) are necessarily absent.

I further announce that, if present and voting, the Senator from Iowa (Mr. HUGHES), the Senator from Missouri (Mr. SYMINGTON), the Senator from North Carolina (Mr. ERVIN), and the Senator from Washington (Mr. MAGNUSON) would each vote "nay."

Mr. GRIFFIN. I announce that the Senator from Colorado (Mr. ALLOTT), the Senator from Delaware (Mr. BOGGS), the Senators from Arizona (Mr. FANNIN and Mr. GOLDWATER), the Senator from California (Mr. MURPHY), the Senator from Oregon (Mr. PACKWOOD), the Senator from Illinois (Mr. SMITH), and the Senators from Pennsylvania (Mr. SCHWEIKER and Mr. SCOTT) are necessarily absent.

The Senator from Vermont (Mr. AIKEN) and the Senator from Oklahoma (Mr. BELLMON) are absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Ohio (Mr. SAXBE) is detained on official business.

If present and voting, the Senator from Delaware (Mr. BOGGS), the Senator from Colorado (Mr. ALLOTT), the Senator from California (Mr. MURPHY), and the Senator from South Dakota (Mr. MUNDT) would each vote "nay."

The result was announced—yeas 12, nays 50, as follows:

[No. 327 Leg.]

So Mr. GOODELL's amendments, en bloc, were rejected.

Mr. CURTIS. Mr. President, I should like to make a brief statement to Senators, and then I will have an amendment to offer.

Were this bill to be considered in the daytime, I have quite a number of amendments that I would like to have voted upon. Due to the lateness of the hour, I want to state for the information of Senators that I will have but two amendments, and I am willing to agree to a limitation of debate of 5 minutes on each side on each amendment.

Mr. MANSFIELD. Would the Senator make that request?

Mr. CURTIS. Yes. I make that unanimous-consent request.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MANSFIELD. Mr. President, will the Senator yield before he starts?

Mr. CURTIS. I yield.

## ORDER FOR THE SENATE TO CONVENE AT 12 NOON TOMORROW, AND AT 12 NOON FRIDAY

Mr. MANSFIELD. Mr. President, in the spirit of the distinguished Senator from Nebraska, I think that, in view of the lateness of the hour, the Senate ought to convene at a more reasonable hour, inasmuch as we cannot consider anything but Senate Joint Resolution 1 from now until 1 hour after the convening of the Senate on Tuesday.

So I ask unanimous consent that on Thursday and Friday the Senate meet at 12 noon.

The PRESIDING OFFICER. Without objection, it is so ordered.

## HOUSING AND URBAN DEVELOPMENT ACT OF 1970

The Senate continued with the consideration of the bill (S. 4368) to extend and amend laws relating to housing and

urban development, and for other purposes.

Mr. CURTIS. Mr. President, I offer an amendment and send it to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk proceeded to read the amendment.

Mr. CURTIS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and, without objection, the amendment will be printed in the RECORD.

The amendment is as follows:

On page 4, line 22, insert the following: "(3) by adding at the end thereof the following new paragraph:

"'(5) Notwithstanding any other provision of this section, no assistance payment shall be contracted to be made under this section on behalf of any family which is eligible under Section 203(b) for insurance of a mortgage in an amount equal to or exceeding the median mortgage insured under such Section 203(b) in the area where the property is located during the most recent three-month period for which information is available, if the Secretary finds that there is available in such area, within that price range, adequate housing which is decent, safe, and sanitary and meets the minimum property requirements for housing with respect to which assistance payments may be made under this section.'"

Mr. CURTIS. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order. The Senate is not in order. Staff members will suspend conversation. Members who want to engage in conversations will withdraw from the Chamber.

Mr. CURTIS. Mr. President, this amendment is a modification of the 235 program. The 235 program was enacted for the stated purpose of subsidizing the payments so that poor people could buy homes. At the time it was presented, there was discussion about the slums and that this would enable people to acquire homes, as against always renting. That was a noble purpose, but it has not worked out that way in many instances. Because of slow housing starts and other reasons, this program has been used for many other purposes than to help the poor.

The purpose of my amendment is to make certain that those families who obtain homeownership subsidies under the section 235 program are clearly and unmistakably unable to achieve homeownership without some financial assistance.

On the basis of information which I have received on the manner in which the section 235 program is administered in Nebraska, many families are obtaining these subsidies who could buy a home under the regular section 203 program without any subsidy.

Let me quote an excerpt of a letter which I received from an individual in Nebraska who is directly connected with the building and selling of homes under section 235. He makes this revealing statement:

Of the several 235's that our company was involved in, there was only one family that I can determine actually should have been helped through a subsidy. Now, this means to me, the guidelines of the program are aimed at those who do not need help. This is defeating the purpose of federal help to needy families to buy homes, as the best buy for a low income person, with a large family, is an existing well kept home.

This is an excerpt of but one of many letters which I have received from people in Nebraska who are protesting the manner in which this program is being administered.

The principal reason for this poor administration is that the law provides only one test. Assume that HUD has established a ceiling of $21,000 for this program as the law permits. The test under existing law is whether a family can afford the $21,000 home. If the family cannot afford the $21,000 home it is eligible for section 235 benefits. However, suppose there are a number of adequate existing homes in the community available under the regular unsubsidized section 203 program for which the family could qualify. Under the present section 235 law, this is irrelevant and immaterial. The family qualifies for the new $21,000 home with the taxpayers paying a substantial part of the monthly shelter costs for insurance, taxes, principal, and interest.

I respectfully contend that this was not the purpose of the section 235 program.

If a family can afford an adequate home costing $18,000, for example, it ought not to be eligible for a new $21,000 home just because it cannot afford the $21,000 home.

The purpose of my amendment is to make ineligible for section 235 benefits any family that could qualify for the median FHA section 203—unsubsidized—mortgage for the recent quarter for which such figures are available, if housing within that price range is determined by the Department of Housing and Urban Development to be available in the community.

Let me give you an example. Suppose the median FHA section 203 mortgage—based on both new and used home sales—for the previous quarter is $16,000. A family that is eligible for an unsubsidized FHA mortgage for $16,000 or more would be ineligible for section 235 provided housing in that price range is available. The family would not be eligible for a more expensive new home built under section 235.

In other words, a family that can buy a home without subsidy is ineligible for a subsidy. This principle is basic to all subsidy program.

My amendment is consistent with the opening paragraph of HUD's June 1970 brochure entitled "Home Ownership for Lower Income Families." This paragraph reads as follows:

Families and individuals who cannot afford to buy a home without some form of assistance may be eligible for home ownership assistance under the new Section 235 program administered by the Federal Housing Administration, U.S. Department of Housing and Urban Development.

While HUD states this in its promotion literature, there is nothing in the law which would deny section 235 subsidies to a family that is able to buy an adequate house under the nonsubsidized FHA program. My amendment would meet this serious shortcoming in the section 235 program. Without it we will continue to hear complaints and criticism and as surely as night follows day the program will become thoroughly discredited.

I am confident that with this amendment the section 235 program will continue to use up its annual contract authority in assisting low-income families to become homeowners. True, it may remove some higher income families from the eligibility list, but these will be replaced by assisting more families of lower income.

The success of the section 235 program will be measured by the number of truly low-income families who otherwise could not become homeowners. It will not be measured by the degree with which it revives the homebuilding, mortgage lending, and real estate brokerage industries. On the other hand it will be thoroughly and completely discredited if it continues to subsidize families who are able to obtain adequate housing without a subsidy. There are more than 6 million substandard housing units in the country. Even if we assume that all of these are occupied by families earning less than $6,000 per year, there are still 8 million families earning $6,000 or less who are occupying standard housing. We must consider these taxpayers in determining eligibility standards for housing subsidies. We must consider these taxpayers before subsidizing higher income families to obtain newer and more expensive housing.

I will read briefly from one letter. A lady in my State says:

I would like to register my protest against subsidy home loans. One of these loans was obtained recently by an acquaintance. This individual has a bachelor's degree in education and is working on his masters. What kind of legislation is being enacted that permits the rest of us to help pay his house payment? The truly needy people are being hurt most by actions like this.

I for one object to paying part of his house payment just because he's just starting out in his professional career and can't have everything he desires immediately.

I have also had turned over to me by a financial institution three cases. One involves a 25-year-old skilled worker. He is earning $450 a month. His total indebtedness is only $2,400. He received an $18,000 loan, and the Government is paying a subsidy of $87.94 every month.

Another is a case of a 28-year-old salesman. His income is $535 a month. He drives a new car. He purchased a home for $17,150. His payments are being subsidized—$83.18 a month.

Another one. A 23-year-old employee making $688 received a loan of $19,000 and his subsidy is $87.

Let me tell the Senate something else. He gets a tax deduction for the $87 interest the Federal Government gives him and he does not have to report as income the money he received to pay it.

Mr. PASTORE. Mr. President, will the Senator from Nebraska yield right there for a question?

Mr. CURTIS. I am sorry, I am on controlled time and I cannot do so.

Here is what the amendment does. It

says in effect that if one is eligible, according to his income, to take a loan, say, of $1,600 without a subsidy, he cannot say, "I am going to buy a $21,000 house," and, therefore, his income is below and he cannot get the subsidy. That is all it says. It provides that if a family is eligible under section 203(b) for insurance on a mortgage equal to a mortgage exceeding the median mortgage under section 203(b), in the area where property is located, and the Secretary finds that there is a house available in such an area at a price range for adequate housing, which is safe and sanitary, a person who can afford a $16,000 house and pay for it without a subsidy is ineligible to ask for a better house and have it subsidized. The subsidies run from $75 to $100 a month.

Mr. President, I urge the Senate to adopt my amendment.

Mr. PROXMIRE. Mr. President, I must oppose the amendment of the Senator from Nebraska, although I certainly sympathize with his objectives and agree that we should do what we can to concentrate subsidies on those with low incomes. I base my opposition on the fact that primarily this could honestly be called: Build no more new homes under section 235 amendment. In other words, no new homeownership. It would not permit Government programs to proceed if the price of a new home, in effect, was higher than the median rate in existing housing in new housing.

We all know that housing costs have escalated enormously in the past few years. In the view of HUD, which opposes the amendment, I have a letter to the chairman of the committee, the Senator from Alabama (Mr. SPARKMAN), which states in effect that we simply would not get new housing. Let me read one paragraph and then I will yield the remainder of my time to the Senator from Illinois (Mr. PERCY).

Mr. PASTORE. Mr. President, will the Senator yield to me for a question?

Mr. PROXMIRE. I yield.

Mr. PASTORE. The only reason I rise is that it is my responsibility under the funding element of the program.

The reason why I asked the Senator from Nebraska to yield to me a moment ago on the questions he was raising, is that no one can condone the situations he describes, but I wonder whether this is not the fault of the administrators rather than the law. The Department should be more careful how it administers the law. There is no reason why the situations the Senator from Nebraska describes should have arisen in the first place. It is not because of the law, it is because of the administration of the law. I do believe that we should tamper with the law but get after the administrators for not carrying out the intent of the law.

Mr. PROXMIRE. The Senator is correct. HUD has tried to administer the program conscientiously. I have a table that shows that the overwhelming amount has gone to those with incomes of less than $8,000. It is about 93 percent. Very little, only seven-tenths of 1 percent, to those earning $10,000 or more. That is too much, of course. We should not have any for those with incomes above $10,000.

Mr. PASTORE. The point is that the Senator from Nebraska did present certain cases which are intolerable.

Mr. PROXMIRE. He did. That is correct.

Mr. President, I ask unanimous consent to have the table printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

GROSS ANNUAL INCOME OF FAMILIES ON BEHALF OF WHOM ASSISTANCE PAYMENTS ARE MADE UNDER SECTIONS 235 AND 236

| | Percentage distributions | | |
|---|---|---|---|
| | Homebuyers under sec. 235(i)[1] | | Renters under sec. 236[2] |
| Gross annual income | 1st half 1970 | Cumulative through June 30, 1970 | Cumulative through June 30. 1970 |
| Under $3,000 | 2.3 | 2.7 | 7.8 |
| $3,000 to $3,999 | 8.8 | 10.4 | 11.4 |
| $4,000 to $4,999 | 18.8 | 20.3 | 25.5 |
| $5,000 to $5,999 | 27.3 | 26.1 | 28.7 |
| $6,000 to $6,999 | 22.3 | 21.3 | 19.2 |
| $7,000 to $7,999 | 13.1 | 12.3 | 5.5 |
| $8,000 to $8,999 | 5.0 | 4.7 | 1.6 |
| $9,000 to $9,999 | 1.6 | 1.5 | .2 |
| $10,000 or more | .8 | .7 | .1 |
| Total | 100.0 | 100.0 | 100.0 |
| Median | $5,750 | $5,650 | $51,200 |

[1] Based on a sample of 2,000 reports per quarter.
[2] Based on about 2,700 approvals reflecting assistance payments and proposed admissions by June 30, 1970.

Mr. PROXMIRE. Mr. President, I conclude by pointing out that HUD writes, in opposition to the amendment, that in Cleveland, Ohio, for example, application of the formula proposed by the Senator from Nebraska would result in an effective mortgage limit of about $15,000 which would, in effect, result in no new housing being constructed.

Mr. President, I yield the remainder of my time to the Senator from Illinois.

Mr. PERCY. Mr. President, I thank the Senator from Wisconsin.

The Senator from Nebraska has pointed out certain fallacies in implementation of the law. We are grateful to him for the instances he mentioned, where the intent of the law is not being carried out.

I should like to follow through, and I know the committee would, on any of these instances. Where the Senator says the purpose of the law is to help low-income and poor people, he is right; but when he says it has not worked, the figures disprove it. It is dangerous, any time, to take a letter or one instance.

Mr. CURTIS. If the Senator will yield right there, the Senator knows that I appeared before the committee and read a long list of letters. The Senator also knows that the Department has done nothing about straightening it out.

Mr. PERCY. I was there at the time of the testimony of the Senator from Nebraska. If there has not been a followthrough by HUD on the specific instances the Senator has pointed out, then I will see to it personally that we do follow through: But I point out that if we take the last section—the second quarter of this year—I pull this one out at random—the second quarter of this year, 29 percent of all families helped were under the $5,000 income level, and 63 percent were between $9,000 and $8,000, which is 90 percent of all the cases under section 235. They were less than $7,000.

The average number of children, family size, would indicate that they definitely need assistance, and if they did not have this kind of assistance, they would not have adequate housing. If they did not get this kind of program, we would be in a worse condition in housing than we are in now.

Thus, I feel that these instances should be followed through.

Mr. CURTIS. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. SPARKMAN. Mr. President, I yield myself 1 minute under the bill simply for the purpose of saying that there are income limits definitely established throughout the country. I have here a table of selected family income limits for section 235, and ask unanimous consent that it be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

SELECTED FAMILY INCOME LIMITS FOR SEC. 235 HOUSING[1]

| City | Regular income limit[2] | | Exception income limit[3] | |
|---|---|---|---|---|
| | 4 member family | 5 member family | 3 and 4 member family | 5 and 6 member family |
| Alabama: | | | | |
| Birmingham (Jefferson County) | 6,210 | 6,480 | 6,050 | 6,950 |
| Huntsville (Madison County) | 6,345 | 6,615 | 5,950 | 6,850 |
| Mobile (Mobile County) | 6,210 | 6,480 | 6,400 | 7,350 |
| California: | | | | |
| Los Angeles | 6,750 | 7,290 | 8,500 | 9,750 |
| Sacramento (Sacramento County) | 6,345 | 6,750 | 8,100 | 9,300 |
| San Diego (San Diego County) | 6,480 | 6,750 | 9,100 | 10,450 |
| San Francisco (San Mateo County) | 7,090 | 7,765 | 8,300 | 9,550 |
| Illinois: | | | | |
| Chicago | 8,100 | 8,910 | 8,850 | 10,200 |
| Rockford | 8,100 | 8,640 | 7,900 | 9,050 |
| Springfield (Sangamon County) | 7,020 | 7,560 | 8,100 | 9,300 |
| Iowa: | | | | |
| Davenport (Scott County) | 7,155 | 7,560 | 7,450 | 8,600 |
| Des Moines | 5,130 | 5,265 | 8,200 | 9,300 |
| Sioux City | 5,130 | 5,265 | 7,750 | 8,900 |

Footnotes at end of table.

SELECTED FAMILY INCOME LIMITS FOR SEC. 235 HOUSING [1]—Continued

| City | Regular income limit [2] | | Exception income limit [3] | |
|---|---|---|---|---|
| | 4 member family | 5 member family | 3 and 4 member family | 5 and 6 member family |
| Maine: | | | | |
| Bangor (Penobscot County) | 6,480 | 6,885 | 6,800 | 7,850 |
| Lewiston (Androscoggin County) | 6,345 | 6,750 | 7,450 | 8,600 |

| Milwaukee (Milwaukee County) | 7,560 | 8,100 | 7,850 | 9,000 |

[1] Sources: HUD handbooks (FHA 4400.30 change 2, April 1970 and FHA 4400.36, March 1970).
[2] Based on 135 percent of public housing admission limits.
[3] Up to 20 percent of sec. 235 funds may be used for families with incomes above 135 percent of public housing admission limits. These incomes cannot exceed 90 percent of limits prescribed for the sec. 221(d)(3) below market interest rate program.

The PRESIDING OFFICER (Mr. MATHIAS). All time on the amendment has now been yielded back.

The question is on agreeing to the amendment of the Senator from Nebraska.

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. BYRD of West Virginia. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Indiana (Mr. BAYH), the Senator from Missouri (Mr. EAGLETON), the Senator from Mississippi (Mr. EASTLAND), the Senator from North Carolina (Mr. ERVIN), the Senator from Tennessee (Mr. GORE), the Senator from Indiana (Mr. HARTKE), the Senator from Iowa (Mr. HUGHES), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Louisiana (Mr. LONG), the Senator from Washington (Mr. MAGNUSON), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Wyoming (Mr. MCGEE), the Senator from North Dakota (Mr. MCGOVERN), and the Senator from New Mexico (Mr. MONTOYA) are necessarily absent.

I further announce that the Senator from Utah (Mr. MOSS), the Senator from Maine (Mr. MUSKIE), the Senator from Rhode Island (Mr. PELL), the Senator from Georgia (Mr. RUSSELL), the Senator from Mississippi (Mr. STENNIS), the Senator from Missouri (Mr. SYMINGTON), the Senator from Maryland (Mr. TYDINGS), the Senator from New Jersey (Mr. WILLIAMS), the Senator from Texas (Mr. YARBOROUGH), and the Senator from Ohio (Mr. YOUNG) are necessarily absent.

I further announce that, if present and voting, the Senator from North Carolina (Mr. ERVIN), the Senator from Louisiana (Mr. LONG), the Senator from Washington (Mr. MAGNUSON), the Senator from Missouri (Mr. SYMINGTON), the Senator from New Jersey (Mr. WILLIAMS), and the Senator from Iowa (Mr. HUGHES) would each vote "nay."

Mr. GRIFFIN. I announce that the Senator from Colorado (Mr. ALLOTT), the Senator from Delaware (Mr. BOGGS), the Senators from Arizona (Mr. FANNIN and Mr. GOLDWATER), the Senator from Oregon (Mr. PACKWOOD), the Senator from California (Mr. MURPHY), the Senator from Illinois (Mr. SMITH), the Senators from Pennsylvania (Mr. SCHWEIKER and Mr. SCOTT) are necessarily absent.

The Senator from Vermont (Mr. AIKEN) and the Senator from Oklahoma (Mr. BELLMON) are absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Kentucky (Mr. COOPER) and the Senator from Ohio (Mr. SAXBE) are detained on official business.

If present and voting, the Senator from Colorado (Mr. ALLOTT), the Senator from Delaware (Mr. BOGGS), the Senator from Kentucky (Mr. COOPER), and the Senator from Pennsylvania (Mr. SCOTT) would each vote "nay."

On this vote, the Senator from South Dakota (Mr. MUNDT) is paired with the Senator from California (Mr. MURPHY). If present and voting, the Senator from South Dakota would vote "yea" and the Senator from California would vote "nay."

The result was announced—yeas 8, nays 53, as follows:

[No. 328 Leg.]

YEAS—8

| | | |
|---|---|---|
| Cotton | Gurney | Thurmond |
| Curtis | Hansen | Williams, Del. |
| Dole | Hruska | |

NAYS—53

| | | |
|---|---|---|
| Allen | Cranston | Holland |
| Baker | Dodd | Hollings |
| Bennett | Dominick | Inouye |
| Bible | Ellender | Jackson |
| Brooke | Fong | Javits |
| Burdick | Fulbright | Jordan, N.C. |
| Byrd, Va. | Goodell | Jordan, Idaho |
| Byrd, W. Va. | Gravel | Mansfield |
| Cannon | Griffin | Mathias |
| Case | Harris | McClellan |
| Church | Hart | McIntyre |
| Cook | Hatfield | Metcalf |
| Miller | Prouty | Spong |
| Mondale | Proxmire | Stevens |
| Nelson | Randolph | Talmadge |
| Pastore | Ribicoff | Tower |
| Pearson | Smith, Maine | Young, N. Dak. |
| Percy | Sparkman | |

NOT VOTING—39

| | | |
|---|---|---|
| Aiken | Hartke | Packwood |
| Allott | Hughes | Pell |
| Anderson | Kennedy | Russell |
| Bayh | Long | Saxbe |
| Bellmon | Magnuson | Schweiker |
| Boggs | McCarthy | Scott |
| Cooper | McGee | Smith, Ill. |
| Eagleton | McGovern | Stennis |
| Eastland | Montoya | Symington |
| Ervin | Moss | Tydings |
| Fannin | Mundt | Williams, N.J. |
| Goldwater | Murphy | Yarborough |
| Gore | Muskie | Young, Ohio |

So Mr. CURTIS' amendment was rejected.

The PRESIDING OFFICER. The Senator from Nebraska is recognized for 5 minutes.

Mr. CURTIS. Mr. President, I send to the desk an amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

On page 18, strike out lines 14 through 26, and insert the following:

ANNUAL CONTRIBUTIONS CONTRACTS LIMITED TO DEBT SERVICE REQUIREMENTS

SEC. 204. The proviso in section 10(b) of the United States Housing Act of 1937 is amended by striking out ", although not limited to debt service requirements,".

Mr. CURTIS. Mr. President, the junior Senator from Nebraska is under no illusions that this amendment will carry. It does represent the first chance that the Senate has had to pass on a major question of subsidy. Therefore, I think it should be done by a rollcall vote. Those in favor of such a subsidy should carry the responsibility.

In the Federal housing program when public housing is built, the Federal Government pays the check. In my 5 minutes I will not take the time to explain that. But the bonds are issued. Then the Fed-

eral Government makes an appropriation to meet the debt.

We have now added to that. We have a rent supplement program. Then the pending bill does what was attempted last year. But there have been no payments under the provision made last year.

This bill grants a subsidy to the Housing Authority for operating expenses, the maintenance, guards, lights, local taxes. The Federal Government underwrites the loss of operating.

It is the local authorities that determine how many expenses there will be and how many people are on the payroll.

One may agree that if we have one subsidy program to give the local Housing Authority, we should add another one to it, a subsidy for operations.

I have no quarrel if anyone believes that. I respect their opinion. However, I think that before we start to pay out money on any such principal we should take the responsibility for voting in an additional subsidy, one subsidy where the Federal Government pays the total cost of building the housing project.

Here, by completing what was attempted a year ago—and no money was provided for it—there would be an additional program where the Federal Government would subsidize the operation of it, and that will include broken out windows and everything else.

Mr. President, there may not be more than one vote for this amendment, but there will be one.

I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. CURTIS. I yield back the remainder of my time.

Mr. SPARKMAN. Mr. President, I shall be very brief.

Back when the public housing was first written into law in 1937 it was provided that the support of the Federal Government would not be limited merely to taking care of the debt service. Unfortunately, over the years the law was narrowly interpreted to limit the Federal contributions to take care of only debt service. Last year the Congress made a specific legislative change to clarify that Federal assistance could take care of certain public housing costs in addition to debt service charges. This 1969 change in the law is further clarified in the bill before us.

Senator CURTIS' amendment would remove all of this and, in fact, would repeal the original intent of the 1937 Housing Act.

I think a fine formula was written in the original act. In 1949 there was a rejuvenation of the act. The Senator from Louisiana was the author of that bill.

Mr. ELLENDER. I offered the 1937 bill also.

Mr. SPARKMAN. I am pleased to know that. At that time it was intended that it would not be confined to debt service. I submit we have tried to handle this very carefully. Public housing has been a most difficult thing to handle through the years, trying to get housing for the very poorest people in our country.

We have had a hard time getting it down to a level they could afford. That is the reason for subsidies in the law. I think they are helpful. I have great respect for the Senator from Nebraska. He did appear before our committee and he gave testimony.

Mr. HANSEN. Mr. President, will the Senator yield for a question?

Mr. SPARKMAN. I yield.

Mr. HANSEN. Would the Senator give an indication of the amount of money we are talking about, the amount that the subsidy would represent?

Mr. SPARKMAN. Does the Senator mean the subsidy over and above the debt service.

Mr. HANSEN. I mean that which is affected by the amendment.

Mr. SPARKMAN. I do not have such figures available. It varies from year to year because the Government does guarantee the bonds. Some housing projects might be losers; others might not lose anything. One year might be better than another year.

I would be glad to supply that information for the record because I think it would be good for all of us to have. I do not have the information before me now.

Mr. HANSEN. I appreciate that, but it would be more helpful to the Senator from Wyoming if we could have the information now.

Mr. SPARKMAN. I do not know. I would be glad to make the data available to you at a later date.

Mr. HANSEN. The Senator would not know if we were talking about $1 million, $100 million, or $50,000?

Mr. SPARKMAN. It may be the Senator from Massachusetts could tell us better. He offered the amendment last year that set these subsidies.

Mr. BROOKE. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. BROOKE. We provided $150 million and it will probably cost about $250 million. That is the answer to the question.

If the Senator will yield further, many Senators were not in the Chamber when I engaged in a colloquy with the Senator from Nebraska. We have been seriously concerned with public housing in this country and we did not want to confine it to debt service but we wanted to go beyond it to operating cost and maintenance because public housing has deteriorated to the point where the Federal Government is being accused of being the greatest slum landlord in the country. We have had serious problems in deterioration in housing and we did not want to confine it to debt service, but to expand it so we could improve the quality of living in public housing projects across the country. That was the purpose we had here. We went to conference; the House passed it overwhelmingly as did the Senate. We feel it is good legislation and essential if we are to maintain public housing. That is the purpose of this part of the bill.

I have great respect for the Senator from Nebraska and what he is trying to do but we do not think this is the place to do it.

Mr. SPARKMAN. Mr. President, I agree completely with the Senator from Massachusetts.

The PRESIDING OFFICER. All time has expired. The question is on agreeing to the amendment of the Senator from Nebraska (Mr. CURTIS). On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. BYRD of West Virginia. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Indiana (Mr. BAYH), the Senator from Missouri (Mr. EAGLETON), the Senator from Mississippi (Mr. EASTLAND), the Senator from North Carolina (Mr. ERVIN), the Senator from Tennessee (Mr. GORE), the Senator from Indiana (Mr. HARTKE), the Senator from Iowa (Mr. HUGHES), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Louisiana (Mr. LONG), the Senator from Washington (Mr. MAGNUSON), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Wyoming (Mr. MCGEE), the Senator from South Dakota (Mr. MCGOVERN), the Senator from New Mexico (Mr. MONTOYA), the Senator from Utah (Mr. MOSS), the Senator from Maine (Mr. MUSKIE), the Senator from Rhode Island (Mr. PELL), the Senator from Georgia (Mr. RUSSELL), the Senator from Mississippi (Mr. STENNIS), the Senator from Missouri (Mr. SYMINGTON), the Senator from Maryland (Mr. TYDINGS), the Senator from New Jersey (Mr. WILLIAMS), the Senator from Texas (Mr. YARBOROUGH), and the Senator from Ohio (Mr. YOUNG) are necessarily absent.

I further announce that, if present and voting, the Senator from North Carolina (Mr. ERVIN), the Senator from Iowa (Mr. HUGHES), the Senator from Washington (Mr. MAGNUSON), the Senator from Louisiana (Mr. LONG), the Senator from New Jersey (Mr. WILLIAMS), the Senator from Maine (Mr. MUSKIE), and the Senator from Missouri (Mr. SYMINGTON) would each vote "nay."

Mr. GRIFFIN. I announce that the Senator from Colorado (Mr. ALLOTT), the Senator from Delaware (Mr. BOGGS), the Senators from Arizona (Mr. FANNIN and Mr. GOLDWATER), the Senator from Oregon (Mr. PACKWOOD), the Senator from California (Mr. MURPHY), the Senator from Illinois (Mr. SMITH), the Senators from Pennsylvania (Mr. SCHWEIKER and Mr. SCOTT) are necessarily absent.

The Senator from Vermont (Mr. AIKEN), and the Senator from Oklahoma (Mr. BELLMON) are absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Kentucky (Mr. COOPER) and the Senator from Ohio (Mr. SAXBE) are detained on official business.

If present and voting, the Senator from Colorado (Mr. ALLOTT), the Senator from Delaware (Mr. BOGGS), the Senator from Kentucky (Mr. COOPER), and the Senator from Pennsylvania (Mr. SCOTT) would each vote "nay."

On this vote, the Senator from South Dakota (Mr. MUNDT) is paired with the Senator from California (Mr. MURPHY).

If present and voting, the Senator from South Dakota would vote "yea" and the Senator from California would vote "nay."

The result was announced—yeas 11, nays 50, as follows:

[No. 329 Leg.]

So Mr. CURTIS' amendment was rejected.

Mr. MONDALE. Mr. President, I have a technical amendment which is designed to do what I thought my amendment in committee did. I do not think there is any objection to it.

I send to the desk my amendment and ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 97, after line 14, insert the following:

(b) The first sentence of section 106(b)(1) of such Act is amended by striking out "any federally assisted program" and inserting in lieu thereof "section 235 of the National Housing Act or any other federally assisted program".

On page 97, line 15, strike out "(b)" and insert "(c)".

On page 98, line 12, strike out "(c)" and insert "(d)".

Mr. MONDALE. Mr. President, this amendment is to clarify the intent of Congress regarding the use of planning loans for nonprofits. I want to make it clear that it is the intent of Congress that section 106 planning funds can be and should be used for all types of federally assisted low- and moderate-income housing programs and should not be limited to programs that utilize project mortgages. This specifically includes loans to nonprofits, such as Town View, Inc. in Duluth, Minn., that plan on utilizing section 235 programs regardless of what subsection of 235. Nonprofits should be encouraged to make use of all available Federal housing programs and they should not be restricted to four or five specific programs.

Mr. SPARKMAN. Mr. President, the amendment is a clarification of existing law. I am willing to accept the amendment.

Mr. TOWER. Mr. President, I associate myself with the statement of the distinguished chairman. I concur.

The PRESIDING OFFICER. Do Senators yield back their time?

Mr. MONDALE. Mr. President, I yield back my time.

Mr. SPARKMAN. Mr. President, I yield back my time.

The PRESIDING OFFICER. All time on the amendment has been yielded back. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. TOWER. Mr. President, I send amendments to the desk and ask that they be stated.

The PRESIDING OFFICER. The amendments will be stated.

The legislative clerk proceeded to read the amendments.

Mr. TOWER. Mr. President, I ask unanimous consent that further reading of the amendments be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments are as follows:

On page 4, beginning with line 23, strike out all through line 8 on page 9, and redesignate succeeding sections in title I of the bill accordingly.

On page 19, beginning with line 22, strike out all through line 18 on page 21, and redesignate succeeding sections in title II of the bill accordingly.

Mr. TOWER. Mr. President, I ask unanimous consent that the amendments be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TOWER. Mr. President, what this amendment does is to delete the authorization for dormitory-type housing under section 236, the rent supplement program, and under public housing.

What I am trying to do is cure or make amends for my own dereliction in committee. I was not aware that this matter was going to come up on the day it did, and I was not present at the time.

I think there is considerable resistance to it in committee. I am not convinced that there is sufficient predicate at this time to open up the section 236 apartment subsidy program, and for that matter, the public housing and rent supplements "low income" housing programs, to dormitory housing.

This housing, of course, would be for nonelderly, single persons, as I understand it.

Let us take the case of section 236. The demand for this lower income housing by deserving families across the country far exceeds the ability of the Government to provide interest subsidy funds. Of course, the family unit includes single persons, assumedly until they are at the age where they are self-sustaining and leave home.

I do not feel I can support a proposal that could possibly dilute the lower income section 236 subsidy program to the extent that it benefits families.

Likewise, the low income rent supplements program and public housing are both at such a point that I would hesitate to open up needy family units to pressure for dormitorytype units.

Therefore, I am hopeful that this amendment would be acceptable to my distinguished chairman.

Mr. SPARKMAN. Mr. President, will the Senator yield?

Mr. TOWER. I yield to the Senator.

Mr. SPARKMAN. I agree with the Senator from Texas. I was not present when this provision was agreed to by the committee and I think it is entirely too broad.

I think there might be some justification for single occupancy of this kind for veterans, for the elderly, and such as that.

Mr. TOWER. Mr. President, if the Senator would yield, I think it would be an appropriate matter for us to hold hearings on.

Mr. SPARKMAN. Yes; so do I. I think it is something we ought to put some work on in hearings. I assure the Senator from New York, if he will not insist on this provision, we certainly will have hearings on it in the new session.

Mr. GOODELL. Mr. President——

The PRESIDING OFFICER. Who yields time to the Senator from New York?

Mr. SPARKMAN. I yield the Senator from New York 3 minutes.

Mr. GOODELL. Mr. President, the amendment offered here is to delete a provision that was accepted in committee, which I authored.

Under present public housing and section 236, single individuals who are less than 62 years of age, who are not disabled, do not receive adequate housing assistance. Many communities setting up their urban renewal and housing programs find that one of the most critical problems is that of single individuals, widows, or widowers, who have not achieved the age of 62, and who are desperately poor.

Mr. HANSEN. Mr. President, may we have order? I cannot hear the Senator.

The PRESIDING OFFICER. The Senate will be in order.

Mr. GOODELL. What justification do we have for excluding this particular group? We can take care of them if they are married, but not if they are single.

Senators know of the desperate situation of many widows, many widowers, and many single people who are poor. What this provision in the bill that the Senator from Texas would delete would permit not more than 10 percent of the aggregate funds under the section 236 public housing program to be used for construction of dormitory style housing. It would provide the local officials means by which to plan a balanced housing program for all citizens.

The need for this housing is great and the committee recognized this in the report. I would like to quote part of that report:

The Committee recognizes that a critical need exists for housing to accommodate the low income single person under 62 years of age.

Existing federal low and moderate income

housing programs do not adequately serve this single population. By and large the programs are primarily designed to assist families and the elderly or handicapped. Although some assistance is available to non-elderly singles, it cannot meet the rising demand for housing among this group.

The needs of this population group has become particularly obvious in areas designated for public clearance such as urban renewal areas. As renewal activities begin, municipal officials, who are responsible for relocating the displaced residents cannot find suitable units in sufficient number for the single population. Existing housing programs are deficient in providing for this group and do not adequately meet relocation needs.

The Committee is recommending that legislation be enacted to provide financial assistance through the Rent Supplement and Section 236 programs for the construction of housing for single persons. Such housing would be dormitory-type rental housing with maximum feasible use made of common baths, community kitchens, common dining areas and other shared facilities such as community recreation rooms, workshops or health facilities. It was felt that this physical design would meet the needs of a single person most economically and efficiently. Furthermore, the Committee agrees that competent and responsive housing management with such a diverse and complex tenantry, is essential for the success of a project. Therefore the management fees should be integrated wherever possible, in the allowable project cases.

I think it is a matter of simple equity. It is not a matter that requires extensive hearings. I think all Senators, if they have not already done so, can get testimony from their own communities of the need for this. I have. I have been on the site. I have heard the housing officials and the local officials talk about how they wished they had the option to provide some kind of housing for poor individuals who do not qualify as being over 62 or disabled, but who qualify very definitely in their desperate need. They are excluded now.

I hope the amendment of the Senator from Texas will be defeated.

Mr. TOWER. Mr. President, I yield myself 1 minute.

Mr. President, to my knowledge, I do not think that there were any hearings on this subject, and, as the distinguished chairman of the committee has already indicated, if my amendment is sustained, we will make this a matter for subsequent hearings, and then we can look into the problem to determine to what extent we should legislate on it.

Right now, I would be very loath and reluctant to use up part of the funds provided to benefit poor families and low income families under section 236, the rent supplement, and public housing, when we know the pipelines are already clogged with requests, and we have more applicants than we can service with existing funding. I think it would be tragic for us not to put the emphasis on families first.

Mr. President, I am prepared to yield back the remainder of the time.

Mr. GOODELL. Mr. President, will the Senator from Alabama yield me 1 minute?

Mr. SPARKMAN. I yield 1 minute to the Senator from New York.

Mr. GOODELL. I express my appreciation to the Senator from Texas and the Senator from Alabama for their assurances that they would give this matter consideration. There is a provision of this nature in the House bill, and there have been hearings on it. Witnesses testified before our committee on the need for this type of legislation.

It is not a complicated thing. It is not as though we were changing any significant or complex sections of the law, and do not know what the impact will be. It is very clear. The impact is that the local communities have a very serious problem housing single individuals, widows, and widowers not over 62, and should have some provision in the housing programs to take care of them.

I would hope we will not wait for a year or two to attempt to meet the problems of this particular group.

Mr. SPARKMAN. Mr. President, I yield back the remainder of my time.

Mr. TOWER. I yield back the remainder of my time.

The PRESIDING OFFICER (Mr. MATHIAS). All time having been yielded back, the question is on agreeing to the amendment of the Senator from Texas (Mr. TOWER).

Mr. GOODELL. I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. BYRD of West Virginia. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Indiana (Mr. BAYH), the Senator from Missouri (Mr. EAGLETON), the Senator from Mississippi (Mr. EASTLAND), the Senator from North Carolina (Mr. ERVIN), the Senator from Tennessee (Mr. GORE), the Senator from Alaska (Mr. GRAVEL), the Senator from Indiana (Mr. HARTKE), the Senator from Iowa (Mr. HUGHES), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Louisiana (Mr. LONG), the Senator from Washington (Mr. MAGNUSON), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Wyoming (Mr. MCGEE), the Senator from South Dakota (Mr. MCGOVERN), the Senator from New Mexico (Mr. MONTOYA), the Senator from Utah (Mr. MOSS), the Senator from Maine (Mr. MUSKIE), the Senator from Rhode Island (Mr. PELL), the Senator from Georgia (Mr. RUSSELL), the Senator from Mississippi (Mr. STENNIS), the Senator from Missouri (Mr. SYMINGTON), the Senator from Maryland (Mr. TYDINGS), the Senator from New Jersey (Mr. WILLIAMS), the Senator from Texas (Mr. YARBOROUGH), and the Senator from Ohio (Mr. YOUNG) are necessarily absent.

I further announce that, if present and voting, the Senator from North Carolina (Mr. ERVIN), the Senator from Washington (Mr. MAGNUSON), the Senator from New Jersey (Mr. WILLIAMS), the Senator from Missouri (Mr. SYMINGTON), and the Senator from Louisiana (Mr. LONG) would each vote "yea."

Mr. GRIFFIN. I announce that the Senator from Colorado (Mr. ALLOTT), the Senator from Delaware (Mr. BOGGS), the Senators from Arizona (Mr. FANNIN and Mr. GOLDWATER), the Senator from Oregon (Mr. PACKWOOD), the Senator from California (Mr. MURPHY), the Senator from Illinois (Mr. SMITH) and the Senators from Pennsylvania (Mr. SCHWEIKER and Mr. SCOTT) are necessarily absent.

The Senator from Vermont (Mr. AIKEN) and the Senator from Oklahoma (Mr. BELLMON) are absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Kentucky (Mr. COOPER) and the Senator from Ohio (Mr. SAXBE) are retained on official business.

If present and voting, the Senator from Colorado (Mr. ALLOTT) would vote "yea."

On this vote the Senator from Delaware (Mr. BOGGS) is paired with the Senator from Pennsylvania (Mr. SCOTT). If present and voting, the Senator from Delaware would vote "yea" and the Senator from Pennsylvania would vote "nay."

On this vote, the Senator from South Dakota (Mr. MUNDT) is paired with the Senator from California (Mr. MURPHY). If present and voting, the Senator from South Dakota would vote "yea" and the Senator from California would vote "nay."

The result was announced—yeas 40, nays 20, as follows:

[No. 330 Leg.]

So Mr. TOWER'S amendment was agreed to.

Mr. JAVITS. Mr. President, I send an amendment to the desk for myself, the Senator from Minnesota (Mr. MONDALE), and the Senator from New York (Mr. GOODELL), and ask that it be read.

The PRESIDING OFFICER. The amendment offered by the Senator from New York will be stated.

The legislative clerk proceeded to read the amendment.

Mr. JAVITS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and, without

objection, the amendment will be printed in the RECORD.

The amendment is as follows:

On page 107, after line 8, add the following new section:

UNITED NATIONS DEVELOPMENT DISTRICT

Sec. 1009. Part A of Title I of the Housing Act of 1949 is amended by adding at the end thereof a new section, as follows:

"UNITED NATIONS DEVELOPMENT DISTRICT

"SEC. 119. Notwithstanding any other provision of this title, the Secretary is authorized to make, subject to the limitation on loan payments herein below specified and such other conditions and requirements as he may deem advisable, temporary and definitive loans, in accordance with section 102, to the United Nations Development Corporation, created and operating under chapter 345, Laws of New York, 1968, as amended. Such loans shall be for a project or projects consisting of the development of the United Nations Development District, as defined in said chapter 345, as amended, in conformity with a development plan or plans that shall be approved after public hearings pursuant to said chapter 345, as amended. Such project or projects may include, but not be limited to, the acquisition, clearance, preparation, improvement and development of real property and the construction of public and other facilities and buildings and relocation housing within said district. The Secretary shall not make any such loan unless he has obtained adequate assurance that a relocation program and assistance will be provided similar to that required for urban renewal projects by sections 105(c) and 114. The Secretary shall not make grants of any type, relocation payments or advances for planning to said Corporation. Furthermore, the Secretary shall not make any loan payments under any loan contract executed under this section, except to the extent necessary to pay or cause to be paid to holders (or to their agents or designees) of obligations of the Corporation the principal of and the interest on such obligations pursuant to any contract or other instrument executed by the Secretary under subsection (c) of section 102 hereof. Except as the Secretary shall deem necessary, determinations, approvals or requirements under this title pertaining to loans for other projects shall not be applicable to loans under this section. Wherever 'local public agency' or the plural thereof appears in section 102 it shall be construed to include said Corporation. The interest on any obligations issued by said Corporation for any project assisted pursuant to this section shall not be exempt from taxation under section 102(g) of this title or section 103 of the Internal Revenue Code of 1954, as amended."

Mr. JAVITS. Mr. President, if I may have the attention of the Senate——

The PRESIDING OFFICER. Will the Senator from New York suspend for an inquiry from the Chair? Is this an amendment which the Senator was to offer upon which there is an hour limitation?

Mr. JAVITS. It is, and I yield myself 5 minutes.

Mr. President, this amendment is an element—I emphasize that word—in a large plan which I will describe. The purpose of the amendment and the amendment's terms provide that the Secretary of HUD is authorized—I emphasize the word "authorized," because it is important—on terms and conditions which he considers proper, to guarantee the bonds, which will probably be mortgage bonds, of a public benefit corporation called the United Nations Development Corporation. The Corporation is organized under a special act of the Legislature of the State of New York and is headed by John J. McCloy, who is very well known to many Members of the Senate. The purpose of this corporation will be to develop two square blocks across the street from the United Nations in connection with United Nations uses. Indeed, the United Nations uses will occupy approximately 60 percent of the development when it first opens, and this percentage will grow substantially as the United Nations needs growth.

The purpose is to have an office building, a hotel, places for visitors, a bus terminal—all of which relate to the tremendous flow of people to and from the United Nations. It is expected to be a very distinguished development. One of the concepts is that it will all be under glass.

The Governor of the State of New York and the mayor of the city of New York have recommended it to us.

An element in the plan is for the Secretary of Housing and Urban Development to guarantee the bonds if he feels that this is the desirable thing to do, that the security is adequate, and so forth.

This amendment has been discussed by me and by others with the manager of the bill and with the Secretary of State—indeed, I just talked with him tonight about it—and with the ranking minority member of the committee. It goes again to the proposition that when we received the United Nations in the United States, we said that we would do everything we could to accommodate them suitably. The needs of the organization have grown very large, and this represents what should be an entirely self-liquidating project. This is a nonprofit corporation. But in order to do what must be done, in order, as it were, to redeem our assurances to the organization, this great project is going to get underway; and the authority in the Secretary of Housing and Urban Development represents an important element in this project.

I would say, too, that all the people concerned are very competent and are people of great experience in this field.

I wish to state that it is entirely understood that the Secretary may refuse to exercise his authority or that he may impose such conditions that the whole thing cannot be done; but if this amendment to the housing bill which is before us, passes he will have the authority if he wishes to exercise it.

Mr. TOWER. Mr. President, will the Senator yield?

Mr. JAVITS. I yield.

Mr. TOWER. Speaking in behalf of myself and I think also in behalf of the distinguished chairman, I believe that the committee probably is willing to take this amendment to conference.

Mr. JAVITS. It is entirely agreeable to me.

Mr. TOWER. If the Senator would like to yield back the remainder of his time——

Mr. JAVITS. I yield back the remainder of my time.

Mr. SPARKMAN. Mr. President, I agree with the Senator from Texas and yield back the remainder of my time.

Mr. GOODELL. Mr. President, will the Senator yield me one-half minute?

Mr. ALLEN. Mr. President,——

Mr. SPARKMAN. One half a minute? I yield 1 whole minute to the Senator from New York. [Laughter.]

Mr. GOODELL. I thank the Senator. To reward him for his generosity, I shall use only one-half a minute.

Mr. President, I have been involved in this deeply. It is a very important issue. There is great difficulty in providing housing and office space for people in the United Nations. This project is self-liquidating. I am a cosponsor of the amendment and wholeheartedly support it.

Mr. PERCY. Mr. President, will the Senator from Alabama yield me 1 minute?

Mr. SPARKMAN. I yield 1 minute to the Senator from Illinois.

Mr. PERCY. Mr. President, I want to associate myself with support of an amendment to the Housing Act of 1970.

This amendment amounts to a pledge of faith in the U.N. in this, its 25th year.

I say pledge of faith because the bill calls for little more. It provides only a guarantee of taxable UNDC bonds in the case of default. It provides no loans, no grants. The guarantee is conditioned by authority for the Secretary of Housing and Urban Development to set terms which will insure prudent expenditures. The guarantee has minimal risk as the project has been designed—both architecturally and economically—to be self-sustaining.

This U.S. pledge is to me a renewal of our commitment to establish a United Nations Organization—an organization that has over the last two and one-half decades served as the principal forum for international discussion. In supporting this amendment, I am, in my own mind, simply following through on the decision we made more than two decades ago, to support the development of a United Nations Organization with headquarters in New York City.

I am not unaware of the shortcomings of the U.N.; I do not consider it a panacea for the solution of our pressing world problems. But what alternative do we have? In a year when we can appropriate $70 billion from military equipment and personnel, we can afford to accept this amendment which will in all likelihood not cost a cent and which might well take us just one step more toward peace.

Mr. MONDALE. Mr. President, I was pleased to have the cosponsorship of Senator JAVITS when I introduced S. 4145, and I am happy to support him in offering that bill as an amendment to the Housing Act of 1970.

In November we will be celebrating the 25th anniversary of the founding of the United Nations. There is no more appropriate way to commemorate this anniversary than the adoption of this amendment which will do so much to enhance the ability of the United Nations to perform the functions for which it was created. Candor requires an admission that the United States has failed fre-

quently in its primary role of maintaining peace throughout the world. It is easy, however, to dwell upon its failures and overlook its many successes. The mere fact the United Nations has endured for a quarter century that has seen hot and cold wars, the disintegration of empires, and the emergency of new nations which have more than doubled its original membership, is ample evidence of the U.N.'s inherent viability. It was in 1945, and is now in 1970, man's best hope for avoiding world conflict through the development of an international rule of law that will guarantee peace among nations great and small.

The purpose of S. 4145 is to provide a Federal guarantee of taxable bonds to be issued by the United Nations Development Corporation to finance a self-sustaining complex created to provide U.N. supporting facilities in accordance with a plan approved by the city of New York. Included are a visitors center, offices for foreign missions, a hotel for visiting dignitaries and housing for those associated with the U.N. and living in New York City. Secretary Rogers has expressed his strong support for the proposal and has requested the help of Secretary Romney in implementing it. The project is to be carried out by a nonprofit public benefit corporation created by special act of the State of New York. The membership appointed by Mayor Lindsay and Governor Rockefeller includes John J. McCloy as chairman of the board.

The plan for relocation is unique and surpasses Federal urban renewal requirements. The proposed legislation would add a new section 119 to the Housing Act of 1949 authorizing the Secretary of Housing and Urban Development to make commitments for loans to the corporation to finance the acquisition and clearance of real property, and the development and construction of buildings and other facilities within the United Nations Development District in New York in accordance with the approved development plan.

Commitments for loans under section 119 would be the same as those which the Secretary is authorized to make for urban renewal projects assisted under the 1959 Housing Act. It is not anticipated, however, that any loans would in fact be made because the corporation, using the security of the commitment, will be able to obtain such funds from private investors. The effect of this arrangement is a Federal guaranty of the payment of interest and principal of the corporation's obligations. In addition, no advances for planning, no project grants or capital grants would be involved.

It should be emphasized the amendment under consideration does not commit the Federal Government to anything, but merely authorizes the Secretary of Housing and Urban Development to guarantee taxable bonds that will be issued to finance the United Nation's Development District "subject to such conditions and requirements as he may deem advisable." It is rare that a project of this kind can be constructed without the use of public funds for direct grants or loans. All the proposed amendment involves is a Federal guaranty of the U.N. Development Corporation's obligations which imposes only a contingent liability on the Federal Government in the event of a default. The likelihood of such a default is extremely remote since the projected net revenues are more than adequate to meet annual debt service requirements.

I urge adoption of the amendment.

Mr. SPARKMAN. Mr. President, I yield back the remainder of my time.

Mr. JAVITS. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER (Mr. MATHIAS). The question is on agreeing to the amendment of the Senator from New York.

Those who favor the amendment will say "aye." Opposed, "no."

Mr. ALLEN. Mr. President, I call for a division.

The PRESIDING OFFICER. A division is called for.

On a division, the amendment was agreed to.

Mr. ALLEN. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER (Mr. MATHIAS). The Chair advises the Senator from Alabama that his request for the yeas and nays is too late. The result of the division has been announced.

The bill is open to further amendment.

Mr. TOWER. Mr. President——

Mr. MANSFIELD. Mr. President, I move to reconsider the vote——

Mr. MANSFIELD, Mr. FULBRIGHT, and Mr. PASTORE asked for the yeas and nays.

Mr. JAVITS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. For what purpose does the Senator state his parliamentary inquiry?

Mr. JAVITS. I would like to say to the majority leader that I am entirely agreeable to having the yeas and nays. I do not wish to shut off any Member, but I hope that we will follow what is proper procedure.

I ask the Chair, has the proper procedure been followed in seeking unanimous consent? Should the previous action be reconsidered and then have the yeas and nays asked for?

The PRESIDING OFFICER (Mr. MATHIAS). The Chair would advise the Senator from New York that the yeas and nays could be obtained either by unanimous consent or upon motion of the distinguished Senator from Montana to reconsider the vote.

Mr. JAVITS. Mr. President, I would suggest respectfully to the Senator, then, that we have the yeas and nays upon the motion to reconsider.

Mr. MANSFIELD. Mr. President, I withdraw my request.

Mr. President, I ask unanimous consent that it be in order to have the yeas and nays and I ask unanimous consent that the yeas and nays be ordered.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

Mr. TOWER. Mr. President, a parliamentary inquiry. What are the yeas and nays ordered on?

The PRESIDING OFFICER. They are ordered on the amendment offered by the Senator from New York.

Mr. TOWER. I thank the Chair.

Mr. JAVITS. Mr. President, a parliamentary inquiry. A vote "yea" is a vote for the amendment?

The ACTING PRESIDENT pro tempore (Mr. METCALF). The Senator is correct.

The question is on agreeing to the amendment of the Senator from New York.

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. BYRD of West Virginia. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Indiana (Mr. BAYH), the Senator from Missouri (Mr. EAGLETON), the Senator from Mississippi (Mr. EASTLAND), the Senator from North Carolina (Mr. ERVIN), the Senator from Tennessee (Mr. GORE), the Senator from Alaska (Mr. GRAVEL), the Senator from Indiana (Mr. HARTKE), the Senator from Iowa (Mr. HUGHES), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Louisiana (Mr. LONG), the Senator from Washington (Mr. MAGNUSON), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Wyoming (Mr. MCGEE), the Senator from South Dakota (Mr. MCGOVERN), the Senator from New Mexico (Mr. MONTOYA), the Senator from Utah (Mr. MOSS), the Senator from Maine (Mr. MUSKIE), the Senator from Rhode Island (Mr. PELL), the Senator from Georgia (Mr. RUSSELL), the Senator from Mississippi (Mr. STENNIS), the Senator from Missouri (Mr. SYMINGTON), the Senator from Maryland (Mr. TYDINGS), the Senator from New Jersey (Mr. WILLIAMS), the Senator from Texas (Mr. YARBOROUGH) and the Senator from Ohio (Mr. YOUNG) are necessarily absent.

I further announce that, if present and voting, the Senator from North Carolina (Mr. ERVIN) and the Senator from Missouri (Mr. SYMINGTON) would each vote "nay."

I further announce that, if present and voting, the Senator from Washington (Mr. MAGNUSON), the Senator from New Jersey (Mr. WILLIAMS), and the Senator from Louisiana (Mr. LONG) would each vote "yea."

Mr. GRIFFIN. I announce that the Senator from Colorado (Mr. ALLOTT), the Senator from Delaware (Mr. BOGGS), the Senators from Arizona (Mr. FANNIN and Mr. GOLDWATER), the Senator from Oregon (Mr. PACKWOOD), the Senator from California (Mr. MURPHY) and the Senator from Illinois (Mr. SMITH), and the Senators from Pennsylvania (Mr. SCHWEIKER and Mr. SCOTT) are necessarily absent.

The Senator from Vermont (Mr. AIKEN) and the Senator from Oklahoma (Mr. BELLMON) are absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Kentucky (Mr. COOPER) and the Senator from Ohio (Mr. SAXBE) are detained on official business.

If present and voting, the Senator from South Dakota (Mr. MUNDT) would vote "nay."

On this vote, the Senator from Delaware (Mr. BOGGS) is paired with the Senator from Colorado (Mr. ALLOTT). If present and voting, the Senator from Delaware would vote "yea" and the Senator from Colorado would vote "nay."

The result was announced—yeas 21, nays 39, as follows:

[No. 331 Leg.]

YEAS—21

| | | |
|---|---|---|
| Bennett | Griffin | Mondale |
| Brooke | Harris | Nelson |
| Case | Hart | Percy |
| Church | Hatfield | Proxmire |
| Cranston | Jackson | Ribicoff |
| Fulbright | Javits | Sparkman |
| Goodell | Mathias | Stevens |

NAYS—39

| | | |
|---|---|---|
| Allen | Ellender | Metcalf |
| Baker | Fong | Miller |

| Ervin | Moss | Williams, N.J. |
| Fannin | Mundt | Yarborough |
| Goldwater | Murphy | Young, Ohio |
| Gore | Muskie | |
| Gravel | Packwood | |

So Mr. JAVITS' amendment was rejected.

Mr. TOWER. Mr. President, I yield myself 2 minutes on the bill.

The ACTING PRESIDENT pro tempore. The Senator from Texas is recognized.

Mr. TOWER. Mr. President, the new housing program which this bill authorizes has a very objectionable feature which I would like to bring to the Members' attention. This program would be financed outside of the normal appropriation committee channels—through so-called back-door financing.

Section 504 of the bill would allow HUD to contract to pay $15 million a year for 3 years in housing allowances to low-income families for use in paying their rents. Once the Secretary of Housing and Urban Development contracts to make these payments, and he could do so at any time without further approval, the appropriation committees and the Congress would be obligated to appropriate the necessary moneys.

There is nothing about this program which can justify bypassing of the customary procedure of allowing the substantive committee to establish the maximum authorization and the appropriation committee to determine yearly funding levels. The housing allowance program is called an experimental research program. However, all of HUD's other research activities must be financed through the regular appropriations process. If this program is allowed to receive back-door financing there is no good reason to deny it to all other new programs.

Mr. President, I had intended to offer an amendment which would have provided that the money should be appropriated to provide a sum not in excess of $45 million to be appropriated. However, in view of the fact that this is part of the administration measure and it will be in conference and we will discuss it in conference, I will not offer the amendment at this time.

Mr. President, I send an amendment to the desk and ask that it be stated.

The ACTING PRESIDENT pro tempore. The amendment will be stated.

The assistant legislative clerk read as follows:

INTERSTATE LAND SALES FULL DISCLOSURE ACT

SEC. 1009. Section 1406 (5) of the Interstate Land Sales Full Disclosure Act is amended by inserting after the first comma the following: "the existence of any unusual conditions relating to noise or safety which affect the subdivision and are known to the developer,".

The ACTING PRESIDENT pro tempore. How much time does the Senator yield himself?

Mr. TOWER. Mr. President, I yield myself such time as I may require.

The ACTING PRESIDENT pro tempore. The Senator from Texas is recognized.

Mr. TOWER. Mr. President, this amendment is designed to fill a void in the current Interstate Land Sales Full Disclosure Act. It would require disclosure, for example, in the vicinity of military airports to people who are purchasing property there of potential noise or safety hazard.

This disclosure would have to be made. Under the present provision of the act, I do not believe this has been required.

We have had trouble at Williams Air Base, for example, where a developer sells property close to a runway where usually most accidents occur with student pilots and where the residents started to complain about the noise.

We have hundreds of flights a day in these military airports. It is kind of an encroachment on the military function.

I believe the committee is prepared to accept the amendment. I wanted to make this bit of legislative history.

Mr. SPARKMAN. Mr. President, I yield myself 1 minute.

The ACTING PRESIDENT pro tempore. The Senator from Alabama is recognized for 1 minute.

Mr. SPARKMAN. Mr. President, I am in agreement with the Senator from Texas. I hope the amendment will be agreed to.

Mr. TOWER. Mr. President, I yield back the remainder of my time.

Mr. SPARKMAN. Mr. President, I yield back the remainder of my time.

The ACTING PRESIDENT pro tempore. All time having expired, the question is on agreeing to the amendment of the Senator from Texas.

The amendment was agreed to.

Mr. JAVITS. Mr. President, I send to the desk an amendment and ask that it be stated.

The ACTING PRESIDENT pro tempore. The amendment will be stated.

The assistant legislative clerk read as follows:

On page 18, line 3, strike the word "periodically" and insert in lieu thereof the words "at least annually" and on line 7 after the word "Act" add the following language: "The Secretary in determining the area's prototype costs shall take into account the extra durability required for economical maintenance of assisted housing, the provision of amenities designed to guarantee safe and healthy family life and neighborhood environment. Further, in developing such prototypes, emphasis should be given to encouraging good design as an essential component of such housing and to producing housing which will be of such quality as to reflect the architectural standards of the neighborhood and community".

Mr. JAVITS. Mr. President, I yield myself 2 minutes.

The ACTING PRESIDENT pro tempore. The Senator from New York is recognized for 2 minutes.

Mr. JAVITS. Mr. President, this is simply an amendment to describe more accurately what is meant by a prototype, which is now going to be a new standard to be used in determining the cost limits in a given area.

It adds standard language which is concerned with enlightened community construction, and so forth.

The only substantive point contained in this is that instead of saying that the prototype costs should be determined periodically, which leaves the question open, the amendment provides that prototype costs should be determined at least annually so that municipalities know where they are at regular intervals.

Mr. SPARKMAN. Mr. President, I yield myself 1 minute.

The ACTING PRESIDENT pro tempore. The Senator from Alabama is recognized for 1 minute.

Mr. SPARKMAN. Mr. President, on my part I think it is good language. I, for my part, would be willing to accept the amendment.

Mr. TOWER. Mr. President, I associate myself with the statement of the Senator from Alabama.

Mr. SPARKMAN. Mr. President, I yield back the remainder of my time.

Mr. JAVITS. Mr. President, I yield back the remainder of my time.

The ACTING PRESIDENT pro tempore. All time having expired, the question is on agreeing to the amendment of the Senator from New York.

The amendment was agreed to.

Mr. JAVITS. Mr. President, will the Senator yield to me for 1 minute on the bill?

Mr. TOWER. I yield 1 minute to the Senator.

LEASED HOUSING—SECTION 23

Mr. JAVITS. Mr. President, the leasing program in low-rent public housing has proved a very valuable tool in making housing available quickly. Since the program's inception in 1966, over 16,000 units have been leased to public housing tenants in the northeastern region. In the fiscal year 1969, leased units accounted for over 30 percent of the total units of public housing provided under

all public housing programs in the northeastern region.

I was pleased to see that the committee bill clarified the authority of local public housing agencies to lease units in other structures in addition to existing structures and extended the initial term and renewal period of the lease from 5 to 10 years. These changes will be very helpful in making the program work more effectively.

However, recent indications are that HUD is deemphasizing the leased housing program. This, despite the fact that even in HUD's view, the program had become the most versatile of housing assistance activities directed toward low-income families and has proven to be a most effective method of providing a supplementary form of low-rent housing.

In fiscal 1969, units under contract totaled more than 54,000. Unfortunately, for fiscal year 1970, HUD established a production target of only 16,000 leased units under the program. The estimates for fiscal year 1971 are that approximately 14,000 units will be developed through the leasing program. It should be pointed out that the annual contributions contracts in the leased housing program are authorized within the total authorization for the low-rent public housing program. Thus it has been an administrative determination as to how much low-rent public housing will be done on a leasing basis each year.

I have checked into the situation on several occasions and have been told that despite the success and value of the leasing program, there are no plans to expand the program or to stop its contraction. The reasons given are that existing leased units are not counted for the established 10-year national housing goal and that since annual contributions allocated to the leasing program develop into budget outlays more quickly than those allocated to other low-rent housing programs, there is concern with possible inflationary impact.

The short answer as to why the leasing program results in faster budget outlays is that it is a quicker and more effective way to make housing available to low-rent tenants. This is one of its advantages rather than a disadvantage. I feel that HUD is ill-advised to be deemphasizing this program at this time. In addition, this administrative decision seems counter to the intent of Congress when enacting the program and also when making improvements in the program as the committee has done in this bill. I am advised that the Housing Subcommittee of the House Banking and Currency Committee has included a provision in its proposed bill which would require that 30 percent of the annual contributions authorization in the low-rent public housing programs be used for the leased public housing program.

I would like to ask the chairman of the committee whether he feels it would be appropriate for the same directions to be placed in the Senate bill or whether he feels the better course for us to pursue today is to express our desire that HUD make greater use of the leasing program. I would hope that in any case, the committee would give favorable consideration to the provisions of the House bill governing leased housing if the issue is present at the conference.

I ask unanimous consent that a memorandum from HUD dated February 17, 1970, discussing the leasing program be made part of my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT,
*Washington, D.C., February 17, 1970.*

Hon. JACOB K. JAVITS,
*U.S. Senate, Washington, D.C.*

DEAR SENATOR JAVITS: Enclosed per your request are answers to the questions posed by Miss Lattin of your staff on February 13, 1970.

We hope these will prove to be satisfactory.

If you desire additional information, please contact me.

Sincerely yours,

ROBERT M. CLARK,
*Senior Assistant for Congressional Relations.*

---

THE LEASED HOUSING PROGRAM

(Answers to questions posed by Miss Lattin on February 13, 1970)

1. Statement of the problems that HUD has had with the Leased Housing Program nationally, if any.

(a) The program requires staff skills that Housing Authorities ordinarily have not had. This has been a major factor in many localities contributing to delays in leasing units after annual contributions contracts have been approved.

(b) There are operations problems such as those involved in maintaining satisfactory relations with owners. And one of the more difficult, sometimes, is the high cost of utilities in some of the older, single family dwellings or row houses that are leased.

(c) While they have not yet become acute, some difficulties are anticipated in the renegotiation of leases. In part, these would be the result of the legal provision under which annual contributions are a function of the cost of building public housing in the locality rather than the cost of operation.

(d) As compared with the conventional low-rent program the leasing program is in a disadvantageous position as to the proportion of the lowest income families that can be accommodated. This is primarily the result of the authorization to pay full real property taxes, but to a lesser extent the return required by the owner is also a factor.

(e) There are several difficult policy problems associated with contributions for leasing notably, the extent to which it should be encouraged, and the conditions under which longer term commitment and rent renegotiation and adjustment provisions may be authorized. During recent months, of course, developers have also had difficulty in obtaining the required mortgage financing.

NOTE.—We have not yet been able to clarify the impact of the Housing and Urban Development Act of 1969 on the leasing program. It may be that problems mentioned under c and d, above, will be mitigated by provisions of that Act relating to annual contributions.

2. Has the Leased Housing Program been successful?

The program has proven to be a most effective method of providing a supplementary form of low-rent housing and has become a major element of the Department's production effort. In hearings on the Housing and Urban Development Act of 1965 through which the program was initiated it was estimated that the annual contributions authorization of the Act would provide for development of 60,000 dwellings for each of the subsequent four years, of which 10,000 would be derived from the Leased Housing Program. By June 30, 1968, a full year prior to the date by which 40,000 leased dwellings were to be programed, a total of 42,000 units had been placed under annual contributions contract. The following table compares the annual program level estimates and actual accomplishments for the first four years:

Fiscal year:

| | HUD estimates | Units placed under ACC |
|---|---|---|
| 1966 | 5,000 | 6,975 |
| 1967 | 10,000 | 15,000 |
| 1968 | 10,000 | 19,824 |
| 1969 | 15,000 | 54,054 |
| Total | 40,000 | 96,327 |

As of June 30, 1969, 46,785 dwelling units had been leased from owners and were available for occupancy to low-income families. This is a measure of the high degree of acceptance of the program by local public officials and real estate and home building interests that apparently stems primarily from the capacity of the leasing program to provide a substantial role in the solution of the housing problems among localities also to a very large extent can be traced to the legislative elimination of several extra operational restrictions applicable to other low-rent housing—Workable Program, tax exemption, Cooperation Agreement and 20 percent gap requirements. Several States, notably California and Mississippi, that, by law require referenda for the construction or acquisition of public housing have recognized these special features and have ruled that their referendum laws are not applicable to it.

Working guidelines covering the program were issued in October 1965, slightly more than two months after the legislative authorization was passed. In their development, again every effort was made to build into the program a reasonable degree of flexibility. To this end:

Minimum property standards were set forth in terms sufficiently general to permit qualification of any type of dwelling that provides decent, safe and sanitary accommodations.

Tenant selection by the owner, by the Housing Authority or by the owner from applicants supplied by the Authority was authorized.

Provisions were made for the development of leasing arrangements within the framework of the private landlord-tenant relationship.

Annual Contributions Contracts were so drawn as to authorize Local Authorities themselves to vary, within limits, the unit size composition of projects.

As a consequence of this generous endowment of legislative and administrative flexibility, leased housing has become, perhaps, the most versatile of housing assistance activities directed toward low income families. This is evident first from the nature and variety of Housing Authority programs:

In the typical program the Authority leases predominately vacant units in older structures that are in standard condition. They would include single family dwellings, row houses and apartments in multi-family structures. In a majority of cases the lease would require the owner to make minor repairs prior to acceptance of the unit for occupancy and in a few situations the owner would agree to fairly extensive rehabilitation.

The program in Fall River, Massachusetts, has been developed largely through the use of rehabilitated dwellings. It has become an effective instrument for neighborhood improvement.

The leased housing legislation specifies the use of "existing" units, but a number of Housing Authorities have found local builders who have been willing to construct dwell-

ings for use in the program without prior commitment of Federal annual contributions to the project.

In Holyoke, Massachusetts, an older hotel has been very extensively renovated to provide apartment accommodations for elderly familes.

The Crazy Water Hotel in Mineral Wells, Texas, for some time has been used as a residential hotel for elderly persons with cooking and dining facilities that are on a congregate basis. Through assistance available under the Leased Housing Program these accommodations can be made available to low-income senior citizens.

In Pinellas County, Florida, very comfortable dwellings with an attractive and pleasant living environment have been developed for elderly families through use of mobile homes.

Another very interesting concept that is presently being explored is the use of the leasing program to stimulate and facilitate homeownership. In its simplest form this is done through inclusion in Housing Authority leases of an option to purchase the dwelling in favor of the occupant. More sophisticated arrangements, however, are being worked out for pilot programs in Los Angeles and Boston. The arrangements in Los Angeles involve development of dwellings, using Section 221(d)(3) market interest rate financing, on behalf of a non-profit corporate owner which enters into a lease-purchase agreement with low-income families certified eligible by the Housing Authority. The Authority also enters into an Assistance Agreement with the owner which makes available subsidies under the Section 23 authorization to cover the difference between the "economic rent" payment needed and the amount low-income occupants can afford to pay. Under the lease-purchase agreement occupants are required to purchase the dwellings when they can afford to do so and they receive the benefit of the amortization payments on the mortgage during the period covered by the Assistance Agreement. In the Boston program leasing subsidies are used by the Housing Authority to help low-income families to make payments necessary to purchase cooperative membership, again through the device of an Assistance Agreement between the Authority and the cooperative.

The amendment of Section 23 through the addition of Subsection (g) by the Housing and Urban Development Act of 1968 adds a new dimension to homeownership programs. Under this provision Housing Authorities may purchase leased properties for resale to tenants. A most interesting feature of it is that the terms of the resale are to be such that tenants may make the purchase without undue financial hardship and might include deferment of any down payment and elimination of, or adjustment in, interest payments for a temporary period. A pilot program to make use of this authorization is being developed in Salisbury, Maryland.

Section 23 leasing has been a most successful program for the promotion of several of the Department's significant social goals, notably the provision of scattered site housing for low-income families and housing accommodations for larger families. Local Authority capacity to lease scattered properties is a result of public acceptance of the leasing program which, in turn, has been enhanced by the fact that this is a program through which the institutional image that has been associated with public housing can be avoided. The program's ability to accommodate larger families, of course, derives mainly from the possibility of utilizing older standard houses that are readily available in the rental market of many localities. Over 50 percent of the units programmed for leasing have been three bedroom dwellings, or larger.

3. What was the funding level appropriated by the Congress for the Leased Housing Program in FY '70?

Annual Contributions Contracts with Local Housing Authorities are executed on the basis of authorizations included in basis HUD legislation and those authorizations do not distinguish between the Leased Housing Program and other program administered under the United States Housing Act of 1937, as amended. For Fiscal Year 1970, the HUD Act of 1969 provided an increased authorization for the low-rent program of $225,000,000. Administratively HUD has established a production target of 16,000 leased units to be placed under Annual Contributions Contract in Fiscal Year 1970.

4. How much has been requested for this program in FY '71?

The HUD Act of 1969 provides an increased annual contributions authorization that will be available July 1, 1970 of $170,000,000. With this authorization it is estimated that 106,000 low-rent housing units may be placed under Annual Contributions Contract of which approximately 14,000 will be developed through the leasing program.

5. Are there any Congressional restraints on the number of leased housing units that can be approved each year? A dollar limitation?

As mentioned above, the program level for low-rent housing is established through annual contributions authorizations. Allocations to programs financed through those authorizations are administrative.

6. and 7. If the Leased Housing Program has been successful, why hasn't more money been requested for FY 71?

Why has the Bureau of the Budget been reluctant to raise the ceiling for this program?

There have been two significant reasons for restraint in the allocation of resources to the leasing program:

(a) Existing units that are leased and not counted toward the established 10-year national housing goal.

(b) Annual Contributions allocated to the leasing program develop into budget outlays more quickly than those allocated to other low-rent housing program. The Bureau of the Budget has been concerned with the inflationary impact of Federal expenditures on the economy.

Mr. SPARKMAN. Mr. President, I send to the desk an amendment and I ask that it be read by the clerk.

The ACTING PRESIDENT pro tempore. The amendment will be stated.

The amendment was read, as follows:

On page 23, strike out lines 11 through 19 and renumber succeeding sections accordingly.

Mr. SPARKMAN. Mr. President, during the consideration of 1970 Housing and Urban Development legislation by the committee, it was brought to our attention that certain expenditures made by certain colleges and universities in connection with urban renewal projects to expand university and college campuses were not considered by the Department of Housing and Urban Development to be eligible for local credits.

The committee included a provision in the bill before us to make these credits eligible.

Subsequent to committee action and since reporting the bill to the Senate, I have received a letter dated September 23, 1970, from the Department of HUD stating that this matter can be handled administratively and that there is no need for legislation in this area. Accordingly I offer an amendment to S. 4368 to strike out the provision dealing with this matter. Specifically, my amendment merely deletes section 212 from the bill.

I have discussed this matter with the minority and there is no objection to the amendment.

I move the adoption of my amendment.

Mr. President, I yield back the remainder of my time.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the amendment of the Senator from Alabama.

The amendment was agreed to.

Mr. SPARKMAN. Mr. President, I send to the desk a technical amendment.

The ACTING PRESIDENT pro tempore. The amendment will be stated.

The assistant legislative clerk read as follows:

On page 72, line 8, after "approved" insert "or".

Mr. SPARKMAN. I yield back my time on the amendment.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. DODD. Mr. President, I am very grateful to the distinguished chairman of the Senate Banking and Currency Committee and the members of the committee for including as an amendment to the Housing and Urban Development Act of 1970 a bill which I introduced to increase to $50 million the $25 million ceiling on guaranteed loans to nonprofit hospitals.

I know that the members of the committee and the Members of the Senate are aware of the great public demand for hospital services which present facilities are unable to supply.

Medicare and medicaid programs have brought hospital services to persons who at one time could not afford proper treatment, and many cases that were once treated at home or in a doctor's office now look to a hospital for health care.

The resultant pressure on existing hospital facilities has constricted the operations of some of our finest institutions and this situation can be alleviated only by the construction of new facilities or the expansion of existing plants.

The adoption of the $25 million guaranteed hospital loan program in the Housing Act of 1968 was a landmark provision.

I believe that the $50 million ceiling contained in the bill before us today will go even further toward insuring that hospitals all across the country can obtain the financing they need in order to proceed with construction plans and thereby bring to all Americans the health care that our medical technology makes possible.

Again, I am very pleased that the Senate Banking and Currency Committee has included my bill as an amendment to the important Housing and Urban Development Act of 1970. With this amendment, hospitals will be able to meet this Nation's vital health needs effeotively and efficiently.

Mr. TOWER. Mr. President, section 112 is my amendment to the FHA title I

mobile home loan program in recognition of the vast promise held out by the modular building concept to bring about true low-cost housing.

The law now allows a loan of up to $10,000 for a conventional mobile home, with a loan amortization period of 12 years and 32 days. However, very recently, mobile dwelling units composed of two or more modules have become very popular. These dwellings are sometimes referred to as "double-wides," and they have been shown to be the most promising approach to low-cost housing that is known today. In this particular instance of a mobile dwelling composed of two or more modules, section 112 would authorize a maximum loan of $15,000, and a 15-year, 32-day, amortization period.

The resourcefulness and initiative of those of our country's housing manufacturers who are now undertaking modular construction probably are nearer the answer to low-cost mass production of housing than any other activity today. Through their efforts we hopefully will see a breakthrough in housing technology and mass production methods.

Modular housing, or houses put together in sections, whether permanently affixed to the land, or movable, can be counted on to bring the cost of housing down significantly, and thus bring it within the reach of this country's lower-income families. Today's mobile home manufacturer is an active participant in pursuing this housing breakthrough, and by adding this particular provision to the law it is my hope that a much more concerted effort will be made in this area.

Mr. President, as many of my colleagues undoubtedly know, the administration is now looking to the mobile home industry to provide a substantial portion of the housing that must be produced during the decade ending in 1978 if the production goal held out by the 1968 Housing Act is to be reached. It is hoped that some 4 million of the 26 million housing unit production goal will be provided by mobile homes. I feel that the most significant part of the mobile home part of the goals achievement will be modular housing. And, I feel it is also very significant that most of these mobile, or mobile/modular, dwelling units will in all probability house those of our country's families at the lower end of the income scale.

Take these figures as such an indication:

The average new mobile home contains about 820 square feet of floor area, and has two bedrooms, kitchen, bath, dinette, living room and is sold complete with furnishings for about $6,000.

The average lot rent upon which a unit is placed runs from $35 to $55.

The median income of mobile home park tenents is around $7,000 per year, and about half of the household heads in mobile homes are under 35.

Hold these figures alongside the $27,000 median price of conventionally built new houses, and consider further that probably half of our country's families cannot afford to pay much more than $15,000 for a home.

The mobile home industry expects to produce around 450,000 units this year, almost double the 1967 production level. But for this housing to have any effect on the pent up housing demand, there must be adequate and reasonably priced financing. To help with this problem, the present statutory restriction on the title I discount, or interest, rate would be superceded by discretionary authority in the Secretary of HUD until January 1, 1972, to set the maximum loan interest rate as necessary to meet the loan market.

Since its enactment into law on December 24, 1969, the title I mobile home loan program has experienced very little lender activity. HUD reports that as of last August, only around 106 loans have been processed. This is mainly because of the present statutory restriction on the title I loan discount rate. The effective net yield of approximately 8 percent per annum under the present law cannot compete with the higher yields available through alternative investments. By authorizing the Secretary of HUD to set loan interest rates as necessary to meet the loan market, as section 112 of the bill would do, we would just be authorizing the Secretary to do what he already can do in the instance of FHA-insured mortgages.

I would like to submit for the record at this point letters to the chairman from HUD Secretary Romney, and representatives of the mobile home and savings and loan industries, concerning my mobile/modular amendment.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

THE SECRETARY OF HOUSING AND URBAN DEVELOPMENT,
*Washington, D.C., September 3, 1970.*

Hon. JOHN SPARKMAN,
*Chairman, Committee on Banking and Currency, U.S. Senate, Washington, D.C.*

DEAR MR. CHAIRMAN: This is in reply to your request for our comments on an amendment proposed by Sen. Tower to the home improvement and mobile home loan program under title I of the National Housing Act.

We have no objection to the provisions of this amendment which would, with respect to mobile homes comprised of two or more modules, extend the maximum loan amount from $10,000 to $15,000 and the maximum maturity from 12 years 32 days to 15 years 32 days.

The proposal would also give the Secretary the discretion until January 1, 1972, to disregard existing title I statutory maximum interest rates and to establish maximum interest rates to meet the loan market. The Secretary now has similar temporary authority to waive statutory maximum interest rates under the mortgage insurance programs of title II of the National Housing Act.

We fully support the principle of flexible interest rates under the title I program. The Administration's proposed Housing and Urban Development Act of 1970, S. 3639, would eliminate statutory maximum interest rates for all FHA programs in favor of administratively established rates. Under current statutory limitations, the effective net yield to lenders on mobile home loans insured under title I would be in the neighborhood of 8 percent per year. Because of these limitations there has been very little activity under the mobile home loan program. The net yield on uninsured mobile home loans is generally at least 12 percent at the present time. We would expect, if this amendment or the provisions of the Administration's bill were enacted, that maximum interest rates somewhat lower than the range of uninsured loan rates would be established. In the interest of the consumer, we would, of course, establish maximum rates as low as would be consistent with an adequate level of activity under the title I program.

Sincerely,

GEORGE ROMNEY.

---

MOBILE HOMES MANUFACTURERS ASSOCIATION,
*Arlington, Va., August 27, 1970.*

Hon. JOHN SPARKMAN,
*Chairman, Subcommittee on Housing and Urban Affairs, New Senate Office Building, Washington, D.C.*

DEAR SENATOR SPARKMAN: I have been advised that your Committee is considering an amendment by Senator John Tower which would revise sections of the Title I, FHA insurance program relating to mobile homes. The Mobile Homes Manufacturers Association and the Trailer Coach Association both support Senator Tower's proposal and thought we might provide you with our reasons.

Since Congress made it possible for FHA to guarantee mobile home financing, we have had little interest on the part of lending institutions because of the maximum interest limitations. If the Secretary of HUD were able to set rates as necessary to meet the mortgage or loan market, we feel that the Title I program would be a great deal more effective. It is our understanding that there have only been about 100 loans since this program went into effect, and all the reaction we have received is that the interest rate limitation has restricted the interest of lenders.

Acually, giving the HUD Secretary this authority would provide an advantage for the consumer, since interest rates under normal financing procedures for mobile homes are considerably higher than other types of mortgage financing. A higher return under Title I would provide an incentive for lenders to enter the field.

We understand that if the legislation is adopted providing for Veterans' Administration involvement in mobile home financing, the regulations will allow for an effective rate of approximately 12% in order to guarantee activity in the program. The conventional money market for mobile homes is currently running in excess of 12%, generally closer to 14%. Higher rates for both FHA and VA would still be more favorable than what buyers are now paying.

We appreciate the interest of your Committee in the mobile home industry, and we likewise appreciate consideration being given to programs which will be more effective in solving some housing problems. We respectfully request support of the amendment by Senator Tower.

Sincerely,

JOHN M. MARTIN,
*Managing Director.*

---

U.S. SAVINGS AND LOAN LEAGUE,
*Washington, D.C., September 2, 1970.*

Hon. JOHN J. SPARKMAN,
*Chairman, Senate Banking and Currency Committee, New Senate Office Building, Washington, D.C.*

DEAR SENATOR SPARKMAN: The purpose of this letter is to comment on the Tower "mobile/modular" amendment which we understand is being considered by the Senate Committee on Banking and Currency. The Tower amendment would improve the overall FHA insurance program for mobile home loans by giving the Secretary of HUD the authority to adjust loan rates in line with market conditions. The amendment would

also set the term of any mobile home loan involving two or more modules at 15 years and increase the loan ceiling on those loans to $15,000.

The program of FHA insurance for mobile home loans, you will remember, was only recently authorized by Congress. Despite the brief time of its existence the fact that virtually no loans have been insured under the program suggests some need to review its provisions. The primary impediment to lender participation at this time is the structure of the maximum allowable interest charges on mobile home loans. The maximum rates as you know are $5.50 per $100 per annum for the first $2,500 loaned, and $4.50 per $100 per annum for any amount over $2,500 up to $10,000. This rate structure applies to loans of all maturities and the peculiarities of its computations result in a lower rate of return to the lender not only as the amount of credit extended increases, but also as the maturity of the contract lengthens. Thus, the "actuarial" or "true" return on a one-year $1,000 loan is 10.57%, but for a ten-year $10,000 loan it is 7.97%. Mobile home loans as you know are generally for larger dollar amounts and for longer maturities.

Further, unlike the other FHA programs where the one-half percent insurance premium cost is borne by the borrower, under the Title I program the premium costs must be borne by the lender. As a result the rate of return is reduced to approximately 7½% on a 10-year, $10,000 loan. By way of contrast the most recent Federal Home Loan Bank Board survey of Interest Cost on Conventional Home Mortgages reported an effective interest rate charge of 8.48% on new single family homes for the month of July. The differential between conventional mortgage and mobile home rates argues well for some readjustment of the Title I rate structure particularly when the differences between the nature of the security offered and the cost of administering a "short term" type lending operation (as compared to real estate lending) are considered. We strongly support, therefore, the Tower amendment which would adjust the Title I mobile home rate structure in line with market rates (at least until January 1, 1972). Since the power of the Secretary of HUD to adjust rates by administrative order has proven workable for other FHA programs we feel there is considerable logic to adopting the same approach for the Title I program.

A second element of the proposed amendment would set the maximum loan amount on mobile home loans involving two or more modules at $15,000 and would permit a maximum maturity on such loans of 15 years. We feel these changes are necessary and desirable as a response to the increased production and corresponding need to finance "double-wide" mobile homes which are, in effect, larger and higher priced structures.

Other organizations have, we are sure, provided you with statistics demonstrating how great the impact of mobile homes has been on the market for low cost housing. The FHA program of insurance for mobile home loans has, we feel, considerable potential for enabling more people to buy and finance their mobile homes. Adoption of the Tower amendment will be of great assistance in making such potential a reality.

Sincerely,

STEPHEN SLIPHER,
*Legislative Director.*

The ACTING PRESIDENT pro tempore. Do Senators yield back their time?

Mr. SPARKMAN. I yield back my time.

Mr. TOWER. I yield back my time.

The ACTING PRESIDENT pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, and was read the third time.

Mr. SPARKMAN. Mr. President, have the yeas and nays been ordered?

The ACTING PRESIDENT pro tempore. The yeas and nays have been ordered.

Senators have yielded back the remainder of their time on the bill.

Mr. SPARKMAN. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized and directed to make necessary clerical and technical changes in the bill when it is engrossed.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

All time having been yielded back, the question is, Shall the bill pass? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. BYRD of West Virginia. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Indiana (Mr. BAYH), the Senator from Missouri (Mr. EAGLETON), the Senator from Mississippi (Mr. EASTLAND), the Senator from North Carolina (Mr. ERVIN), the Senator from Tennessee (Mr. GORE), the Senator from Alaska (Mr. GRAVEL), the Senator from Indiana (Mr. HARTKE), the Senator from Iowa (Mr. HUGHES), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Louisiana (Mr. LONG), the Senator from Washington (Mr. MAGNUSON), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Wyoming (Mr. MCGEE), the Senator from South Dakota (Mr. MCGOVERN), the Senator from New Mexico (Mr. MONTOYA), the Senator from Utah (Mr. MOSS), the Senator from Maine (Mr. MUSKIE), the Senator from Rhode Island (Mr. PELL), the Senator from Georgia (Mr. RUSSELL), the Senator from Mississippi (Mr. STENNIS), the Senator from Missouri (Mr. SYMINGTON), the Senator from Maryland (Mr. TYDINGS), the Senator from New Jersey (Mr. WILLIAMS), the Senator from Texas (Mr. YARBOROUGH), and the Senator from Ohio (Mr. YOUNG), are necessarily absent.

I further announce that, if present and voting, the Senator from North Carolina (Mr. ERVIN), the Senator from Iowa (Mr. HUGHES), the Senator from Louisiana (Mr. LONG), the Senator from Washington (Mr. MAGNUSON), the Senator from Maine (Mr. MUSKIE), and the Senator from New Jersey (Mr. WILLIAMS), would each vote "yea."

Mr. GRIFFIN. I announce that the Senator from Colorado (Mr. ALLOTT), the Senators from Arizona (Mr. FANNIN and Mr. GOLDWATER), the Senator from Oregon (Mr. PACKWOOD), the Senator from California (Mr. MURPHY), the Senator from Illinois (Mr. SMITH), and the Senators from Pennsylvania (Mr. SCHWEIKER and Mr. SCOTT) are necessarily absent.

The Senator from Vermont (Mr. AIKEN) and the Senator from Oklahoma (Mr. BELLMON) are absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Kentucky (Mr. COOPER) and the Senator from Ohio (Mr. SAXBE) are detained on official business.

If present and voting, the Senator from Vermont (Mr. AIKEN), the Senator from Colorado (Mr. ALLOTT), the Senator from Kentucky (Mr. COOPER), the Senator from California (Mr. MURPHY), and the Senator from Pennsylvania (Mr. SCOTT) would each vote "yea."

On this vote, the Senator from Illinois (Mr. SMITH) is paired with the Senator from South Dakota (Mr. MUNDT). If present and voting, the Senator from Illinois would vote "yea" and the Senator from South Dakota would vote "nay."

The result was announced—yeas 59, nays 2, as follows:

[No. 332 Leg.]

So the bill (S. 4368) was passed, as follows:

S. 4368

An act to extend and amend laws relating to housing and urban development, and for other purposes

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Housing and Urban Development Act of 1970".

TITLE I—MORTGAGE CREDIT

EXTENSION OF PROGRAMS

SEC. 101. (a) Section 2(a) of the National Housing Act is amended by striking out "1970" in the first sentence and inserting in lieu thereof "1973".

(b) Section 217 of such Act is amended by striking out "1970" and inserting in lieu thereof "1973".

(c) Section 221(f) of such Act is amended by striking out "1970" in the fifth sentence and inserting in lieu thereof "1973".

(d) Section 235(m) of such Act is amended by striking out "1971" and inserting in lieu thereof "1973".

(e) Section 236(n) of such Act is amended by striking out "1971" and inserting in lieu thereof "1973".

(f) Section 809(f) of such Act is amended by striking out "1970" in the second sentence and inserting in lieu thereof "1973".

(g) Section 810(k) of such Act is amended by striking out "1970" in the second sentence and inserting in lieu thereof "1973".

(h) Section 1002(a) of such Act is amended by striking out "1970" in the second sentence and inserting in lieu thereof "1973".

(i) Section 1101(a) of such Act is amended by striking out "1970" in the second sentence and inserting in lieu thereof "1973".

AUTHORIZATION FOR ASSISTANCE PAYMENTS UNDER SECTIONS 235 AND 236

SEC. 102. (a) The second sentence of section 235(h)(1) of the National Housing Act is amended—

(1) by inserting "outstanding" before "contracts" the first place the term appears; and

(2) by striking out "by $125,000,000 on July 1, 1970, and by $170,000,000 on July 1, 1971" and inserting in lieu thereof "by $150,000,000 on July 1, 1970, and by $250,000,000 on July 1, 1971".

(b) The second sentence of section 236(i)(1) of such Act is amended—

(1) by inserting "outstanding" before "contracts" the first place the term appears; and

(2) by striking out "$170,000,000" and inserting in lieu thereof "$250,000,000".

(c) Section 236(b) is amended by adding at the end thereof the following: "The term 'mortgage insurance premium', when used in this section in relation to a project financed by a loan under a State or local program includes such fees and charges approved by the Secretary, as are payable by the mortgagor to the State or local agency mortgagee to meet reserve requirements and administrative expenses of such agency."

RENT SUPPLEMENT PAYMENTS

SEC. 103. Section 101(a) of the Housing and Urban Development Act of 1965 is amended by striking out "and by $100,000,000 on July 1, 1970" and inserting in lieu thereof "by $100,000,000 on July 1, 1970, and by $37,000,000 on July 1, 1971".

COMPENSATION FOR DEFECTS IN SECTION 235 EXISTING HOUSING

SEC. 104. Section 518 of the National Housing Act is amended by redesignating subsection (b) as subsection (c) and inserting after subsection (a) a new subsection as follows:

"(b) The Secretary is authorized to make expenditures to correct, or to compensate the owner for, latent or structural defects which seriously affect the use and livability of any single-family dwelling which is covered by a mortgage insured under section 235 of this Act and is more than one year old on the date of the issuance of the insurance commitment, if (1) the owner requests assistance from the Secretary not later than one year after the insurance of the mortgage, and (2) the defect is one that a competent appraiser, properly performing his duties, could reasonably be expected to recognize."

USE OF EXISTING HOUSING UNDER THE SECTION 235 PROGRAM

SEC. 105. Section 235(h) of the National Housing Act is amended—

(1) by striking out "to be made prior to July 1, 1971" in subparagraph (B) of paragraph (3); and

(2) by adding at the end thereof the following new paragraph;

"(4) At least 10 per centum of the total amount of contracts for assistance payments authorized by appropriation Acts to be made after June 30, 1971, shall be available for use only with respect to dwellings, or dwelling units in projects, which are approved by the Secretary prior to substantial rehabilitation."

ASSISTANCE UNDER SECTION 235 PROGRAM FOR COOPERATIVE PROJECTS FINANCED UNDER CERTAIN STATE OR LOCAL PROGRAMS

SEC. 106. Section 235(b)(2) of the National Housing Act is amended by inserting before the period at the end thereof the following: ": *Provided further*, That assistance payments may be made on behalf of a member of a cooperative association operating a housing project which is financed under a State or local program providing assistance through loans, loan insurance, or tax abatements, and which prior to completion of construction or rehabilitation is approved for receiving the benefits of this section".

LOWER DOWNPAYMENTS FOR FHA—FINANCED SALES HOUSING

SEC. 107. (a) Section 203(b)(2) of the National Housing Act is amended—

(1) by striking out "97 per centum" and inserting in lieu thereof "98 per centum"; and

(2) by striking out "$25,000", wherever it appears, and inserting in lieu thereof "$30,000".

(b) Section 203(b)(9) of such Act is amended by striking out "3 per centum" and inserting in lieu thereof "2 per centum".

MAXIMUM AMOUNT OF FHA-INSURED HOSPITAL MORTGAGE

SEC. 108. Section 242(d)(2) of the National Housing Act is amended by striking out "$25,000,000" and inserting in lieu thereof "$50,000,000".

MORTGAGE INSURANCE FOR PROPRIETARY HOSPITALS

SEC. 109. (a) Section 242 of the National Housing Act is amended by striking out "NONPROFIT" in the section heading.

(b) Section 242(b) of such Act is amended by striking out "the" where it first appears in paragraphs (1) and (2) and inserting in lieu thereof "The".

(c) Section 242(b)(1) of such Act is amended—

(1) by inserting "and" after the semicolon at the end of subparagraph (A);

(2) by striking out "; and" at the end of subparagraph (B) and inserting a period in lieu thereof; and

(3) by striking out subparagraph (C).

(d) The sixth sentence of section 212(a) of such Act is amended by striking out "or association" and inserting in lieu thereof ", association, or other organization".

MORTGAGES FOR CIVILIAN PERSONNEL AT MILITARY INSTALLATIONS

SEC. 110. Section 809(b) of the National Housing Act is amended by inserting before the period at the end of the second sentence the following: ": *Provided*, That the Secretary shall relieve the Secretary of Defense from any obligation to guarantee the General Insurance Fund from loss with respect to a mortgage assumed by a person ineligible to receive a certificate under subsection (a), if the original mortgagor is issued another certificate with respect to a mortgage insured under this section on property which the Secretary determines is not an acceptable risk".

MOBILE HOME LOANS UNDER TITLE I

SEC. 111. Section 2(b) of the National Housing Act is amended—

(1) by inserting in clause (1) after "$10,000" the following: "($15,000 in the case of a mobile home composed of two or more modules)";

(2) by inserting in the proviso of clause (2) after "days" the following: "(fifteen years and thirty-two days in the case of a mobile home composed of two or more modules)"; and

(3) by adding at the end thereof a new sentence as follows: "Notwithstanding any other provision of this subsection, the Secretary is authorized, until January 1, 1972, to set the maximum interest rate or rates for obligations with respect to which insurance is granted under this section at not to exceed such rate or rates as he finds necessary to meet the loan market."

FUNDS FOR FEDERAL NATIONAL MORTGAGE ASSOCIATION CAPITAL SURPLUS ACCOUNT

SEC. 112. The first sentence of section 303(b) of the National Housing Act is amended—

(1) by striking out "shall accumulate" and inserting in lieu thereof "may accumulate";

(2) by striking out "and other";

(3) by striking out "nor less than 1 per centum", and

(4) by inserting "with the approval of the Secretary of Housing and Urban Development" immediately after "as determined from time to time by the corporation".

LIABILITY OF FNMA TO UNITED STATES

SEC. 113. (a) In accordance with the provisions of section 303(a) of the National Housing Act relating to payment of a prescribed part of the general surplus and reserves of the corporation, the Federal National Mortgage Association shall pay to the Secretary of the Treasury the sum of $52,386,117.

(b) In accordance with the provisions of section 309(c) of the National Housing Act as it existed prior to September 1, 1968, the Federal National Mortgage Association shall pay to the Secretary of the Treasury the remaining income tax equivalent of $16,479,604, plus interest (1) on $2,977,442 at the rate of 6 per centum from September 16, 1967, until the date of payment; (2) on $13,442,424 at the rate of 6 per centum from September 16, 1968, until the date of payment; and (3) on $59,738 at 6 per centum from November 16, 1968, until the date of payment.

(c) The receipt by the Secretary of the Treasury of the amounts required to be paid by subsections (a) and (b) of this section shall constitute a full and final settlement of all matters affected by such subsections. The United States shall be made a party defendant in any case against any person because of any action taken by him while serving as a director, officer, employee, or agent of the Federal National Mortgage Association pursuant to subsection (a) or (b) of this section, and any judgment awarded the Federal National Mortgage Association in such action shall be paid in the same manner as a judgment against the United States.

(d) Section 302(a) of the National Housing Act is amended by adding at the end thereof the following new paragraph:

"(3) The partition transaction effected pursuant to the foregoing paragraph constitutes a reorganization within the meaning of section 368(a)(1)(E) of the Internal Revenue Code of 1954; and for the purposes of such Code, no gain or loss is recognized by the previously existing body corporate by reason of the partition, and the basis and holding period of the assets of the corporation immediately following such partition are the same as the basis and holding period of such assets immediately prior to such partition."

(e) Section 810(a) of the Housing and Urban Development Act of 1968 is amended by adding at the end thereof the following sentence: "For the purposes of the Internal Revenue Code of 1954, no gain or loss is recognized by the holders of such stock on such change, and the basis and holding period of such stock in the hands of the stockholders immediately after such change are the same as the basis and holding period of such stock in their hands immediately prior to such change."

INVESTMENT OF FHA RESERVE FUNDS

SEC. 114. (a) Section 206 of the National Housing Act is amended by inserting before the period at the end of the first sentence the following: "or any agency of the United States: *Provided*, That such moneys shall to

the maximum extent feasible be invested in such bonds or other obligations the proceeds of which will be used to directly support the residential mortgage market".

(b) Section 213(o) of such Act is amended by inserting before the period at the end of the second sentence the following: "or any agency of the United States: *Provided*, That such moneys shall to the maximum extent feasible be invested in such bonds or other obligations the proceeds of which will be used to directly support the residential mortgage market".

(c) Section 236(g) of such Act is amended by inserting before the period at the end of the third sentence the following: "or any agency of the United States: *Provided*, That such moneys shall to the maximum extent feasible be invested in such bonds or other obligations the proceeds of which will be used to directly support the residential mortgage market".

(d) Section 238(b) of such Act is amended by inserting before the period at the end of the sixth sentence the following: "or any agency of the United States: *Provided*, That such moneys shall to the maximum extent feasible be invested in such bonds or other obligations the proceeds of which will be used to directly support the residential mortgage market".

(e) Section 519(c) of such Act is amended by inserting before the period at the end of the first sentence the following: "or any agency of the United States: *Provided*, That such moneys shall to the maximum extent feasible be invested in such bonds or other obligations the proceeds of which will be used to directly support the residential mortgage market".

SEC. 115. (a) Section 221(f) of the National Housing Act is amended by adding at the end thereof the following new sentence: "In any case in which it is determined in accordance with regulations of the Secretary that facilities in existence or under construction on the date of enactment of the Housing and Urban Development Act of 1970 which could appropriately be used for classroom purposes are available in any such property or project and that public schools in the community are overcrowded due in part to the attendance at such schools of residents of the property or project, such facilities may be used for such purposes to the extent permitted in such regulations (without being subject to any of the requirements of the proviso in section 220 (d)(3)(B)(iv) except the requirement that the project be predominantly residential)."

(b) Section 236(j)(5) of such Act is amended by adding at the end thereof (after and below subparagraph (C)) the following new sentence: "In any case in which it is determined in accordance with regulations of the Secretary that facilities in existence or under construction on the date of enactment of the Housing and Urban Development Act of 1970 which could appropriately be used for classroom purposes are available in any such property or project and that public schools in the community are overcrowded due in part to the attendance at such schools of residents of the property or project, such facilities may be used for such purposes to the extent permitted in such regulations (without being subject to any of the requirements of the first proviso in subparagraph (A) except the requirement that the project be predominantly residential)."

## TITLE II—PUBLIC HOUSING, URBAN RENEWAL, AND HOUSING ASSISTANCE PROGRAMS

### PUBLIC HOUSING ANNUAL CONTRIBUTIONS

SEC. 201. The first sentence of section 10(e) of the United States Housing Act of 1937 is amended by striking out "and $170,000,000 on July 1, 1970" and inserting in lieu thereof "$320,000,000 on July 1, 1970, and $275,000,000 on July 1, 1971".

### PUBLIC HOUSING RENT REQUIREMENTS

SEC. 202. Section 2(1) of the United States Housing Act of 1937 is amended—

(1) by adding at the end of the second paragraph the following: "In defining income for purposes of applying the one-fourth of family income limitation set forth above, the Secretary shall consider income from all sources of each member of the family residing in the household who is at least eighteen years of age; except that (1) nonrecurring income, as determined by the Secretary, shall be excluded, (2) an amount equal to the sum of (A) $300 for each person in the household under eighteen years of age, and (B) 5 per centum of the family's gross income shall be deducted, and (3) the Secretary may allow further deductions in recognition of unusual circumstances including, but not limited to, an amount equal to those medical expenses of the family which may properly be considered to be extraordinary, and an amount equal to that part of the income of the female head of a family, or the expended in order to enable her to take employment outside the home."; and

(2) by adding at the end thereof a new paragraph as follows:

"In the case of families receiving public assistance in the form of money payments under any State program with respect to which there is Federal financial participation, the total amount of their benefits thereunder shall not be reduced as a result of any reduction in rent by a local public housing agency made in conformity with the applicable rent ceiling established in accordance with the preceding paragraph."

### PUBLIC HOUSING COST LIMITS

SEC. 203. (a) The first sentence of section 15(5) of the United States Housing Act of 1937 is amended by striking out all that follows "based" and inserting in lieu thereof the following: "shall not exceed by more than 10 per centum the appropriate prototype cost for the area. Prototype costs shall be determined at least annually by the Secretary on the basis of his estimate of the construction and equipment costs of new dwelling units of various sizes and types in the area suitable for occupancy by persons assisted under this Act. The Secretary in determining the area's prototype costs shall take into account the extra durability required for economical maintenance of assisted housing, and the provision of amenities designed to guarantee safe and healthy family life and neighborhood environment. Further, in developing such prototypes, emphasis should be given to encouraging good design as an essential component of such housing and to producing housing which will be of such quality as to reflect the architectural standards of the neighborhood and community. The prototype costs for any area shall become effective upon the date of publication in the Federal Register."

(b) This section becomes effective on such date as the Secretary of Housing and Urban Development prescribes, but not later than one hundred and twenty days following the date of enactment of this Act.

### AMENDMENT OF CONTRACTS TO ASSURE LOW-RENT CHARACTER OF PROJECTS

SEC. 204. The third sentence of section 10(a) of the United States Housing Act of 1937 is amended by striking out the period and inserting in lieu thereof the following: ": *Provided further*, That the Authority shall amend or supersede annual contributions contracts to provide payments annually (within the limitations prescribed by this Act) which the Authority determines are required (1) to assure the low-rent character of the projects involved, and (2) to achieve and maintain adequate operating and maintenance services and reserve funds including payment of outstanding debts."

### CONGREGATE HOUSING FOR THE ELDERLY

SEC. 205. Section 15 of the United States Housing Act of 1937 is amended by adding at the end thereof a new paragraph as follows:

"(12) The Secretary shall encourage public housing agencies, in providing housing predominantly for elderly families, to design, develop, or otherwise acquire such housing to meet the special needs of the occupants and, wherever practicable, for use in whole or in part as congregate housing. As used in this paragraph, the term 'congregate housing' means low-rent housing (A) in which some or all of the dwelling units do not have kitchen facilities, and (B) connected with which there is a central dining facility to provide wholesome and economical meals for elderly families under terms and conditions prescribed by the public housing agency to permit a generally self-supporting operation. Expenditures incurred by a public agency in the operation of a central dining facility in connection with congregate housing (other than the cost of providing food and service) shall be considered one of the costs of administration of the project."

### LOW-RENT HOUSING IN PRIVATE ACCOMMODATIONS

SEC. 206 (a) Section 23(a)(3) of the United States Housing Act of 1937 is amended by striking out "an existing" and inserting in lieu thereof "a".

(b) The last sentence of section 23(d) of such Act is amended by striking out "sixty" and inserting in lieu thereof "one hundred and twenty".

(c) Section 10(c) of such Act is amended by striking out "existing" in the last proviso.

### POLICY STATEMENT

SEC. 208. Section 1 of the United States Housing Act of 1937 is amended by adding at the end thereof the following: "It is the sense of the Congress that no person should be barred from serving on the board of directors or similar governing body of a local public housing agency because of his tenancy in a low-rent housing project."

### URBAN RENEWAL GRANT AUTHORITY

SEC. 209. Section 103(b) of the Housing Act of 1949 is amended—

(1) by striking out "and by $1,700,000,000 on July 1, 1970" in the first sentence and inserting in lieu thereof "by $1,700,000,000 on July 1, 1970, and by $2,000,000,000 on July 1, 1971"; and

(2) by striking out "beginning July 1, 1969, and July 1, 1970" in the second sentence and inserting in lieu thereof "commencing after June 30, 1969, and ending prior to July 1, 1974".

### RELOCATION PAYMENTS

SEC. 210. (a) Section 114(b)(1) of the Housing Act of 1949 is amended by inserting before the semicolon the following: ": *Provided further*, That the Secretary may authorize payment to displaced business concerns of fixed amounts in lieu of their total certified actual moving expenses where he determines that it is impractical for a displaced business concern to calculate the amount of such expenses".

(b) The last sentence of section 114(b) of such Act is amended by striking out "certified actual".

### EXPENSES IN CONNECTION WITH THE SALE OF SURPLUS LANDS TO LOCAL URBAN RENEWAL AGENCIES

SEC. 210. The last sentence of section 108 of the Housing Act of 1949 is amended by inserting "net" immediately before proceeds".

### URBAN RENEWAL PROJECT IN MONROE, WISCONSIN

SEC. 211. Notwithstanding the date of commencement of construction of streets

and highways in the tornado urban renewal area in Monroe, Wisconsin, local expenditures made in connection therewith shall, to the extent otherwise eligible, be counted as a local grant-in-aid to the tornado urban renewal project (Wisconsin R–27) in accordance with the provisions of title I of the Housing Act of 1949.

AUTHORIZATION FOR COLLEGE HOUSING DEBT SERVICE GRANTS

SEC. 212. Section 401(f)(2) of the Housing Act of 1950 is amended by inserting before the period at the end thereof the following: ", and by $12,000,000 on July 1, 1971".

## TITLE III—MODEL CITIES AND METROPOLITAN DEVELOPMENT PROGRAMS

AUTHORIZATION FOR MODEL CITIES PROGRAM

SEC. 301. (a) The first sentence of section 111(b) of the Demonstration Cities and Metropolitan Development Act of 1966 is amended—

(1) by striking out "and" the third time it appears; and

(2) by inserting before the period the following: ", and not to exceed $162,500,000 for the fiscal year ending June 30, 1972".

(b) Section 111(c) of such Act is amended by striking out "1971" and inserting in lieu thereof "1974".

(c) Section 111 of such Act is further amended by striking out "and administrative expenses" each place it appears.

AUTHORIZATION FOR COMPREHENSIVE PLANNING GRANTS

SEC. 302. The fifth sentence of section 701(b) of the Housing Act of 1954 is amended by striking out "and not to exceed $390,000,000 prior to July 1, 1971" and inserting in lieu thereof "and not to exceed $415,000,000 prior to July 1, 1972".

NEW COMMUNITY LAND DEVELOPMENT

SEC. 303 (a) Section 407(d) of the Housing and Urban Development Act of 1968 is amended by striking out "$250,000,000" and inserting in lieu thereof "$500,000,000."

(b) Section 412(d) of such Act is amended by striking out "July 1, 1971" and inserting in lieu thereof "July 1, 1974".

(c) Section 48 of such Act is amended—

(1) by striking out "qualified"; and

(2) by striking out all that follows "guaranteed obligation" and inserting in lieu thereof a period.

COMMUNITY FACILITIES GRANTS

Sec. 304. (a) Section 708(a) of the Housing and Urban Development Act of 1965 is amended by adding at the end thereof the following: "In addition, there is authorized to be appropriated for grants under section 703 not to exceed $44,000,000 for the fiscal year commencing July 1, 1971."

(b) Section 708(b) of such Act is amended by striking out "1972" and inserting in lieu thereof "1974".

EXTENSION OF URBAN INFORMATION AND TECHNICAL ASSISTANCE SERVICES AUTHORIZATION

SEC. 305. Section 906 of the Demonstration Cities and Metropolitan Development Act of 1966 is amended by striking out "July 1, 1971" and inserting in lieu thereof "July 1, 1974".

## TITLE IV—CONSOLIDATION OF OPEN-SPACE LAND PROGRAMS

SEC. 401. Title VII of the Housing Act of 1961 is amended to read as follows:

"TITLE VII—OPEN-SPACE LAND

"FINDINGS AND PURPOSE

SEC. 701. (a) The Congress finds that the rapid expansion of the Nation's urban area and the rapid growth of population within such areas has resulted in severe problems of urban and suburban living for the preponderant majority of the Nation's present and future population, including the lack of valuable open-space land for recreational and other purposes.

"(b) The Congress further finds that there is a need for the additional provision of parks and other open space in the built-up portions of urban areas especially in low income neighborhoods and communities and a need for greater and better coordinated State and local efforts to make available and improve open-space land throughout entire urban areas.

"(c) The Congress further finds that there is a need for timely action to preserve and restore areas, sites, and structures of historic or architectural value in order that these remaining evidences of our history and heritage shall not be lost or destroyed through the expansion and development of the Nation's urban areas.

"(d) It is the purpose of this title to help curb urban sprawl and prevent the spread of urban blight and deterioration, to encourage more economic and desirable urban development, to assist in preserving areas and properties of historic or architectural value, and to help provide necessary recreational, conservation, and scenic areas by assisting State and local public bodies in taking prompt action to (1) provide, preserve, and develop open-space land in a manner consistent with the planned long-range development of the Nation's urban areas, (2) acquire, improve, and restore areas, sites, and structures of historic or architectural value, and (3) develop and improve open space and other public urban land, in accordance with programs to encourage and coordinate local public and private efforts toward this end.

"GRANTS FOR ACQUISITION AND FOR DEVELOPMENT OF OPEN-SPACE LAND

"SEC. 702. (a) The Secretary is authorized to make grants to States and local public bodies to help finance (1) the acquisition of title to, or other interest in, open-space land in urban areas and (2) the development of open-space or other land in urban areas for open-space uses. The amount of any such grant shall not exceed 50 per centum of the eligible project cost, as approved by the Secretary, of such acquisition or development. Not more than 50 per centum of the non-Federal share of such eligible project cost may, to the extent authorized in regulations established by the Secretary, be made up by donations of land or materials.

"(b) No grants under this title shall be made to (1) defray ordinary State or local governmental expenses, (2) help finance the acquisition by a public body of land located outside the urban area for which it exercises (or participates in the exercise of) responsibilities consistent with the purpose of this title, (3) acquire and clear developed land in built-up urban areas unless the local governing body determines that adequate open-space land cannot be effectively provided through the use of existing undeveloped land, or (4) provide assistance for historic and architectural preservation purposes, except for districts, sites, buildings, structures, and objects which the Secretary of the Interior determines meets the criteria used in establishing the National Register.

"(c) The Secretary may set such further terms and conditions for assistance under this title as he determines to be desirable.

"(d) The Secretary shall consult with the Secretary of the Interior on the general policies to be followed in reviewing applications for grants under this title. To assist the Secretary in such review, the Secretary of the Interior shall furnish him (1) appropriate information on the status of national and statewide recreation and historic preservation planning as it affects the areas to be assisted with such grants, and (2) the current listing of any districts, sites, buildings, structures, and objects significant in American history, architecture, archeology, and culture which may be contained on a National Register maintained by the Secretary of the Interior pursuant to other provisions of law. The Secretary shall provide current information to the Secretary of the Interior from time to time on significant program developments.

"(e) The Secretary may provide such technical assistance to the States and local public bodies as may be required to effectively carry out activities under this section.

"PLANNING REQUIREMENTS

"SEC. 703. The Secretary shall make grants under section 702 only if he finds that such assistance is needed for carrying out a unified or officially coordinated program, meeting criteria established by him, for the provision and development of open-space land which is a part of, or is consistent with, the comprehensively planned development of the urban area.

"CONVERSIONS TO OTHER USES

"SEC. 704. No open-space land for the acquisition of which a grant has been made under section 702 shall be converted to uses not originally approved by the Secretary without his prior approval. Prior approval will be granted only upon satisfactory compliance with regulations established by the Secretary. Such regulations shall require findings that (1) there is adequate assurance of the substitution of other open-space land of as nearly as feasible equivalent usefulness, location, and fair market value at the time of the conversion; (2) the conversion and substitution are needed for orderly growth and development; and (3) the proposed uses of the converted and substituted land are in accord with the then applicable comprehensive plan for the urban area, meeting criteria established by the Secretary.

"ACQUISITION OF INTERESTS TO GUIDE URBAN DEVELOPMENT

"SEC. 705. In order to encourage the acquisition of interests in underdeveloped or predominantly undeveloped land which, if withheld from commercial, industrial, and residential development, would have special significance in helping to shape economic and desirable patterns of urban growth (including growth outside of existing urban areas which is directly related to the development of new communities or the expansion and revitalization of existing communities), the Secretary may make grants to State and local public bodies for the acquisition of such interests in an amount not to exceed 75 per centum of the cost of such acquisition. In the case of any interests acquired pursuant to this section, the Secretary may approve the subsequent conversion or disposition of the land involved without regard to other requirements of this title but subject to such terms and conditions as he determines equitable and appropriate with respect to the control of future use and the application or sharing of the proceeds or value realized upon sale or disposition.

"LABOR STANDARDS

"SEC. 706. (a) The Secretary shall take such action as may be necessary to insure that all laborers and mechanics employed by contractors or subcontractors in the performance of construction work financed with the assistance of grants under this title shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended. The Secretary shall not approve any such grant without first obtaining adequate assurance that these labor standards will be maintained upon the construction work.

"(b) The Secretary of Labor shall have, with respect to the labor standards specified in subsection (a), the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (15 F.R. 3176; 64 Stat. 1267; 5 U.S.C. 133z–15), and section 2 of the Act of June 13, 1934, as amended (48 Stat. 948; 40 U.S.C. 276c).

"AUTHORIZATION

"SEC. 707. There are authorized to be appropriated for purposes of making grants under this title not to exceed $560,000,000 prior to July 1, 1972. Any amounts appropriated under this section shall remain available until expended.

"DEFINITIONS

"SEC. 708. As used in this title—

"(1) The term 'open-space land' means any land located in an urban area which has value for (A) park and recreational purposes, (B) conservation of land and other natural resources, or (C) historic, architectural, or scenic purposes.

"(2) The term 'urban area' means any area which is urban in character, including those surrounding areas which, in the judgment of the Secretary, form an economic and socially related region, taking into consideration such factors as present and future population trends and patterns of urban growth, location of transportation facilities and systems, and distribution of industrial, commercial, residential, governmental, institutional, and other activities.

"(3) The term 'State' means any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the territories and possessions of the United States.

"(4) The term 'local public body' means any public body (including a political subdivision) created by or under the laws of a State or two or more States, or a combination of such bodies, and includes Indian tribes, bands, groups, and nations (including Alaska Indians, Aleuts, and Eskimos) of the United States.

"(5) The term 'open-space uses' means any use of open-space land for (A) park and recreational purposes, (B) conservation of land and other natural resources, or (C) historic, architectural, or scenic purposes."

TITLE V—RESEARCH AND TECHNOLOGY

RESEARCH AND DEMONSTRATIONS

SEC. 501. The Secretary of Housing and Urban Development is authorized and directed to undertake such programs of research, studies, testing, and demonstration relating to the mission and programs of the Department as he determines to be necessary and appropriate. In order to carry out activities under this section there are authorized to be appropriated such sums as may be necessary. All funds so appropriated shall remain available until expended unless specifically limited.

GENERAL PROVISIONS

SEC. 502. (a) The Secretary shall require, to the greatest extent feasible, the employment of new and improved technologies, methods, and materials in housing construction, rehabilitation, and maintenance under programs administered by him with a view to reducing costs, and shall encourage and promote the acceptance and application of such advanced technology, methods, and materials by all segments of the housing industry, communities, industries engaged in urban development activities, and the general public. To the extent feasible, in connection with the construction, major rehabilitation, or maintenance of any housing assisted under section 501, the Secretary shall assure that there is no restraint by contract, building code, zoning ordinance, or practice against the employment of new or improved technologies, techniques, materials, and methods or of preassembled products which may reduce the cost or improve the quality of such construction, rehabilitation, and maintenance, and therefore stimulate expanded production of housing, except where such restraint is necessary to insure safe and healthful working and living conditions.

(b) To encourage large-scale experimentation in the use of new technologies, methods, and materials, with a view toward the ultimate mass production of housing and related facilities, the Secretary shall wherever feasible conduct programs under section 501 in which qualified organizations, public and private, will submit plans for development and production of housing and related facilities using such new advances on Federal land which has been made available or acquired by the Secretary for the purpose of this subsection or on other land where (1) local building regulations permit such experimental construction, or (2) necessary variances from building regulations can be granted. The Secretary may utilize the funds and authority available to him under the provsions of section 501 to assist in the implementation of plans which he approves.

(c) Notwithstanding any other provision of law, the Secretary is authorized, in connection with projects under this title, to acquire and dispose of any land and other property required for the project as he deems necessary. Notwithstanding the provisions of the Federal Property and Administrative Services Act of 1949, any land which is execess property within the meaning of such Act and which is determined by the Secretary to be suitable in furtherance of the purposes of subsection (b) may be transferred to the Secretary upon his request.

(d) In order to effectively carry out his activities under section 501, the Secretary is authorized to provide such advice and technical assistance as may be required and to pay for the cost of writing and publishing reports on activities and undertakings financed under section 501, as well as reports on similar activities and undertakings, not so financed, which are of significant value in furthering the purposes of that section. He may disseminate (without regard to the provisions of section 3204 of title 39, United States Code, or section 4154 of such title with respect to any period before the effective date of such section 3204 as provided in section 15(a) of the Postal Reorganization Act) any reports, data, or information acquired or held under this title, including related data and information otherwise available to the Secretary through the operation of the programs and activities of the Department of Housing and Urban Development, in such form as he determines to be most useful to departments, establishments, and agencies of Federal, State, and local governments, to industry, and to the general public.

(e) The Secretary is authorized to carry out the functions authorized in section 501 either directly or, without regard to section 3709 of the Revised Statutes, by contract or by grant. Advance and progress payments may be made under such contracts or grants without regard to the provisions of section 3648 of the Revised Statutes and such contracts or grants may be made for work to continue for not more than four years from the date thereof.

(f) In carrying out activities under section 501, the Secretary shall utilize to the fullest extent feasible the available facilities of other Federal departments and agencies, and shall consult with, and make recommendations to, such departments and agencies. The Secretary may enter into working agreements with such departments and agencies and contract or make grants on their behalf or have such departments and agencies contract or make grants on his behalf. The Secretary is authorized to make or accept reimbursement for the cost of such activities. The Secretary is further authorized to undertake activities under this title under cooperative agreements with industry and labor, agencies of State or local governments, educational institutions, and other organizations. He may enter into contracts with and receive funds from such agencies, institutions, and organizations, and may exercise any of the other powers vested in him by section 502(c) of the Housing Act of 1948.

(g) The Secretary is authorized to request and receive such information or data as he deems appropriate from private individuals and organizations, and from public agencies. Any such information or data shall be used only for the purposes for which it is supplied, and no publication shall be made by the Secretary whereby the information or data furnished by any particular person or establishment can be identified, except with the consent of such person or establishment.

REPEAL OF EXISTING RESEARCH AUTHORITIES

SEC. 503. Effective July 1, 1971, the following provisions of law are repealed; except that such repeal shall not affect contracts, commitments, reservations, or other obligations entered into pursuant to such provisions prior to that date:

(1) title III of the Housing Act of 1948;

(2) section 314 of the Housing Act of 1954;

(3) section 602 of the Housing Act of 1956;

(4) section 207 of the Housing Act of 1961;

(5) section 301 of the Housing and Urban Development Act of 1965;

(6) sections 1010 and 1011 of the Demonstration Cities and Metropolitan Development Act of 1966; and

(7) sections 108 (except subsection (f)(2)) and 1714(b) of the Housing and Urban Development Act of 1968.

EXPERIMENTAL HOUSING ALLOWANCE PROGRAM

SEC. 504. (a) In carrying out activities under section 501, the Secretary shall undertake on an experimental basis a program to demonstrate the feasibility of providing families of low income with housing allowances to assist them in obtaining rental housing of their choice in existing standard units. For this purpose, the Secretary is authorized to pay and to contract to pay, subject to the limitations of this section, monthly housing allowances to such families in localities determined by the Secretary to have an adequate supply of such housing units.

(b) The housing allowance provided to any family of low income shall not exceed the difference between 25 per centum of the family's income and the maximum fair market rental established in the locality by the Secretary for dwelling units of similar size in projects receiving annual payments under contracts authorized by section 101(a) of the Housing and Urban Development Act of 1965. The Secretary shall make the payment of any such allowance to any such family conditional upon an agreement by the family that the allowance will be used solely for the payment of rent for occupancy in existing standard housing.

(c) The Secretary is authorized to contract with public or private organizations to provide the services required in the selection of families of low income for the distribution of monthly housing allowance payments to such families. In contracting with such organizations, the Secretary is authorized (without limiting his authority under any other provision of law) to delegate to such organizations the authority to make the ministerial findings necessary to enable the Secretary to make such payments to families selected by such organizations.

(d) The Secretary is authorized to pay and to contract to pay (in an aggregate amount not to exceed $15,000,000 in each of the fiscal years 1972, 1973, and 1974) monthly housing allowance payments to families of low income pursuant to this section.

(e) The Secretary shall, as early as practicable in the calendar years 1972, 1973, and 1974, make a report to the respective Committees on Banking and Currency of the Senate and House of Representatives with respect to the administration of the program authorized by this section, together with any

recommendations that he may deem appropriate.

(f) As used in this section—

(1) The term "families of low income" has the same meaning as in section 2(2) of the United States Housing Act of 1937.

(2) The term "existing standard housing" means a rental unit which meets standards prescribed by the Secretary.

(g) No housing allowance payments pursuant to this section shall be made after June 30, 1974.

DEMONSTRATIONS WITH RESPECT TO ABANDONED PROPERTIES

SEC. 505. (a) In carrying out activities under section 501, the Secretary may undertake programs to demonstrate the most feasible means of providing assistance to localities in which a substantial number of structures are abandoned or are threatened with abandonment for the purpose of arresting the process of housing abandonment in its incipiency or in restoring viability to blighted areas in which abandonment is pervasive. For this purpose, the Secretary is authorized to make grants, subject to the limitations of this section, to assist local public bodies in planning and implementing demonstration projects for prompt and effective action in alleviating and preventing such abandonment in designated demonstration areas.

(b) In administering this section, the Secretary shall give preference to those demonstration projects which in his judgment can reasonably be expected to arrest the process of abandonment in the demonstration area within a period of two years and which provide for innovative approaches to combating the problem of housing abandonment. Such projects may include, but shall not be limited to (1) acquisition by negotiated purchase, lease, receivership, tax lien proceedings, or other means authorized by law and satisfactory to the Secretary, of real property within the demonstration area or areas which is abandoned, deteriorated, or in violation of applicable code standards; (2) the repair of streets, sidewalks, parks, playground, publicly owned utilities, public buildings to meet needs consistent with the revitalization and continued use of the area; (3) the demolition of structures determined to be structurally unsound or unfit for human habitation or which contribute adversely to the physical or social environment of the locality involved; (4) the establishment of recreational or community facilities including public playgrounds; (5) the improvement of garbage and trash collection, street cleaning and other essential services necessary to the revitalization and maintenance of the area; (6) the rehabilitation of privately and publicly owned real property by the locality; and (7) the establishment and operation of locally controlled, nonprofit housing management corporations and municipal repair programs.

(c) Subject to such conditions as the Secretary may prescribe, real property held as part of a project assisted under this section may be available to (1) a limited dividend corporation, nonprofit corporation, or association, cooperative or public body or agency, or other approved purchaser or lessee, or (2) a purchaser who would be eligible for a mortgage insured under section 221(d)(3) or (d)(4), section 221(h)(1), section 235(i) or (j)(1), or section 236 of the National Housing Act, for purchase or lease at fair market value for use by such purchaser or lessee, as, or in the provision of, new or rehabilitated housing for occupancy by families or individuals of low or moderate income.

(d) Grants under this section shall be in amounts which do not exceed 90 per centum of the net project cost as determined by the Secretary. There are authorized to be appropriated for demonstration grants under this section not to exceed $25,000,000 for the fiscal year ending June 30, 1971. Any amounts appropriated shall remain available until expended in amounts authorized but not appropriated may be appropriated for any succeeding fiscal year commencing prior to July 1, 1972. Not more than one-third of the aggregate amount of grants made in any fiscal year under this section shall be made with respect to projects undertaken by one locality.

(e) The provisions of sections 106, 114 and 115 of title I of the Housing Act of 1949, and section 312 of the Housing Act of 1964, may apply to projects assisted under this Act as if such projects were being carried out in urban renewal areas as part of urban renewal projects within the meaning of section 110 of the Housing Act of 1949.

(f) The Secretary shall report annually to the Congress with respect to the status of demonstration projects funded by him and shall make such recommendations to the Congress as he deems necessary to further the purposes of this section.

## TITLE VI—CRIME INSURANCE

FINDINGS AND PURPOSE

SEC. 601. Section 1102(b) of the Housing and Urban Development Act of 1968 is amended by striking out "and" immediately before "(2)", and by inserting before the period at the end thereof the following: "; and (3) provide direct insurance through the facilities of the Federal Government in the case of properties for which statewide programs and the Federal reinsurance program either do not make crime insurance available or offer such insurance to property owners only at prohibitive cost".

AMENDMENTS TO TITLE XII OF THE NATIONAL HOUSING ACT

SEC. 602. (a) Section 1201 of the National Housing Act is amended to read as follows:

"PROGRAM AUTHORITY

"SEC. 1201. (a) The Secretary is authorized to establish and carry out the programs provided for in parts A, B, C, and D of this title.

"(b) (1) The powers of the Secretary under this title shall terminate on April 30, 1975, except to the extent necessary—

"(A) to continue reinsurance and direct insurance in accordance with the provisions of sections 1223(b) and 1231(c) until April 30, 1978;

"(B) to process, verify, and pay claims for reinsured losses and directly insured losses and perform other necessary functions in connection therewith; and

"(C) to complete the liquidation and termination of the reinsurance and direct insurance programs.

"(2) On April 30, 1978, or as soon thereafter as possible, the Secretary shall submit to the Congress, for its approval, a plan for the liquidation and termination of the reinsurance and direct insurance programs."

(b) Section 1203(a) of such Act is amended by redesignating paragraphs (1) through (13) as paragraphs (4) through (16), respectively, and by inserting immediately after and below "the term—" the following new paragraphs:

"(1) 'affordable rate' means such premium rate as the Secretary determines would permit the purchase of a specific type of insurance coverage by a reasonably prudent person in similar circumstances with due regard to the costs and benefits involved;

"(2) 'crime insurance' means insurance against losses resulting from robbery, burglary, larceny, and similar crimes, and may include broad form personal theft insurance, mercantile open stock insurance, mercantile robbery and mercantile safe burglary insurance, storekeepers burglary and robbery insurance, office burglary and robbery insurance, and may include business interruption insurance as the Secretary may designate; the term does not include automobile insurance or losses resulting from embezzlement;

"(3) 'directly insured losses' means losses on direct insurance claims and all direct expenses incurred in connection therewith, including but not limited to expenses for processing, verifying, and paying such losses;".

(c) Section 1221(a)(2) of such Act is amended by striking out "section 1203(a)(10)" each place it appears and inserting in lieu thereof "section 1203(a)(13)".

(d) Title XII of such Act is amended by redesignating part C and sections 1231 through 1241 as part D and sections 1241 through 1251, respectively, and by inserting after part B the following new part:

"PART C—FEDERAL INSURANCE AGAINST BURGLARY AND THEFT

"REVIEW AND PROGRAM AUTHORITY

"SEC. 1231. (a) At the close of the first full regular legislative session of the appropriate State legislative body after the date of the enactment of this part (but not prior to August 1, 1971), the Secretary shall review the market availability situation in each of the several States to determine whether crime insurance is available at affordable rates either through the normal insurance market or through a suitable program adopted under State law.

"(b) Upon determing pursuant to subsection (a) that a critical market unavailability situation for crime insurance exists in any State and has not been met through appropriate State action, the Secretary is authorized to make crime insurance available at affordable rates within such State through the facilities of the Federal Government. Such insurance shall be provided upon such terms and conditions, and subject to such deductibles and other restrictions and limitations, as the Secretary deems appropriate, but no such insurance shall be made available to a property which the Secretary determines to be uninsurable or to a property with respect to which reasonable protective measures to prevent loss, consistent with standards established by the Secretary, have not been adopted.

"(c) Notwithstanding any other provision of this title, direct insurance may be continued for the term of the policies written prior to the date of termination of the Secretary's direct insurance authority under this part, for as long as the insured pays the required direct insurance premiums; except that direct insurance under this part for any risk shall be terminated after notice whenever the Secretary determines that the standard lines of crime insurance otherwise have become available to such property at affordable rates.

"USE OF EXISTING FACILITIES AND SERVICES

SEC. 1232. In carrying out his responsibilities under this part, the Secretary may utilize—

"(1) insurance companies and other insurers, insurance agents and brokers, and insurance adjustment organizations, as fiscal agents of the United States,

"(2) officers and employees of the Department of Housing and Urban Development, and such other officers and employees of any executive agency (as defined in section 105 of title 5 of the United States Code) as the Secretary and the head of any such agency may from time to time agree upon, on a reimbursement or other basis, or

"(3) both the alternatives specified in paragraphs (1) and (2), or any combination thereof.

"ESTABLISHMENT OF AFFORDABLE RATES

"SEC. 1233. In estimating the affordable rates for the various crime insurance coverages offered from time to time under this part, the Secretary shall consult with appropriate State insurance authorities and other knowledgeable persons and is authorized to take into consideration the nature and degree of the risks involved, the protective devices employed, the extent of anticipated losses, the prevailing rates for similar

coverages in adjacent or comparable areas and territories, the economic importance of the various individual coverages and the type of property involved, and the relative abilities of the particular classes and types of insureds to pay the full estimated costs of such coverages. Nothing in this section shall be construed to prohibit or require either the adoption of uniform national rates or the periodic modification of currently estimated affordable rates for any particular line or subline of coverage, class, State, territory, or risk on the basis of additional information or actual loss experience.

"REPORTS ON OPERATIONS

"SEC. 1234. The Secretary shall include in his reports to the Congress on the program authorized by this title full and complete information on his operations and activities under this part, together with such recommendations with respect thereto as he may deem appropriate."

(e) Section 1222(a) of such Act is amended by striking out "section 1233" and inserting in lieu thereof "section 1243".

(f) Section 1244(c) of such Act (as redesignated by subsection (d) of this section) is amended by striking out "section 1232" and inserting in lieu thereof "section 1242".

(g) Section 1241(a) of such Act (as so redesignated) is amended by inserting "or direct insurance" after "reinsurance", and by inserting "or property owners" after "insurers".

(h) Section 1241(b) of such Act (as so redesignated) is amended by inserting "or direct insurance" after "reinsurance".

(i) Section 1242(a) of such Act (as so redesignated) is amended—

(1) by striking out "the reinsurance program" and inserting in lieu thereof "the reinsurance and direct insurance programs";

(2) by inserting "or direct insurance" after "reinsurance" in paragraphs (1), (2), and (4);

(3) by inserting "or property owner" after "any insurer" where it first appears in paragraph (4); and

(4) by inserting "or directly insured" after "reinsured" in paragraph (4).

(j) Section 1243 of such Act (as so redesignated) is amended—

(1) by inserting "and direct insurance" after "reinsurance" in subsection (a)(1) and each place it appears in subsection (b)(1);

(2) by striking out "part B" in subsection (b)(1) and inserting in lieu thereof "parts B and C"; and

(3) by redesignating clauses (4) and (5) of subsection (b) as clauses (5) and (6), and inserting after clause (3) a new clause as follows:

"(4) such amounts which are hereby authorized to be appropriated as may be necessary from time to time to reimburse the fund for losses and expenses (including administrative expenses) incurred in carrying out the program authorized under part C;".

(k) Section 1244(a) of such Act (as so redesignated) is amended by striking out "Any insurer or pool acquiring reinsurance" and inserting in lieu thereof "Any insurer, pool, or property owner requiring reinsurance or direct insurance".

(l) Section 1244(c) of such Act (as so redesignated) is amended by inserting "or direct insurance" after "reinsurance".

REVIEW OF STATEWIDE PLANS

SEC. 603. Title XII of the National Housing Act is amended by inserting after section 1214 a new section as follows:

"OFFICE OF REVIEW AND COMPLIANCE

"SEC. 1215. The Secretary, through an Office of Review and Compliance under the Federal Insurance Administrator, shall periodically review each plan under this part and the methods and practices by which such plan is being actually carried out in the areas and communities where it is intended to operate, in order to assure that such plan is effectively making essential property insurance readily available in such areas and communities and is otherwise carrying out the purposes of this title, and in order to identify any aspects of the operation or administration of such plan which may require revision, modification, or other action to carry out such purposes."

CONFORMING AMENDMENT

SEC. 604. Clause (2) of the first sentence of section 520(b) of the National Housing Act is amended by inserting "and directly insured" after "reinsured" wherever it appears.

## TITLE VII—URBAN GROWTH AND NEW COMMUNITY DEVELOPMENT

SHORT TITLE AND STATEMENT OF PURPOSE

SEC. 701. (a) This title may be cited as the "Urban Growth and New Community Development Act of 1970".

(b) It is the policy of the Congress and the purpose of this title to provide for the development of a national urban growth policy and to encourage the rational, orderly, efficient, and economic growth, development, and redevelopment of our States, metropolitan areas, cities, counties, towns, and communities in predominantly rural areas which demonstrate a special potential for accelerated growth; to encourage the prudent use and conservation of our natural resources; and to encourage and support development which will assure our communities of adequate tax bases, community services, job opportunities, and well-balanced neighborhoods in socially, economically, and physically attractive living environments.

### PART A—DEVELOPMENT OF A NATIONAL URBAN GROWTH POLICY

FINDINGS AND DECLARATION OF POLICY

SEC. 702. (a) The Congress finds that the rapid growth of urban population and uneven expansion of urban development in the United States, together with a decline in farm population, slower growth in rural areas, and migration to the cities, has created an imbalance between the Nation's needs and resources and seriously threatens our physical environment, and that the economic and social development of the Nation, the proper conservation of our natural resources, and the achievement of satisfactory living standards depend upon the sound, orderly, and more balanced development of all areas of the Nation.

(b) The Congress further finds that Federal programs affect the location of population, economic growth, and the character of urban development; that such programs frequently conflict and result in undesirable and costly patterns of urban development which adversely affect the environment and wastefully use our natural resources; and that existing and future programs must be interrelated and coordinated within a system of orderly development and established priorities consistent with a national urban growth policy.

(c) To promote the general welfare and properly apply the resources of the Federal Government in strengthening the economic and social health of all areas of the Nation and more adequately protect the physical environment and conserve natural resources, the Congress declares that the Federal Government, consistent with the responsibilities of State and local government and the private sector, must assume responsibility for the development of a national urban growth policy which shall incorporate social, economic, and other appropriate factors. Such policy shall serve as a guide in making specific decisions at the national level which affect the pattern of urban growth and shall provide a framework for development of interstate, State, and local growth and stabilization policy.

(d) The Congress further declares that the national urban growth policy should—

(1) favor patterns of urbanization and economic development and stabilization which offer a range of alternative locations and encourage the wise and balanced use of physical and human resources in metropolitan and urban regions as well as in smaller urban places which have a potential for accelerated growth;

(2) foster the continued economic strength of all parts of the United States, including central cities, suburbs, smaller communities, local neighborhoods, and rural areas;

(3) help reverse trends of migration and physical growth which reinforce disparities among States, regions, and cities;

(4) treat comprehensively the problems of poverty and employment (including the erosion of tax bases, and the need for better community services and job opportunities) which are associated with disorderly urbanization and rural decline;

(5) develop means to encourage good housing for all Americans without regard to race or creed;

(6) define the role of the Federal Government in revitalizing existing communities and encouraging planned, large-scale urban and new community development;

(7) strengthen the capacity of general governmental institutions to contribute to balanced urban growth and stabilization; and

(8) facilitate increased coordination in the administration of Federal programs so as to encourage desirable patterns of urban growth and stabilization, the prudent use of natural resources, and the protection of the physical environment.

URBAN GROWTH REPORT

SEC. 703. (a) In order to assist in the development of a national urban growth policy, the President shall utilize the capacity of his office, adequately organized and staffed for the purpose, through an identified unit of the Domestic Council, and of the departments and agencies within the executive branch to collect, analyze, and evaluate such statistics, data, and other information (including demographic, economic, social, land use, environmental, and governmental information) as will enable him to transmit to the Congress, during the month of February in every even-numbered year beginning with 1972, a Report on Urban Growth for the preceding two calendar years which shall include—

(1) information and statistics describing characteristics of urban growth and stabilization and identifying significant trends and developments;

(2) a summary of significant problems facing the United States as a result of urban growth trends and developments;

(3) an evaluation of the progress and effectiveness of Federal efforts designed to meet such problems and to carry out the national urban growth policy;

(4) an assessment of the policies and structure of existing and proposed interstate planning and developments affecting such policy;

(5) a review of State, local, and private policies, plans, and programs relevant to such policy;

(6) current and foreseeable needs in the areas served by policies, plans, and programs designed to carry out such policy, and the steps being taken to meet such needs; and

(7) recommendations for programs and policies for carrying out such policy, including such legislation and administrative actions as may be deemed necessary and desirable.

(b) The President may transmit from time to time to the Congress supplementary reports on urban growth which shall include such supplementary and revised recommendations as may be appropriate.

(c) To assist in the preparation of the Report on Urban Growth and any supplementary reports, the President may estab-

lish an advisory board, or seek the advice from time to time of temporary advisory boards, the members of whom shall be drawn from among private citizens familiar with the problems of urban growth and from among Federal officials, Governors of States, mayors, county officials, members of State and local legislative bodies, and others qualified to assist in the preparation of such reports.

PART B—DEVELOPMENT OF NEW COMMUNITIES

FINDINGS AND PURPOSE

SEC. 710. (a) The Congress finds that this Nation is likely to experience during the remaining years of this century a population increase of about seventy-five million persons.

(b) The Congress further finds that continuation of established patterns of urban development, together with the anticipated increase in population, will result in (1) inefficient and wasteful use of land resources which are of national economic and environmental importance; (2) destruction of irreplaceable natural and recreational resources and increasing pollution of air and water; (3) diminished opportunity for the private homebuilding industry to operate at its highest potential capacity in providing good housing needed to serve the expanding population and to replace substandard housing; (4) costly and inefficient public facilities and services at all levels of government; (5) unduly limited options for many of our people as to where they may live, and the types of housing and environment in which they may live; (6) failure to make the most economic use of present and potential resources of many of the Nation's smaller cities and towns, including those in rural and economically depressed areas, and decreasing employment and business opportunities for their residents; (7) further lessening of employment and business opportunities for the residents of central cities and of the ability of such cities to retain a tax base adequate to support vital services for all their citizens, particularly the poor and disadvantaged; (8) further separation of people within metropolitan areas by income and by race; (9) further increases in the distances between the places where people live and where they work and find recreation; and (10) increased cost and decreased effectiveness of public and private facilities for urban transportation.

(c) The Congress further finds that better patterns of urban development and revitalization are essential to accommodate future population growth; to prevent further deterioration of the Nation's physical and social environment; and to make positive contributions to improving the overall quality of life within the Nation.

(d) The Congress further finds that the national welfare requires the encouragement of well-planned, diversified, and economically sound new communities, including major additions to existing communities, as one of several essential elements of a consistent national program for bettering patterns of development and renewal.

(e) The Congress further finds that desirable new community development on a significant national scale has been prevented by difficulties in (1) obtaining adequate financing at moderate cost for enterprises which involve large initial capital investment, extensive periods before investment can be returned, and irregular patterns of return; (2) the timely assembly of sufficiently large sites in economically favorable locations at reasonable cost; and (3) making necessary arrangements, among all private and public organizations involved, for providing site and related improvements (including streets, sewer and water facilities, and other public and community facilities), in a timely and coordinated manner.

(f) It is, therefore, the purpose of this part to provide private developers and State and local public bodies and agencies (including regional or metropolitan public bodies and agencies) with financial and other assistance necessary for encouraging the orderly development of well-planned, diversified, and economically sound new communities, including major additions to existing communities, and to do so in a manner which will rely to the maximum extent on private enterprise; strengthen the capacity of State and local governments to deal with local problems; preserve and enhance both the natural and urban environment; increase for all persons, particularly members of minority groups, the available choices of locations for living and working, thereby providing a more just economic and social environment; encourage the fullest utilization of the economic potential of older central cities, smaller towns, and rural communities assist in the efficient production of a steady supply of residential, commercial, and industrial building sites at reasonable cost; increase the capability of all segments of the homebuilding industry, including both small and large producers, to utilize improved technology in producing the large volume of well-designed, inexpensive housing needed to accommodate population growth; help create neighborhoods designed for easier access between the places where people live and the places where they work and find recreation; and encourage desirable innovation in meeting domestic problems whether physical, economic, or social. It is also the purpose of this part to improve the organizational capacity of the Federal Government to carry out programs of assistance for the development of new communities and the revitalization of the Nation's urban areas.

DEFINITIONS

SEC. 711. As used in this part—

(a) The term "new community development program" means a program which is intended to result in a newly built community or a major addition to an existing community and which meets the eligibility standards set forth in section 712.

(b) The term "private new community developer" means any private entity organized in a form satisfactory to the Secretary for carrying out one or more new community development programs.

(c) The term "State land development agency" means any State or local public body or agency with authority to act as developer in carrying out one or more new community development programs.

(d) The term "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, any territory or possession of the United States, or any agency or instrumentality of any of the foregoing.

(e) The term "local public body or agency" means any public body or agency, including a political subdivision, created by or under the laws of a State or two or more States, or a combination of such bodies or agencies.

(f) The term "land development" means the process of clearing and grading land, making, installing, or constructing waterlines and water supply installations, sewerlines and sewage disposal installations, steam, gas, and electric lines and installations, roads, streets, curbs, gutters, sidewalks, storm drainage facilities, and other installations or work, whether on or off the site, which the Secretary deems necessary or desirable to prepare land for residential, commercial, industrial, or other uses, or to provide facilities for public or common use. The term "land development" includes the construction of public facilities, but does not include the construction of any other building unless it is (1) needed in connection with a water supply or sewage disposal installation or a steam, gas, or electric line or installation, or (2) is to be owned and maintained by residents of the new community under joint or cooperative arrangements approved by the Secretary.

(g) The term "actual cost" means the costs (exclusive of rebates or discounts) incurred by a private new community developer in carrying out the land development assisted under this Act. These costs may include amounts paid for labor, materials, construction contracts, land planning, engineers' and architect's fees, surveys, taxes, and interest during development, organizational and legal expenses, such allocation of general overhead expenses as are acceptable to the Secretary, and other items of expense incidental to development which may be approved by the Secretary. If the Secretary determines that there is an identity of interest between the developer and a contractor, there may be included as a part of actual cost an allowance for the contractor's profit or risk in an amount deemed reasonable by the Secretary.

(h) The term "Secretary" means the Secretary of Housing and Urban Development.

(i) The term "Community Development Corporation" means the corporation established within the Department of Housing and Urban Development under section 727.

ELIGIBLE NEW COMMUNITY DEVELOPMENT

SEC. 712. (a) A new community development program is eligible for assistance under this part only if the Secretary determines that the program (or the new community it contemplates)—

(1) will provide an alternative to disorderly urban growth, helping preserve or enhance desirable aspects of the natural and urban environment or so improving general and economic conditions in established communities as to help reverse migration from existing cities or rural areas;

(2) will be economically feasible in terms of economic base or potential for economic growth;

(3) will contribute to the welfare of the entire area which will be substantially affected by the program and of which the land to be developed is a part;

(4) is consistent with comprehensive planning, physical and social, determined by the Secretary to provide an adequate basis for evaluating the new community development program in relation to other plans (including State, local, and private plans) and activities involving area population, housing and development trends, and transportation, water, sewerage, open space, recreation, and other relevant facilities;

(5) has received all governmental reviews and approvals required by State or local law, or by the Secretary;

(6) will contribute to good living conditions in the community, and that such community will be characterized by well balanced and diversified land use patterns and will include or be served by adequate public, community, and commercial facilities (including facilities needed for education, health and social services, recreation, and transportation) deemed satisfactory by the Secretary;

(7) makes substantial provision for housing within the means of persons of low and moderate income and that such housing will constitute an appropriate proportion of the community's housing supply; and

(8) will make significant use of advances in design and technology with respect to land utilization, materials and methods of construction, and the provision of community facilities and services.

(b) A new community development program approved for assistance under this part shall be undertaken by a private new community developer or State land development agency approved by the Secretary on the basis of financial, technical, and administrative ability which demonstrates capacity to carry out the program with reasonable assurance of its completion.

GUARANTEES

SEC. 713. (a) The Secretary (acting through the Community Development Corporation) is authorized to guarantee, and enter into commitments to guarantee, the bonds, debentures, notes, and other obligations issued by or on behalf of private new community developers and State land development agencies for the purpose of financing real property acquisition and land development and to compensate for the use of real property or the removal of liens or encumbrances on such property, pursuant to the new community development programs approved by the Secretary. The Secretary may make such guarantees and enter into such commitments upon such terms and conditions as he may prescribe consistent with the limitations and conditions contained in section 715; except that no obligation of any State land development agency shall be guaranteed under this section if the income from such obligation is exempt from Federal taxation. The Secretary is authorized to make grants to any State land development agency the obligations of which are guaranteed under this section in amounts estimated by him not to exceed the difference between the interest paid on such obligations and the interest on similar obligations the income from which is exempt from Federal taxation.

(b) The full faith and credit of the United States is pledged to the payment of all guarantees made under this section with respect to principal, interest, and any redemption premiums. Any such guarantee made by the Secretary shall be conclusive evidence of the eligibility of the obligations for such guarantee, and the validity of any guarantee so made shall be incontestable in the hands of a holder of the guaranteed obligation.

(c) The outstanding bonds, debentures, notes, or other obligations guaranteed under this section with respect to a single new community development program shall involve a principal obligation in an amount not exceeding the sum of (1) 80 per centum of the Secretary's estimate of the value of the real property before development, and (2) 90 per centum of his estimate of the actual cost of the land development.

(d) The outstanding principal obligations guaranteed under this section with respect to a single new community development program shall at no time exceed $50,000,000.

(e) The aggregate of the outstanding principal obligations guaranteed under this section shall at no time exceed $500,000,000.

LOANS

SEC. 714. (a) The Secretary (acting through the Community Development Corporation) is authorized, subject to the limitations and conditions contained in section 715, to make and enter into agreements to make loans to or on behalf of private new community developers and State land development agencies for the purpose of assisting them to make interest payments on indebtedness incurred by them to finance new community development programs approved by him. Loans under this section shall be in amounts which do not exceed the amount of interest the Secretary estimates is payable on indebtedness attributable to land acquisition or land development and shall be made only with respect to interest payments on indebtedness outstanding during an initial development period (not to exceed fifteen years) which the Secretary estimates to be prior to the time when land marketing activity is of sufficient volume to permit continued development under the new community development program without the benefit of further loans under this section.

(b) The Secretary shall require that loans under this section shall be repaid, with interest and on terms and conditions satisfactory to him, commencing at such time as development progress and marketing under the new community development program permit such repayment, but not later than fifteen years after the date the loan is made. Interest on such loans shall be payable at an annual rate which the Secretary of the Treasury shall specify as applicable to the six-month period, ending either June 30 or December 31 during which the contract for the loan is entered into, which rate for each such six-month period shall be determined by the Secretary of the Treasury by estimating the average yield to maturity prior to the beginning of such period on all outstanding marketable obligations of the United States having a maturity date three or more years from the time the estimate is made, plus one-eighth of 1 per centum per annum.

(c) The principal amount of the loans outstanding at any time under this section with respect to a single new community development program shall not exceed $20,000,000.

(d) The aggregate principal amount of the loans outstanding under this section shall at no time exceed $240,000,000.

LIMITATIONS ON GUARANTEES AND LOANS

SEC. 715. (a) No guarantee or loan shall be made under this part unless the Secretary has determined that the new community development program represents an acceptable financial risk to the United States, taking into consideration (1) the financial and security interests of the United States, including the manner in which the developer proposes to finance and schedule land acquisition, land development, and marketing, and (2) the public purposes of this part and the special problems involved in financing new communities, including (i) the large amount of initial capital required to finance sound new communities, (ii) the extended period before initial returns can be expected, and (iii) the irregular pattern of cash returns characteristic of this type of development.

(b) The Secretary shall take such steps as he considers reasonable to assure that bonds, debentures, notes, and other obligations guaranteed, or with respect to which interest loans are made, under this part will—

(1) be issued to investors approved by, or meeting requirements prescribed by, the Secretary, or if an offering to the public is contemplated, be underwritten upon terms and conditions approved by the Secretary;

(2) bear interest at a rate satisfactory to the Secretary;

(3) contain or be subject to repayment, maturity, and other provisions satisfactory to the Secretary; and

(4) contain or be subject to provisions with respect to the protection of the security interests of the United States, including any provisions deemed appropriate by the Secretary relating to subrogation, liens and releases of liens, payment of taxes, cost certification procedures, escrow or trusteeship requirements or other matters.

REVOLVING FUND

SEC. 716. (a) The Secretary is authorized to establish a revolving fund to provide for (1) the timely payment of any liabilities incurred as the result of guarantees made under this part; (2) making loans authorized under this part; (3) payment of obligations issued to the Secretary of the Treasury under subsection (b) of this section; and (4) any other program expenditures, including administrative and non-administrative expenses. Such revolving fund shall be comprised of (1) receipts from fees and charges; (2) recoveries under security, subrogation, and other rights; (3) repayments, interest income, and any other receipts obtained in connection with guarantees or loans made under this part; (4) proceeds of the obligations issued to the Secretary of the Treasury pursuant to subsection (b) of this section; and (5) such sums, which are hereby authorized to be appropriated, as may be required for the payment of the obligations issued to the Secretary of the Treasury for the purpose of making grants to State land development agencies under section 713, and for other purposes under this part.

(b) The Secretary may issue obligations to the Secretary of the Treasury in an amount sufficient to enable the Secretary to carry out the functions authorized by this part. The obligations issued under this subsection shall have such maturities and bear such rate or rates of interest as shall be determined by the Secretary of the Treasury. The Secretary of the Treasury is authorized and directed to purchase any obligations so issued, and for that purpose he is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, and the purposes for which securities may be issued under that Act are extended to include purchases of the obligations hereunder.

(c) Notwithstanding any other provision of law relating to the acquisition, handling, improvement, or disposal of real and other property by the United States, the Secretary shall have power, for the protection of the interests of the fund authorized under this section, to pay out of such fund all expenses or charges in connection with the acquisition, handling, improvement, or disposal of any property, real or personal, acquired by him as a result of recoveries under security, subrogation, or other rights.

SUPPLEMENTARY GRANTS FOR PUBLIC FACILITIES

SEC. 717. (a) The Secretary is authorized to make supplementary grants to any State or local public body or agency carrying out a new community assistance project, as defined in subsection (c), if the Secretary determines that such project is necessary or desirable for carrying out a new community development program. In no case shall any grant under this section exceed 20 per centum of the cost of the new community assistance project for which the grant is made; and in no case shall the total Federal contributions to the cost of such project be more than 80 per centum.

(b) In carrying out his authority under this section, the Secretary shall, with respect to any new community assistance project assisted by grants administered by a Federal department or agency other than the Department of Housing and Urban Development, consult with such department or agency concerning the project; and he shall, for the purpose of subsection (a), accept the certification of such department or agency as to the cost of such project.

(c) For the purposes of this section, a "new community assistance project" is a project assisted by grants under section 3 of the Urban Mass Transportation Act of 1964; section 120(a) of title 23, United States Code; section 19 of the Airport and Airway Development Act of 1970; title VI of the Public Health Service Act; title II of the Library Services and Construction Act; section 5 of the Land and Water Conservation Fund Act of 1965; title VII of the Housing Act of 1961; section 702 or 703 of the Housing and Urban Development Act of 1965; section 8 of the Federal Water Pollution Control Act; section 306(a)(2) of the Consolidated Farmers Home Administration Act; section 103 or 104 of the Higher Education Facilities Act of 1963; or section 101(a)(1) of the Public Works and Economic Development Act of 1965 with respect to projects of a type eligible for assistance under any of the other provisions of law listed in this subsection.

(d) There are authorized to be appropriated for supplementary grants under this section not to exceed $36,000,000 for the fiscal year ending June 30, 1971, not to exceed $66,000,000 for each of the fiscal years ending June 30, 1972, and June 30, 1973, and not to exceed such sums as may be necessary for any fiscal year commencing after June 30, 1973. Any amount so appropriated shall re-

main available until expended, and any amounts authorized for any fiscal year but not appropriated may be appropriated for any succeeding fiscal year. In addition, the amounts authorized to be appropriated for grants under section 412 of the Housing and Urban Development Act of 1968 and the amounts appropriated thereunder shall be available for carrying out this section and shall remain available until appropriated and expended.

TECHNICAL ASSISTANCE

SEC. 718. The Secretary is authorized to provide, either directly or by contract or other arrangements, technical assistance to private new community developers and State land development agencies, or State and local public bodies and agencies to assist them in connection with planning and carrying out new community development programs.

SPECIAL PLANNING ASSISTANCE

SEC. 719. (a) The Secretary may, until June 30, 1975, enter into agreements with private new community developers to provide financial assistance for planning work, in amounts not exceeding two-thirds of the estimated cost of such work, which he determines will have special value in assuring that new community development programs (1) will be fully responsive to social or environmental problems related to the public purposes of new community development, or (2) will adequately provide for, or encourage the use of, new or advanced technology in support of program objectives.

(b) The Secretary shall enter into agreements under this section only with respect to new community development programs which had been approved or are being actively considered for approval, having met such initial feasibility criteria as the Secretary may have prescribed, and only with respect to planning work which the Secretary determines is in excess of that which would ordinarily be needed to establish final market, financial, and engineering feasibility for programs or projects of similar size and scope not subject to the special purposes of this part. The financial assistance extended pursuant to such agreements shall be subject to such terms and conditions, which may include provisions for repayment where appropriate, as the Secretary may prescribe.

(c) There are authorized to be appropriated for financial assistance under this section not to exceed $5,000,000, which limit shall be increased by $5,000,000 on July 1, 1971. Any amount appropriated under this section shall remain available until expended.

FEES AND CHARGES

SEC. 720. The Secretary is authorized to establish and collect fees for guarantees under this part, and may make such charges in connection with guarantees, loans, and technical and other assistance under this part as he considers reasonable for the analysis of applications, appraisals, inspections, and other activities related to such assistance. On or before March 1, 1973, the Secretary shall make a report to the Congress concerning the fees and charges for guarantees under this part that he estimates will be adequate to provide income sufficient for a self-supporting guarantee program and concerning the relationship of other charges to costs incurred under this part.

ENCOURAGEMENT OF SMALL BUILDERS

SEC. 721. The Secretary shall adopt such requirements as he deems necessary to assure that new community assistance under this part will (1) help maintain a diversified, local homebuilding industry; (2) increase the capability of all segments of the homebuilding industry, including both small and large producers, to participate, through an increased supply of building sites at reasonable costs and through improved technology, in producing the needed, large volume of well-designed, inexpensive housing; and (3) encourage broad participation by the homebuilding industry, particularly small builders.

REAL PROPERTY TAXATION

SEC. 722. Nothing in this part shall be construed to exempt any real property that may be acquired and held by the Secretary as a result of the exercise of lien or subrogation rights from real property taxation to the same extent, according to its value, as other real property is taxed.

AUDIT BY GENERAL ACCOUNTING OFFICE

SEC. 723. Insofar as they relate to any guarantees, loans, or grants made pursuant to this part, the financial transactions of recipients of Federal assistance may be audited by the General Accounting Office under such rules and regulations as may be prescribed by the Comptroller General of the United States. The representatives of the General Accounting Office shall have access to all books, accounts, records, reports, files, and all other papers, things, or property belonging to or in use by such recipients pertaining to such financial transactions and necessary to facilitate the audit.

GENERAL PROVISIONS

SEC. 724. In the performance of, and with respect to, the functions, powers, and duties vested in him by this part, the Secretary, in addition to any authority otherwise vested in him, shall—

(1) have the functions, powers, and duties (including the authority to issue rules and regulations) set forth in section 402, except subsections (c)(2), (c), (4), (d), and (f), of the Housing Act of 1950: *Provided*, That subsection (a)(1) of section 402 shall not apply with respect to functions, powers, and duties under section 718 of this part;

(2) have the power, notwithstanding any other provision of law, in connection with any assistance under this part, whether before or after any default, to provide by contract for the extinguishment upon default of any redemption, equitable, legal, or other right, title, or interest of the private new community developer or State land development agency in any mortgage, deed, trust, or other instrument held by or on behalf of the Secretary for the protection of the security interests of the United States; and

(3) have the power to foreclose on any property or commence any action to protect or enforce any right conferred upon him by law, contract, or other agreement, and bid for and purchase at any foreclosure or other sale any property in connection with which he has provided assistance pursuant to this part. In the event of any such acquisition, the Secretary may, notwithstanding any other provision of law relating to the acquisition, handling, or disposal of real property by the United States, complete, administer, remodel and convert, dispose of, lease, and otherwise deal with, such property. Notwithstanding any other provision of law, the Secretary shall also have power to pursue to final collection by way of compromise or otherwise all claims acquired by him in connection with any security, subrogation, or other rights obtained by him in administering this part.

TECHNICAL AND CONFORMING PROVISIONS

SEC. 725. (a) No bonds, debentures, notes, or other obligations shall be guaranteed under title IV of the Housing and Urban Development Act of 1968 after the effective date of this part except pursuant to a commitment to guarantee or project approval made before that date: *Provided*, That a new community developer whose new community development project has, as of the effective date of this part, been approved by the Secretary under title IV shall be eligible with respect to obligations thereafter issued by him for guarantee assistance as authorized either by title IV or by this part, and such guarantee assistance may be given without a further determination by the Secretary under sections 712 and 715(a) of this part. If the Secretary finds that an applicant for title IV assistance has submitted complete financial and internal development plans and related materials pursuant to section 404 of such title IV, or major elements of such plans or materials, the Secretary may accept such plans and materials or major elements, respectively, as full or partially satisfying the requirement under this part for the submission of a new community development program. All receipts, funds, or other assets and all liabilities of the revolving fund established pursuant to section 407 of the Housing and Urban Development Act of 1968 (including liabilities arising under guarantees made pursuant to such title IV and this section) shall become and be assets and liabilities of the revolving fund established pursuant to this part, as if such assets and liabilities had been received or incurred pursuant to this part, and shall be paid over, held, and accounted for accordingly.

(b) Section 202(b)(4) of the Housing Amendments of 1955 is amended by adding before the period at the end thereof "or under part B of the Urban Growth and New Community Development Act of 1970".

(c) The first paragraph of section 24 of the Federal Reserve Act is amended by inserting the following before the period at the end of the fourth sentence thereof: "or under part B of the Urban Growth and New Community Development Act of 1970."

(d) The twelfth paragraph of section 5(c) of the Homeowners' Loan Act of 1933 is amended by adding in the last sentence immediately after "under title IV of the Housing and Urban Development Act of 1968" the words "or under part B of the Urban Growth and New Community Development Act of 1970".

(e) Section 701 of the Housing Act of 1954 is amended by—

(1) striking out the word "approved" in subsection (a)(4) and adding before the semicolon at the end of such subsection "or under part B of the Urban Growth and New Community Development Act of 1970";

(2) inserting in subsection (b) after "(2) areas described in" the following: "subsection (a)(4) or"; and

(3) striking out the "No" at the beginning of the third sentence of subsection (b) and inserting in lieu thereof "Except for planning for areas described in subsection (a)(4), no".

(f) All laborers and mechanics employed by contractors or subcontractors in land development assisted under this part shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended (40 U.S.C. 276a–276a–5). No assistance shall be extended under this part for any land development without first obtaining adequate assurance that these labor standards will be maintained upon the construction work involved in such program. The Secretary of Labor shall have, with respect to the labor standards specified in this section, the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (64 Stat. 1267), and section 2 of the Act of June 13, 1934 (40 U.S.C. 276c).

JOINT FUNDING

SEC. 726. Funds made available under any Federal assistance program for projects or activities approved as part of, or pursuant to, a new community development program may be used jointly with funds made available for such projects or activities under any other Federal assistance program, subject to regulations prescribed by the President. Such regulations may include provisions for common technical or administrative re-

quirements where varying or conflicting provisions of law would otherwise apply, for establishing joint management funds and common non-Federal shares, and for special agreements, or delegations of authority, among different Federal agencies in connection with the supervision or administration of assistance. Such regulations shall in any case include appropriate criteria and procedures to assure that any special authorities conferred, which are not otherwise provided for by law, shall be employed only as necessary to promote effective and efficient administration and in a manner consistent with the protection of the Federal interest and program purposes or statutory requirements of a substantive nature. For purposes of this section, the term "Federal assistance program" has the same meaning as under the Intergovernmental Cooperation Act of 1968.

COMMUNITY DEVELOPMENT CORPORATION

SEC. 727. (a) There is hereby created within the Department of Housing and Urban Development a body corporate to be known as the Community Development Corporation which shall carry out its functions subject to the direction and supervision of the Secretary.

(b) The Corporation shall have a Board of Directors (hereinafter referred to as the "Board") which shall consist of five members as follows:

(1) the Secretary, who shall be Chairman of the Board;

(2) one person, to be appointed by the President by and with the advice and consent of the Senate, who shall serve at the pleasure of the President, shall be the General Manager of the Corporation, serving as its chief executive officer under the Board's general direction, and shall receive compensation at the rate provided for positions at level IV of the Executive Schedule (5 U.S.C. 5315); and

(3) three persons, to be appointed by the Secretary, who shall serve at his pleasure, but not more than one such person shall be selected from among officers or employees of the Department of Housing and Urban Development.

Members of the Board who are regular, full-time officers or employees of the Federal Government shall receive no additional compensation for their services as Board members. Other members shall receive for their services as members, when engaged in the performance of their duties, the per diem equivalent to the rate for level IV of the Federal Executive Salary Schedule under section 5315 of title 5 of the United States Code. Each member of the Board shall be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of such title for persons in the Government service employed intermittently.

(c) The functions of the Secretary with respect to guarantees and loans in aid of new community development under this part shall be administered through the Community Development Corporation, and the Corporation shall perform such additional functions, powers, and duties as the Secretary may prescribe from time to time.

PART C—DEVELOPMENT OF RATIONAL URBAN GROWTH PATTERNS

STATE AND REGIONAL PLANNING

SEC. 735. Section 701 of the Housing Act of 1954 is amended by adding at the end thereof the following new subsection:

"(j) In carrying out the provisions of this section relating to planning for States, regions, or other multijurisdictional areas whose development has significance for purposes of national growth and urban development objectives, the Secretary shall encourage the formulation of plans and programs which will include the studies, criteria, standards, and implementing procedures necessary for effectively guiding and controlling major decisions as to where growth should take place within such States, regions, or areas. Such plans and programs shall take account of the availability of and need for conserving land and other irreplaceable natural resources; of projected changes in size, movement, and composition of population; of the necessity for expanding housing and employment opportunities; of the opportunities, requirements, and possible locations for, new communities and large-scale projects for expanding or revitalizing existing communities; and of the need for methods of achieving modernization, simplification, and improvements in governmental structures, systems, and procedures related to growth objectives. If the Secretary determines that activities otherwise eligible for assistance under this section are necessary to the development or implementation of such plans and programs, he may make grants in support of such activities to any governmental agency or organization of public officials which he determines is capable of carrying out the planning work involved in an effective and efficient manner and may make such grants in an amount equal to not more than 75 per centum of the cost of such activities."

PART D—DEVELOPMENT OF INNER CITY AREAS

PURPOSE

SEC. 740. It is the purpose of this part to provide our cities, which urgently need to augment their inventories of housing (particularly housing for low and moderate income families) and to find sites for essential public facilities and additional sources of employment, but have virtually no vacant land upon which to build, with a program which will make possible the more rational use of urban land and space that is currently occupied by industrial or commercial uses which though not physically blighted are functionally obsolete or uneconomic, or of land and space that is not usable in its present state because of natural hazards or inadequate development, so that in appropriate cases major rebuilding projects (including new communities in town) may be undertaken without major residential clearance activities and with minimal displacement.

AMENDMENTS TO TITLE I OF THE HOUSING ACT OF 1949

SEC. 741. (a) The heading of title I of the Housing Act of 1949 is amended to read as follows:

"TITLE I—URBAN REVITALIZATION".

(b) The proviso in section 103(a)(1) of such Act is amended by inserting after "open land" the following: "(other than land within the purview of section 110(c)(1)(v)),".

(c) Section 110(c)(1) of such Act is amended—

(1) by inserting before the first proviso the following: ", or (v) land or space which is vacant, unused, underused, or inappropriately used (including infrequently used rail yards and rail storage facilities, and excessive or vacated railroad rights-of-way; air rights over streets, expressways, railroads, waterways, and similar locations; land which is occupied by functionally obsolete nonresidential buildings or is used for low-utility purposes or is covered by shallow water or is subject to periodic flooding or consists of unused or underused slips or dock areas or other waterfront property; which land or space the Secretary determines may be developed (at a cost reasonably related to the public purpose to be served), without major residential clearance activities, and with full consideration to the preservation of beneficial aspects of the urban and natural environment, for such uses as are consistent with emphasis on housing for low- and moderate-income families, including the provision of schools, hospitals, parks, and other essential public facilities, and, where appropriate, all uses associated with new communities in town or similar large scale undertakings related to inner city needs, including concentrated sources of employment"; and

(2) by striking "clauses (iii) and (iv)" in the first proviso and inserting in lieu thereof "clauses (iii), (iv), and (v)".

(c) Section 110(c)(7) of such Act is amended to read as follows:

"(7) Construction of foundations and platforms necessary for the development of air rights sites in accordance with the provisions of clause (iv) or (v) of paragraph (1) of this subsection."

TITLE VIII—URBAN MASS TRANSPORTATION

CONGRESSIONAL FINDINGS

SEC. 801. The Congress finds—

(1) that over 70 per centum of the Nation's population lives in urban areas;

(2) that transportation is the lifeblood of an urbanized society and the health and welfare of that society depends upon the provision of efficient, economical, and convenient transportation within and between its urban areas;

(3) that for many years the mass transportation industry satisfied the transportation needs of the urban areas of the country capably and profitably;

(4) that in recent years the maintenance of even minimal mass transportation service in urban areas has become so financially burdensome as to threaten the continuation of this essential public service;

(5) that the termination of such service or the continued increase in its cost to the user is undesirable, and may have a particularly serious adverse effect upon the welfare of a substantial number of lower income persons;

(6) that some urban areas are now engaged in developing preliminary plans for, or are actually carrying out, comprehensive projects to revitalize their mass transportation operations; and

(7) that immediate substantial Federal assistance is needed on an interim basis to enable many mass transportation systems to continue to provide vital service during the period required to overhaul and revitalize mass transportation operations and to place such operations on a sound financial basis.

EMERGENCY GRANTS TO PAY INDEBTEDNESS

SEC. 802. The Urban Mass Transportation Act of 1964 is amended—

(1) by redesignating sections 6 through 15 as sections 8 through 17, respectively; and

(2) by inserting after section 5 a new section as follows:

"EMERGENCY GRANTS TO MAKE ANNUAL DEBT PAYMENTS

"SEC. 6. (a) Notwithstanding any other provision of this Act, the Secretary is authorized to make grants to States and local public bodies and agencies thereof to assist in paying the yearly interest on and discharging annual obligations on securities, equipment trust certificates, or other similar instruments of indebtedness which have been incurred in the acquisition, construction, reconstruction, improvement, and leasing (exclusive of any charge for operation or maintenance) of facilities and equipment for use, by operation or lease or otherwise, in mass transportation service in urban areas. A grant may not be made under this subsection unless the Secretary determines that it is essential to prevent (1) the termination of a significant part of the transportation service for a community, or (2) the occurrence of a serious adverse effect upon the welfare of a substantial number of lower income persons who are dependent upon the transportation service of such community. The amount of any grant made by the Secretary under this subsection shall not exceed twice the amount provided by the grant

applicant (from other sources than current revenues of a mass transportation system) for use in paying such interest or obligations during the year in which the grant is made.

"(b) To finance grants under subsection (a) of this section, there is authorized to be appropriated $75,000,000 for each of the fiscal years 1971, 1972, 1973, 1974, and 1975. Any amount appropriated pursuant to this subsection shall remain available until expended, and any amount so authorized but not appropriated for any fiscal year may be appropriated for any subsequent fiscal year."

INTERIM ASSISTANCE TO ASSURE ADEQUATE MASS TRANSPORTATION SERVICE IN URBAN AREAS

SEC. 803. The Urban Mass Transportation Act of 1964 is amended by inserting after section 6 (added by section 802 of this Act) a new section as follows:

"INTERIM ASSISTANCE

"SEC. 7. (a) For the purpose of providing interim assistance to assure adequate mass transportation service in urban areas, the Secretary is authorized to make grants to any State or local public body or agency thereof to enable it to assist any mass transportation system which maintains mass transportation service in an urban area within its jurisdiction to defray annual net operating deficits incurred as the result of providing such service to such areas. No grant shall be provided under this section unless (1) the Secretary determines that the mass transportation services provided by the system involved are needed for carrying out a program referred to in section 4(a), and (2) the applicant State, public body, or agency, and the operator (if a different entity) of such system, have jointly submitted to the Secretary a comprehensive mass transportation service improvement plan which is approved by him and which sets forth a program, meeting criteria established by the Secretary, for capital or service improvements to be undertaken for the purpose of providing more efficient, economical, and convenient mass transportation service in an urban area, and for placing the mass transportation operations of such system on a sound financial basis.

"(b) The amount of any grant under this section to a State or local public body or agency thereof to defray the operating deficit of any mass transportation system shall not exceed twice the amount of financial assistance provided by such State, public body, or agency to such system to defray such deficit.

"(c) The Secretary shall issue such regulations as he deems necessary to administer this section in an equitable and efficient manner. Such regulations shall include appropriate definitions of (1) the items of cost and revenue to be used in determining annual net operating deficits, and (2) the sources or types of State or local financial assistance which may be considered in computing the maximum allowable Federal grant.

(d) To finance grants under this section, there is authorized to be appropriated not to exceed $75,000,000 for each of the fiscal years 1971, 1972, 1973, 1974, and 1975. Any amount so appropriated shall remain available until expended, and any amount so authorized but not appropriated for any fiscal year may be appropriated for any subsequent fiscal year. The Secretary is authorized, notwithstanding the provisions of section 3648 of the Revised Statutes to make advance or progress payments on account of any grant made pursuant to this section.

"(e) The Secretary shall conduct a study of the operation of the subsidy program authorized by this section comparing it with other operating subsidy programs including those currently carried out by the Federal Government, with a view to determining the efficacy of such program in assuring adequate mass transportation service in urban areas. The Secretary shall submit an interim report of his findings not later than June 30, 1971, and a final report of such findings and recommendations not later than June 30, 1973.

"(f) No grants shall be made under this section after June 30, 1975, except pursuant to a commitment entered into prior to such date."

ADDITIONAL AMENDMENTS

SEC. 804. The following sections of the Urban Mass Transportation Act of 1964 (as redesignated by section 802 of this Act) are amended as follows:

(1) Section 14(c) is amended—

(A) by striking out "and" at the end of clause (4);

(B) by striking out the period at the end of clause (5) and inserting in lieu thereof a semicolon; and

(C) by adding after clause (5) the following new clauses:

"(6) the term 'mass transportation system' means any private company or public authority or agency providing mass transportation service; and

"(7) the term 'annual net operating deficit' means that part of the annual operating costs of a mass transportation system which could reasonably have been avoided by the elimination of all or part of the mass transportation service in an urban area, less the annual revenues derived by such system from the provision of such service."

(2) Section 14(d) is amended by adding the following at the end thereof: "No funds appropriated pursuant to section 4(b) may be used for grants made pursuant to section 6 or 7. Grant assistance provided under any section of this Act shall be coordinated to the greatest extent practicable with any other financial assistance provided under this Act. With the specific exception of the prohibition contained in section 3(b), the extension of financial assistance to a State or local public body or agency thereof under any section of this Act shall not have the effect of prohibiting the extension of financial assistance to such entity pursuant to any other section of this Act."

(3) The first sentence of section 15(c) is amended by striking out "section 3" and inserting in lieu thereof "section 3, 6, 7, or 8".

(4) The part of the first sentence of section 17 which precedes the proviso is amended to read as follows: "Grants made under sections 3, 6, and 7 of this Act (other than grants for relocation payments in accordance with section 9(b)) for projects in any one State shall not exceed in the aggregate 12½ per centum of the aggregate amount of grant funds authorized to be appropriated pursuant to sections 4(b), 6(b), and 7(c):".

(5) The first sentence of section 3(b) is amended by striking out "section 7(b)" and inserting in lieu thereof "section 9(b)".

(6) Section 3(c) is amended by striking out "section 13(c)" and inserting in lieu thereof "section 15(c)".

## TITLE IX—FARM HOUSING

HOUSING AND RELATED FACILITIES FOR DOMESTIC FARM LABOR

SEC. 901. (a) That part of the text of subsection (a) of section 514 of the Housing Act of 1949 which precedes the first numbered paragraph is amended to read as follows: "The Secretary is authorized to insure and make commitments to insure loans made by lenders other than the United States to the owner of any farm or any association of farmers for the purpose of providing housing and related facilities for domestic farm labor, or to any State (or political subdivision thereof), or any broad-based public or private nonprofit organization or any nonprofit organization of farmworkers incorporated within the State for the purpose of providing housing and related facilities for domestic farm labor any place within the State where a need exists. All such loans shall be made in accordance with terms and conditions substantially identical with those specified in section 502, except that—".

(b) Section 514(a) of such Act is amended by striking out in paragraph (2) "5 per centum" and inserting in lieu thereof "1 per centum".

(c) Paragraph (1) and (2) of section 514(f), and paragraph (1) of section 516(g) are amended by inserting "(including household furnishings)" after "structures", each place the term appears.

(d) Section 516 of such Act is amended—

(1) by striking out that part of the text of subsection (a) which precedes the first numbered paragraph and inserting in lieu thereof the following: "Upon the application of any State or political subdivision thereof, or any broad-based public or private nonprofit organization incorporated within the State, or any nonprofit organization of farmworkers incorporated within the State, the Secretary is authorized to provide financial assistance for the provision of low-rent housing and related facilities (which may be located any place within the State) for domestic farm labor, if he finds that—";

(2) by striking out in paragraph (2) of subsection (a) "one-third" and inserting in lieu thereof "10 per centum";

(3) by inserting after "thereof" in paragraph (3) of subsection (a) the following: "; and such housing and facilities shall be durable and suitable for year-around occupancy or use, unless the Secretary finds that there is no need for such year-around occupancy or use in that area"; and

(4) by striking out in subsection (b) "two-thirds" and inserting in lieu thereof "90 per centum".

MOBILE HOMES

SEC. 902. Title V of the Housing Act of 1949 is amended by adding at the end thereof a new section as follows:

"MOBILE HOMES

"SEC. 525. (a) As used in this title, the term 'housing' shall, notwithstanding any other provision of this title and to the extent deemed practicable by the Secretary, include mobile homes.

"(b) With respect to mobile homes financed under this title, the Secretary shall—

"(1) prescribe minimum property standards to assure the livability and durability of the mobile home and the suitability of the site on which it is to be located, and

"(2) obtain assurances from the borrower that the mobile home will be placed on a site which complies with standards prescribed by the Secretary and with applicable local requirements.

Loans under this title for the purchase of mobile homes shall be on the same terms and conditions as are applicable under section 2 of the National Housing Act to obligations financing the purchase of mobile homes."

LOCAL LOAN COMMITTEES

SEC. 903. Section 508(b) of the Housing Act of 1949 is amended by striking out "shall" wherever it appears except in the last sentence and inserting in lieu thereof "may".

HOUSING AND RELATED FACILITIES FOR ELDERLY PERSONS

SEC. 904. Section 515(b)(1) of the Housing Act of 1949 is amended by striking out "$300,000" and inserting in thereof "$1,000,000".

## TITLE X—MISCELLANEOUS

ADVICE AND ASSISTANCE WITH RESPECT TO HOUSING FOR LOW- AND MODERATE-INCOME FAMILIES

SEC. 1001. (a) Subsection (a) of section 106 of the Housing and Urban Development Act of 1968 is amended to read as follows:

"(a)(1) The Secretary is authorized to provide, or contract with public or private

organizations to provide, information, advice, and technical assistance, including but not limited to—

"(i) the assembly, correlation, publication, and dissemination of information with respect to the construction, rehabilitation, and operation of low- and moderate-income housing;

"(ii) the provision of advice and technical assistance to public bodies or to nonprofit or cooperative organizations with respect to the construction, rehabilitation, and operation of low- and moderate-income housing, including assistance with respect to self-help and mutual self-help programs;

"(iii) counseling on household management, self-help, budgeting, money management, child care, and related counseling services which would assist low- and moderate-income families receiving assistance under the United States Housing Act of 1937 or the National Housing Act in improving their living conditions and housing opportunities, and in meeting the responsibilities of homemaking.

"(2) There is authorized to be appropriated for the purposes of this subsection, without fiscal year limitation, not to exceed $5,000,000. Any amounts so appropriated shall remain available until expended."

(b) The first sentence of section 106(b)(1) of such Act is amended by striking out "any federally assisted program" and inserting in lieu thereof "section 235 of the National Housing Act or any other federally assisted program".

(c) Section 2(6) of the United States Housing Act of 1937 is amended by adding at the end thereof the following: "The term also means the financing of tenant programs and services for families residing in low-rent housing projects, particularly where there is maximum feasible participation of the tenants in the development and operation of such tenant programs and services. As used in this paragraph, the term 'tenant programs and services' includes the development and maintenance of tenant organizations which participate in the management of low-rent housing projects; the training of tenants to manage and operate such projects and the utilization of their services in project management and operation; counseling on household management, housekeeping, budgeting, money management, child care, and similar matters; advice as to resources for job training and placement, education, welfare, health, and other community services; services which are directly related to meeting tenant needs and providing a wholesome living environment; and referral to appropriate agencies when necessary for the provision of such services. To the maximum extent available and appropriate, existing public and private agencies in the community shall be used for the provision of such services."

(d) Section 15(10) of the United States Housing Act of 1937 is repealed.

TRAINING IN HOUSING MANAGEMENT

SEC. 1002. Section 803 of the Housing Act of 1964 is amended by redesignating subsections (b) and (c) as subsections (c) and (d), respectively, and inserting after subsection (a) a new subsection as follows:

"(b) Grants may be made under subsection (a) to support (1) the training of persons, especially persons of low income, in acquiring the skills needed in the management of housing for low- and moderate-income persons, and (2) research and the dissemination of information with respect to the problems involved in the management of housing for low- and moderate-income persons."

GENERAL ADMINISTRATIVE POWERS OF THE SECRETARY

SEC. 1003. Section 7 of the Department of Housing and Urban Development Act is amended by adding at the end thereof the following new subsections:

"(h) Except as such authority is otherwise expressly provided in any other Act administered by the Secretary, such financial transactions of the Secretary as the making of loans or grants (and vouchers approved by the Secretary in connection with such financial transactions) shall be final and conclusive upon all officers of the Government. Funds made available to the Secretary pursuant to any provision of law for such financial transactions shall be deposited in a checking account or accounts with the Treasurer of the United States. Such funds and any receipts and assets obtained or held by the Secretary in connection with such financial transactions shall be available, in such amounts as may from year to year be authorized by the Congress, for the administrative expenses of the Secretary in connection with such financial transactions. Notwithstanding the provisions of any other law, the Secretary may, with the approval of the Comptroller General, consolidate into one or more accounts for baking and checking purposes all cash obtained or held in connection with such financial transactions, including amounts appropriated, from whatever source derived.

"(i) Except as such authority is otherwise expressly provided in any other Act administered by the Secretary, the Secretary is authorized to:

"(1) foreclose on any property or commence any action to protect or enforce any right conferred upon him by any law, contract, or other agreement, and bid for and purchase at any foreclosure or any other sale any property in connection with which he has made a loan or grant. In the event of any such acquisition, the Secretary may, notwithstanding any other provision of law relating to the acquisition, handling, or disposal of real property by the United States, complete, administer, remodel and convert, dispose of, lease, and otherwise deal with, such property: *Provided*, That any such acquisition of real property shall not deprive any State or political subdivision thereof of its civil or criminal jurisdiction in and over such property or impair the civil rights under the State or local laws of the inhabitants on such property: *Provided further*, That section 3709 of the Revised Statutes shall not apply to any contract for services or supplies on account of any property so acquired or owned if the amount of such contract does not exceed $2,500;

"(2) enter into agreements to pay annual sums in lieu of taxes to any State or local taxing authority with respect to any real property so acquired or owned;

"(3) sell or exchange at public or private sale, or lease, real or personal property, and sell or exchange any securities or obligations, upon such terms as he may fix;

"(4) obtain insurance against loss in connection with property and other assets held;

"(5) consent to the modification, with respect to the rate of interest, time of payment of any installment of principal or interest, security, or any other term of any contract or agreement to which he is a party or which has been transferred to him; and

"(6) include in any contract or instrument such other covenants, conditions, or provisions as he may deem necessary.

"(j) Notwithstanding any other provision of law the Secretary is authorized to establish fees and charges, chargeable against program beneficiaries and project participants, which shall be adequate to cover over the long run, costs of inspection, project review and financing service, and by Federal or federally authorized auditors, and other beneficial rights, privileges, licenses, and services. Such fees and charges heretofore or hereafter collected shall be considered nonadministrative and shall remain available for operating expenses of the Department in providing similar services on a consolidated basis.

"(k)(1) The Secretary is authorized to accept and utilize voluntary and uncompensated services and accept, hold, administer, and utilize gifts and bequests of property, both real and personal, for the purpose of aiding or facilitating the work of the Department. Gifts and bequests of money and the proceeds from sales of other property received as gifts or bequests shall be deposited in the Treasury in a separate fund and shall be disbursed upon order of the Secretary. Property accepted pursuant to this paragraph, and the proceeds thereof, shall be used as nearly as possible in accordance with the terms of the gift or bequest.

"(2) For the purpose of Federal income, estate, and gift taxes, property accepted under paragraph (1) shall be considered as a gift or bequest to or for use of the United States.

"(3) Upon the request of the Secretary, the Secretary of the Treasury may invest and reinvest in securities of the United States or in securities guaranteed as to principal and interest by the United States any moneys contained in the fund provided for in paragraph (1). Income accruing from such securities and from any other property held by the Secretary pursuant to paragraph (1) shall be deposited to the credit of the fund and shall be disbursed upon order of the Secretary.

"(l) The Secretary is authorized to appoint, without regard to the civil service laws, such advisory committees as shall be appropriate for the purpose of consultation with and advice to the Department in performance of its functions. Members of such committees, other than those regularly employed by the Federal Government, while attending meetings of such committees or otherwise serving at the request of the Secretary, may be paid compensation at rates not exceeding those authorized for individuals under subsection (e) of this section, and while so serving away from their homes or regular places of business, may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons in the Government service employed intermittently."

PROHIBITION RELATING TO THE USE OF LEAD-BASED PAINT

SEC. 1004. (a) As used in this section—

(1) The term "Secretary" means the Secretary of Housing and Urban Development.

(2) The term "dwelling" means any building, structure, or portion thereof which is occupied, or designed or intended for occupancy, as a residence by one or more individuals.

(3) The term "lead-based paint" means any paint containing basic white lead, leaded zinc oxide, red lead, litharge, lead acetate, and lead driers singly or in combination in excess of 1 percent lead as metal in total nonvolatile.

(b)(1) It shall be unlawful for any person to apply lead-based paint on the interior of any dwelling which is subject to the provisions of this section.

(2) The Secretary may assess upon any person violating this subsection a civil penalty of not to exceed $1,000 for each such violation. Any such penalty may be compromised by the Secretary, and the amount of such penalty, as finally determined or as agreed upon in compromise, may be deducted from any sums owed to such person by the United States.

(c) This section applies only to dwellings to which the provisions of title VIII of the Act of April 11, 1968 (Public Law 90-284), relating to fair housing, are applicable on or after January 1, 1969.

(d) The Secretary shall make an objective study and investigation to determine whether

paint containing lead chromate or molybdate pigments as coloration present a sufficient health hazard to be included within the prohibitions of this section. The Secretary shall report his findings and recommendations to the Congress not later than one year after the date of enactment of this Act.

INCREASED FEES FOR CONSULTANT SERVICES

SEC. 1005. Section 7(e) of the Department of Housing and Urban Development Act is amended by striking out everything after the word "rates" and inserting in lieu thereof the following: "for individuals not to exceed the per diem equivalent to the highest rate for grade GS–18 of the General Schedule under section 5332 of title 5, United States Code."

AMENDMENT TO PUBLIC UTILITY HOLDING COMPANY ACT OF 1935

SEC. 1006. Section 9(c) of the Public Utility Holding Company Act of 1935 (15 U.S.C. 791(c)) is amended—

(1) by striking out "or" at the end of paragraph (2);

(2) by striking out the period at the end of paragraph (3) and inserting in lieu thereof "; or"; and

(3) by adding at the end thereof a new paragraph as follows:

"(4)(A) securities of a subsidiary company engaged in the business of providing housing for persons of low and moderate income within the service area of the holding-company system under housing programs authorized by the National Housing Act or any Act supplementary thereto, or (B) securities of or interests in a company organized to participate in such housing programs within the service area of a holding-company system which receives financial or other assistance from a company created or organized pursuant to title IX of the Housing and Urban Development Act of 1968. No such acquisitions shall be made except within such limitations and upon such terms and conditions, and with due regard to other provisions of this title, as the Commission may, by rules and regulations or order, permit as not detrimental to the public interest or the interest of investors or consumers."

SAVINGS AND LOAN ASSOCIATIONS

SEC. 1007. (a) Section 12(b) of the Federal Home Loan Bank Act (12 U.S.C. 1432(b)) is amended by adding at the end a new sentence as follows: "This authority extends to the acquisition, holding, and disposition of loans, or interests therein, having the benefit of any guaranty under section 221 or 222 of the Foreign Assistance Act of 1961, as amended by section 105 of the Foreign Assistance Act of 1969."

(b) Paragraph 13 of section 5(c) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(c)) is amended by inserting after the first sentence the following: "This authority extends to the acquisition, holding, and disposition of loans, or interests therein, having the benefit of any guaranty under section 221 or 222 of the Foreign Assistance Act of 1961, as amended by section 105 of the Foreign Assistance Act of 1969."

(c) The first sentence of section 5(c) of the Home Owners' Loan Act of 1933 is amended by striking out "15" and inserting in lieu thereof "20".

FINANCIAL INSTITUTIONS SUPERVISORY ACT OF 1966

SEC. 1008. Title IV of the Financial Institutions Supervisory Act of 1966 (80 Stat. 1056) is repealed.

INTERSTATE LAND SALES FULL DISCLOSURE ACT

SEC. 1009. Section 1406(5) of the Interstate Land Sales Full Disclosure Act is amended by inserting after the first comma the following: "the existence of any unusual conditions relating to noise or safety which affect the subdivision and are known to the developer,".

Mr. BYRD of West Virginia. Mr. President, I am authorized by the Senator from Iowa (Mr. HUGHES)—who is necessarily absent—to state that had he been present, he would have voted "yea" on the final passage of the Housing Urban Development Act of 1970.

Mr. MANSFIELD. Mr. President, the distinguished senior Senator from Alabama (Mr. SPARKMAN) has again demonstrated legislative skill and effectiveness that is unsurpassed in this body. The hour is late and perhaps that fact itself demonstrates the devotion and dedication that characterizes every legislative endeavor undertaken by the able chairman of the Committee on Banking and Currency. Senator SPARKMAN time and time again has shown outstanding legistive capacities. The overwelming success of this measure adds another splendid achievement to an overabundant record of public service obtained during a long and distinguished career. Once again the Senate is deeply indebted to Senator SPARKMAN. He has again earned the highest commendation of the Senate.

Deserving our praise as well is the distinguished Senator from Texas (Mr. TOWER), the ranking minority member of the Housing Subcommittee. His cooperation and able assistance assured the expeditious and efficient disposition of this measure.

At this late hour I wish to thank as well the Senator from Wisconsin (Mr. PROXMIRE), the Senator from Utah, Mr. BENNETT), and the many other Senators who supported and assisted so capably the passage of this housing proposal.

## ADDITIONAL COSPONSORS OF AN AMENDMENT

AMENDMENT NO. 915 TO H.R. 17604

Mr. GRIFFIN. Mr. President, at the request of the Senator from New York (Mr. GOODELL) I ask unanimous consent that at the next printing of amendment 915 to H.R. 17604 introduced on September 16, the names of the Senator from California (Mr. CRANSTON), the Senator from Iowa (Mr. HUGHES), the Senator from New York (Mr. JAVITS), the Senator from Massachusetts (Mr. KENNEDY), the Senator from New Jersey (Mr. CASE), the Senator from Kentucky (Mr. COOK), the Senator from Missouri (Mr. EAGLETON), the Senator from Alaska (Mr. GRAVEL), the Senator from Michigan (Mr. HART), the Senator from Montana (Mr. METCALF), the Senator from Ohio (Mr. YOUNG), the Senator from Rhode Island (Mr. PELL), the Senator from Indiana (Mr. HARTKE), the Senator from South Dakota (Mr. MCGOVERN), the Senator from Connecticut (Mr. DODD), the Senator from Tennessee (Mr. GORE), and the Senator from Maine (Mr. MUSKIE) be added as cosponsors.

The ACTING PRESIDENT pro tempore (Mr. METCALF). Without objection, it is so ordered.

## ORDER FOR RECOGNITION OF SENATOR JAVITS TOMORROW

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that on tomorrow, immediately following the prayer and the disposition of any unobjected items on the Legislative Calendar, the senior Senator from New York (Mr. JAVITS) be recognized for not to exceed 5 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## ORDER FOR TRANSACTION OF ROUTINE BUSINESS TOMORROW

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that following the remarks of the senior Senator from New York (Mr. JAVITS) on tomorrow, there be a period for the transaction of routine morning business, with statements therein limited to 3 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## ADJOURNMENT

Mr. BYRD of West Virginia. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in adjournment until 12 noon tomorrow.

The motion was agreed to; and (at 10 o'clock and 31 minutes p.m.), the Senate adjourned until tomorrow, Thursday, September 24, 1970, at 12 noon.

## NOMINATIONS

Executive nominations received by the Senate September 23, 1970:

COMMISSIONER OF EDUCATION

Sidney P. Marland, Jr., of New York, to be Commissioner of Education, vice James E. Allen, Jr.

DISTRICT OF COLUMBIA COURT OF APPEALS

Hubert B. Pair, of the District of Columbia, to be an associate judge of the District of Columbia Court of Appeals for the term of years prescribed by Public Law 91–358, approved July 29, 1970, and vice a new position created by said Public Law 91–358.

Gerard D. Reilly, of the District of Columbia, to be associate judge of the District of Columbia Court of Appeals for the term of years prescribed by Public Law 91–358, approved July 29, 1970, and vice a new position created by said Public Law 91–358.

J. Walter Yeagley, of Virginia, to be an associate judge of the District of Columbia Court of Appeals for the term of years prescribed by Public Law 91–358, approved July 29, 1970, and vice a new position created by said Public Law 91–358.

DISTRICT OF COLUMBIA COURT OF GENERAL SESSIONS

DeWitt S. Hyde, of Maryland, to be an associate judge of the District of Columbia court of general sessions, for the term of years prescribed by Public Law 91–358 approved July 29, 1970. He is now serving in this office under an appointment which expired September 13, 1969.

Dyer Justice Taylor, of Virginia, to be an associate judge, District of Columbia Court of general sessions, for the term of 15 years, as prescribed by Public Law 91–358, approved July 29, 1970, vice Justin L. Edgerton, deceased.

Normalie Holloway Johnson, of Washington, D.C., to be an associate judge, District of Columbia court of general sessions, for the term of 15 years, as prescribed by Public Law 91–358, approved July 29, 1970, vice Morris Miller, deceased.

Leonard Braman, of Maryland, to be an associate judge, District of Columbia court

of general sessions, for the term of 15 years, as prescribed by Public Law 91–358, approved July 29, 1970, vice Milton S. Kronheim, term expired.

Paul F. McArdle, of Maryland, to be an associate judge of the District of Columbia court of general sessions, for the term of 15 years as prescribed by Public Law 91–358, approved July 29, 1970, vice Thomas C. Scalley, term expired.

Sylvia A. Bacon, of the District of Columbia, to be an associate judge, District of Columbia court of general sessions, for the term of 15 years, vice a new position created by Public Law 91–358, approved July 29, 1970.

John F. Doyle, of Maryland, to be an associate judge, District of Columbia court of general sessions, for the term of 15 years vice a new position created by Public Law 91–358, approved July 29, 1970.

Eugene N. Hamilton, of Maryland, to be an associate judge, District of Columbia court of general sessions, for the term of 15 years vice a new position created by Public Law 91–358, approved July 29, 1970.

Stanley S. Harris, of Maryland, to be an associate judge, District of Columbia court of general sessions, for the term of 15 years vice a new position created by Public Law 91–358 approved July 29, 1970.

Theodore R. Newman, Jr., of the District of Columbia, to be an associate judge, District of Columbia court of general sessions, for the term of 15 years vice a new position created by Public Law 91–358, approved July 29, 1970.

Nicholas S. Nunzio, of Maryland, to be an associate judge, District of Columbia court of general sessions, for the term of 15 years vice a new position created by Public Law 91–358 approved July 29, 1970.

John G. Penn, of Maryland, to be an associate judge, District of Columbia court of general sessions, for the term of 15 years vice a new position created by Public Law 91–358 approved July 29, 1970.

George H. Revercomb, of Virginia, to be associate judge, District of Columbia court of general sessions for the term of 15 years vice a new position created by Public Law 91–358, approved July 29, 1970.

William E. Stewart, Jr., of Maryland, to be an associate judge, District of Columbia court of general sessions for the term of 15 years vice a new position created by Public Law 91–358, approved July 29, 1970.

James A. Washington, Jr., of Maryland, to be an associate judge, District of Columbia court of general sessions for the term of years prescribed by Public Law 91–358, approved July 29, 1970, and vice a new position created by said Public Law 91–358.

# EXTENSIONS OF REMARKS

## CHIEF JUSTICE SCORES "POT" SAFETY REPORTS

### HON. HENRY HELSTOSKI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1970*

Mr. HELSTOSKI. Mr. Speaker, many in legislative and Government executive positions today are being pressured to legalize the use and possession of marihuana.

May I suggest that any who lean favorably toward such a proposal read the following Associated Press article carrying the views of Chief Justice Joseph Weintraub of the Supreme Court of New Jersey on the subject.

Chief Justice Weintraub counsels extreme caution and I share that viewpoint. At the very, very least all should wait until appropriate and needed studies of marihuana and its effects are made as called for in my bill H.R. 14354.

I also share the doubts of the Chief Justice that full scale and complete research will prove that marihuana is harmless. Is there any doubt that many times the use of marihuana leads to the taking of hard-core drugs and dopes for lifts, trips, and crutches? Then often minds and bodies.

It will be a sad day in this Nation if those with the allout permissive philosophy should prevail and force legalization of the use and possession of marihuana before all of the facts are before those who must make the decision.

The Associated Press article follows:

CHIEF JUSTICE SCORES "POT" SAFETY REPORTS

TRENTON.—Chief Justice Joseph Weintraub of the New Jersey Supreme Court said yesterday that marijuana should not be legalized "until we are darn sure it's harmless."

The chief justice also criticized medical and research reports which said that smoking marijuana has not been proven to be harmful. Weintraub said the reports, like "the pied piper," were enticing youngsters to try the drug.

He made the remarks during a hearing on an appeal by 21-year-old Steven Ward who was sentenced to 2-3 years in prison for possessing marijuana valued at about $2.50.

Stanley C. Van Ness, head of New Jersey's public defender office, who argued Ward's case, said the sentence was cruel and excessive for a first offender.

He urged the court to overturn the sentence and establish a policy of probation for first offenders in marijuana cases.

Ward, who was 19-years-old when he was sentenced to state prison in 1969 by Cumberland County Judge Harry Adler, is free on parole after being confined for nearly one year.

Weintraub said the prison term for Ward would appear "wildly excessive" were it not for other factors outlined in a probation report submitted to Adler before sentencing.

The chief justice said the pre-sentence report indicated that Ward had "sponsored marijuana parties" which on one occasion had led to a search of his home by police which failed to turn up any evidence.

However, Assistant Cumberland County Prosecutor Samuel J. Serata told the high court that the pre-sentence report probably played a minor role in the harsh sentence.

Serata said the sentence was the product of an "almost hysterical" attitude in the county which has since changed.

Serata, who joined the prosecutor's staff this year, said that people in rural Cumberland County regarded "marijuana as a horrendous thing that comes from the cities . . . an epidemic that must be stamped out." He said he represented marijuana defendants before joining the prosecutor's staff.

Weintraub, who said he recognized that there has "been quite a change in public attitude" toward marijuana in the past year, said he thought it was "nonsense" to equate the laws against marijuana with prohibition on liquor during the 1920's. "One day it may be proven that it's no more harmful than Scotch," Weintraub said. "But I doubt it."

He added, "everyone agrees it's not as dangerous as heroin. But that doesn't mean it's just a drink of water.

"More harm is being done by these silly reports that it is not proven harmful and therefore it's (like) prohibition. That's nonsense. It's encouraging kids to try it."

## TAKE PRIDE IN AMERICA

### HON. CLARENCE E. MILLER

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. MILLER of Ohio. Mr. Speaker, today we should take note of America's great accomplishments and in so doing renew our faith and confidence in ourselves as individuals and as a nation. A Russian must work 2,950 minutes for a pair of men's shoes while an American works 275 minutes. For a business suit, a Russian must work 11,800 minutes compared to 802 minutes by an American worker.

## RESULTS OF POLL CONDUCTED BY THE AMERICAN SECURITY COUNCIL

### HON. JOHN G. SCHMITZ

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1970*

Mr. SCHMITZ. Mr. Speaker, at this time I would like to introduce the findings of a poll just completed by the respected American Security Council. I would like to call special attention of my colleagues to question No. 8 which, according to this survey, it seems that a substantial number of Americans favor an objective of victory in Vietnam.

There are obviously a number of Americans who continue to reflect the wisdom set down by Mommsen:

History has a nemisis for every sin: for the will to freedom that fails in force, as well as for the pride of mind that fails in understanding.

The poll follows:

NATIONAL SECURITY ISSUES POLL

In a true democracy, decisions on such vital matters as military preparedness should reflect the will of the people.

Therefore, we must ask, "does the trend toward unilateral disarmament represent the will of most Americans, or the will of special interest pressure groups?"

In seeking the answer to this question, the American Security Council conducted a National Security Issues Poll with a final total of 115,559 participants.

From March 1 to August 31, 1970, the Council invited opinion leaders representing the full range of domestic political viewpoint to serve on its National Voter Advisory Board and to participate in the National Security Issues Poll. The response of the 42,946 who did both is shown under "A" below.

The response of the 45,456 who participated in the Poll, but did not become mem-

bers of the Advisory Board is listed under "B" below.

From July 1 to August 31, 1970, 203 newspapers in 44 states published the Poll. These newspapers ranged in size from the St. Louis Globe Democrat and the San Francisco Examiner to small town newspapers. The response of 27,197 readers is shown under "C" below.

It is clear from the results of this Poll and the results of other polls that most of the American people want the security of military superiority and oppose isolationism.

NATIONAL SECURITY ISSUES POLL RESULTS

| | Agree, percent | | | Disagree, percent | | | Undecided, percent | | |
|---|---|---|---|---|---|---|---|---|---|
| | [1] A | [2] B | [3] C | [1] A | [2] B | [3] C | [1] A | [2] B | [3] C |
| 1. The Safeguard anti-ballistic missile defense system (ABM) is necessary for the defense of the United States | 93.19 | 78.53 | 80.39 | 1.26 | 11.47 | 10.58 | 5.55 | 10.00 | 9.03 |
| 2. The United States should maintain military strength greater than that of the Soviet Union and Red China | 93.53 | 82.07 | 84.75 | 2.07 | 10.73 | 9.85 | 4.40 | 7.20 | 5.40 |
| 3. Communists and other revolutionaries should be permitted to teach in tax-supported educational institutions | 1.20 | 9.69 | 4.79 | 97.77 | 88.28 | 92.66 | 1.03 | 2.03 | 2.55 |
| 4. Communists and other revolutionaries should be permitted to hold sensitive positions in defense facilities | .58 | 4.78 | 1.32 | 99.00 | 93.05 | 96.04 | .42 | 2.17 | 2.64 |
| 5. The United States should have a national objective of victory in the cold war | 93.46 | 80.64 | 80.04 | 2.47 | 11.09 | 11.53 | 4.07 | 8.27 | 8.43 |
| The United States needs a "Freedom Academy" to train leaders for new forms of nonmilitary conflict | 73.09 | 56.91 | 47.25 | 6.61 | 16.46 | 26.40 | 20.30 | 26.63 | 26.35 |
| 7. The United States should help the people of Czechoslovakia, Hungary, Cuba and other captive nations in their struggle for freedom | 71.95 | 57.10 | 52.97 | 9.85 | 20.80 | 28.48 | 18.20 | 22.10 | 18.55 |
| 8. The United States should have a national objective of victory in Vietnam | 89.85 | 76.77 | 78.16 | 3.18 | 13.70 | 14.09 | 6.97 | 9.53 | 7.75 |
| 9. The United States should give economic aid to foreign governments even if they are Communist or pro-Communist | 2.07 | 8.87 | 5.41 | 93.05 | 85.57 | 89.99 | 4.88 | 5.56 | 4.60 |
| 10. The United States should extend diplomatic recognition to Red China | 10.27 | 20.85 | 21.74 | 76.35 | 66.55 | 66.88 | 13.38 | 12.60 | 11.38 |

[1] National Voter Advisory Board—42,946 members.
[2] Mail poll—45,456 participants.
[3] Newspaper poll—27,197 readers.

NATIONAL VOTER ADVISORY BOARD

*(Partial listing of 42,946 members)*

Walter R. Beardsley, Chairman, Miles Laboratories, Inc.

Dr. H. Russell Beatty, President, Wentworth Institute.

Arch N. Booth, Executive Vice President, Chamber of Commerce of U.S.

The Honorable Spruille Braden, Former Ambassador.

Dr. Frank R. Brown, Dean, Hood Theological Seminary.

The Honorable Joel Broyhill, U.S. Congressman.

L. B. Burger, Chairman, Westinghouse Air Brake.

Dr. Cordas C. Burnett, President, Bethany Bible College.

Henri G. Busignies, Senior Vice President, International Telephone & Telegraph Corporation.

James Cagney, Actor.

Colonel John T. Carlton, USAR, Executive Director, Reserve Officers Association of the U.S.

Joseph A. Carrera, Senior Vice President, Bank of America.

Sylvan C. Coleman, Chairman, E. F. Hutton & Company, Inc.

Dr. David S. Collier, Director, Foundation for Foreign Affairs, Inc.

Bing Crosby, Actor, Singer.

The Honorable Peter Dominick, U.S. Senator.

William L. Davis, Jr., President, Emerson Electric Company.

The Honorable Thomas Dodd, U.S. Senator.

Gaylord Donnelley, Chairman of the Board, R. R. Donnelley & Sons.

Mrs. Cathryn L. K. Dorney, Executive Director, American Education Association.

James C. Ellsworth, Senior Vice President, United California Bank.

The Honorable Paul J. Fannin, U.S. Senator.

Shelton Fisher, President, McGraw-Hill, Inc.

Bishop A. L. Fletcher, Little Rock Diocese.

Mother Jane Frances, Motherhouse of the Grey Nuns of the Sacred Heart.

Dr. Carl A. Frische, President, Sperry Gyroscope Company.

Roland E. Fulton, President, Employers' Association of Greater Chicago.

Dr. Vernon F. Galliano, President, Nicholls State College.

Richard A. Goodson, President, Southwestern Bell Telephone Company.

J. Peter Grace, President, W. R. Grace and Co.

Elisha Gray, Chairman of the Board, Whirlpool Corporation.

The Honorable Durwood Hall, U.S. Congressman.

Robert P. Hanrahan, Superintendent of Schools, Cook County, Illinois.

Z. C. R. Hansen, Chairman and President, Mack Trucks, Inc.

Dr. Charles P. Hogarth, President, Mississippi State College for Women.

John M. Houchin, President, Phillips Petroleum Company.

Dr. John A. Howard, President, Rockford College.

Claude A. Jessup, Chairman, Continental Trailways Bus System.

Speaker Ernest N. Johnson, Speaker of North Dakota House of Representatives.

Robert L. Jones, President, The Copley Press.

Dr. Walter H. Judd, former member of Congress.

Charles H. Kellstadt, Chairman, General Development Corp.

Donald B. Lourie, Chairman of the Board, Quaker Oats Company.

Dr. Charles W. Lowry, President, Foundation for Religious Action in the Social & Civil Order.

Edgar F. Luckenbach, Jr., President, Luckenbach Steamship Company.

Dr. John P. Maurer, President, Southeastern University.

Daniel D. McCracken, Chairman, Computer Professionals Against ABM.

H. C. McDonald, President, Eugene, Oregon City Council.

Roger Milliken, President, Deering-Milliken Inc.

Dr. John D. Millett, Chancellor, Ohio Board of Regents.

The Honorable John M. Murphy, U.S. Congressman.

Reverend David Nettleton, Sr., President, First Baptist Bible College.

Arthur C. Nielsen, Sr., Chairman, A. C. Nielsen Company.

Sister Natalie Palagyi, Superior General, Sisters of Social Service.

J. Milton Patrick, Immediate Past National Commander, American Legion.

The Honorable William D. Pawley, former Ambassador.

Admiral Arthur W. Radford, USN (Ret.), former Chairman, Joint Chiefs of Staff.

Dr. Robert G. Rayburn, President, Covenant Theological Seminary.

Archbishop Nikon Rklitzky, Russian Orthodox Church.

The Hon. James Rothstein, Majority Leader of the South Dakota House of Representatives.

Frank O. Sherrill, President, S & W Cafeterias, Inc.

Sister Irene Socquet, S.S.A., President, Anna Maria College for Women.

Robert C. Sprague, Chairman, Sprague Electric Company.

Ezra J. Stone, Actor, Writer, Director.

Jerome A. Straka, Chairman, Chesebrough-Ponds, Inc.

Dwight H. Swanson, President, Iowa Power & Light Company.

The Honorable Strom Thurmond, U.S. Senator.

William K. Todd, President, Rockford Morning Star.

Dr. A. P. Torrence, President, Tennessee A & I State University.

George W. Waters, Executive Vice President, American Express Company.

John Wayne, Actor, Producer

Monsignor Nicholas H. Wegner, Director, Boys Town.

William H. Weldon, Publisher, News Tribune Corporation.

Colonel T. R. Wert, USMCR (Ret.), Executive Secretary, Marine Corps Reserve Officers Association.

George S. Wheaton, Chairman, Dillingham Corporation.

Dr. Ernest L. Wilkinson, President, Brigham Young University.

Dr. Benjamin C. Willis, Retired Superintendent of Schools, Chicago, Illinois.

The Reverend Victor R. Yanitelli, Sn., President, Saint Peter's College.

The Honorable Sam Yorty, Mayor, Los Angeles.

## MAN'S INHUMANITY TO MAN—HOW LONG?

### HON. WILLIAM J. SCHERLE

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. SCHERLE. Mr. Speaker, a child asks: "Where is daddy?" A mother asks: "How is my son?" A wife asks: "Is my husband alive or dead?"

Communist North Vietnam is sadisti-

cally practicing spiritual and mental genocide on over 1,500 American prisoners of war and their families.

## QUOTAS NEEDED ON PEP PILLS

### HON. LIONEL VAN DEERLIN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1970*

Mr. VAN DEERLIN. Mr. Speaker, the House is scheduled to act later this week on H.R. 18583, the Comprehensive Drug Abuse Prevention and Control Act of 1970.

Along with many of our colleagues, I feel strongly that quotas should be set on the production of amphetamines, and an amendment will be offered to accomplish this.

For the information of the House I insert at this point in the RECORD pertinent editorials from the Washington Post and the Houston Chronicle:

[From the Washington Post, Sept. 18, 1970]

SLOWING DOWN SPEED

By now, everyone concerned about the spreading drug problem has heard the grim stories on speed and the speed-freaks. The terms refer to amphetamines and methamphetamines, the stimulant drugs which account for 8 per cent of all prescriptions written in this country. Their abuse ranges from the trivial (the athlete who takes it before the big game) to the disastrous (the person seeking a high who ends up dead, brain damaged, malnourished, violent or otherwise impaired). Few American communities are without its victims.

According to the National Institute of Mental Health over 8 billion amphetamine pills are legally produced annually by American drug firms. This is 40 doses per citizen; the legitimate medical need, reports the NIMH, is not in the billions but in the thousands. As for where the 8 billion legal pills are eventually consumed, it is estimated that over 50 per cent are diverted into illegal and unsupervised use. While the government and media have focused on other drugs, evidence exists that amphetamines—used largely by adolescents and young adults—are just as addictive and hard to overcome as heroin.

What is needed clearly is some kind of production control. It is unfair to put the entire blame on the drug firms for the oversupply; abuse is encouraged because the law is lax, many doctors prescribe the drug carelessly and because the power of the black market is increasing.

Recently, a bipartisan majority of the House select committee on crime offered an amendment to the Comprehensive Drug Abuse Prevention and Control Act now before the House. It calls for a manufacturing quota on amphetamine production. This is perhaps a strong move, but unless all the drug firms suddenly limit production and doctors suddenly prescribe with extreme care, it is a necessary move. Why should the country be flooded with 8 billion pep pills when only a few thousand are medically needed? If amphetamines are as dangerous as heroin why shouldn't they be put under the enforcement authority of the Justice Department? These are some of the questions that should be consideerd when the quota amendment is debated.

[From the Houston Chronicle, Sept. 15, 1970]

PUT A QUOTA ON PEP PILLS

One medical judgment is that amphetamines should be used only to treat narcolepsy, a rare sleeping sickness, and a small number of hyperactive children.

An official of the National Institute of Mental Health says this would add up to an annual need for mere thousands of doses. Yet four major U.S. companies legally synthesize some 8 billion doses of amphetamine products a year—an average of 40 doses for every man, woman and child in this country. And even more is imported, also illegally.

And what happens to this overabundance of "speed," the substances which cause euphoria and hyperactivity, generally followed by prolonged paranoid psychosis or accentuation of personality disorder? Over 50 percent of the legally manufactured pills are diverted into illegal channels. Moreover, some 80 percent of amphetamines seized in 1968 by the Federal Bureau of Narcotics and Dangerous Drugs originally was legally manufactured domestically.

The situation would be ludicrous if it were not so serious. It has prompted the U.S. House's Select Committee on Crime in a "Dear Colleague" letter to ask congressional support for a measure which would impose quotas on the domestic production of amphetamines. The measure would amend the Comprehensive Drug Abuse Prevention and Control Act, due to reach the House floor by the end of the week.

Most every American of junior high school age or older is familiar with one of the basic tenets of this nation's drug-taking subculture: "Speed kills." If it doesn't do that, it can make a user wish he were dead. It can contribute to hepatitis, malnutrition and the general undermining of health due to irregular eating and sleeping patterns. Permanent brain damage can result. There is some medical opinion that use by pregnant women may increase the risk of congenital abnormalities in their offspring.

It does not take a doctor of medicine or an expert on drugs to realize that the indiscriminate taking of amphetamines can injure a person's health. When a licensed physician prescribes amphetamines for a patient, they should be available. But we don't buy the drug companies' argument that we need the manufacturing of relatively unlimited numbers of doses of amphetamines.

## MOUNT LORETTO—100 YEARS OF ACCOMPLISHMENT

### HON. JOHN M. MURPHY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1970*

Mr. MURPHY of New York. Mr. Speaker, I would like to pay tribute to one of the most dynamic and compassionate personalities of his or any age, the late Father John Drumgoole and to all those dedicated men and women who worked with him and who followed him in selfless work through the last 100 years. On October 7, the start of a yearlong celebration marking the 100th anniversary of the founding of the Mission of the Immaculate Virgin, Catholic child-caring institution, at Mount Loretto, Staten Island, N.Y., will commence. The Mission of the Immaculate Virgin is not just another children's institution. For Father Drumgoole, born the son of John and Bridget Drumgoole in Coolecroft, Abbeylara, County Longford, Ireland, on the Feast of the Assumption, August 15, 1816, made it a home.

Mr. Speaker, under leave to extend my remarks in the RECORD, I would like to present the centennial program as a tribute to this remarkable man and all the wonderful people who have helped each child develop their capacities in a good, holy, and happy life:

CENTENNIAL PROGRAM

Twelve centennial events and programs are scheduled, starting with a Concelebrated Mass, Wednesday, October 7, 1970, in the Mission's Church of St. Joachim and St. Anne, and ending with an Alumni Association Reunion, Sunday, September 19, 1971, at Mount Loretto.

His Eminence, Terence Cardinal Cooke, Archbishop of New York and President of the Mission's Board of Trustees, will preside at the Centennial Concelebrated Mass, said Monsignor Edmund F. Fogarty, the Mission's executive director.

Other major events planned are St. Joseph's Union Day, November 8, 1970; Cardinal Cooke's Day, December 1, 1970; Symposium on Child Care, January 20, 1971; Symposium on the Education of the Exceptional Child, February 11–14, 1971; Reverend John Christopher Drumgoole Day, March 28, 1971; Staff Appreciation Day, April 16, 1971; Sports Night, May 19, 1971; Open House, June 13, 1971; and Fun Day for the Children, August 18, 1971.

Tracing its origin to the year 1871 when Father Drumgoole was appointed director and resident chaplain of the St. Vincent's Newboys' Lodging House, then located at 53 Warren Street, New York City, N.Y., the home was formally incorporated in May, 1877, under the laws of the State of New York as the "Mission of the Immaculate Virgin for the Protection of Homeless and Destitute Children."

Today, the facilities and services of the Mission, providing care for approximately 700 resident boys and girls between the ages of 6 and 18 years, are centered in the Pleasant Plains area of Staten Island, bordering Raritan Bay.

The initial purchase of this property was made in June 1882, and the name Mount Loretto was given to the site by Father Drumgoole.

A pioneer of organized child care and social service, Father Drumgoole came to New York City in 1824, and was ordained a priest in 1869 at the advanced age of 53. As the result of exposure in the blizzard of 1888, he developed pneumonia and died March 28 that year.

An affiliate of Catholic Charities of the Archdiocese of New York, the Mission has accommodations for 200 in its girls' division, called St. Elizabeth's; 288 in its junior boys' division, ages 6 through 13; and 184 in its senior boys' division ages 14 through 18.

Three schools, owned by the Mission and located on the grounds, provide four educational programs for the children. St. Aloysius, staffed by the Sisters of St. Francis, is a regular parochial elementary school with grades one through eight for boys and girls and includes a reading school for levels one through five.

The New York City Board of Education operates the two other schools—St. Joseph's School for boys, grades six through 12, as Public School 25, and St. Elizabeth's School for girls, grades six through 12, as Public School 10.

The Sisters of St. Francis have been identified with the Mission and its work since July 2, 1882, when six Sisters from the Buffalo, N.Y., foundation arrived in New York City to assist Father Drumgoole.

In July 1893, the Sisters formed a separate community and adopted the title "Sisters of St. Francis of the Mission of the Immaculate Virgin, Conventual of the Third Order." They elected Mother Mary Catherine, O.S.F., their first Mother General.

Today, 44 Sisters—17 in the girls' division and 27 in the boys' division—are assigned to the Mission from their Motherhouse in Hastings-on-Hudson, N.Y. Reverend Mother Anne Morgan, O.S.F., present Mother General, is a member of the Mission's Board of Trustees.

Recreational facilities for the children at Mount Loretto include three gymnasiums, an athletic field, and an outdoor swimming pool. The pool is named after Angel Mendez, Mission alumnus and U.S. Marine, killed in Vietnam, March 16, 1967, and buried in the Mission's cemetery.

Facing the Mission's Church of St. Joachim and St. Anne with its steeple rising 255 feet from ground level is the heroic bronze statue of Father Drumgoole, ten feet in height and weighing seven and one-half tons.

Since its founding, the Mission has cared for more than 50,000 children. Today, there is an active Father Drumgoole Alumni Association that meets regularly and maintains contact with Mount Loretto graduates.

Appointed August 2, 1969, Monsignor Fogarty is the eighth executive director of the Mission. His Eminence, Patrick Cardinal O'Boyle, Archbishop of Washington, served as Mission director from 1936 to 1943.

Mission chaplains are Reverend Eugene V. Mangan and Reverend Robert P. Hickey.

## WALL STREETERS DO NOT LIKE PRESENT SITUATION

### HON. WILLIAM L. HUNGATE

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1970*

Mr. HUNGATE. Mr. Speaker, the following article by Philip Greer, has an interesting comment on our current economic problems:

WALL STREETERS DO NOT LIKE PRESENT SITUATION

(By Philip Greer)

NEW YORK.—Notes on a random walk through Wall Street:

Spiro Agnew came to the Street last week to explain to the financial nabobs why it is important to them that the Republicans take control of Congress this year. A GOP-controlled Congress would help President Nixon finish his programs, Agnew said.

So far, in the 21-months the Republicans have been in the White House, the Dow Jones industrial average is down about 200 points, more than 120 brokerage firms have disappeared through merger, takeover or just plain failure, incomes in the street are maybe a third to a half of what they were in pre-Republican 1968 and the entire structure of the markets is threatened by do-nothingism at the Securities & Exchange Commission.

Agnew is right. The Wall Streeters must help Nixon finish his programs. They certainly don't want things to stay as they are.

Its a rare time when the National Press Club invites a brokerage firm president to be a guest speaker. The fourth estate got its money's worth from Don Regan, who heads Merrill Lynch, Pierce, Fenner & Smith, Inc., but, being 200 miles from the Street, its doubtful that the reporters digested all the morsels Regan fed them.

Possibly the most revealing line was his statement that Merrill Lynch "is on Wall Street but not of Wall Street." Despite its over-shadowing presence, "the thundering herd" has never been a part of the Street establishment. In fact, it has a history of fighting the roll-top desk mentality that controlled the financial community for generations. Merrill, for instance, has fought all increases in commission rates—it does well enough without them—it was one of the first to stump for allowing brokers to incorporate and it has been a strong advocate of public ownership of brokerage firms.

Regan can afford to speak out because, with the Street still in a financial vise, the profitable and still-expanding Merrill Lynch stands head and shoulders over much of the competition. The chances are that Regan and other non-establishment types will be talking even louder in the days ahead. The Street's stumbling, bumbling approach to its problems is making minimal progress and the people who still have something to lose are getting restless.

Operation rescue at the New York Stock Exchange has taken a new turn, bringing up the question of whether the lifeguard needs a lifeguard.

The parceling of Hayden, Stone into Cogan, Berlind, Weill & Levitt and Walston & Co. and the shareholders' management takeover of Goodbody & Co., both within the last two weeks, are a distinct departure from the former approach, when failing brokers were picked apart and the diseased torso was cremated, with the Exchange watching over it all like a public ombudsman. Likewise, the suspensions of Charles Plohn & Co. and First Devonshire, chasing both of them—and their customers—from the promised land without so much as a final blessing from the Exchange.

What seems clear is that the NYSE can no longer be the guardian of the public interest. The $55 million slush fund is used up and the Big Board apparently doesn't want to hit its members again—possibly as a lever to prod Congress into passing the investor insurance bill.

On Capitol Hill, where understanding of the securities industry is about as rare as votes against highway construction, that will probably be enough to make the legislators pass the bill, thus putting the government on the hook right alongside the Exchange.

In the meanwhile, the Street's financial fever has reached the crisis stage. The question now is where does that leave the securities industry and its more than 30 million customers?

The only thing that seems brighter is the outlook for the market itself. Analysts generally feel the list has turned into a kind of baby bull stage. Nobody is ready to pour money in just yet—the negative contingent is still sizable—but there is a growing feeling that the traders have absorbed the worst that Washington has to give. The fall could turn out to be a fairly pleasant time in Wall Street—except, maybe, for the people who live there.

## PRISONERS OF WAR

### HON. WILLIAM J. SCHERLE

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1970*

Mr. SCHERLE. Mr. Speaker, the house of delegates, the governing body of the American Medical Association, met in Chicago this summer and adopted a resolution urging the World Medical Association and other appropriate international organizations to use their influence to improve the lot of the American prisoners of war in Vietnam. The American Medical Association is to be commended for its firm stand. If more responsible citizens banded together to voice their indignation at the terrible treatment our servicemen receive at the hands of our enemies, Hanoi, might be induced to yield to the pressure of world opinion and begin to act more humanely. Following is the statement issued by the American Medical Association House of Delegates which could serve as a model for other concerned Americans:

PRISONERS OF WAR

In view of North Viet Nam's failure to live up to the terms of the Geneva Convention, the House resolved, "As a professional medical organization, recommend that, in the best medical interests of both servicemen and their families, the World Medical Association and/or other appropriate international organizations be requested to use their influence with those countries which do not subscribe to the Geneva Convention to the effect that (a) a list of prisoners names be furnished, (b) inspection of prisoner compounds by neutrals be carried out, and (c) medical supplies and food parcels, as well as mail, be distributed to prisoners."

## PHONE RATE PLEA

### HON. HENRY HELSTOSKI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1970*

Mr. HELSTOSKI. Mr. Speaker, I call attention to a very pertinent editorial from the September 16, 1970, edition of the Evening News of Newark, N.J.

The editorial cites another example of the ravages of the wild inflation we have under the present national administration. While the President twiddles his thumbs and assures one and all that the Nation's economy is straightening itself out, the wage earners and housewives get hit again and again with increased prices of goods and services.

The policies of the present administration forces businesses of all kinds against the wall, and they turn for relief to their only source—the consumer.

It is about time President Nixon took another look at the legislation passed by the Congress this year giving him the authority to place controls on the factors that are continuing and expanding inflation. His failure to take affirmative action can well drive this Nation into the bankruptcy that struck the Roman Empire and brought about its fall.

The editorial follows:

PHONE RATE PLEA

For consumers struggling to stretch inelastic dollars, there's more bad news. New Jersey Bell Telephone Co. has filed an application for higher rates at a time when state regulatory authorities already have under study pleas for higher tariffs on gas and electricity and for increased fares on buses and railroads.

Any assessment of whether New Jersey Bell's rate request is justified must await examination by the Public Utilities Commission of the company's data, particularly figures on total plant investment and projected rate of return. In 1951 the company asked for a $10-million rise and got nothing. In 1954, it was given about $2 million of the additional $19 million sought. In 1958, it was awarded $11 million of the $14 million requested. In all the cases, the Supreme Court had to decide some of the issues.

In addition to deciding on a rate base and a fair rate of return, both questions on which it has differed widely with the company before, the PUC must consider whether the

specific and complex rate revisions proposed are equitable, whether New Jersey Bell's profits ($91 million last year) are sufficient to cover the costs of providing expanded and more efficient service, and whether the burden is fairly distributed between interstate and intrastate service charges.

Beyond question, New Jersey Bell's operating costs have jumped. From 1958, when it won its last general rate boost, to last year, construction expenditures climbed 132 per cent, operating taxes rose 125 per cent, the original value of its total plant in service went up 141 per cent, and operating expenses 103 per cent. At the same time, its operating revenues rose 112 per cent and its net income 116 per cent.

Money to expand further must be raised. The company estimates it will spend $285 million next year on new plant and equipment and more than $1 billion by 1975 to keep pace with demand. Borrowing capital to finance that construction cost the company 9.35 per cent last June, compared with 4.6 per cent only five years ago.

Still, New Jersey Bell's request for higher rates can be greeted by consumers only as dismaying news. The company has been in the vanguard of those providing better and more efficient service through automation and new technology, a factor which permitted at least half a dozen selective reductions in rate schedules during the last decade.

What the company implies by yesterday's rate application is that even its technological and operating improvements can't provide enough savings to keep pace with the skyrocketing rise in business costs caused by the ravages of inflation. If the telephone company can't keep up, how can the housewife?

## DECLINE IN CONSUMER PRICE INDEX

### HON. JOHN J. RHODES

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. RHODES. Mr. Speaker, the announcement today of the dramatic decline in the Consumer Price Index is one of the best pieces of economic news we have had in months. Combined with the spreading trend in banks to lower the prime interest rate to 7½ percent, there can no longer be any doubt that the Nixon administration has succeeded in halting inflation.

The administration has come in for much criticism in recent months for its economic policies, but I hope its critics have now seen the light. The President's policies evidently are working and have slowed inflation without plunging the country into another recession.

Noted economists, such as John Kenneth Galbraith, who saw the worst possible outlook for the economy and implied that inflation could not be cured without resorting to wage and price controls have now once again, been proved dead wrong.

Once again, the Nixon administration has achieved its goal by hewing carefully to a predetermined course and rejecting the extremist options offered by discredited economic soothsayers. It is the type of performance we expect from this administration.

## CONSUMER INTEREST IN LOW-COST AIR TRAVEL

### HON. JOHN V. TUNNEY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. TUNNEY. Mr. Speaker, at this time, with hundreds of thousands of Americans trying to enjoy a well-earned vacation, we ought to examine very carefully the manner in which our Government is protecting its vacationing citizens, particularly in the field of air travel. It appears to me that the Federal Government cannot make up its mind on this important matter, a situation I would bring to the attention of my colleagues.

Many will recall that on May 8 of this year, the Civil Aeronautics Board published proposed revised regulations governing air travel. As a person deeply concerned about the consumer and his ability to gain equity in the marketplace, I was genuinely surprised to see that agency propose a series of regulations that would regulate not the air transportation industry but the traveling public. The CAB had a lot to say about the limitations of the number of American citizens that could belong to a traveling group, about how that group elects its officers and keeps membership records, and about the way it affiliates with other groups. The CAB attacked the travel agents and the operators of vacation, study, and travel tours, as if the consumer's right to travel and the right of others to aid him were inherently some kind of suspicious if not outright illegal activity.

Following the publication of those proposals, the CAB received harsh but just criticism from many distinguished Members of this Congress, as well as from organizations that would no longer be able to charter a plane as a group and fly to a convention or for study or simply for relief.

Messages condemning the proposals have been sent to the CAB by the United Steelworkers of America—AFL–CIO—the Cooperative League of the U.S.A., the National Grange, and the Group Health Association of America, to name just a few. Mr. President, groups with such very different interests rarely get together on an issue unless the offending agency is grossly unjust or very stupid. It is just possible that both reasons prevail in this instance. However, I would point out that just last month, on June 22, the President issued the Government's revised Statement of International Air Transportation Policy. That statement is not only a document representing many forward-looking approaches to the improvement of America's position in the air, it is also a sharp rebuke to the CAB.

The statement reads:

> The economic and technological benefits we seek can best be achieved by encouraging competition and by a relative freedom from government restriction." It goes on to specifically note that the "U.S. should work for the broadest range of profitable services, designed to appeal to the broadest consumer market and based on the lowest cost of operating an efficient air transportation system . . . We expect both scheduled services and charter services to have important roles throughout the coming decade.

It is apparent to me that the administration has a slight case of schizophrenia which can be cleared up with effective, low-cost therapy. I would strongly prescribe the pursuit of the ideas in the statement of policy and I would just as strongly urge that the Civil Aeronautics Board once again rejoin the Government, adjust its policies to the needs of the traveling public, and withdraw the proposed arbitrary, restrictive, punitive, and demeaning regulations. It is exactly this kind of fuzzy, contradictory thinking that has produced chaos in rail transportation and has worked against the welfare of passengers and shippers. Surely we can and we must avoid the same chaos from occurring in air transportation.

I am pleased to see that the Subcommittee on Transportation and Aeronautics of the Interstate Foreign Commerce Committee has held hearings on this matter and I am positive that that committee will issue a very strong report setting guidelines for the Civil Aeronautics Board to follow if not regarding specific legislation to correct this situation. Mr. FRIEDEL and the members of his committee ought to be congratulated for stepping into the breach to contain such gross abuse of administration discretion as has been evidenced by the Civil Aeronautics Board.

## LAW AND ORDER

### HON. DONALD D. CLANCY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. CLANCY. Mr. Speaker, the chairman of the Hamilton County Police Association College Scholarship Fund, Lincoln J. Stokes, recently announced the first awards made by the association. These cash award scholarships were based upon academic achievement, financial assistance, and essays. Each applicant was requested to submit a short essay concerning his personal understanding of the term "law and order."

Awards were made to Geoffrey A. Paul, 797 East Columbia Avenue, Reading, Ohio, son of Col. and Mrs. Artice Paul, chief of police at Reading, Ohio; Barbara Ann Belbot, 5338 Rawhide Court, Cincinnati, daughter of Detective and Mrs. William A. Belbot, Hamilton County sheriff's office.

Geoffrey A. Paul graduated from Reading High School in June 1970, and is entering David Lipscomb College in Nashville, Tenn.

He plans to study speech and drama in preparing for a career in the entertainment and theatrical field. During his senior year at Reading High School, he was president of the Thespian group and participated in all productions and plays at the school.

Barbara Ann Belbot graduated in the upper 1 percent of her class from Seton

High School in June 1970. She is entering Xavier University for extended studies in the political science field and hopes to become a lawyer in the field of governmental law.

I am very pleased to bring to the attention of my colleagues these excellent essays on this important issue facing our Nation today—"Law and Order." It is most gratifying to read that these fine young citizens and more like them are aware of the meaning of law and order, and its effect upon society.

Miss Belbot's essay reads as follows:

"Law and Order" is a product of our times that the meanings of formerly familiar words and expressions have been distorted and new meanings added—sometimes radically altering the original definitions. "Law and Order" is such an expression. Law is not a confinement of man's natural freedoms, but rather an opportunity for man to express himself freely and maturely without infringing on other's rights or vice versa. But laws must be just or they no longer are able to command respect. Order is not the enforcement of a police state, but rather the enforcement of each individual's right to live peacefully and securely. But order must never become the tool of fear. "Law and Order" reflects man as the social animal that he is.

There is nothing evil about "Law and Order". At the same time the expression should not be used as a reactionary response to our troubled times. Both uses are irresponsible. Perhaps the best solution is to abstain from using the expression at all until we are ready to use it in its proper light. Any false use of its meaning can only serve to undermine its true concept.

Geoffrey Paul felt that—

Without the law, the weak would have no security, they would slowly become engulfed by the strong. To have a Utopian society where it would be true that all men are created equal is the ultimate goal of our hopes and dreams. However, we must be realists, we still have the rich and the poor and the strong and the weak.

We must be careful not to confuse freedom with permissiveness. This freedom can be abused in many ways, not the least being apathy and indifference toward their elected officials, which tends to breed corruption and the general breaking down of moral values. When this happens, we are all losers and erode our gift of freedom.

The law is what we make of it, if it is strong our nation will grow, if it is weak we will regress. Of this we must always be mindful, for what is law? "Law Is Order."

## STABILIZATION OF THE ECONOMY UNDER THIS ADMINISTRATION

### HON. JOHN E. HUNT

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. HUNT. Mr. Speaker, today's announcement that the rise in the Consumer Price Index was a 20-month low of 0.2 percent for the month of August is the strongest indication we have had to date of the stabilization of the economy under the Nixon administration.

This new low actually signals the end of the fantastic acceleration in the rate of increase for the Consumer Price Index which started in late 1965. Unfortunately, the American consumer was taken along on this joyride and each new monthly increase in the Consumer Price Index meant higher prices across the board for the wage earner.

The double tragedy of this inflation was that it was caused by escalation of the war in Vietnam. There are still those of us in this chamber who remember former President Johnson's promise that this country could have both "guns and butter."

There are also those who will recall how the "guns and butter" account went bankrupt in 1968 when this country ran $25 billion deficit which touched off an even wilder round of inflation.

President Nixon has completely changed this situation. He has reversed our budget priorities so that for the first time in 20 years this country will spend more on domestic needs than on defense; and he has brought the runaway inflation to a halt.

## SOUTHEAST ASIA POLICY

### HON. PAUL N. McCLOSKEY, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. McCLOSKEY. Mr. Speaker, if we have been mistaken in our policies in Southeast Asia since adoption of the Gulf of Tonkin resolution on August 7, 1964, it has not been the fault of the armed services of the United States. The armed services are an instrument of national policy; they do not make it. The services have unhesitatingly and uncomplainingly carried out their obligations to the Commander in Chief and to the Nation, and it is we in the Congress who have both authorized and funded the vast expenditure of lives and money which an increasing number of our people now feel to have been a mistake.

For our bitter experiences of the past 6 years, however, many examples of humanity, kindness, and courage have served to retain the faith of Americans that our national instincts are those of peace rather than destruction. A number of such examples are set forth in Gen. Lewis Walt's recently published book, "Strange War, Strange Strategy." A single such example was recently described by Marine Corps Lt. Gen. Keith B. McCutcheon, commanding the Third Marine Amphibious Forces in Danang, and appearing in the Marine Corps "Sea Tiger," dated August 14, 1970. That article is set forth as follows:

CG's OP

We hear a lot of talk these days about "gaps" or areas of misunderstanding between people. There is the "generation gap" between young people and parents, the "credibility gap" between government and citizens. Back in 1889 Rudyard Kipling spoke of a similar gap. He wrote, "Oh, East is East and West is West, and never the twain shall meet." This is sometimes called the "cultural gap."

Serving here in Vietnam we are very much aware of the differences between the cultures of East and West. A huge jet airliner can bridge the "geographic gap" between the shores of California and the coast of Vietnam in a matter of hours. But only the actions and efforts of each individual Marine can bridge the "cultural gap."

I think this can best be illustrated by a dramatic incident that took place in a battalion TAOR. A little Vietnamese girl had been bitten by a dog and was seriously ill with rabies. The doctor knew that she would need medicine that night or she would die. A request was made for vaccine. Soon the sound of a MAG–16 helicopter was heard overhead. VC tracer rounds streaked toward the chopper as it neared the LZ. In spite of hostile fire, the pilot completed his mission of mercy. The crew chief handed the vaccine to the doctor and the chopper lifted into the darkness, drawing more tracers as it disappeared. The little girl lived.

An entire village watched what took place. All at once the American Fighting Man ceased to be a stranger from a distant land. East and West became partners in a mutual struggle for survival and freedom. Differences of language and customs no longer formed a gap. These are the deeds that communicate to the people of Vietnam our nation's concern for the freedom, well being and dignity of all men. I know of no more effective means to destroy the "cultural gap."

I suspect that none of us can understand all the strange sights, customs and behavior patterns of the Orient. At times we even have trouble understanding our fellow Marines. But when two people stand face to face, and by their actions communicate their understanding and respect for each others dignity and worth, the differences cease to create a barrier of separation.

We can never learn all their is to know about anyone. Studying customs and culture can help, and I recommend it, but the real clue to bridging the "cultural gap" is simply the magic of one man treating the other as a human being.

I think it is interesting that Kipling recognized this. Remember how he concluded his well-known ballad by declaring:

"But there is neither East nor West
Border, nor Breed nor Birth
When two strong men stand face to face
Tho' they come from the ends of the Earth."

## NATIONAL EMPLOY THE HANDICAPPED WEEK—1970

### HON. CHARLES E. BENNETT

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. BENNETT. Mr. Speaker, the President has proclaimed the week beginning October 4, 1970 as "National Employ the Physically Handicapped Week." This is a very meritorius and good proposal, and I join with the President in promoting and encouraging this week set aside for those millions of Americans who are handicapped.

The President said in his proclamation of September 8, 1970:

Isolated from regular contact with society, many of our handicapped citizens lead lives of lonely frustration. Working together, on both public and private levels, we can—and must—insure full lives for them.

It is my feeling that this resolution, declaring the first week of October of each year as "National Employ the Physically Handicapped Week," should be broadened, making the resolution applicable to all handicapped workers.

My bill, House Joint Resolution 1379, would accomplish this, providing for a "National Employ the Handicapped Week."

We want to bring all of our handicapped persons into the mainstream of American life, to utilize their vast talents and energies.

The 42 million handicapped persons

and their families in America today face not only the burdens that their handicaps present, but also a worse fate—little knowledge of how they can help themselves.

As a handicapped person myself, I know of the problems faced by people who become disabled. The lack of readily available information on how they can develop and live normal lives is a detriment to them as they go about their daily tasks.

While we have many public and nonpublic organizations and agencies involved in helping the handicapped, there is no real centralized and consolidated center to help the handicapped in their problems of employment, education, transportation, recreation, and other activities.

I have introduced another bill to provide for a National Information and Resource Center for the Handicapped in the Department of Health, Education, and Welfare. I joined Senator ROBERT DOLE, of Kansas, in the introduction of this legislation, which I believe will go a long way in helping the handicapped to help themselves.

This bill has been added as an amendment in the Senate to S. 3418 as title III, the family practice medicine legislation, and I am hopeful it will be approved by the House, and I am working toward that end.

Over the last two decades I have sponsored and supported bills to assist the handicapped of America. In the last Congress, a bill sponsored by myself and the late Senator from Alaska, E. L. Bartlett, was enacted into law, and it provides that public buildings shall be constructed to be accessible to handicapped persons. In this Congress, I have sponsored bills enacted into law which provide for a National Center on Educational Media and Materials for the Handicapped and to insure that the proposed Washington metro system is designed and constructed to be accessible to the physically handicapped.

Mr. Speaker, this legislation will help the 42 million handicapped persons and their families to achieve useful and productive lives. The Congress should and must do all possible for this large segment of our population.

## IMPENDING DISASTER IN CHILE

### HON. JOHN G. SCHMITZ

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. SCHMITZ. Mr. Speaker, the mailed fist is already beginning to show through the velvet glove of the Communist coalition which recently won a plurality in the Chilean elections. According to a statement recently issued by the Inter-American Press Association "Freedom of the press in Chile is being strangled by Communist and Marxist forces and their allies." This is in all probability simply a preview of what is to come when and if Mr. Allende takes the reigns of power in his hands.

The logic of the Communist system demands absolute concentration of power in the hands of the party. To allow any meaningful opposition to remain is absolutely against the basic tenents of Marxism-Leninism. To think that a Communist government might do so is to fly in the face of the entire history of the Communist movement. It has been suggested that if Allende signs some type of agreement promising not to do certain things then all will be well and 6 years hence there will be another fair and free election. This would seem to me to be the most wishful thinking imaginable.

At this point, I would like to insert the statement made by the Inter-American Press Association and an article by William F. Buckley which makes the point that a leftist government is not so much the answer of communism as the answer to the Communists' dreams. Some of Mr. Buckley's readers of years ago will be happy to see him returning, in this article, to the hard-hitting anti-Communist journalism which originally made his reputation.

The material follows:

STATEMENT BY THE INTER-AMERICAN PRESS ASSOCIATION

Freedom of the press in Chile is being strangled by Communist and Marxist forces and their allies.

The Inter-American Press Association has received information from Chile that threats of violence and intimidation are causing the resignation of news officials, the sale of newspapers and radio stations, the dismissal of anti-Marxist editors and reporters from newspapers, radio and television stations and upheaval within press-related trades unions.

Those practicing intimidation have already gained control over all of Chile's non-government television channels.

IAPA has learned that emissaries from one political faction offered a "deal" to representatives of Augustin Edwards, publisher of El Mercurio, one of Chile's and the hemisphere's most distinguished newspapers—the oldest Spanish language newspaper in continuous publication. It was founded Sept. 12, 1827.

If El Mercurio would drop its opposition to the seating of Salvador Allende as president of Chile, the emissaries said, the new government would nationalize the newspaper properties of Edwards, but would permit him to retain some other business holdings in Chile.

Mr. Edwards and his representatives flatly rejected the offer.

It is evident in reports from Chile that certain political forces are attempting to smother free speech in that country and to thwart free political dialogue.

The Inter-American Press Association must protest these activities in the strongest possible terms. IAPA does not presume to interfere in Chilean partisan politics. The choice of leaders is a responsibility only of the Chilean people and the Chilean Congress.

But the IAPA must raise its voice against this attempt to intimidate, coerce and muzzle a large section of the established press in an American nation.

Signed by:

James S. Copley, Copley Newspapers, President of IAPA.

Manoel F. do Nascimento Brito, Jornal do Brasil, 1st Vice President.

John C. A. Watkins, Providence, R.I., Journal-Bulletin, 2nd Vice President.

George H. Beebe, Knight Newspapers, Chairman of the IAPA executive committee.

Andrew Heiskell, New York Times, Past President.

Alberto Gainza Paz (La Prensa of Buenos Aires, Past President.

Lee Hills, Detroit Free-Press, Past President.

THE IMPENDING DISASTER IN CHILE

(By William F. Buckley, Jr.)

Concerning the situation in Chile, a few observations:

It is not true in the formal sense that for the first time in history a nation has voted itself into communism. In order to do that, it requires that a majority of the people vote for the Communist candidate.

Far from getting a majority, Dr. Salvador Allende received this time around an even smaller percentage of the votes than he received in 1964, and less than Barry Goldwater in 1964. To conclude that because the Chilean Congress is likely to respect precedent by voting in as president the man who won the plurality of the votes, therefore it follows that a free nation will have voted itself into communism, is disjointed. The proper way to put it is that democratic mechanisms abound which make it possible for someone who has won even a small minority of the vote to take power.

Although it is certainly true that the strength of Allende is a tribute in part to Communist propaganda, in part to the shortness of the historical memory, in part to the collapsing strength of the Catholic Church, it is also testimony to the substantial superstition that the Social Democrats (in Chile they call them Christian Democrats) are the worst enemies of the Communists.

On that myth we have been brought up, and over and over and over again, our postwar thought-leaders have urged us to deal with the "progressive" governments of Latin America, Italy and Germany.

In Italy, a few years ago, the progressive government made a deal with the hard Socialists who in turn made a deal with the Communists. In Germany, the fighting Socialist anti-Communist mayor of Berlin became the head of the Social Democratic party, and then the prime minister, whereupon he made a treaty with the Soviet Union, the consequences of which may make Munich look like Custer's Last Stand.

The critical date is Oct. 23. We should bear in mind that Chile's Congress is under no constitutional compulsion to name Allende. He needs about 20 votes, and they would only come from the Social Democrats. Unfortunately, the vote is by secret ballot, and the party will not therefore accept official responsibility for the impending act of treachery. But the world will know that it was Social Democrats who made possible the Communists taking power, and the world will be sorely vexed.

In Chile there are three television networks. One is controlled by the Communists, one by an unholy combination of left-Marxists and Catholics, and one by the state. So that when Allende takes power, he would automatically take control of the only important broadcasting facility not already dedicated to revolutionary communism.

It is amusing to hear a few liberals vesting their hopes in the army. Surely—they are saying, having for generations scorned the uses of an army in Latin America—surely the army will stage a coup, and prevent the Castroization of Chile?

It is not certain by any means that the army will come to the aid of the country. To do so now would alienate a great number of people who harbor illusions about what communism will bring.

Under Chilean law, the president has almost total powers to advance whomsoever he wants to head the various branches of the military. Now hear this. Under Chilean practice, every officer who is senior to the man who is advanced, is compulsorily retired. That means that by elevating the right captain, say, Allende could retire the whole senior military, and thus diminish the threat to his regime.

Do the Chileans (just over one-third of them) have the right to impose a Castro-style dictatorship on the rest of the country? Such an absolutization of democracy is for children. It recalls the wry comment on African democracy, "One Man, One Vote, Once," because the prospects are, under Allende, for dictatorship, and for the end of the rights of the dissenter.

The humane, liberal, obligation of the Chilean Congress is to spare the Chilean people rule by Allende: That is the true democratic imperative.

## CONGRESS SHARES STRIKE BLAME

### HON. SHERMAN P. LLOYD

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. LLOYD. Mr. Speaker, the current situation with respect to the threatened railroad strike once again underscores the need for a permanent legislative solution dealing with national emergency strikes in the transportation industry.

Four railroad unions are under a temporary restraining order barring them from striking until September 23. Meanwhile, talks with the three railroads involved are continuing. This is the third time in a year that the Nation has been faced with the prospect of a crippling railroad strike.

The House Republican Task Force on Labor Law Reform, which I have the privilege of chairing, has distributed a factual analysis of legislative proposals introduced during this Congress to deal with national emergency strikes in the transportation industry.

Last February the administration proposed the Emergency Public Interest Protection Act of 1970 to update and improve the Government's weapons for dealing with transportation strikes effecting the national health and safety. However, Congress has failed to act on the legislation, and as we draw near the closing hour of the 91st Congress, the country is again threatened with a strike while reasonable and effective proposals for permanent solution to these problems remain on the shelf.

Mr. Speaker, the Salt Lake Tribune in an editorial September 13, 1970, made some particularly pertinent comments on this situation, and I include the editorial at this point in the RECORD.

CONGRESS SHARES STRIKE BLAME

For the third time in a year the nation faces the prospect of a crippling railroad strike. And for the third time in a year the nation has nothing but outmoded procedures and laws to deal with the threat.

Most of the blame must be placed squarely on Congress which has steadfastly refused to enact, indeed to even seriously consider, remedial legislation.

It is true that no law can prevent a strike if enough workers are willing to defy the law and leave their jobs. But it is also true that if reasonable laws designed to fit modern problems were now on the books the possibility of strikes in critical industries would be greatly reduced.

Reasonable new labor laws were proposed by President Nixon last February. He asked that the Railway Labor Act of 1926 be partially dismantled and that the President be given new weapons for settling major strikes by amending the Taft-Hartley Act of 1947. Both laws operate on the principle that if a strike by labor or a lockout by management can be delayed for a specific period of time (cooling-off period) then there is a good chance of working out a solution. But when the time expires and no agreement has been reached, the strike or lockout is legal. A number of such work stoppages have occurred.

President Nixon asked Congress to approve a plan which contains an optional provision for a 30-day extension in the "cooling-off" period in those instances when real progress toward settlement is being made. The plan also provides for partial operation of an essential industry during a strike and presidential authority to invoke a "final offer selection procedure" under which a neutral third party would select one of the "final" offers made by either side in a labor dispute as the binding settlement.

Mr. Nixon's plan has now gathered dust for six months and another railroad strike threat is upon the nation. This third strike threat didn't just happen, everyone knew it was coming. But Congress, perhaps because this is an election year, has refused to act to prevent it. As a result every citizen faces the possibility of personal inconvenience, perhaps financial loss, that a railroad strike poses.

Mr. Nixon's plan may not be the best one imaginable. But it was a starting point in solving a problem that returns year after year to haunt us all. Congress had an obligation to seriously consider the Nixon plan or present one of its own. It did neither. We think it has defaulted on a basic obligation to the people it is supposed to represent.

## OPERATION EXODUS

### HON. SIDNEY R. YATES

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. YATES. Mr. Speaker, Sunday, September 13, was the final day of the 20th Pugwash Conference which took place at the Abbey Hotel in Fontana, Wis., a conference devoted to discussion of scientific and world affairs. Among the delegates to the conference were representatives from the Soviet Union and it was to these that a hopeful, peaceful assembly was addressed outside the doors of the conference. The assembly, which was known as Operation Exodus, was convened by the Community Council of Jewish Organizations of Chicago and the Milwaukee Conference on Soviet Jewry. Approximately 1,200 people were gathered in an open field for an hour and a half participating in a program of prayer, music, speeches, and the reading of Jewish freedom letters smuggled out of Russia.

The purpose of the assembly was to let the delegates from the Soviet Union know the concern of Americans of Jewish faith to the discriminatory treatment being accorded to Soviet citizens of Jewish faith and to express the hope that Soviet Jews would be permitted to leave Russia if they so desired for other lands.

The written appeal of participants in the assembly was delivered to members of the Pugwash Conference and that appeal, which I hope will be conveyed through the Soviet delegates to appropriate authorities in the Soviet Union.

WELCOME TO ALL PARTICIPANTS IN THE 20TH PUGWASH CONFERENCE—AND ESPECIALLY TO THE SOVIET PARTICIPANTS

We welcome all participants in the 20th Pugwash Conference on Science and International Affairs to our country. We wish you well in your deliberations on your theme of "Peace and International Co-operation: A Program for the Seventies."

This appeal is directly pertinent to your theme. Your work towards the establishment of a just and secure peace is of great importance, and we shall pray for your success. If the goal of universal peace is not in sight, perhaps you can assist the world community in realizing more attainable objectives, such as assuring that governments honor commitments made to secure peace, that criminal attacks on civilian aircraft be ended, and that basic human rights be respected throughout the world.

We extend a special welcome to the distinguished participants from the Soviet Union. We bear no rancor toward them. We urge them to see not only the beautiful Wisconsin countryside but also to visit with the American people and observe the many facets of our society. We invite the Soviet delegates to visit our homes, to share with us our bread and our thoughts, and especially to visit our houses of worship and religious schools.

We assemble this afternoon not to interfere with the Pugwash conference but solely because our consciences forbid us to remain silent in the face of continuing oppression of three million Jews in the USSR. We hope that in the spirit of the Pugwash conference you will attempt to understand our concern just as we are sympathetic towards your work. It has been suggested by well meaning persons that Pugwash is an inappropriate place for us to express our concern. But you would be receiving a very false impression of our country and of the force of our concern if we did remain silent.

We assemble to remind you and the world of the plight of the Jewish minority in the USSR. Our program includes prayer, music from many nations, including Russia, informative reports about the plight of the Soviet Jews, a speech by the Lieutenant Governor of Illinois, and the reading of Jewish freedom letters smuggled out of the USSR.

We appreciate that the Soviet participants may not be accustomed to seeing public prayer and the assembling of private citizens to express their grievances. But prayer and peaceful assembly are among the most cherished rights of a free people. We will not suspend our exercise of these rights just because public prayer and protest are illegal in the USSR. We will even pray that outside a future Pugwash conference in the USSR the Soviet people may be allowed to pray and to express peacefully what is in their hearts. Even in the USSR, there are courageous Jews who at fearful risk to themselves are speaking out. As the group of 28 Jewish intellectuals and professionals of Riga stated in their petition delivered to the Seventh International Symposium on the Chemistry of Natural Combinations in June of this year:

"We beg for your help. We beg you to raise your voice in the defence of our rights. We beg you to render us assistance in our age-long dream to unite with our relations in Israel, to unite with our Jewish people in the land of our ancestors . . .

"We also beg you to acquaint to other scientists and representatives of scientific organizations with this problem of ours, so that in accordance with the spirit of the General Declaration of the Rights of Man they should be able to speak in the defense of our inherent inalienable human right to unite with our people on our ancient land and to live a worthy national life."

The appeal we place before you is thus the same as that addressed to your scientific colleagues at Riga on behalf of millions of Soviet Jews. No reasonable person can expect us to hide our concern when the Jews of Riga risked their lives to express theirs.

The specific aspects of Soviet oppression of Jews which deeply concern us include the following:

1. Refusal to allow Jews who desire to emigrate to do so. This is in violation of Article 13 of the United Nations Universal Declaration of Human Rights and Premier Kosygin's promise in Paris on December 3, 1966. Can a government which denies this basic right be considered civilized?

2. Imprisonment of Jews whose only "offense" is that they want to emigrate. A large number of Soviet Jews have been imprisoned in Leningrad since June 15 without formal charges being placed against them, and there is reason to fear they will be executed after secret trials and without trials. We hope you will agree that the saving of human lives under these circumstances is of transcendent importance.

3. Prohibition of the operation of Jewish religious schools and the teaching of Hebrew and Yiddish, as well as the unavailability of Jewish books and cultural and religious articles. Most of the synagogues in the USSR have been closed. The Jews are singled out among the many Soviet minority groups for such deprivation.

4. An anti-Jewish propaganda campaign in the Soviet press and in books published by the government, reminiscent of the libels disseminated by the Czars and the Nazis.

The facts documenting the anti-Jewish policies of the Soviet government are readily available and undisputed. If any of you care to examine further into the pertinent documents, we shall be pleased to supply you with copies. We call upon the participants in the Pugwash conference to familiarize yourselves with these facts and to ask the Soviet participants about their knowledge of these inhumane practices. We particularly suggest that you ask them why in the year 1970 a person who desires only to leave a country in peace should be forcibly prevented from doing so. The prohibition of emigration resembles the very serfdom supposedly abolished in 1861. We submit that you will not be doing justice to yourselves or to your theme of "Peace and International Cooperation" if you fail to consider these facts.

Some Soviet Jews, such as those whom the Soviet government presents in press conferences, have adjusted themselves to these inhumane practices, and they too have our good wishes. But millions of others feel the yoke of oppression, including those who ask for press conferences but are not allowed to hold them. It is for their sake that we cry out.

We ask the Soviet participants to examine the causes of our concern to your government, your academic colleagues and your fellow citizens, Jewish and Non-Jewish. For the time has come when no Soviet representative can show his face in the free world without being reminded of our indignation over oppression of Soviet Jews.

Once before in our time the world remained silent in the face of evil, and millions of our brothers perished. We respect and appreciate the heroic sacrifices of the Soviet people in the Second World War, after Hitler shattered the Nazi-Soviet alliance, but the mutual suffering of our peoples in the war provides all the more reason for granting freedom to the survivors of the Holocaust.

President Nixon said last week in his New Year Message to American Jews:

"Jewish tradition teaches that the power to do good or evil is in our own hands."

We appeal to you to take into your own hands and hearts the oppression of the Soviet Jews and to hear their groaning. The demand to "Let My People Go" has been heard by God. It must now be heard by governments and men.

COMMUNITY COUNCIL OF JEWISH ORGANIZATIONS OF CHICAGO,
MILWAUKEE CONFERENCE ON SOVIET JEWRY.

## NEW MEXICO'S EXPERIENCE WITH SPORTS SERVICE

### HON. SAM STEIGER

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. STEIGER of Arizona. Mr. Speaker, the following description of the activities of Emprise, a Buffalo, N.Y., firm that does business with organized crime, should be of special interest to all the Members of Congress.

Note that the attempt by Emprise to conceal its real position of interest in an applicant for a racing permit led to the New Mexico Racing Commission requiring that Emprise could have no more than a 5-percent interest in any racing permit in the State. This pattern of Emprise concealing its true interest in various enterprises is not new. On September 2 of this year the Security and Exchange Commission forced a suspension of trading in the stock of Tucson Turf Club because the SEC, as a finding of fact, determined that Emprise had lied about its true ownership of Tucson Turf Club.

The New Mexico Racing Commission is to be commended for a courageous stand taken in the face of tremendous pressure from Emprise whose finances and expertise in legislative and administrative seduction has been so overwhelmingly successful in my own State of Arizona.

An article from the August 1970 edition of the New Mexican Horse Bulletin follows:

THE N.M. RACING COMMISSION—WHAT IT TRIED TO DO FOR THE NEW MEXICO HORSEMAN AT RUIDOSO DOWNS

The members of the New Mexico Racing Commission do not get paid. During the past months these members have put in hundreds of hours of their own time, taking it away from their businesses, their personal interests, and their home life. Time on a problem caused by a company of Raton, New Mexico, which bought Ruidoso Downs in the summer of 1969.

The Commission started an investigation in August, 1969, and ended it in April, 1970, after six hearings which averaged some ten hours apiece. These were the longest hearings on any one subject in the history of the Commission. The Commission ended by refusing racing dates in 1970 to Ruidoso Downs Racing Association, knowing full well that this decision would have a most unfortunate economic impact on the Ruidoso Community should the end result be no racing in Ruidoso in 1970.

That this result would occur was never seriously believed, but we have never known a decision of this kind to be made without deep feeling and profound investigation of the ascertainable facts. So, there must have been some good reason why four unpaid, unbiased New Mexican horsemen and ranch owners entrusted with the protection of the horse racing interests of New Mexico took the time and trouble and made this decision in what they thought was in the best interests of the New Mexico Horse Racing Industry.

We thought it would be interesting to the horsemen of New Mexico and perhaps helpful if we asked the New Mexico Racing Commission itself to tell the story as it appeared to them. We, therefore, went to the head of the Commission and asked Mr. Robert Lee of Belen if we could publish his answers to a few questions we had heard posed. He was very cooperative.

This—in his words—is what took place.

"The first question I would like to ask is what got the commission going on this matter—what happened?"

"The first thing we knew about this matter was that an outfit called Newco had taken over Ruidoso and that the track had been sold. There was a rumor that went around fast.

"Before we knew it, there was a race program from Ruidoso Downs in our hands with a new Board of Directors and a new president of the Ruidoso Racing Association.

"Well, that was almost the first we knew.

"The thing that got me looking at this matter personally was that we were issued some statements, a little later to be found completely false or at least misleading."

"What were these statements?"

"These statements involved—first—that Sports Service, a catering company, was in no way connected with the new ownership of the track.

"Then later that Sports Service was connected only as concessionaires. And then later came the word that they were concessionaires and also had a loan out, but that there was no connection between Newco and Sports Service.

"This was stated to the Commission under oath in a hearing that there was no connection between Sports Service, their loan, and their concession contract.

"As things turned out later, the concession contract and all of the financing agreements and everything else were completely tied together. The only way you could divorce one from the other was to take Sports Service completely out of the financing; and as it turned out, the concession contract was for twenty years which would probably make it difficult to do. So, I don't know what decided the other members of the commission later on to go the way they did, but this is one of the things that started me looking at the whole operation."

"Isn't it the law of New Mexico that when a major track is sold, a full disclosure of the ownership as to who is buying it and how it is going to be run has to be made to the racing commission before the deal can be consummated?"

"That's right. The Commission has the right, and I think the obligation, that all of the financing and the complete planned operation must be disclosed any time one of these tracks is taken over.

"And, in this case of course, the whole deal was completed before the Commission knew anything about it. The contracts were all signed with no provision in them based upon the Racing Commission approval.

"The next thing we knew they just brought this thing in and dropped it on the table and here it is.

"And, at the time, they didn't bring us any of their contracts and getting the total number of their contracts was kind of like pulling teeth. We didn't wind up with something like this management agreement between Newco and Ruidoso Racing until this last hearing we had in Albuquerque."

"What was the mangament contract?"

"The management contract was set up to be a percentage of the handle or $800,000 a year, whichever was greater. This would be paid from Ruidoso Racing Association to Newco. In 1969 at the rate of last year's handle it would have amounted to $960,000. We couldn't see from any reported income the Ruidoso track had ever had, how it could meet these obligations to Newco year by year; and if it didn't, everything ended up in the hands of Sports Service or the owners of

Sports Service. There just didn't appear any way that they could do it and save Ruidoso racing.

"So, we got to studying this and in a full hearing of the Commission which is on record, a member of the Board of Ruidoso Racing Association stated that they couldn't meet their obligations. They were going to have to have outside help. With the contracts set up the way they were, it looked like a take over of Ruidoso Downs.

"We had only received a part of the contracts by then. Ten out of the seventy or eighty or whatever it turned out to be after it was all over. And so, we became even more concerned for it looked like it, as I said, has just been set up for Sports Service to take over Ruidoso Downs.

"And so we called another hearing on the findings. We had this hearing back in Albuquerque. They brought in additional information and everything. It didn' look right to us and didn't look too good.

"In the meantime, of course, you hear a lot of these things as rumors and everything, but we got to hearing about other provisions in some contracts that we didn't know any thing about even then. So, we made demands for these.

"I can't remember just the sequence of all the events and we got some more contracts in but still didn't have them all.

"Along about this time, it got to looking serious enough so that we requested a special investigation from the Attorney General's Office and that's where Mr. Baiamonte and Jack Love came in. He took over handling the investigation from this point on.

"We found then there were some 50 more documents we hadn't received. We demanded these. We finally got most of them, including a letter that covered some of the financing contracts to Sports Service. The letter was the same date and the same time and in addition to all the really obnoxious provisions that had been counted out in the contracts themselves.

"The provisions in this letter would have allowed Sports Service to take over and all their options were in this letter that was written on the side and was just as binding a contract as one of the contracts themselves.

"But it was there, and all this time we were having the hearings and hadn't come to a decision. Eventually when we had gotten all of this and had come to look at what Baiamonte had turned up in his investigation, what Congressman Steiger had testified, and a few Arizona commissioners had come over and testified on how Sports Service had operated in in Arizona, we turned down the application. It looked like a take over, and we didn't like the operation in other states and didn't think it would be good for New Mexico."

"What about this Arizona operation?"

"We had some people from Arizona testifying—the little dog breeders groups—they had personal problems with Sports Services. Their testimony may not have had too much value in court; but what it did to me—it proved, first, we didn't want any dog racing in the State of New Mexico. Second, we don't want these people taking over because they have a set-up over there in Arizona so that their dog track management absolutely controls who can race a dog on that track, who can get on there and there is not much recourse from it. An old boy can't set over there in Arizona and raise a couple or three dogs himself and take them to the track and try them out. He's got to go under one of these full stable deals of 25 dogs and be approved by the management and everything before he can even get on the track. Sports Service had a tendency under the testimony of these people to keep the Arizona Breds out, because they have to pay 10% breeders' award to go along with it and costs them some more money. We got several of these people testifying to this over there and, like I say, there are arguments that while Sports Service is not the management over there, they own 50% of the track but they still are not the management. Well, whatever it is, the main thing this proves to me is that we certainly don't want the dog racing and we don't want any set up like this in New Mexico where a concessionaire would control who runs and who doesn't. In stables protected by state controlled pari-mutuel law, any citizen in that state who is qualified would be able to raise his livestock and get it tried out on the State's tracks. Boy, they can't get them in over in Arizona. They have to get them into one of these contract stables or kennels, I believe they are called. So many dogs, 25 or so many approved dogs, I mean, ran with records and then they can have two or three maidens, and you've got to get them in that. And most of these guys travel from one track to another, which means that a guy sitting there in Arizona can't run his dogs and take them to a track and run them unless he can make a connection with these people. It's a bad set up. It would be bad to have it here for the horses."

"Have you had any trouble in getting witnesses to help you in this situation from the horsemen?"

"We have had a lot of trouble. All the time throughout this investigation we have had so many complaints from horsemen.

"But when it came time for people to get up and testify in an open hearing, our attorneys called numerous New Mexico horsemen and we couldn't get one to get up and testify just as to their honest opinion. The horsemen of the state are going to have to help if they want help and protection. They are going to have to come forward and do something to help us out."

"What was the final agreement?"

"The final agreement was that the concession contract be dropped from 20 years to 5 years. That Sports Service can own no more than 5% in any New Mexico race track. That they will loan no further money to race track operators in New Mexico. This is not only for Sports Service—this goes for any concessionaires too. We are writing a rule to this effect. The quality of Sports Service concession is based not on their services in New Mexico, Texas, and Colorado but it was based on a comparison of concessions other than Sports Service operation in New Mexico, and the terms of this agreement would start at the time Sports Service gets paid the $600,000 that they put into the financing of Ruidoso Racing Association."

"What is the connection between Emprise and the Trustees and why did you grant them dates?"

"There is no connnection between Emprise and the Trustees. I don't know about their personal friendship and things like that. But as far as their operation of that race track, the three trustees are true receivers by order of the Court. They operate this race track under the direction of Judge Waldo Speiss and the New Mexico State Racing Commission, and this is all.

"They have no obligation to any one else as far as the operation of that race track goes. They report to the judge, and they report to the Racing Commission. They are obligated to sell the race track. They are obligated to get Sports Service out of the financing as soon as possible. They are obligated to run this track as well as they can run it during the time they are in there, but under the court's order, they've got to get a sale on this thing if there is any sale to be made.

"Another reason we went ahead and made our decision on this concession deal at the time we did was that anybody coming up interested in buying this race track knows exactly what they have got to do. He's got a five year concession contract with Sports Service, but this concession contract is up before the Commission for annual review. This is the point I want to emphasize—these concession contracts are reviewed annually by the State Racing Commission.

"It would have been extremely hard for the trustees to get a sale on the race track with things still up in the air, and an old boy not knowing which he was buying, Sports Service for twenty years or just what he was doing. At the hearing Judge Speiss widened the power of these trustees by his written order so that we and everybody else understands that these are true receivers in every sense of the word.

"And again they are obligated to take care of all financing, obligated to get a sale as soon as possible and to act as true receivers in every way. This was one thing we were vitally concerned with and one of the reasons we turned them down.

"The first time these trustees asked for dates they were not true receivers and did not have the authority. Judge Speiss changed all that and made them true receivers, gave them by court order full authority to run the track, so the next time they asked we gave them dates.

---

## CREATION OF WORLD ENVIRONMENTAL INSTITUTE

### HON. EMILIO Q. DADDARIO

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. DADDARIO. Mr. Speaker, today I am introducing a House resolution calling for the creation of a world environmental institute and the support of this concept by the U.S. delegation to the U.S. Conference on the Human Environment in 1972.

The phrase "one world" has taken on a new meaning as our perception of ecology increases. We are still struggling for peace and political agreement but the one world which every citizen shares is that of the environment and natural resources. Barbara Ward, who appeared before our Science and Astronautics Committee in 1968 coined the term "space ship earth." And we are no less dependent than the astronauts on the wise usage of the finite supplies we carry on our journey around the sun.

The management of this common environment cannot be successful without international agreement because increasing evidence shows the consequences of actions taken in one area on the landscape in another. We have already learned this lesson in America. Connecticut counties are a part of an air shed shared with New York and New Jersey jurisdictions. And Connecticut's shores are linked by the Long Island Sound and the ocean to pollution out-falls far away.

I was particularly impressed by the results this summer of a study organized by the Massachusetts Institute of Technology. Incidentally, it was the very first project sponsored by the National Science Foundation—along with other funding sources—under the Interdisciplinary Research Related to the Problems of Society—IRRPOS—program which the Congress stimulated by the 1968 amendments to the NSF Act.

The study focused on environmental problems whose cumulative effects on ecological systems are so large and prevalent that they have worldwide signifi-

cance. Here are the specific topics considered:

Climatic effects of increasing carbon dioxide content of the atmosphere.

Climatic effects of the particle load of the atmosphere.

Climatic effects of contamination of the troposphere and stratosphere by subsonic and supersonic transport aircraft.

Ecological effects of DDT and other toxic persistent pesticides.

Ecological effects of petroleum oil in the oceans.

Ecological effects of nutrients in estuaries, lakes, and rivers.

This study and others have established the need for world accord on actions affecting the shared environment. For example, even if the United States bans DDT, fish caught off our shores may contain this persistent chemical washed in from continuing foreign applications. Radionuclides from atomic powerplants can circle the globe and enter food chains far from the point of origin. The carbon dioxide from fossil fuel combustion in the highly industrialized countries may eventually alter the worldwide climate and weather patterns. Oil in the oceans originates from defective offshore rigs and from the tankers of various nations to pollute the shorelines of the world.

Thus the requirement for international control of critical environmental problems is established. Rational decisions can be reached only with a strong information base, as we have learned so well in the United States. World environmental management will also rest on accurate and timely scientific data, analyzed and validated for use in appraising the consequences of ongoing actions and options for change.

The time for attention to an adequate information source is now. The experience of my Subcommittee on Science, Research and Development suggests that many valuable laboratories and research centers for environmental science already exist and are located in various nations. But no central function is available to gather, analyze, evaluate, and interpret the myriad facts and figures. Measurements must be systematically filled; and unnecessary replication of expensive experimentation and monitoring must be avoided.

Science has shown itself to be an international discipline which, in its practice, transcends ideologies and geographical boundaries. The careful study of cause-and-effect relationships in environmental matters should be susceptible to worldwide participation with great benefits to the political decisionmaking process.

I do not propose further to define my concept of a world environmental institute. It would be inappropriate for me to do so. Several capable efforts are now underway and the intent of my resolution is to put the House on record as urging that the creation of such an entity be pursued vigorously.

I am aware of the plans for the extension of the international biological program, an ongoing activity relevant to the information needs I have described.

The International Congress of Scientific Unions has formed a Scientific Committee on Problems of the Environment—SCOPE—which is developing an International Center for the Environment. This organization may be very much what is needed by international management.

The National Academy of Sciences has formed a Committee for International Environmental Problems with Dr. Thomas Malone of the University of Connecticut as chairman. I will look forward to their development of a pattern for a world environmental institution.

Senator MAGNUSON has introduced a similar resolution (S. Res. 399) in the other body and has called attention to the varying proposals made by George Kennan, Secretary General U Thant and others.

The need is recognized, the capabilities are at hand. My resolution can add the push of congressional concern to the developmental efforts now going forward so that environmental science can be focused on those critical problems which will demand international political agreement in the next few years. I ask early consideration of the resolution in order that the organizational work which it will stimulate can move ahead rapidly.

## COST OF LIVING SLOWED

### HON. GERALD R. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. GERALD R. FORD. Mr. Speaker, there is good news today for the workers and housewives of America.

The news is that the increase in the cost of living has slowed to the lowest pace in nearly 2 years.

This is conclusive evidence that the Nixon administration policies of fiscal and monetary restraint are working in the fight against inflation. This is solid evidence that all of the scare talk about the need for wage and price controls was exactly that—wild talk which flowed from a desire to reap political advantage.

We have now not just turned the corner on inflation. We are on the road to relative price stability.

I have predicted that the administration's policies will slow inflation down to a 3-percent rate. I renew that prediction today. As I see it, the annual rate of consumer price advance will fall from the recent level of 6 percent to about 3½ percent by the end of this year and to 3 percent by the summer or fall of 1971.

I firmly believe that the administration's policies of fiscal and monetary restraint are producing a victory over inflation. This has been the administration's game all along. It is a game which is going to push the ball over the goal line.

And now that we have started down the road to relative price stability, it is all the more important that Congress refrain from mandatory overspending—refrain from jeopardizing the economic gains we have made in our transition from a wartime to a peacetime economy.

## CANNOT AFFORD TO ABANDON SST

### HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. BOB WILSON. Mr. Speaker, in the past few months the supersonic transport has become so clouded in dissention and controversy that we have lost our sense of perspective on this issue. The following editorial from the San Diego Union analyzes the pro and con issues, emphasizing the uncertainties still involved as well as the economic consequences if we fail to proceed now with the funding on the SST. I know my House colleagues will find this editorial both interesting and informative.

[From the San Diego Union, Aug. 24, 1970]

TECHNOLOGICAL FUTURE AT STAKE: UNITED STATES CANNOT AFFORD TO DROP SST

The American supersonic transport is approaching another hurdle in its difficult journey from the drawing board to the flight line. The Senate must decide soon whether an additional $290 million in federal funds shall be invested in development of an aircraft designed to carry passengers between continents faster than the speed of sound.

Only by a narrow margin did this item in the budget clear the House of Representatives last May. The SST has become a cause for environmentalists, a bone of contention among economists, a subject of gee-whiz statistics about future world travel.

The welter of conflicting views about the SST make one thing clear. If the program is to proceed at all, it must do so in the face of many unknowns—ranging from a controversial theory about the effect of high-altitude jet exhaust on the world's climate, to whether airlines will buy as many of our SSTs as the proponents foresee.

It would take rose-colored glasses to obscure these uncertainties and to deny that the American taxpayer is taking an economic risk in underwriting the SST program. No one can assure us that supersonic travel will be commonplace in the future. It is equally true that no one can assure us that it will not be.

The problems and uncertainties of this great undertaking have not deterred Britain, France and the Soviet Union from pressing ahead with development of their own supersonic transports. They are creating the technology and production capacity for an era of supersonic travel, bidding for an historic breakthrough in the world aviation industry.

In our own country we see scientific and technical teams breaking up in our aerospace industry with the lull in our space program and as a consequence of drastic cutbacks in the defense budget. Federal funds for basic research are being curtailed.

An industry that now stands as the foremost supplier of multi-engine jet transports to the airlines of the world, and which only recently was celebrating the triumph of providing the hardware to send the first men to the moon, is facing a clouded future.

Members of Congress are asking whether we can afford the SST program. A better question is whether we can afford to continue dismantling a part of the network of creative technology which has contributed so much to raising the United States of America to a pinnacle of economic and industrial success in the 20th Century.

The misnamed "military-industrial complex" is in reality a wedding of technology and industry which gives us much more than the weapons on which our security rests. It is the means of translating the inventive genius

of our scientists and engineers into the material goods that fulfill dreams of progress and become the basis for our prosperity in the future.

It is a national resource in the fullest sense of the word, and it would be even more gravely damaged if we allow the SST program to die.

## MOORHEAD CHEERS COLLEGIATE FUNDRAISING EFFORT

### HON. WILLIAM S. MOORHEAD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. MOORHEAD. Mr. Speaker, I would like to introduce into the RECORD an editorial from the September 14 Pittsburgh Post-Gazette.

It details the efforts of a group of Duquesne University students who have responded to the financial plight of their school by organizing a fundraising program of their own.

I think it is often forgotten in this day, when few people use anything but expletives to describe our young people, that today's group of students is truly an outstanding aggregation. Events like those at Duquesne reinforce this positive image.

I hope their effort to save their school is successful. Duquesne University has contributed much to Pittsburgh and the Nation, and its students and academic family deserve a much better fate. And with the kind of spirit "The Third Alternative" has manifested, the long path the school has to travel toward financial solvency seems a bit shorter.

The editorial follows:

A "THIRD ALTERNATIVE" AT DUQUESNE

In view of the adverse publicity which a radical minority has inflicted upon the nation's campuses, it is most reassuring to watch developments at Duquesne University, where student volunteers are coming to the institution's financial rescue. Hundreds of students are demonstrating the loyalty, the appreciation and the sense of responsibility traditionally associated with an American campus.

Like most of the nation's 1,500 private colleges, Duquesne has serious financial troubles. These institutions are caught between steadily rising costs, tight credit and diminishing resources. Campus disorders have tended to slow down once generous giving. Tuitions are rising and some of the country's seven million college students have found it difficult to return to school this fall.

Due to such obstacles, Duquesne faces tough alternatives. It can curtail program or even close its doors, it can subject students to yet another tuition increase (it went up $200 this year) or it can raise some $5 million needed to keep the institution's head above water.

University officials will undertake to raise $4 million through loans and gifts. Student volunteers, calling themselves The Third Alternative, started last April to raise $1 million. During a spring telephone solicitation they raised $61,000. Starting next week they will make a house-to-house canvass seeking contributions.

We hope these student visitors will be received generously. Their cause is good and their motivation is commendable. They restore faith in the constructive majority who have been sadly eclipsed by the destructive posturing of an exhibitionist minority. With students like The Third Alternative, Duquesne promises to make in the future the same valuable contributions it has made to this area for more than 90 years.

## THE BATTLE FOR THE AIR FARE DOLLAR

### HON. GEORGE P. MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. MILLER of California. Mr. Speaker, Bill Eaton, a staff writer for the Oakland Tribune that is now published by former Senator William F. Knowland, has written a very interesting article entitled "The Battle for the Air Fare Dollar."

In this he outlines some of the problems that are materially affecting the supplemental or nonscheduled airlines.

Mr. Eaton points up the problem that confronts Trans International Airlines, one of the supplementals that is based at the Oakland airport in California.

The article is based on an interview with Mr. Glenn A. Cramer, chairman of TIA and one of the imaginative operators in the air business. I commend the article of Mr. Eaton for your consideration:

[From the Oakland-Tribune, Sun., Aug. 30, 1970]

THE BATTLE FOR THE AIR FARE DOLLAR

(By Bill Eaton)

"The airlines are beginning to cut down on the frills.

"Last week I was flying on one of the scheduled carriers, in first class, and they sold me a drink."

Glenn A. Cramer wasn't laughing when he said it. There is little to laugh at in a year of recession in the airlines industry.

He smiled when it was suggested the scheduled carrier might have handed him a free highball had it known who he was.

They know who he is.

Cramer is chairman and chief executive officer of Trans International Airlines, a supplemental air carrier. There are 13 of these in the United States. They have existed as such since 1963, survivors of more than 100 small "non-skeds" that sprang into the air after World War II with ex-GI pilots and equipment. They became "supplementals" by federal edict seven years ago and have prospered in military contract airlift and commercial charter flying until lately.

Now the Vietnam War and the nation's economic boom, if these can be thought of separately, are winding down in a severe recession.

The supplemental airlines and the scheduled airlines alike are seeing their military contracts halved.

In the troubled civil market passenger loads consistently average below 50 per cent.

The scheduled carriers, trying to fulfill the somewhat unwanted promise of new transpacific routes and the outsized Boeing 747 jetliner in the same bad year, have reduced service on intercontinental routes and will cut back flight frequencies on transcontinental runs this year.

It is the kind of a year when the scheduled carriers can't help but notice Glenn A. Cramer. He is no direct threat to them when it comes to their mainstay, the single-ticket passenger. And while he and other supplementals take half the military contracts, this is a market the scheduled carriers entered only recently and it isn't easily manipulated in favor of one class of carrier or the other.

Commercial air charters are, in the modern idiom, where it's at for the supplemental air carriers. And in this recession year the charter passenger business is where the fight is, between scheduled carriers demanding more restriction of the supplementals, and the supplementals fighting the U.S. Civil Aeronautics Board's attempts to regulate them more or at all.

The dispute is not new. Hard times have made it more serious, so serious that the fight is moving into the Congress in the full belief that if something isn't resolved some airline presidents will be reading the bankruptcy statutes.

It is not merely a matter of which class of carriers gets the charter business, because the supplementals are saying quite plainly that if they are given the unlimited charter authority they feel they deserve, then some truly low-cost air travel will result. They can do it for half, they say, for that little guy who will never see a far-away place unless he goes as a member of a group to spread the cost.

Glenn Cramer is saying that little guy has a right to that trip, but he's saying something else about what could happen if the government regulates the supplementals out of the charter business.

"The consumer loses. If we're knocked out, you'll see all the prices go up" in the airline industry.

Cramer is saying this in a year when the supplemental airline industry's total first quarter loss is $8 million, after 1969 when the total loss was $7.7 million, and in comparison with 1968 when the supplementals ran in the black to the extent of $17.7 million in profits.

"The answer is more income, not restricting people from doing more charter flying," he said. "Take off the restrictions and we'll fill the airplanes."

The CAB has always authorized "single entity charters" to a person for his own use, and this included both passengers and cargo. The people hauled, or the people interested in cargo hauled, make no contribution toward payment of the charter price and most freight forwarders work under this category. There are few regulatory problems.

Another charter classification called "pro rata" is used almost exclusively for passenger carrying and it has long stirred conflict in the determination of what constitutes a qualified pro rata charter. At first the CAB prohibited any solicitation of the general public for such charters, and that was the main rule.

In the last decade, when powerful jetliners made it possible to whisk charter loads all over the world, the supplemental airline prospered in the pro rata charter business, and regulation grew apace.

A restriction evolved as the "affinity group" charter, a classification conceived by the International Air Transport Association of scheduled air carriers—which is called "their international price-fixing cartel" by the National Air Carrier Association of supplemental air carriers (NACA).

The affinity group concept grew into a bewildering series of CAB regulations intended to set the contributory-type charter apart from the general public, an affinity group being essentially one which has aims and objectives other than travel, and its members having their required affinity as a group before any application is made for a charter flight. Fraternal, social, religious or educational groups, and employee associations, fit this category.

A third classification of charter regulation grew up as the "inclusive tour" charter which allows a full or splitload charter to a

tour operator or travel agent who organizes and promotes it, and arranges the flight.

Clients pay the tour operator who hires the airplane, and the CAB approves the tour, which must have three stopping points and at least seven days. The cost includes hotel, and surface transport, and the cost must be at least 110 per cent of the lowest available single-ticket scheduled airline fare over the route.

Amid this welter of rules and rule-making, travel agents and supplemental airlines increasingly ran afoul of restrictions at some point or another in the process of making arrangements and scrambling for business.

A scheduled airline couldn't scramble for so much as a supplemental carrier, being bound by law not to make up more than two per cent of its business in the form of "off-route charters" not flown along their regularly scheduled routes. But groups of people don't ordinarily fly to jungles and deserts, and as the scheduled carriers expanded their routes to all the best-known civilized places on earth they cut deeper into the formerly off-route markets which the supplementals pioneered and claimed as their own.

The NACA now is asking the government to switch that two-per-cent-of-business restriction from the off-route to the on-route charters flown by the scheduled carriers. The supplementals ought then to be given a right-of-first-refusal on all off-route charters, NACA says. (Some foreign nations now impose such a right-of-first-refusal on the U.S. supplementals which can't, for example, fly a charter tour to Australia until Australia's own Quantas airline has been solicited for the job and rejected it.)

The CAB, in this year of airline difficulty, proposes more stringent regulations of the supplementals. One proposal would limit charter a group with membership of more than 20,000 to 2,000 airplane seats in a calendar year—eight trips on a TIA Stretched Eight.

The CAB says it will allow the seeking of waivers of any rules, but this will mean a waiver for virtually every charter, NACA says, and the CAB has no regulatory standards now for guidance of its own officials in deciding for or against a waiver request. The criteria would have to develop in the way legal precedent does, through time and trial, in a field where everyone wants a piece of the action now.

The scheduled air carriers say they need more business or higher fares or both; the supplementals insist they can't exit with less business and more retriction, and the general public mut be assumed to want more low-cost travel.

Congress is in the game, in hearings before the House Interstate and Foreign Commerce Committee's subcommittee on transportation and aeronautics. The supplementals hope the hearings will produce recommendations for a simplified set of rules that will assist them in making low-cost charter air travel available to more people.

CAB Chairman Secor D. Browne a week ago told the subcommittee the key question is, "How can the delicate balance between the scheduled services and the charter services be maintained to the benefit of both?"

Browne deplored the battle between the two in which ". . . the ability and the desire to supplement and develop new markets has been subordinated."

Glenn Cramer says, "We found a new market in low-cost charters. We just need simplification of the regulations to develop it.

"We developed the military contract market, too, and the scheduled carriers got in.

"We agree with Mr. Browne, but after we've developed new markets we should have a chance to reap the harvest.

"We want total competition. If we develop business we should have the right to that business."

Chairman Browne feels new laws are unnecessary. "In my judgment we need to take the five or six regulations now in existence and clarify them."

Cramer: "We don't think the affinity group is necessary. It will always be a big source of passengers but why should a man have to join a group just to make a trip at low cost?" A man ought to be able to form his own group for the purpose of a charter trip.

TIA can take a group at 50 per cent of the cost the members would pay for single-ticket airline service. This is because the scheduled carrier must maintain the service on its routes even when its airplanes go at less than 50 per cent load factor as they have most of this year. TIA, however, has what amounts to a guaranteed load factor of 95 per cent, in characters booked before an airplane is scheduled to fly.

Cramer: "To Paris our passengers pay under $300, but it's $700 (single-ticket) on a scheduled carrier. If he belongs to a group that can qualify under the regulations then he goes, and if he doesn't qualify then he doesn't go, and he doesn't pay the $700."

In 1969, 57 per cent of TIA's revenues came from commercial flying—charter passengers and some cargo. That figure will pass 60 per cent this year, Cramer said.

TIA had $15.7 million worth of so-called "fixed buy" military contracts in the final three quarters of fiscal year 1970, but has only $9.3 million in the same period of fiscal 1971 (and the supplementals together watched the figures drop from $63.1 to $38.9 million), while among their scheduled air carriers competition American Airlines is looking at $21.3 million that sank to $11.4 million, and Trans World Airlines as $13.6 million that went to $9 million across those same fiscal periods.

Cramer: "In the last three years the scheduled carriers have gotten into the MAC (Military Airlift Command) work and caused dilution of that market. We pioneered it, and now everybody's got a piece, but we were there when the need first developed.

"We've worked the last six years to develop and explore our commercial markets to where, when we have a choice between a military and a commercial job, we'll take the commercial one."

For a long while in Vietnam War related flying, the military operated its own aircraft at 4.5 hours a day, leaving the balance of the work to commercial airlines. But then MAC began working its airplanes eight hours a day, and still works them 6.5 hours a day this year, and that reduces the need for civil aircraft, Cramer said.

But in competing for whatever military business is available the supplemental carriers are clearly in a better position insofar as equipment is concerned. They don't have the 747.

The military has shown a continuing clear preference for the convertible jetliners operated by the supplementals, rather than for the big new 747's with which the scheduled carriers made a bid for a greater piece of MAC pie.

MAC rated the 747 solely as a passenger aircraft, with a belly cargo hold. MAC prefers the McDonnell-Douglas DC–8–61 and DC–8–63 "Stretched Eight", because, Cramer says, "we can convert the airplane on the other end of a trip to meet the need—18 pallets and 90,000 pounds of cargo or 221 military passengers—and we don't need the special ground-handling equipment the 747 does."

Cramer has ten Stretched Eights and a pair of medium-range Boeing 727 jet-liners, and all of them are convertible.

This past Friday, Cramer's principal competitor among the supplementals, World Airways, based just down the street from TIA at Oakland International Airport, opted out of the jumbo jet field for the time being. World withdrew its orders for what would have been its first three 747s, on the basis of the troubled charter situation and the proposed restrictions.

TIA plans to take a 330-passenger McDonnell-Douglas DC–10 in 1973 but Cramer says, "We presently don't want to face the big ones. We look at the 747 and it's too big. It doesn't fit the transportation market at all."

The scheduled carriers are carrying average loads of 250 to 300 in their 400-passenger 747s, but in these hard times they're doing it by literally robbing their older jetliners of passengers. The scheduled airlines, in a year of 40 per cent load factors, "have got to reduce their promotional fares," Cramer said.

"There's no point in advertising that 'My 747 is better than your 747' when it's just a big bus."

No frills are advertised for TIA charter flights.

There are no movies. Dinner is a one-course meal which Cramer says is "good, wholesome, hot."

He believes the business traveler cares little for lobster-in-the-sky, and the tourist would as soon wait to eat his exotic meals in that exotic place he's bound for.

"Our liquor service isn't as extensive as the scheduled carrier's," Cramer added.

He was a business traveler last week when that scheduled airliner sold him a drink in a first class seat, and he was delighted.

---

## VA DOES GOOD JOB IN VIETNAM

### Hon. G. V. (SONNY) MONTGOMERY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. MONTGOMERY. Mr. Speaker, last week each one of us received a letter from Mr. Donald E. Johnson, Administrator of the Veterans' Administration, in which he outlined the steps that have been taken by the Veterans' Administration to acquaint Vietnam-duty servicemen with the VA benefits available to them as veterans. I think the VA has done a very commendable job in apprising these men and women of the programs we have voted for their benefit.

When the House Select Committee on U.S. Involvement in Southeast Asia went to Vietnam, we looked into the work being done by the Veterans' Administration. Our investigation substantiates the facts related in Mr. Johnson's letter. Our committee found that 80 percent of the servicemen and servicewomen had been contacted by a representative of the VA through either personal interviews or group meetings before leaving the combat area to return to civilian life. This past June, the Veterans' Administration had nine representatives in South Vietnam with the following assignments: One at Tan Son Nhut for Air Force, USARV and MACV; two at the 90th Replacement Group at Long Binh; one for the Air Force at Bien Hoa; one for the Air Force at Cam Ranah Bay; one for the 22d Replacement Group at Cam Ranh Bay; one for the Marines at Da Nang; and one for the Air Force at Da Nang.

The VA conducts regular briefings for service personnel leaving South Vietnam. These meetings usually last about 15 minutes. The men and women are then given an opportunity to confer with VA representatives on an individual basis. The representatives receive no special

training before coming to Vietnam because they do basically the same type of work at any other duty assignment. Since sending representatives to Vietnam in 1967, the VA has had a total of 69 people volunteer for duty in the combat area. Unfortunately, two of these dedicated persons have lost their lives.

In addition to the briefing session, the Veterans' Administration also make extensive use of the Armed Forces radio and TV network in order to keep servicemen and servicewomen continually informed of VA programs while they are assigned to South Vietnam.

Mr. Speaker, as a Member of Congress and member of the House Committee on Veterans' Affairs, I would like to take this opportunity to publically thank the personnel of the Veterans' Administration for fulfilling their responsibilities in South Vietnam.

## CHICAGO TRIBUNE URGES NATO INTERVENE IN HELPING JORDAN

### HON. ROMAN C. PUCINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. PUCINSKI. Mr. Speaker, the Chicago Tribune has proposed editorially, that the North Atlantic Treaty Organization undertake the difficult task of saving Jordon from Palestinian rebels and Syrian invaders thus, restoring peace to the Middle East.

This is an excellent suggestion and worthy of immediate support by the administration.

I am particularly pleased to see the Chicago Tribune urge NATO intervention because as early as April 4, 1968, I proposed here in Congress that NATO invite Israel as a member nation and through the collective security of NATO assure peace in the Middle East.

In urging the United State propose membership for Israel in NATO, I said:

The growing Soviet influence in the Mediterranean and the Middle East certainly justifies the admission of Israel into NATO and the giving of Israel the full support of the NATO nations in securing her sovereignty in the Middle East.

We now have three Mediterranean nations in NATO: Greece, Turkey, and Italy.

It is not unreasonable to suggest that Israel become the fourth Mediterranean nation to be included in NATO, and that the force of the NATO defense community be extended to the Middle East for, surely, you cannot protect Europe from Soviet aggression if the Soviet Union becomes the dominant force in the Middle East.

Tiny and heroic Israel today stands as the key to peace, not only in the Middle East, but in Africa, the Mediterranean, and, yes, Europe itself.

The Chicago Tribune editorial follows:

A JOB FOR NATO

President Nixon is quite properly reluctant to order unilateral American intervention to save King Hussein of Jordan from the Palestinian rebels and Syrian invaders.

It isn't that there is any doubt about the importance of saving Hussein. His downfall would plunge the Arab world into chaos. While some Americans may view this in itself with equanimity or even satisfaction, a guerrilla victory would also shatter what hope remains for a peaceful Arab-Israeli settlement. If the Israeli war were to resume, it would be harder to stop than ever and it would inevitably involve the United States to a greater extent than we care to imagine. It must not be allowed to happen.

The trouble is that the remedies thus far mentioned are either unattainable or useless. Intervention by Israel would do more harm than good. Unilateral action by the United States would be little better, and would turn every Arab nationalist against us. A combined effort, as we said on Sunday, is infinitely preferable. But by whom? The United Nations, which nominally backed the defense of Korea, offers no hope today. Neither the Soviet Union nor the moderate Arab governments are likely to help. And the Western European governments, individually, are reluctant even to discuss intervention.

It is time therefore to consider collective action thru the North Atlantic Treaty Organization, a functioning organization with readily available forces and with bases in Turkey, next door to the fighting. Of course the obstacles are great. It will be argued, for example, that the Middle East is beyond the jurisdiction of NATO.

But there is nothing in the NATO agreement which prohibits such action, and surely the obstacles can be overcome if the member countries are persuaded that joint intervention is in their own interests as well as the interest of peace. They must realize that at least 85 per cent of their oil comes from the Middle East and that if the Middle East were to go up in flames they would very likely find themselves without oil at all, or at the mercy of the Soviet Union.

These are the NATO allies, moreover, who insist that the United States keep its forces in Europe as part of a collective deterrent to Soviet expansion westward. West Germany shudders whenever the withdrawal of American forces is suggested. Greece has just received a new commitment of American arms under the NATO agreement. If these countries consider our help so important on the continent of Europe, where the threat seems rather remote at the moment, can they be blind to a much more immediate threat thru the Middle East?

It is not, as we have said, just a matter of saving Hussein's throne or Jordan's integrity. The whole Middle East is at stake. If the Israeli cease-fire falls apart, there will be no suitable alternative to international occupation of the controversial border areas. Establishing an international presence there now will be more effective than waiting until there is no choice. International intervention is vastly better than letting the war break out again.

We know that this is a long shot. But at a time like this, we cannot afford to be fussy about seeking easy or unanimous solutions. If President Nixon can persuade NATO to act, we think it would work. We urge him to try.

## AVOIDING JORDAN'S QUARREL

### HON. HOWARD W. ROBISON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. ROBISON. Mr. Speaker, the civil war which has erupted in Jordan—and which presently threatens to polarize the revolutionary and conservative halves of the Arab world—is viewed by many as raising the likelihood of the kind of big-power involvement in the Middle East that both we and the Russians have sought to avoid since before the Arab-Israel war of 1967.

Quite clearly, the President has been walking a diplomatic tightrope for us—and we with him—these past few days, as fast-moving events have threatened to pull the United States deeper into a conflict that offers us many dangers and few rewards.

The President has hinted that the United States might take military action—without going into specifics as to the nature or extent thereof—if intervention by Syrian or Iraqi armed forces were to tip the balance against King Hussein or if American lives were threatened. But the situation in the Middle East, today, is far more treacherous than it was in 1958 when President Eisenhower moved to intervene in the Lebanese civil war, so-called, for somewhat the same purposes, and American stock among the Arab countries is at a much lower ebb.

In a rapidly changing situation such as pertains now in Jordan—and in the midst of such vast uncertainties and near-incalculable stakes—it is understandable if American foreign policy for this part of our troubled world is being made on a day-by-day, if not hour-by-hour, basis; and it is equally understandable why the President may not wish to be very explicit as to what the United States may, or may not, feel called upon to do. At the same time, however, one in my position must hope very much that the White House is keeping our congressional leadership, and the chairmen and ranking members of the committees most concerned, constantly abreast of the developing situation, and advised as to the policy decisions we may be facing, along with whatever alternative courses of action may be available.

Surely, there are compelling reasons why we would not wish to stand idly by while King Hussein's government, and he with it, goes down the drain, for he—along perhaps with Tunisia's Bourguiba—is one of our last, remaining links with reason on the Arab side of this tragic conflict, and one of the few Mideast leaders we have thought capable of making peace with Israel and then enforcing that peace. Beside that, we have understandably an instinctive desire to do something to end, or at least alleviate, the misery and appalling suffering this sudden civil war in Jordan has brought its people and the Palestinian people living therein.

However, even though the same has been hinted at by American Presidents and Secretaries of State since the days of Messrs. Eisenhower and Dulles, it would appear that we have no actual commitment to defend Hussein's throne; in any event, the precise nature of any such has never been spelled out.

For that matter, we have no specific commitment to Israel though I think it generally understood that we have accepted at least a moral commitment to protect Israel's security—something that has probably been firmed up these past few weeks as our own initiatives toward peace in the Mideast have seemed to go awry, and it has now become incumbent on us to try to negotiate a new stand-

still cease-fire, including the rectification of the violations that ocurred under the first attempt threat and the roll-back of the new Russian-Arab missile sites West of the Suez.

But what, now, to do about Jordan?—where the time-bomb represented by the unresolved, and largely unnoticed, Palestinian Arab problem that has been ticking away for 22 years has finally gone off?

The right answer—the wise answer—comes exceedingly hard.

One has to hope that a similar sort of answer is being searched for in Moscow, as well as at the headquarters of the United Nations in New York, where that organization—by effective, concerted action now, as it prepares to celebrate its 25th birthday—has an opportunity to justify its existence and all the support this Nation and the other peace-minded nations of the world have poured into it through the years.

But as for us—at least for me—the right, and wise, answer seems to be suggested in this past Tuesday's lead editorial in "The Wall Street Journal," as offered now, Mr. Speaker, for my colleagues' careful consideration:

AVOIDING JORDAN'S QUARREL

Hints by President Nixon and Secretary of State Rogers that the United States might intervene in the Jordanian war do not necessarily reflect a serious intention. Diplomacy, particularly where the Middle East is concerned, has many intricacies and the threat of U.S. intervention might have its uses as a diplomatic ploy.

But if President Nixon is harboring serious thoughts of involving U.S. troops or airpower in the conflict there is a key and crucial question to be asked first. Why? And there are not any very satisfactory answers.

Unquestionably the U.S. has important commitments and interests in the Middle East. It is committed to protecting Israel's security, to an eventual resolution of the problems of the Palestinian Arab refugees and furthering any efforts that can be made towards re-establishing peace. It also has a strategic and economic interest in trying to protect the flow of oil from Libya, Iraq, Saudi Arabia and the Persian Gulf sheikdoms to Europe, which has a vital dependence on these sources.

It is hard to see how any of these interests would be furthered by intervention in Jordan. Regardless of how the Jordanian army fares against the Palestinian guerrillas, it will not obliterate the Palestinians or their deep-seated hostilities born out of 22 years as a homeless people. If defeated, the guerrillas will most likely withdraw to Syria and Lebanon to regroup and continue pressing their claims.

Whatever the euphemism employed, a U.S. military intervention would presumably mean killing Palestinians. The Palestinians already have countless grievances and this is one they would not forget. Thus, potential U.S. effectiveness in bringing about any kind of eventual peace between the Palestinians and Israel would be undermined.

As to Israel's security, it is hardly endangered by the quarrel in Jordan. If anything, it is temporarily improved while the guerrillas are occupied elsewhere.

Intervention would further endanger the already shaky relationship between the U.S. and two of the major oil producing nations, Libya and Iraq. Both of these countries appear to be in sympathy with the guerrillas. A U.S. intervention would tend to harden their positions and make them more likely to take rash actions, even to their own detriment, such as cutting off oil supplies.

There is the argument, of course, that by supporting the Jordanian army the U.S. would serve notice that it is willing to support relatively conservative and pro-Western forces in the Middle East. But given the climate of opinion among the Arabs, U.S. support would probably weaken, instead of aid, such forces. King Hussein has shown, particularly in the events leading up to the six-day war in 1967, that he feels his best chance for survival rests in allying himself with President Nasser of Egypt and paying lip service to the cause of Arab unity rather than on calling for help from Western nations.

There comes the final question of what to do about some 400 Americans, including hostages of Palestinian hijackers, who are trapped in the Jordanian conflict. If an airlift can be organized to protect these lives without any suggestion of a military intervention, it should be done. But a military operation would endanger those lives even more than they already are.

Some hints from the State Department have suggested that the United States might make common cause with the Soviet Union in the Jordanian situation. To us, this sounds slightly naive. There are indeed possibilities that the Russians are not happy about the freewheeling ways of the Palestinians and that they have no love for Syria's unorthodox revolutionary regime. Still, the United States should keep in mind that the prime objective of Soviet policy is to destroy American influence wherever it exists. To get into a high-risk operation on the assumption that it has some form of Soviet assent would be reckless indeed.

There is, in fact, a great deal to be said for letting the Russians fend for themselves in trying to cope with Arab quarrels. The Russians already are directly involved, unlike the U.S., through their troops and weapons in Egypt. If they could bring peace among the Arabs it would be a notable achievement but not one that we should necessarily fear.

Sometimes the U.S. has to make bold moves to protect its vital interests; before bold moves are made, however, it should be clear that there is something important to be gained.

Once directly involved, the U.S. would find itself caught up in the imbroglio to a far greater extent than it is now. So the best course will be to stay out of this Arab quarrel.

## NIKOLA PETKOV

### HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. CONTE. Mr. Speaker, today marks the 23d anniversary of the murder of Nikola Petkov, the Bulgarian national hero and the gallant leader of the united democratic opposition in the Bulgarian Parliament. This event was noted at a memorial meeting in New York City on September 19 and at a religious service in Washington, D.C., on September 20.

I would like to join the Bulgarian National Committee in paying tribute to Nikola Petkov, a great man and a great leader. During the Nazi occupation of Bulgaria, he was an underground leader and was imprisoned several times. When the Nazis were driven out of Bulgaria, Nikola Petkov and three other representatives of the Bulgarian National Agrarian Union—the largest political organization in Bulgaria—took part in the first coalition government, together with Communists, socialists, representatives of the political group, "Zveno," and the independent intellectuals.

Nikola Petkov continued to fight for the freedom and independence of his country. He fought in the finest traditions of democratic government, and for this he was finally arrested and executed.

Mr. Speaker, I hope my colleagues and the American people will pause for a moment today to pay tribute to that great Bulgarian hero, Nikola Petkov.

## PRIORITIES HAVE CHANGED

### HON. PAGE BELCHER

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. BELCHER. Mr. Speaker, President Nixon is succeeding in his efforts to shift the national priority emphasis from defense to domestic spending.

The 1964 fiscal budget allotted $81.2 billion for defense spending whereas the 1971 fiscal budget includes only $79.4 billion. Not only is this a reduction in the total amount budgeted for defense, but also it is a percentage reduction of 8 percent.

The Daily Oklahoman discusses this change in national priorities in a recent editorial which I insert in the RECORD.

[From the Daily Oklahoman, Sept. 5, 1970]

PRIORITIES HAVE CHANGED

Arguments that we must cut defense budgets drastically in order to be able to afford civil projects continue. In his presentation of the need for a $5 billion cut in defense spending, for example, Sen. William Proxmire told his colleagues that we "must shift priorities from the military to the civilian sector." He added that this shift is long overdue.

The fact is that the shift has occurred already, and the shift in emphasis is greater with each succeeding budget. The fiscal 1969 budget the last prepared by the Johnson administration, included $81.2 billion for defense—44 per cent of the total federal budget and 9 per cent of the gross national product in constant dollars. The first Nixon budget included only $79.4 billion for defense. For fiscal 1971, the amount for defense dropped to $73.6 billion, or 36 per cent of the federal budget and 7.3 per cent of the GNP.

The appropriations for the next year are already under debate, but will be at least $2 billion below current spending, unless there is an unforeseen increase in international tensions.

Non-defense projects, conversely, take rapidly growing portions of the federal budget. In the current fiscal year, 63.7 per cent of federal spending ($127 billion) goes to civil programs.

Although the Nixon administration takes credit for reversing a long trend, the fact is that the reordering of national priorities has been going on for a number of years. Defense spending back in 1964, the last fiscal year before our involvement in Vietnam became a major item, amounted to more than half the total federal budget. In per capita terms, national defense cost each American $273 that year.

Although Vietnam costs are not easy to isolate from other military expenditures, Congress has insisted each year that federal officials make some sort of breakdown. For the first Nixon budget, the figure came to

$88 per American for the Vietnam war, by the admittedly rather arbitrary breakdown established several years earlier. All other defense costs combined, however, had dropped to $268.

During the same period of time, nondefense federal spending rose from $251 per person in 1964 to $624 per person in fiscal 1971.

While this shift of emphasis was taking place in this country, another kind of change was occurring in the Soviet Union. Spending on military projects in the U.S.S.R. increased by 50 per cent in the six years beginning with 1964. Funds allocated to Soviet strategic forces grew even faster, by over 60 per cent. Our own spending for strategic forces—on which we rely to discourage potential warmakers—dropped from $46 billion in fiscal 1964 to $39 billion in fiscal 1971.

From any angle, it is clear that national security does not now have first place in the federal budgets, and has not occupied that spot for several years. Perhaps the politicians who keep demanding that our defense spending be reduced have other, and valid, reasons for that demand. But they should stop imputing to national defense a share of the tax burden it no longer represents.

---

## PERSONAL PRIVACY, DATA SECURITY, AND A FREE AMERICA

---

**HON. CORNELIUS E. GALLAGHER**

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. GALLAGHER. Mr. Speaker, during the years the Privacy Subcommittee of the Committee on Government Operations has been carrying on its work of preserving constitutional rights, I have had the steady support and intelligent encouragement of Congressman FRANK HORTON. He made especially important contributions to the hearings we held in 1966 on the proposed National Data Bank and he has continued his informed interest in the problem of computer privacy.

On Tuesday, September 15, 1970, Congressman HORTON spoke at a symposium sponsored by Computer Audit Systems. He spoke to the issues of personal privacy, the security of data within automated information systems, and he highlighted the ultimate threat to our system of government in these terms:

In such a situation of social upheaval we must soberly confront the possibility of the Federal Government overreacting or the even more frightening possibility of the people losing faith in our institutions and voting into power a Government without any awareness of the diversity which is our strength as a free society. Spearheaded by an information handling technology utilized without safeguards, without conscience and with malice, dictatorship is now an operational possibility. For technological totalitarianism can become political totalitarianism.

Mr. Speaker, my friend FRANK HORTON said very sensible things in his speech and I commend it to the attention of readers of the RECORD and my colleagues in the House:

PRIVACY, SECURITY, AND A FREE AMERICA

I am very pleased to have this opportunity to address this symposium conducted by Computer Audit Systems. In 1966, as a member of the Special Subcommittee on Invasion of Privacy of the Committee on Government Operations, I participated with Representative Cornelius E. Gallagher in pioneering hearings on the computer. At that time, we considered a proposal advanced by the Bureau of the Budget to establish a National Data Bank. The Bank would have contained almost all of the records of citizen contact with Federal Agencies: tax returns, census data, military records, educational histories, all of the vast trail of data left by the citizen as he dealt with the Federal Government.

At that time, little was really known in Washington, or at least in the Congress, about the miracle of electronic data processing. We were assured by statisticians and experts in Federal programs that such a combination and centralization of records was essential to evaluate and guide ongoing social action programs. That may well be true, for certainly none then or now would suggest that vast expenditures of Federal tax dollars should be undertaken without the most sophisticated review and analysis. Our concern then, and our concern now, is that a massive compilation of citizen records would present an unacceptable threat to the continuation of individual privacy and democratic safeguards.

After a careful analysis by our subcommittee, it was determined that a National Data Bank was not in the best interests of the American people and the formal proposal has been effectively buried. Whether this was truly a victory or merely a holding action is now under quite valid dispute, as I will discuss later. However, certain basic points were made which were quite legitimate and it is my judgment that our hearings and subsequent actions sparked a re-evaluation of the role of data processing and data processors in our evolving free society.

This is a major reason why I am so pleased to be able to share my experiences in Washington with you today. Your organizations have the fundamental responsibility to assure that your own systems do not invade privacy and one of the major ways in which data processors can take that civilized step is to build in mechanisms to guarantee the security and integrity of the data bases. The president of Computer Audit systems has been one of the leaders in establishing security mechanisms which are a vital part of insuring a continuation of free America.

I would like to point out what I regard as a fundamental difference between security of data and privacy of data. Security means thwarting unauthorized access to the information and privacy means assuring the individual to whom the data refers the opportunity to have access himself. This is, probably, a major oversimplification, but I think both parts of that equation are vital to our society and I would like to expand on it as the focus of my speech.

Many of you are executives in firms which have computerized information systems or which are seriously considering shifting from a manual mode to an automated one. It is essential, in my view, that you understand the necessity for security of your data, and I am sure many of you have already put into practice the methods which I am about to discuss. For you must gauge the level of the threat to the data which you possess if you are to build a system secure enough to resist intruders.

Just as automated data systems make information more easily and quickly available to your organization, they offer similar advantages to potential pilferers and datathieves. It is both easier and more fruitful to raid a computer than to raid a roomful of file drawers.

It is obvious that threats to your data do exist, and I am not engaging in the currently popular art of doomsdaymanship by pointing out the vulnerability of computer rooms and computer systems to theft or attack.

Let me point out two brief examples:

1. When one company wishes to expand quickly, one of the easier ways is to know the salaries of executives in another similar firm and to raid that company. If the payroll information system is not protected, it is a simple matter for a rival to know the salary levels of executives and to offer opportunities just a little better than the executives now are enjoying.

2. When you undertake to bid upon a project, your bid must remain secret. But computerized information systems, which contain all the justifying data, may be vulnerable to access by a competitor and thus the very concept of free enterprise and open bidding will become a farce.

What can you do to protect your own systems: I would offer three methods which may slightly increase the cost of the system, but which can offer an acceptable level of security for the data.

1. Encoding. Simple cryptographic procedures are available which would prevent a memory dump of all your information. It appears that many casual browsings among files in a time shared environment can be thwarted by encoding of data, for individuals often will not take the trouble to decode them if they are inadvertently dumped at his terminal or if he accidentally gains access to files which he is not entitled to see.

2. Password at each terminal in a time shared system is vitally essential in my judgment. This permits the executive program in a system to assure that unauthorized access does not occur and that the terminal identifying itself really is one which has the proper purpose for entry into the data.

3. Perhaps the most meaningful technical device to assist in maintaining security of data and preventing invasion of personal privacy is an AUDIT TRAIL. This keeps a record of every access to the data and can flag any unusual activity. American Express Company, for example, uses this to determine when a credit card is much more active than usual and has been effective in stopping credit card abuse. In addition, this will show who has received what information and will facilitate the sending of corrected records to those who may have received erroneous information.

And that feature, of course, is a major aspect of privacy. When the Special Subcommittee on Invasion of Privacy initiated Congressional consideration of the credit bureau and credit reporting industry in 1968, we found that while these files were data rich, the individuals to whom thy referred were privacy poor. At the invitation of Chairman Gallagher I participated in the first three days of the subcommittee's hearings, although I was not a member of the subcommittee at that time. What we heard was truly appalling and I am pleased to report to you that legislation, The Fair Credit Reporting Act, passed the Senate in November 1969 and is now being considered by the House Banking and Currency Committee. The body of evidence which was unearthed by the Privacy Subcommittee, specifically as it referred to the growing use of the computer by an industry which knew so much about every American who had ever applied for credit, insurance, or employment, disclosed that a National Data Bank was in fact in existence and controlled by firms which were under absolutely no legal restrictions.

While we had some sense of accomplishment in the name of privacy in defeating the Budget Bureau's National Data Bank proposal, I have even greater concerns about a totally non-regulated web of data systems growing between private credit firms and credit bureaus. At the time credit firm practices were first investigated, the abuses of privacy were staggering. There were almost

no provisions for an individual's access to credit data that refers to him, and no provisions for deleting or correcting false reports, or for dropping bad credit reports which are more than one or two decades old.

Fortunately, the situation is not as bad as it was in 1968. The majority of firms in the credit industry have taken steps to improve the fairness of their operations, and at least some of the regulations contained in the Fair Credit Reporting Act seem to offer guarantees of fair treatment to the individual consumer.

An example is the provision of the Act which limits the period that credit data can be held to seven years, except for a bankruptcy report which may be held for 14 years. Hopefully, this kind of safeguard can soon be enacted into law.

Consider that a man cannot be compelled to give up his home to quarter troops, a man cannot be compelled to testify against himself, and he has the right to face his accuser in an adversary proceeding. Most important to a constitutional basis for the right to privacy is the beautifully clear concept of the Fourth Amendment. I would like to repeat some of the Fourth Amendment's language because it can never be repeated often enough as we move into the Age of the Computer:

"The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated and no warrants shall issue, but upon probable cause . . ."

Methods to breach these guarantees existed long before the computer and other advanced technologies and certainly some men in our history have occasionally had little respect for the rights of our citizens. But the computer puts a wild card into record keeping and allows the invasion of privacy on a scale never even envisioned by Adolph Hitler. One reel of magnetic tape can contain the personal histories of thousands, even millions of Americans which can be taken from a computer in one jurisdiction and run on a computer in another. Thus, all the protective legislation adopted in past technological eras can be circumvented.

In addition, the very fact that so much data is now embedded within computerized data banks poses an almost insurmountable obstacle to the technologically unsophisticated individual. How does he make sure his records are correct when they are embedded in an automated system which he scarcely knows exists much less has the technical means to question? Here again, we see the necessity for new legal actions.

Not only can private credit reporting agencies wield almost absolute power over those who seek credit, employment, or insurance, but Federal Agents even now have uncontrolled access to these records. A truly appalling fact disclosed in the recent hearings held by my colleague, Mrs. Lenore Sullivan on the Fair Credit Reporting Bill is that 50,000 visits took place by IRS and FBI agents in 1969 to these repositories of credit and personal information and that subponeas were seldom required. While the majority of the firms in the credit reporting field are not computerized, those which are can assemble all the information in any part of the Nation to be turned over to the Federal Government.

As I said earlier, actions taken by our Special Subcommittee on Invasion of Privacy were able to stop a formal National Data Bank, but advances in the state of the electronic data processing art make me strongly suspect that such a nationwide system really is in effect. In addition to the credit reporting industry, computers in Federal Agencies now have the ability to "talk to each other." Executive Orders have been issued to upgrade the compatibility of various Executive Branch systems and thus all files held in the Federal Establishment will soon be able to be merged into a de facto National Data Bank.

I have been wrestling with Federal agencies to stop one seemingly simple form of privacy invasion which this de facto Federal data bank has made possible.

With computers at their disposal, Federal agencies now can compile and reproduce with ease, the names and addresses of citizens having dealings with them. Under what I consider to be a poor interpretation of the Freedom of Information Act, which guarantees public access to non-classified government data, several agencies have been selling huge lists of licensees to commercial and other buyers at about a tenth of a cent per name—generating much unsolicited mail, and in some cases, some potential dangers to persons named on these lists.

One example which I uncovered was that the Internal Revenue Service was selling, at cost, a list of all gun collectors in the United States to direct mail firms. This would not have been possible before the computer, let me add, because of the great expense. Such a dangerous practice placed a constituent of mine in a position where he felt it necessary to erect an expensive electronic warning system around his valuable collection of guns.

He felt that wide distribution of a list of 140,000 licensed gun collectors to virtually anyone able to pay the $140 fee would be tantamount to the IRS selling a "national guide for gun thieves"—a list pinpointing private homes around the country which were likely to contain valuable or extensive collections of firearms.

After learning of this abuse, I surveyed fifty Federal agencies to learn their policies on mailing list distribution. This led to my introduction last June of legislation to stop the sale of mailing lists by Uncle Sam, while still preserving safeguards of the public's right to have access to government data. Over eighty Members of Congress joined me in sponsoring this bill, which is some indication of the sensitivity now existing in Congress to the need for protection of individual privacy.

So we see that data flows into the Federal establishment with little control and that data also flows out of the Federal establishment, due largely to our failure to provide an effective means to assess the new information handling technology in all its ramifications. We have witnessed the rapid blurring of the distinction between Federal, State and local information files and as a Member of Congress I am becoming increasingly aware that the concept of our Federal system with States having separate sovereignty and jurisdiction is suffering severe technological incursions.

By collecting all information from all files, private and public, Federal and State, in a central repository or in a unified information system we give the Federal Government immensely increased access to information about each American. And the old Cliche about knowledge being power must now be expanded to say that absolute knowledge is absolute power.

I believe that here is the ultimate threat of the computer and allied technologies to the future of a free America. Our Nation is in turmoil at the moment and the conflict between right and left, young and old, liberal and conservative, is threatening to rip apart the very fabric of our society. In such a situation of social upheaval we must soberly confront the possibility of the Federal Government overreacting or the even more frightening possibility of the people losing faith in the institutions and voting into power a Government without any awareness of the diversity which is our strength as a free society. Spearheaded by an information handling technology utilized without safeguards, without conscience and with malice, dictatorship is now an operational possibility. For technological totalitarianism can become political totalitarianism.

That is why I believe that the actions taken in the Congress in the area of privacy are so important and it is another reason why I am delighted to have the opportunity to address this distinguished group of data processing professionals. You know, far more than I or any other Member of the Congress, the incredible advances in the state of your art and you know the disastrous as well as the promising long range implications of your day to day work. But the Congress does not yet fully grasp these implications, I regret to inform you.

The cover story of *Newsweek* of July 27 was on the subject of privacy and I commend it to each of you. It stated what has always seemed to me to be an indication of the failure of the Congress to rationally assess the priorities of its own operations. Congressman Gallagher, the leader in the privacy struggle in the House and a man who I am proud to have had the opportunity to work with, has been granted by our Committee on Government Operations the staggering sum of $65,000 in the five years he has been leading the Privacy Subcommittee. As a means to correct this striking imbalance, I have joined with Mr. Gallagher in cosponsoring H. Res. 717, to establish a Select Committee on Technology, Human Values, and Democratic Institutions. I am proud to have had a part in what the Congress has been able to do thus far in this area, but I am convinced that much more must be done, and done soon.

A Select Committee focusing exclusively on the toxic elements in the obvious tonic of technology is vitally necessary for at least two reasons:

1. The institutions of representative government are now under massive attack by virtually every element of society. The young call democracy irrelevant, the "over 30 crowd" calls it destruction of valid traditions, the disadvantaged say it has ignored their needs while the "experts" contend that it cannot react quickly enough to immediately implement the solution to our social ills. The House of Representatives, that branch of the Government, most closely connected with the people, is particularly vulnerable to such attacks for we must go to the people every two years.

We have long been threatened by massive power in the Executive Branch and one of our disagreements with the concept of the National Data Bank was that it would enlarge that power by several orders of magnitude. One of the main points made in the Report of the Committee on Government Operations on the Privacy Subcommittee hearings was that standing committees of the Congress must have equal access to such a vast data system, or *de facto* data system, should it be established. Today, the Executive Branch has over 10,000 computers; the Congress has but three. This imbalance must be corrected. A Select Committee such as we propose could assemble the sophisticated expertise and the data to challenge and alter Executive Branch proposals. It could help restore the Congress to a coequal role; where as now we frequently act as merely a supine ceremonial confirming body in passing legislation devised by a better informed Executive Branch.

No matter which party controls the Executive Branch, the hot voice of humanity is often unheard in the chilly corridors of power. The experts who create innovative plans are never called to public accountability, as are those of us in the Congress who must appropriate the funds to put them into operation. Adverse social or Constitutional side effects of Federal programs are often ignored if they seem to offer a short term increase in efficiency and economy and the operating role of the Agency.

A Select Committee on Technology, Human Values and Democratic Institutions

could enable us to compete effectively and could truly make us effective spokesmen for the human values of our citizens.

Even before the establishment of the Select Committee, I think Congress, now in a self-reforming mood for a change, should very seriously consider equipping itself with the computer facilities and staff necessary to keep up with the Executive's data handling and data maneuvering capabilities. I do not propose that we create a duplicate of agency staffs and computers on Capitol Hill. I do propose that computers sufficient to borrow data held by the agencies, and to analyze it for legislative implications be made available to Congress. Without the equipment and the staff necessary to do this job, the right of Congress to access to all government information, and the right of Congress to probe, to oversee and to change Executive policies will rapidly lose all meaning in this computer age. And as these cherished legislative prerogatives are dissipated, so will the democratic protections upon which our free nation is founded.

2. The second reason why we need a new structure within the House is that the role of the Privacy Subcommittee is not consistent with the goals and jurisdiction of its parent Committee—the Government Operations Committee. The sole jurisdiction of our Committee on Government Operations is to investigtae the efficiency and economy of Federal Agencies. Yet, it is regrettable that sometimes the greatest enemies of the individual's right to privacy are efficiency and economy—the achievement of short range success of missions with little attention to long range impacts.

In order to be effective, the struggle to preserve human values in a world of skyrocketing automation and technology must be freed from its contradictory role within the Government Operations Committee. Frankly, I can think of few legislative reforms which would be more important both to the House of Representatives and to the American people.

For when we talk about privacy, we really discuss a whole series of shared values and traditions which have made the American dream a reality for the vast majority of our citizens. We are talking about what is unique in the American experience and what has vitalized the American experiment—that is our supreme value on human life, on the individual and on affording the individual an ideal blend of freedom, opportunity and security.

I want to conclude this afternoon with several direct appeals to each member of my audience. First, make sure that your own information systems respect the security of the data and protect the privacy of those whose data make up your systems. You can help us implement a modern interpretation of the Fourth Amendment's guarantees if your own organizations allow the individual to have access to his own records and if you deny access to those who can illegally harm the individual.

Second, I want to ask you to write to your own Congressman and ask him to support H. Res. 717, to establish a Select Committee on Technology, Human Values, and Democratic Institutions. As we enter the twilight of the 20th Century we may very well be entering the blackness of totalitarianism unless we establish a formal mechanism to turn back the tide of unevaluated technologies.

In my judgment, it would be especially influential for those of you who are professional in the computer business to offer your support for a Select Committee. Not only would your words carry special weight because of your knowledge and expertise, but I believe that it would be in your own best interests. All around us we see computer rooms and computer complexes being attacked as a tool of repression. I hardly need to point out the number of colleges which have seen the computer taken hostage and the work of years of research destroyed. The computer industry is going to have to assert its informed conscience and its moral leadership. Yours is the fastest growing industry in the world and to protect the environment of that growth, it is essential that you support sound suggestions at the local, State and National levels. You must help us in Congress to insure that the beneficial applications of your trade are permitted to flourish, while those which threaten to stifle the freedom and innovation which fostered your industry will be firmly leashed. We are past the time when any industry can operate in a vacuum, particularly an industry which is as future-oriented as yours.

We in the Congress need your help to assess particular problems presented by information handling and we need your help to establish an atmosphere of trust in which we may go forward together to assure the freedom, which has allowed us to prosper, will be the birthright of our children. I hope you will join with us or else I am deeply afraid that it will be our common destiny to be folded, mutilated, and spindled by events we let slip from our grasp.

---

## A CALL FOR REASON—AMERICA IN PERIL

### HON. WILLIAM H. AYRES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. AYRES. Mr. Speaker, for many years those in Government and I do include our Presidents, have turned to the weekly column of John S. Knight for guidance on national and international affairs.

The veteran publisher of the Knight newspaper chain has the faculty of evaluating our Nation's problems and then presenting constructive solutions.

I believe that his column of September 13 is of such importance that it should be read by all of my colleagues.

The column follows:

A CALL FOR REASON—AMERICA IN PERIL

(By John S. Knight)

What has happened to America?

Why, in our madness, do we turn to riots and destruction, to contempt for revered institutions which made the American dream possible, to nostrums instead of cures for our economic ills, to sleazy, cheap political devices rather than exercising at least a modicum of statesmanship?

Are we indeed a part of the world revolution which seeks only to destroy while parading under the banners of democracy, Marxist style?

Why are Americans, who enjoy greater freedoms under our Constitution than are permitted anywhere else in the world, berating "the system" which makes these precious liberties possible?

How long must we permit a small band of revolutionaries to disrupt our colleges and universities, to bomb government research centers, kill innocent people and ruin the careers of devoted scientists?

What kind of a country do we live in where the flouting of law has become a national pastime, where a law officer automatically becomes a "pig," an object of derision and attack by an untutored, undisciplined and unprincipled rabble?

Where indeed, are our leaders, the parents of our youth, the educators and the great body of law abiding, responsible citizens?

Are the leaders too politically oriented, too concerned with their personal ambitions to stand up and be counted?

Have the educators become so supine, so dependent upon government grants or so cowardly that they stand meekly by while their institutions of learning are defiled and brought to heel by roving bands of professional anarchists?

Must we yield to the sophistry that the right of dissent—as stated so forthrightly in Article I of the Bill of Rights—can be taken as license by those willful violators of the law who cannot distinguish between dissent and disobedience?

Ironically, the destroyers who abuse our Constitutional liberties would find themselves prisoners of the Marxist police state of the authoritarian world to which they give such frenetic devotion.

The greatest of all government documents—the United States Constitution—provides ample safeguards against tyranny and injustice.

Yet the Center for the Study of Democratic Institutions has drafted a new constitution for the United States that would concentrate all authority in the national government, strengthen the Presidency, weaken the national judiciary and create new branches of government to oversee planning, elections and economic regulations.

Dr. Rexford G. Tugwell, 79-year-old former member of Franklin D. Roosevelt's "brain trust" and author of the document, observes that cherished traditions and institutions which no longer serve the needs of modern society must be pulled down as "impediments to progress."

Along with the Black Panthers, who have also put together a new constitution, Dr. Tugwell typifies the fuzzy and radical left who would tear apart our system of government while offering the absolute authority of statism in its place.

These are the true revolutionaries—along with socialists in the teaching profession—who are more to be feared than college youths expressing their frustrations on the campus.

Yes, our young people are being taught that there is something inherently evil about the capitalistic system, that its rewards for the industrious and thrifty segments of our society are unfair, that a "people's capitalism" would somehow solve all of our problems.

Why is it, Americans, that we of the world's most affluent society now wish to embrace the fatuous economic doctrines which have failed so miserably wherever they have been tried?

Are we like the lemmings who migrate at intervals to their own destruction?

Where were our statesmen when Congress fueled the fires of inflation by passing a "tax reform measure" which insured a huge deficit?

Can you tell us, please, why such responsible Negro leaders as Whitney Young and Roy Wilkins constantly criticize the total community for the excesses of young blacks while making no substantial contribution of their own in the direction of restraint?

Does it bug you that elementary school teachers once dedicated to character building are now setting a sorry example for our youth with their union-directed strikes on the eve of a new school year?

Or that labor's power monopoly is able to cripple the economy by making a farce of collective bargaining?

Can these distortions of an orderly society be attributed solely to the war in Indochina? Or is the current unrest symptomatic of a world society in revolution?

Whatever the cause, this is a time for the rededication of all Americans to the proposition, as stated in the preamble of the Constitution, that this nation was conceived to "form a more perfect union, establish justice, insure domestic tranquility, provide for

the common defense, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity."

These were the wise and profound thoughts of our Founding Fathers.

That we have strayed so far from the paths of righteousness is a serious indictment of the weaknesses of man who in the almost 200 years of our Republic now finds himself for the first time seemingly incapable of constructive self-government.

For our enemies within would destroy the Union make a mockery of justice, insure domestic anarchy, gut the national defense, disregard the general welfare and repress the blessings of liberty.

This is what is happening to America, known in happier days as the land of the free and the home of the brave.

## LEGISLATIVE REORGANIZATION ACT OF 1970

### HON. JAMES W. SYMINGTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. SYMINGTON. Mr. Speaker, what the House has done in passing the Legislative Reorganization Act of 1970 is to realize that—at least in this case—reform, even more than charity must begin at home. It is incredible, but true, that for the first time in 25 years we have examined our own consciences and come to the conclusion that it was time to take action to make the Congress a more responsive body.

It is time that we achieved this realization. Citizens have frequently leveled the justifiable criticism that Congress, and particularly the House of Representatives, is an anachronism—that it does not serve, and indeed often defies, the wishes of the people supposedly represented. The desire to achieve a more responsive Congress is in the best American tradition.

The framers of the Constitution, in providing for a two-house legislature, consciously chose to make the House of Representatives the more directly responsible to the people. Thus, Members of the House have always been elected directly, and have stood for reelection more frequently to insure a more accurate reflection of the voters' wishes. Unfortunately, however, the House has too often failed to live up to this intent because tradition-bound procedures within the House actually operate to frustrate it.

Recognizing the disparity between theory and practice, the House acted decisively in 1910 to limit the power of Speaker Joe Cannon. At that time the objective was to take arbitrary control from the Speaker and disperse the power to the committees and the whole House, and ultimately to respond to the Nation's demand for widespread progressive change.

But now many of these earlier structures have become objects of criticism and attempts at reform. They developed in a less complex age when Congress was a smaller body, dealing with simpler issues; before modern communications allowed the public immediate access to official decisions. With time and different circumstances, the needs of Congress and the Nation have changed. Institutions must be adapted accordingly.

My constituents in Missouri's Second District have traditionally been interested supporters of reform and for that reason I introduced in July 1969 a bill very similar to the one which passed the House. We should feel heartened by the action taken here today—and proud that our efforts have produced results.

Not only the relevance but also the credibility of the current congressional structure have been called into question. There is indeed something of a contradiction when those of us in political life call upon young people and others to take the responsibility for and accept the consequences of their actions, while we in Congress too often transact our business hidden beyond a cloak of anonymity. It is not remarkable then that the most fundamental issue dealt with in the Legislative Reorganization Act of 1970 is the matter of secrecy within the House.

We have attacked secrecy on three fronts in this legislation: in the standing committees, in the Committee of the Whole, and in the attempt to make more information available to the Members.

Such a large proportion of the House's significant action takes place in committee that it is incumbent upon us to make serious efforts to achieve greater public accountability at that level. The provision in the bill which requires the recording of names and numbers on record committee votes is a step toward this end. Likewise, larger investigatory staffs for minority committee members and a longer time for minority Members to file supplementary views will work to make the committees more representative.

It would be a great step toward an open House if the bulk of committee meetings were open to the press and the public. Unfortunately, the provision of the bill which allows a committee to vote at the beginning of a Congress to close all their meetings will probably perpetuate the current practice of several influential committees who hold all but the most innocuous of their sessions behind closed doors. This practice not only thwarts the public's accessibility to vital information, it also effectively prevents Members of Congress themselves from knowing what occurred during the committees' debates. The provision to allow radio and television coverage of some committee hearings will increase public understanding of committee procedure providing the media are allowed to cover sessions of some significance.

As Representative SCHWENGEL described, we escalated our attack on secrecy from the committees to the Committee of the Whole. On July 27, the House passed an amendment which I cosponsored, aimed at one of the most flagrant manifestations of secrecy—the unrecorded teller vote. Although the members of the British Parliament were fully justified in instituting this procedure to protect themselves from reprisals from the Stuart monarch, it has long outlived its usefulness. The British Parliament ended the practice of unrecorded teller votes in 1832. We were only 138 years behind.

Hopefully, this amendment will accomplish a twofold purpose. It will first of all make Representatives more accountable to their constituents for their votes on crucial matters. In addition, the knowledge that voters will be aware of their votes should encourage Members to be present and participate on the House floor with greater regularity.

The volume of information with which a Congressman must deal if he hopes to be an effective legislator is tremendous. In addition to the provision increasing the size of committee staffs, I welcome the other moves to provide greater access to information. Making the Legislative Reference Service a more comprehensive Congressional Research Service, increasing the budgetary information required from executive departments, and developing an automatic data processing system will assist all of us in making more intelligent legislative decisions.

Reform in the Congress is long overdue, and with the passage of this act we cannot sit back and congratulate ourselves on our accomplishment. Much remains to be done and reform to be truly meaningful must be an ongoing process. Other institutional practices need updating, and some must be discarded entirely. We must also continue to search for new and more appropriate mechanisms to aid in our legislative efforts. In the meantime, the 91st Congress should be remembered for its contribution to an open House policy.

## WBBM EDITORIAL

### HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. DERWINSKI. Mr. Speaker, Christmas will soon be upon us and one of the organizations which deserves support is the USO with its program to serve GI's scattered throughout the globe. A very timely editorial carried over WBBM Radio—Chicago—urged Chicago area listeners to support the USO.

The editorial follows:

USO

WBBM has for some time been running public service announcements urging support of the USO, which works to ease the loneliness of GIs in Vietnam and other posts far from the comforts of home.

I'm sure you've heard these announcements by people such as Bob Hope, and also seen television spots and print ads urging donations to the USO. But it seems a lot of people are now taking the USO for granted, and others unfortunately feel that assisting the USO is tantamount to endorsing the American Involvement in Southeast Asia.

According to one official, the Christmas Gift program in Vietnam was 30 to 40 per cent off the level of previous years. Homefront participating in the Vietnam pen pal program is off by about 40 per cent. And fewer show business stars are touring Vietnam to provide entertainment and boost morale.

The American GI doesn't make foreign or military policy. He has been assigned to Viet-

nam, to a difficult job, and he needs help. Whether we support the war or not, we have an obligation to assist the GI who is in Vietnam. It's not the place he would prefer to be.

A lot of people these days look at the radicals and then say how proud they are of the GIs willingly doing their duty in Vietnam. It's time we did our duty. It's time we assisted the USO in making life better for a kid under fire halfway around the world.

It has nothing to do with politics. It's a matter of compassion.

## FAIR TRADE

## HON. WM. JENNINGS BRYAN DORN

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. DORN. Mr. Speaker, the textile industry asks only for fairness and equity, not for protection. The Honorable R. Cooper White, Jr., mayor of Greenville, S.C., the "textile center of the world," in a recent letter to the editor of the Greenville News made this point crystal clear.

The Mills Trade Act of 1970 promotes fair trade and should be passed without further delay. I commend to the attention of Congress and to the American people the Honorable R. Cooper White's splendid and timely letter.

[From the Greenville (S.C.) News, Sept. 13, 1970]

TEX INDUSTRY ASKS FAIR TRADE

In his letter of September 1, 1970 entitled, "Protectionism In Trade Scored" Mr. R. M. Pope Jr. of Clemson seems to feel that the textile industry, in their endeavor to seek restraints on textile imports, is returning to the protectionism of the '30's. I can in no way agree with Mr. Pope.

As mayor of "The Textile Center of the World" I have obtained answers to the questions he raised and feel as if, with help from many people, I can shed a different view. The people of this area need to know the theory of free trade and the facts as they exist today.

The fact is that what the textile industry is seeking is fair trade; there is no such thing as free trade in the world today. Actually our nation is, as has been said by Secretary of Commerce Stans, "the only virtually free market in the world". Other nations have raised a multitude of non-tariff barriers to American goods as for example, Japan, the biggest textile importer to the United States has 98 import quotas against our commodities and 16 other types of restrictions including custom practices, financing arrangements, etc.

As for our textile industry, they have not sought to shut off the flow of foreign textile imports but rather to slow the rate of growth. They are asking through a bill now before Congress that this growth rate be 5 per cent per year while still permitting foreign textiles to come in at a very high level. The important growth rate in the past few years has been beyond belief. For instance, wool imports now account for one out of every four yards of goods sold in the United States. Man-made fiber imports of textiles and apparel doubled between 1963 and 1965, doubled again from 1965 to 1967 and doubled again to 1.8 billion square yards in 1969. With such rapid growth as this the domestic industry cannot plan intelligently its own investments in production, new plants and equipment, research or jobs. With a reasonable predictable rate of growth the textile industry will know where it stands.

Further, regarding the trade bill, assurance of continued availability of foreign textiles is built into several provisions. The President is given authority to exempt any textile product if he deems this in the national interest, if the product does not threaten disruption of our market, or if supplies are inadequate. Any nations which negotiate voluntary agreements with the United States—either now or after passage—are exempt from the bill's restrictions. The net effect of all this will be to assure a continuing flow of foreign textiles generally available in the quantities and at the prices now prevailing.

The restraints suggested do not call for taxes but again only restraints on growth. Mr. Pope need have no fear that he will have to choose between a $6 American shirt or a $2 foreign shirt carrying a $5 tax. He will still be able to buy his $2 foreign shirt—if he wants it—for $2.

Also, if history is any criteria, Mr. Pope should know when he speaks of "inflationary forces" that our textile industry is the most inflation-proof in the country. This is a fact that any one can check and by checking it will be found that textile prices on the wholesale index have risen only 1 per cent since the inception of the index in 1957-59. By contrast, all commodities have jumped 17 per cent.

I feel that with over 700 companies competing bitterly for the sale of every yard of goods that textiles need no additional pressures to keep prices low.

There are many basic and compelling reasons why our government should put some restraint on the growth of textile imports. I would recite some of these, not just because the textile business is so very vital to our area but I feel that as an American first, a South Carolinian second, and a Greenvillian third, this is in the best interest of all and in the order in which I have mentioned.

These imports are destroying American jobs; some 300,000 in the last five years, 87,000 in the last year alone. People without jobs cannot buy anything or pay taxes, but more importantly they cannot enjoy the finer things of life that every American has the right to expect. The textile-apparel complex is one of the nation's largest employers. 2.4 million people, plus another million in cotton, wool, man-made fibers and machinery depend upon it directly for their livelihood. Another important factor to me is that minority employment in textiles is 14 per cent and in apparel 13.5 per cent which is considerably higher than the 10 per cent average for all manufacturing.

Our nation's balance of payments is in a serious deficit condition and the importation of textiles is the biggest contributor to this situation. To set the record straight, Mr. Pope should know, contrary to his letter, that American Industry does not sell more goods to Japan than Japan sells to America. In 1969 Japan exported $4.9 billion in goods to the United States while we sold $3.5 billion to her. The difference is $1.4 billion—in Japan's favor.

R. COOPER WHITE, Jr.,
*Mayor of Greenville.*

## FRAMEWORKS OF FREEDOM

## HON. DEL CLAWSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. DEL CLAWSON. Mr. Speaker, the lead editorial in the current Kiwanis magazine is of such quality of thought and on a topic of such wide general interest at this point in our national history that I would like to commend it to the attention of my colleagues in the House of Representatives. The author is a fellow Kiwanian and Californian, Herb Klein. The editorial entitled "Frameworks of Freedom" follows:

FRAMEWORKS OF FREEDOM

(By Herbert G. Klein)

The United States will soon celebrate its 200th anniversary, marking a history which has brought greatness and high responsibility to a nation.

The Constitution which has served the nation so well has been challenged often. It is challenged today. But as we mark Constitution Week, we do so in the knowledge that it stands as a strong framework of freedom.

It is true that today, some of those who cling closest to its provisions of freedom, try hardest to destroy it. A strong nation and a strong people, who recognize such enemies of liberty for what they are, will survive such attack without endangering their constitution or the rights it offers.

The United States Constitution is now 183 years old and the equally strong Canadian Constitution was born 80 years later—July 1, 1867. Both have served remarkably well.

If one sees the current play "1776" (incidentally, it recently was presented at the White House) one regains the sense that Constitutions, like other documents, were written by individuals with both human failings and extraordinary strength and vision.

There are wide differences between the United States Constitution, which is in legal theory at least contained in one instrument with later amendments, and the Canadian Constitution, which consists of the several British North America Acts and also includes unwritten conventions and historical usages.

Different as the Constitutions of these two great nations are, they share with that of their common mother country the common purpose of assuring the right of the majority to rule, the right of the minority to be heard, and the safeguarding of the rights of individual citizens as against the claims of the state.

Standing above the contention of rival political parties and differing governmental philosophies, the constitutions establish a structure of government designed to outlast the tenure in office of any political party or philosophical creed.

In these times, during which nations throughout the world have seen a sharp increase in civil turmoil and acerbic protest, it is worth harking back to fundamental constitutional provisions in order that we may not lose sight of the ground rules which they establish.

Under constitutional systems such as these, the majority, within limits, is given the right to govern; the minority is given the right to freely criticize, and to be afforded regular opportunities to persuade a citizen electorate that the reins of government should be turned over to it.

Reminders to the majority of its covenant to respect the minority's right to dissent, to criticize, and to seek to become the majority are commonplace. They should not for that reason be thought trite. Less commonplace, but fully as important, is the reciprocal covenant which minorities must be regarded as making with the majority under any constitutional system. The minority covenants to obey any enactment of the majority which is the "law of the land"—an enactment regularly passed and consistent with the provisions of the constitution.

Only if the majority keeps its covenant with the minority to both permit dissent and to afford a regular opportunity to challenge its electoral mandate, can there be guaranteed the freedom of expression and popularly representative government which have so long been prized by both of these

great nations. Only if the minority keeps its covenant to obey the laws enacted by the majority can there be civil order, a condition every bit as indispensable to constitutional government as is freedom of expression.

The great virtue of the Constitutions of our two great North American nations is that, greatly differing as they do in specific provision, each provides the machinery for a system of government which tolerably balances the claims of freedom and order. Freedom without order is anarchy; order without freedom is tyranny. Order with freedom—freedom with order—is the hallmark of constitutionalism.

## MEANY'S ATTITUDE ENCOURAGING

### HON. BURT L. TALCOTT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. TALCOTT. Mr. Speaker, we must eliminate the strike and lockout as outmoded and barbaric techniques for settling labor-management disputes.

If a strike or lockout involved only the disputants perhaps it could be tolerated.

But a strike or lockout that wastes resources or products, that injures or penalizes innocent third parties, that bankrupts employers, that cripples and wrongs the employees and their helpless families should not be tolerated in a civilized society whose woof ought to be good will and whose warp ought to be justice and order under law.

Mutual cooperation is necessary. Good will between employer and employee must be expanded. Coercion is detrimental to everyone. Work stoppages cause injury and losses to both sides. After the strike has wreaked its damage, there still must be negotiation. So why not negotiate and arbitrate first and avoid the losses.

This no-strike concept has been long recommended by the independent scholars and experts in the field of labor-management relations. But few oldtime labor leaders have had the courage or foresight to seriously advocate the concept.

For too long, the new groping insecure labor leaders have insisted and preached that the strike, with all the strife of picketing, intimidation and threats of violence, was their ultimate weapon. Untrue; a false shibboleth.

Labor is making, and can expect in the future to achieve greater advances through negotiation than by striking.

George Meany is the patriarch, the seer, of the labor movement. None can dispute his sincere and aggressive commitment to the betterment of the workingman. Mr. Meany's developing attitude toward arbitration is encouraging. He is demonstrating great foresight and breaking ground for important advancement in labor-management relations.

Clayton Fritchey, an astute columnist writing in the Washington Evening Star, grasps this breakthrough in the difficult, rough-and-tumble business of labor-management relations. His column of September 21, 1970, should be read and contemplated by all Members who are interested in bringing labor-management relations into a new era for the benefit of all involved.

I include Mr. Fritchey's column at this place in the RECORD:

MEANY'S ATTITUDE ON ARBITRATION ENCOURAGING

(By Clayton Fritchey)

With General Motors struck by the United Auto Workers, the railroad unions also ready to go out, and organized teachers closing many schools around the country, this may be a good moment to pause for a brief announcment from George Meany, president of the AFL–CIO.

It's not easy these days to get Meany off his pet current hates—Viletnam doves, student rebels, and Democratic "extremists"—but when he does get back to what he knows the most about (labor-management relations) he is surprisingly open-minded.

In a pre-Labor Day session with the press, for instance, he had the courage to talk openly and hopefully about a fromula which, if adopted, would have prevented the present big strikes by resolving them through peaceful, orderly means, in short, by binding arbitration.

For many decades, opposition to the arbitration process (like opposition to wage and price controls) has been as dogmatic with labor as it has been with management. Meany is the first national labor leader to show any flexibility on either issue—and he is now flexible on both.

This is certainly an advanced and controversial position for the head of the AFL–CIO to take. But Meany, now 76, is so secure in his position that he is virtually immune to serious challenge by other union leaders. Even before Lyndon Johnson retired as president, Meany was so alert to the danger of inflation that he began hinting labor would accept economic controls if employers would.

Meany's Labor Day political opinions made so many headlines that his strike views got little or no attention. And yet, he said that some of his federation's "real solid unions," including the United Steel Workers, were thinking about voluntary arbitration in contract disputes. In fact, the federation has already agreed to establish a committee to meet with the American Arbitration Association to explore the idea.

"Actually," Meany says, "what it adds up to is that while strikes have their part and all that, we certainly have advocated for years that you have got to have the right to strike, we find more and more that strikes really don't settle a thing. Where you have a well established industry and a well established union, you are getting more and more to the point where a strike doesn't make sense."

The head of the AFL–CIO has chosen a propitious moment to launch this trial balloon, if that is what it is, for the Nixon administration, which has been unexpectedly benign toward labor, has also been showing some interest in the idea.

The previous administration promised to draft and send to Congress legislation "which will enable us to deal with strikes which threaten irreparable damage to the national interest," but it never did. The issue was too touchy. It is all the more remarkable, therefore, that Nixon earlier this year did walk in where Johnson feared to tread.

Nixon's bill would bring the railroad, airline, maritime, longshore, and trucking industries under the same rule. To prevent strikes, the bill, as a last resort calls for a form of arbitration under which the President could give the rival parties three days to submit one or two final offers. Then, if there is no agreement, the parties, or the President, would name a "selector committee" to decide which of the final offers would become binding on both sides.

Unfortunately, there has been very little administration follow-up, so there has been no action on Capitol Hill, where the lawmakers are notoriously wary of new labor legislation. Their timidity may be tempered by the Meany statement, but there also needs to be a show of interest on the part of management.

Actualy, there is more management support for arbitration than is generally surmised, and it is growing. Many business leaders now share the view of John H. Kauffmann, president of The Star, who recently told the Economic Forum that arbitration "would benefit management and labor and the public at large." For the practicality of this solution, he said, "we need only look to Sweden where for 31 years newspaper labor and management have had an arbitration agreement which works."

## ARMS FOR THE GREEK COLONELS

### HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. EDWARDS of California. Mr. Speaker, in spite of the embargo placed on arms shipments to Greece, the repressive military regime in Athens manages to maintain its weapons stockpile through the generosity of the United States. The following editorial from the September 22 issue of the New York Times is, I believe, a frank and timely indictment of U.S. support for the Greek junta:

ARMS FOR THE GREEK COLONELS

Ambivalence and timidity have marked American policy toward Greece's military rulers since their seizure of power in April 1967. The decision to resume full-scale arms shipments to the Athens regime symbolizes the bankruptcy of that policy.

The timing of the decision doubtless owes much to the Middle East crisis and the need that might arise for emergency American use of Greek naval and air bases. Such Mediterranean facilities have become steadily less available with the rise of nationalism in many lands and a lessening of cold-war tensions.

It made little sense at the outset to embargo shipments to Greece of the heavy weapons, artillery, ships and planes is supposedly needed to carry out assigned NATO functions, while continuing to send the small arms, jeeps and other equipment the colonels could use to enforce repression at home. In any event, over the last three years the Pentagon has breached the spirit of the embargo by sending $162 million worth of arms to Greece.

Whatever the wisdom or demerits of the embargo, to lift it at this time represents success for diplomatic blackmail long practiced by Colonel Papadopoulos and his agents. Their argument—that the United States needs Greece more than Greece needs this country—is accepted by Americans who should know better.

While giving the colonels a badly needed prestige boost, the decision leaves the United States more of an odd-man-out than ever with its European partners, some of whom led the fight to oust Greece from the Council of Europe and to condemn the Athens regime for its systematic use of torture on political prisoners.

Concern for adequate air and naval facilities is understandable in this time of expanding Russian naval presence in the Medi-

terranean and outright Soviet military involvement in Egypt. But the Pentagon always seems unable or unwilling to find alternatives that would save the United States the embarrassment of bolstering a repressive regime in the avowed interest of defending freedom.

## POW IS NO CLOSER TO HUMANE TREATMENT

### HON. JOHN M. ZWACH

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. ZWACH. Mr. Speaker, on September 17, 1969, I joined with a number of my colleagues in sponsoring House Concurrent Resolution 362, which called upon North Vietnam and the National Liberation Front of South Vietnam to comply with the requirements of the Geneva Convention relative to the treatment of prisoners of war.

These provisions, which North Vietnam signed in 1957, include making public the identification of prisoners, free exchange of mail between prisoners and families, impartial inspection of prisoner camps, and release of seriously ill or injured prisoners.

A year has passed since that resolution was introduced but we are no closer to humane treatment of our prisoners now than we were then.

My heart bleeds for these men, for their families, and their wives and sweethearts.

Picture the plight of the wife or sweetheart whose husband or fiance has been missing for years. Is he dead or alive? Should she start to rebuild her shattered life or should she continue to wait?

Never before has America been treated so contemptuously. Never before have the tenets of civilization been so completely ignored.

We have waited in vain for Hanoi to warm to our suggestion for humane treatment of these prisoners.

We have pursued the philosophy that an outpouring of indignation by our citizens would move Hanoi to soften its policies, but the only outpouring of indignation that we had was directed at political prisons in South Vietnam.

Mr. Speaker, I believe that the United States should take whatever steps now considered necessary to obtain information on these prisoners of war and to convince Hanoi of the necessity to treat them in a civilized manner.

## JUDICIAL INTERPRETATION OF EQUAL EMPLOYMENT

### HON. JOHN R. RARICK

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. RARICK. Mr. Speaker, in Louisiana we now have a judicial interpretation by a Federal judge of equal employment opportunity in State jobs.

"Blacks to fill all vacancies."

Mr. Speaker, I include a newsclipping from the August 26 Times Picayune of New Orleans, as follows:

BLACKS TO FILL ALL VACANCIES—JUDGE SETS REFORM SCHOOL HIRING GUIDELINES

Federal Judge Alvin B. Rubin Tuesday ordered that any staff vacancies occurring in the state's three main reform schools must be filled by Negroes.

In addition, he approved a plan presented by the Department of Corrections which would give special placement to boys tested at a new diagnostic center, for which the 1970 Legislature allocated funds.

After testing at the center, and rated according to mental and physical age, the lowest and highest would be sent to the Louisiana Training Institute in Monroe, with those in the middle bracket remaining in Scotlandville. Girls below 15 years of age would be placed in the LTI in Pineville and others will be located in Scotlandville.

Judge Rubin stressed that staffing of the diagnostic center must be done on an equal racial balance, and he ordered that the administration of the schools follow guidelines which he established for equalizing staffs in regard to Negro and white personnel. His quotas for the various departments called for virtually 50–50 ratio of blacks to white.

"I am aware of the employment problem, however," Judge Rubin said. "And I am not requiring that persons be hired who are incompetent. Rather, in order to achieve a racial balance, I am saying that it may be necessary to hire the second best. Nevertheless, if it seems impossible to fill vacancies for this purpose, I will consider other suggestions. Any deviation from the guidelines, however, must be done by court consent."

The judge said he believes the action will create motivations to seek out personnel from minority groups.

# SENATE—*Thursday, September 24, 1970*

The Senate met at 12 noon and was called to order by the President pro tempore (Mr. RUSSELL).

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Eternal God, Lord of this world and the worlds beyond, we pray for Thy whole creation. Order unruly powers, crush every tyranny, rebuke injustice, and satisfy the longing peoples. Send peace on earth, and by Thy grace put down the pride, greed, and anger that turn man against man and nation against nation.

O Thou whom we cannot love unless we love our brother, remove from us and from all men all hate and prejudice, that Thy children may be reconciled with those whom they fear, resent, or threaten, and thereafter live in peace.

Regard Thy servants in this Chamber, O Lord. Direct them in all their efforts by Thy most gracious favor, and strengthen them with Thy continual help, that in all their works begun, continued, and ended in Thee, they may glorify Thy holy name, and finally by Thy mercy obtain everlasting life.

In the Redeemer's name. Amen.

## MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States submitting nominations were communicated to the Senate by Mr. Leonard, one of his secretaries.

## EXECUTIVE MESSAGES REFERRED

As in executive session, the President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations received today, see the end of Senate proceedings.)

## MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Berry, one of its reading clerks, announced that the House had agreed to the amendment of the Senate to House Joint Resolution 589, expressing the support of the Congress, and urging the support of Federal departments and agencies as well as other persons and organizations, both public and private, for the international biological program.

## ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

The message also announced that the Speaker had affixed his signature to the following enrolled bills and joint resolutions:

S. 3637. An act to revise the provisions of the Communications Act of 1934 which relate to political broadcasting;

H.R. 11953. An act to amend section 205 of the act of September 21, 1944 (58 Stat. 736), as amended;

H.R. 18127. An act making appropriations for public works for water, pollution control, and power development, including the Corps of Engineers—Civil, the Panama Canal, the Federal Water Quality Administration, the Bureau of Reclamation, power agencies of the Department of the Interior, the Tennessee Valley Authority, the Atomic Energy Commission, and related independent agencies and commissions for the fiscal year ending June 30, 1971, and for other purposes;

S.J. Res. 218. Joint resolution providing for the designation of a "Day of Bread" and "Harvest Festival Week";

S.J. Res. 228. Joint resolution to authorize the President to designate the period beginning October 5, 1970, and ending October 9, 1970, as "National PTA Week";

H.J. Res. 589. Joint resolution expressing the support of the Congress, and urging the support of Federal departments and agencies as well as other persons and organizations, both public and private, for the international biological program; and

H.J. Res. 1178. Joint resolution authorizing the President to proclaim the month of October 1970 as "Project Concern Month."

## THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Wednesday, September 23, 1970, be dispensed with.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## FIXING A TIME FOR COMMITTEE TO FILE A REPORT

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Committee on Foreign Relations have until midnight tonight to file its report on H.R. 18306, to authorize U.S. participation in increases in the resources of certain international financial institutions, to provide for an annual audit of the exchange stabilization fund by the General Accounting Office, and for other purposes, together with individual and minority views.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## COMMITTEE MEETINGS DURING SENATE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Committee on Labor and Public Welfare; the Subcommittee on Small Business of the Banking and Currency Committee; the Subcommittee on Parks and Recreation of the Committee on Interior and Insular Affairs; and the Committee on Public Works be authorized to meet during the session of the Senate today.

Mr. SCOTT. Mr. President, there is no objection on the minority side.

The PRESIDING OFFICER. Without objection——

Mr. BAYH. Mr. President——

The PRESIDING OFFICER. The Senator from Indiana.

Mr. BAYH. Mr. President, reserving the right to object, the Senator from Indiana is reluctant to impose an objection on his colleagues, but I think the RECORD of yesterday will show the reasons for doing so.

I notice that this is the first time there has not been an objection proposed by our friends on the minority side relative to one particular committee that has been meeting for some time, but I do object, Mr. President, without any further explanation, but with all apologies to my colleagues for the inconvenience.

The PRESIDENT pro tempore. Objection is heard. The Senator has that right as a Member of the Senate.

## ORDER FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that there be a period for the transaction of routine morning business, with a time limitation of 3 minutes therein.

Mr. BAYH. Mr. President——

The PRESIDENT pro tempore. The Senator from Indiana.

Mr. BYRD of West Virginia. Mr. President, reserving the right to object——

The PRESIDENT pro tempore. The Senator from Indiana has been recognized.

Mr. BAYH. Reserving the right to object, would the majority leader state his request one more time?

Mr. MANSFIELD. Yes. I understand this was agreed to on yesterday.

Mr. President, I ask unanimous consent—and this is the usual procedure allowed under any and all circumstances—that there be a period for the transaction of routine morning business, with a time limitation of 3 minutes therein.

The PRESIDENT pro tempore. Is there objection?

Mr. BAYH. Mr. President, the Senator from Indiana does not care to object. The Senator from Indiana would not have objected yesterday. This is normal courtesy to the Senate.

Mr. MANSFIELD. I appreciate the remarks of the distinguished Senator from Indiana.

The PRESIDENT pro tempore. Is there objection to the Senator from Montana? The Chair hears none, and it is so ordered.

## ORDER OF BUSINESS

The PRESIDENT pro tempore. Under the order of yesterday, the distinguished Senator from New York (Mr. JAVITS) is now recognized for 5 minutes.

Mr. MANSFIELD. Mr. President, to clear the RECORD——

The PRESIDENT pro tempore. Does the Senator from New York yield to the Senator from Montana?

Mr. JAVITS. Well, Mr. President, I have exactly 5 minutes.

Mr. MANSFIELD. Will the Senator yield to me, without losing any of his time, of course?

Mr. JAVITS. I yield.

Mr. MANSFIELD. I want to clear the RECORD by stating that at the conclusion of the remarks of the Senator from New York the period for the transaction of routine morning business will begin.

The PRESIDENT pro tempore. The Senator from Montana is correct.

The Senator from New York is recognized.

## THE TRADE BILL

Mr. JAVITS. Mr. President, 1 month ago, I spoke on the Senate floor on the trade bill which had been reported out of the House Ways and Means Committee. This bill is now pending before the House Rules Committee, and Senator HOLLINGS in his press conference of last Friday indicated that he would introduce it as an amendment to both the social security bill and the family assistance plan. I cannot support this parliamentary maneuver and regret that special interest legislation such as the trade bill might be attached to domestic legislation of overridding concern to millions and millions of Americans.

In my statement of 1 month ago I specifically analyzed various provisions of the bill. Today I would like to explain in greater detail why this legislation is anticonsumer and also why it represents a reversal of the trade policy the United States has followed since the end of the war.

The legislation that has been reported out of the Ways and Means Committee of the House of Representatives is out and out quota legislation which will immediately limit the entry of five categories of products including textiles and shoes into the United States.

In addition, the general purpose quota triggering device contained in section 301(5)(a) of the bill could lead to quota restrictions on dozens of products ranging a wide spectrum from automobiles to wigs. By limiting the entry of these products into the United States without regard to internationally accepted injury criteria, the supply-demand equation for these products will be altered. It is widely accepted that changes in the supply-demand equation for any product lead to price changes and supply limitations almost inevitably result in price increases. This is not in the interest of the consumer or in the interest of our Nation in terms of curbing the inflationary spiral.

In addition to the price increases which can result from rigid import quotas, the consumer is also denied the flexibility of choice. Quotas, by insuring that fewer competing products will be available, distort normal marketing patterns. Foreign industries exporting to the United States under a quota limitation will seek to maximize their profits within the limited market range, available to them. Production shifts toward higher priced products are often a result.

For example, my office has now received a barrage of letters asking for an import limitation on speciality steels. This problem arose very suddenly after "voluntary" steel export quotas were agreed to by the European Common Market and Japan. These exporting countries shifted their production into these higher priced lines of steel in order to maximize profits. This case also indicates how quotas can disrupt normal marketing patterns and inadvertently injure other sectors of the industry. It also is indicative of the fact that the imposition of quotas leads to demands for more quotas.

In previous statements I have made on the trade bill, I spelled out in detail the effect on prices import quotas have had on two items of direct interest to the consumer—oil and meat—the facts clearly indicate that quota controls on these two items have materially contributed to higher prices for consumers.

The trade bill, as reported out of the House Ways and Means Committee, does violence to one of the key principles of the international trading world, namely the most-favored-nation clause. Under the rules of the GATT, nations have been enjoined to accord other free nations the same treatment in trade. For example, the United States cannot accord West German automobile imports different tariff treatment than French or Japanese automobile imports. In turn, in negotiations tariff concessions granted by one country to another must also be granted to all other trading partners in the free world. Since the end of the war then, international trade negotiations generally have been nondiscriminatory and multilateral. But, the trade bill now before the Congress would turn the clock back to bilateral, discriminatory negotiations; it contains a clause which gives the President the power to exempt certain countries from specific quotas where he deems such an exemption is in the national interest. This provision shapes up as a potential nightmare for the State Department and augurs a new era for our economic policy.

For example, it has been reported that during the Spanish military bases negotiations, the question of an exemption for Spain's shoe exports to the United States was on the negotiating table. It has also been reported that Latin American nations have been promised an exemption from some of the quota provisions in the bill.

This national interest exemption provision opens endless possibilities of bilateral pressure. Under this clause, country after country would feel obliged to lobby bilaterally with the United States for exemptions. This would put a premium on the type of questionable lobbying practice which came to characterize the granting of quotas under our sugar import policies in years past. The diplomatic mischief could be played both ways with foreign countries holding the "exemption gun" to our head in terms of military bases on foreign investment negotiations, and so forth, and the United States in turn could promise quota exemptions to secure political or military objectives. The chances for abuse are enormous.

Moreover, every time a specific exemption came under consideration, formidable political pressure would be put on the White House by domestic lobbies to reject the exemption request. The lobbying and counterlobbying would present an endless source of new problems for the White House and reduce U.S. trade policy to bilateralism, favoritism, and special interest consideration. This game has already been played in textiles and oil and it is my view that it has not redounded to our national interest.

It is the course of wisdom, in my view, not to go the protectionist route with all the inherent dangers of a trade war. However, if this Nation's lawmakers are determined to go the protectionist route, it is better that this protectionism be nondiscriminatory rather than a protectionism which picks and chooses its victims on a bilateral, arbitrary basis. The impact of the trade bill will not solve any problems. It will heighten them for the businessman, the consumer, and the country.

Mr. President, I make these remarks because we may be faced with the trade bill as a rider to some other bill in the closing days of this session.

I wish to serve notice now—I am sure not only for myself but for other Senators—but certainly I serve notice for myself, that I consider this bill so inimical to the interests of the United States, including the consumers and the workers of America, that I shall consider it appropriate to use every means available to an individual Senator to see that we do not make an improvident mistake for the future of this country in that regard.

Mr. President, a bill such as the trade bill deserves to have the considered and intelligent and wise judgment of the Senate. I am entirely willing to come here and stay here as long as necessary, including all of October or to come back immediately after election, whatever the leadership desires. To endeavor to have such a critical measure introduced as an amendment to some other measure because of the crowding at the end of the session would, I think, be a great mistake.

I hope we do not make that mistake.

## TECHNOLOGY, MAN, AND NATURE

Mr. JAVITS. Mr. President, The Aspen Institute for Humanistic Studies, of which Mr. Joseph E. Slater is president, and the International Association for Cultural Freedom, whose president is Mr. Shepard Stone, recently sponsored a conference of most distinguished scientists, artists, scholars, public officials, and citizens for many parts of the world to consider the better use of modern technology for the needs of man.

As this conference aroused broad interest in many parts of our society, I ask unanimous consent that the concluding statement of the conference, together with lists of the participants, be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

TECHNOLOGY, MAN, AND NATURE

We have come together from many parts of the world—scientists and artists, scholars and philosophers, public officials and citizens—to consider how societies can make better use of modern technology for the needs of man. This is one of the most pressing of all issues facing humanity today. Even if a man suceeds in the supreme task of avoiding annihilation by nuclear warfare, the consequences for society and for the natural environment of the uncontrolled peaceful uses of technology could bring disaster within the foreseeable future. This is one of the crucial concerns of our age.

Men have from the beginning used technology to alter the physical and social environment. One should not underestimate that accomplishment. Technology has eliminated hunger and misery in many countries, and it can do so in many more. It has helped to halt malaria, polio, famines, and floods. It has provided unprecedented opportunities for education and for the development of individuality.

Yet technology has also served the interests of suppression, genocide, saturation bombings, and economic exploitation. In other words, technology can become the tool of mindless, selfish, or malign governments or industries that overlook human ends. Today, moreover, technologies are so powerful that they can threaten radical and irreversible changes in the entire planet, in the quality of human life, and even in the biological nature of man. The root of the problem is not in technology as such, but in its generation, its management, its use, and in the difficulty of controlling it.

We are concerned both about the sense of defeat shown by many young pople and poor people and about the complacency of large sections of the public in all countries. We are also concerned about the continuing deterioration of many parts of our natural environment.

We are all agreed that the problems of poverty and human deprivation are the most pressing we now face, but we are also unanimous in the belief that there will be an environmental crisis if we do not take deliberate and timely steps to prevent it.

How much injustice can society suffer? How much change can man adapt to? How much punishment can the earth sustain? These are the questions that rightly disturb us and, particularly, young people. They are urgent questions and their resolution will demand greater wisdom in the development and application of new technologies than societies have usually shown in the past.

We emphasize that the need is not for the slower development of technology, either in advanced or in developing countries. Such a slowdown would cruelly sacrifice the interests of millions of underprivileged people whose hopes and expectations cannot begin to be met without more technology. The need is rather for more thoughtful and careful application of new technologies to prevent both long-range damage to the earth and violence to human values and to foster social, economic, and cultural development.

The prosperity which technology has brought to some nations and to some communities within nations is continuously sharpening the differences between rich and poor. Within nations, close attention must be given to the problems of disadvantaged communities if internal political stability and social justice is to be assured. Between nations, the disparity between the developed and the developing nations is not merely a threat to international stability, but also an impediment to bringing the developing nations fully within the international community.

It follows that advanced and developing societies must both aim at increasing the transfer of technology and technological capability to the developing nations. At the same time, however, each developing nation should be free to determine priorities consonant with its own cultural values and social institutions. Aid organizations must be fully aware that technical assistance, usually given for projects which are economically worthwhile in the simplest sense, should also be sensitive to socially desirable objectives.

In many respects existing social and political institutions—local, national, and international—are now inadequate for the problems occasioned by technological advance and the growth of population. National institutions frequently lack the means or the will to impose necessary restraints on the exploitation of technology and to mediate equitably between individual interests and those of the community at large. International institutions are often unable to reconcile conflicting interests among nations or even international corporations.

We believe that many of these deficiencies can be remedied. Indeed, even existing legal and political devices have often been used to direct technological developments constructively. In meeting changing needs, it may often be sufficient to extend the scope of many existing institutions, to strengthen administrative regulations and to make more effective the enforcement of judicial rights. These steps require political will, often reinforced by appropriate economic incentives. Nevertheless, there are already many circumstances in which new kinds of institutions are necessary, and there will be many more.

In the actual world, conflicts of interest, disagreements about goals, and differences in values will no doubt always remain to be resolved through political processes, both national and international. But it would be wrong to suppose that rationality and wisdom can make no contribution. Often, conflicts may be overcome when a third way is found to advance common aims. Even where incompatabilities of interests and values remain, however, knowledge and intelligence can play a crucial role by showing which choices are preferable, and which are not, in a given specific situation.

The rapid growth of population and its concentration in some parts of the world are particular and growing causes for concern. There is an urgent need to move as quickly as possible towards a stationary population, not merely for the improvement of the quality life but for the development of human personality. Only by the control of population growth can societies hope to share the potential benefits of technology. Moreover, we know that economic and social progress

is one of the most effective inducements to a declining birth rate.

We believe it to be important that the encouragment of economic growth should not be simply an end in itself but also an encouragement of social development. From this it follows that aid organizations should be sensitive to the need to support some technical projects in developing countries when potential social benefits outweigh possible apparent diseconomies. Capital for economic development outside the industrialized nations is an urgent need, however, and in this spirit it is important that developed countries should concentrate economic development in advanced technology and at the same time be prepared to throw open their markets to imports of manufactured goods from labor-intensive industries of countries in earlier stages of development.

Similarly, governments seeking to encourage economic growth should provide means by which poorer communities would be able to share as fully as possible in the potential benefits of technology. In the attempt to adapt the uses made of technology to the needs of society, governments should be aware of the uses which may be made of economic tools for directing efforts and resources to desirable ends. Economic incentives and disincentives can also help to insure the development of technologies which are not wasteful of natural resources.

The pace of technological development, faster than ever before, compels increasing vigilance in anticipating the consequences of technological development. The objectives should be to predict as fully as possible the social, economic, and even political consequences of new developments and to provide governments and their electorates with an opportunity for making informed assessments of potential benefits and social costs. In many countries, new institutions will be needed for this work.

One particular task to be undertaken is the continuing assessment of developments in weapons technology, for the threat of nuclear warfare requires constant vigilance. But early warning systems, often administered by new institutions, are also necessary in the surveillance of the condition of the natural environment and in the continuing assessment of scientific research, which may provide opportunities for beneficial application. One component of this apparatus should be more research in the natural and social sciences; desirable as this may be in its own right, deeper understanding will make it easier to foresee the consequences of new technological developments and thus easier to choose wisely between alternatives.

In this same spirit, fuller use must be made of institutions of the kind which at present serve to bring individuals in touch with government—voluntary associations, local governments, parliamentary bodies, and the investigating committees which they often set up. Such devices can alone provide groups of individuals with means of assessing the opportunities and the dangers of new technological developments.

Institutional changes are needed in both education and the arts. In developing nations, educational systems may have to evolve in a way radically different from those appropriate to industrial societies, and they should be supported and encouraged to develop according to indigenous cultural needs. But, in industrial societies as well, educational reform—in structure, purpose, and content—is also necessary at all levels.

Higher education should not be concentrated on a given age group; opportunities and financial support for adult education are of the utmost importance.

The delicate relationship between the arts and society has been stressed by developments in technology. Artists have always had a unique power to clarify human experience. Their work has had the dual function of defining the character of contemporary reality and of imagining alternatives. The most gifted artists have responded with prescience to the impact of technological change. As the rate of change accelerates, however, the public often has more difficulty in understanding what artists have perceived. Society must recognize that the contributions of its artists will take surprising and disturbing forms. In this situation, we reaffirm that the artist's primary responsibility is to his own work, and that society in turn must encourage him and leave him free.

The freedom of expression which creative artists require if their work is to prosper must be mirrored by the freedom which individuals of all kinds must be given and must assume if society as a whole is to function well. Nothing in the new technology requires that freedom and diversity should be restrained. On the contrary, unless society can devise means by which individuals can participate fully and equitably in the making of decisions, wise decisions about the proper exploitation of technology will be difficult and even impossible to reach. The continuing development of technology is not a restriction of the right of individuals to be free but rather reinforces their responsibility to assert their claims on society at large.

TECHNOLOGY: SOCIAL GOALS AND CULTURAL OPTIONS—PARTICIPANTS

Mr. Amory Bradford, Aspen, Colorado 81611.

Monsignor Marvin Bordelon, Director, Department of International Affairs, U.S. Catholic Conference.

Prof. Harvey Brooks, Dean, Department of Engineering and Applied Physics, Harvard University.

Mr. Colin Crouch, Lecturer in Sociology, London School of Economics.

Mr. K. E. de Graft-Johnson, Lecturer in Sociology, Sociology Department, University of Ghana.

Mr. Frederic de Hoffmann, Chancellor-Elect, Salk Institute.

Countess Marion Doenhoff, Editor-in-Chief, "Die Zeit".

Mr. Jean-Marie Domenach, Director, "Esprit."

Prof. Paul Doty, Department of Biochemistry and Molecular Biology, Harvard University.

Mr. Charles Eames, Filmmaker and Designer.

Prof. Victor Ferkiss, Department of Government, Georgetown University.

Mr. Stepher Fischer, Assistant to the Publisher, "Scientific American."

Mr. Fred Freed, Executive Producer, NBC White Paper.

Mr. Edward Furia, Attorney, City Planner, and Environmental Consultant.

Prof. Murray Gell-Mann, Robert Millikan, Professor of Physics, California Institute of Technology.

Mr. Mathias Goeritz, Architect, Sculptor, City Planner.

Mr. Maurice Goldsmith, Secretary General, the Science of Science Foundation.

Prof. William Gomberg, Professor of Industry, Wharton School of Finance and Commerce.

Mr. Paul Goodman, Writer.

Mr. Gordon Harrison, Officer in Charge, Resources and Environment, Division of National Affairs, Ford Foundation.

Prof. Yurjiro Hayashi, Tokyo Institute of Technology.

Professor Stanley Hoffmann, Professor of Government, Harvard University.

Dr. Alexander Hollaender, Consultant and Senior Research Adviser, Biology Division, Oak Ridge National Laboratory.

Mme. Danielle Hunebelle, Journalist.

Mr. Isaac Hunt, Lawyer and Urban Researcher, the New York City Rand Institute.

Dr. Ivan Illich, Philosopher and Independent Educator.

Dr. Erich Jantsch, Richard Merton Professor, Technical University, Hannover, Germany.

Dr. Carl Kaysen, Director, Institute for Advanced Study.

Dr. Prof. Karl Kaiser, Professor of Political Science, Universität des Saarlandes, Inst. für Theorie u. Soziologie der Politik, Saarbrücken, Germany.

Mr. Pierre Kende, Economist and Associate Lecturer, University of Paris-Ouest (Nanterre).

Dr. Alexander King, Director General for Scientific Affairs, OECD.

Mr. Kurt Klappholz, Reader in Economics, London School of Economics.

Raj Krishna, Professor of Economics, University of Rajasthan, Rajasthan, India.

Mr. Hans Landsberg, Economist and Director, Resource Appraisal Program, Resources for the Future, Inc.

Professor Cyrus Levinthal, Chairman, Department of Biological Sciences, Columbia University.

Mr. Robert Lilley, Director, Environmental Action Institute.

Professor Salvador Luria, Department of Biology, Massachusetts Institute of Technology.

Professor Gene Lyons, Chairman, Department of Government, Dartmouth College.

Prof. Donald G. MacRae, Professor of Sociology, London School of Economics.

Mr. John Maddox, Editor, "Nature".

Professor Leo Marx, Professor of English and American Studies, Amherst College.

Miss Mary McCarthy.

Mr. Victor McElheny, Science Editor, "The Boston Globe."

Dr. Emmanuel G. Mesthene, Director, Harvard University Program on Technology and Society.

Mr. John Oakes, Editor of the Editorial Page, "The New York Times."

Mr. Hasan Ozbekhan, Economist and Planner.

Mr. Guy Pauker, Senior Staff Member, Social Science Department, Rand Corporation.

Dott. Aurelio Peccei, Vice Chairman, Olivetti Corporation.

Professor Morse Peckham, Distinguished Professor of English and Comparative Literature, University of South Carolina.

H. E. Dr. Ernst Petric, Minister of Science of the Republic of Slovenia.

Mr. Herman Pollack, Director, Office of International Scientific and Technological Affairs Department of State.

Professor Theodore T. Puck, Chairman, Department of Biophysics, University of Colorado.

Professor Isidor Rabi, Columbia University, Professor Emeritus, Columbia University.

Mr. James Reston, Vice President, "The New York Times."

Professor Roger Revelle, Director, Harvard University Center for Population Studies.

Mr. Harold Rosenberg, Writer and Art Critic, "The New Yorker."

Professor Nathan Rosenberg, Visiting Rockefeller Professor ('70–'71), Department of Economics, University of the Philippines.

Dr. Jonas Salk, Director, Salk Institute.

Mr. Daniel Schorr, Radio-TV Commentator, CBS.

## ORDER FOR RECOGNITION OF SENATOR SCHWEIKER TOMORROW

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that on tomorrow, immediately following the disposition of the reading of the Journal and the disposition of any unobjected to items on the calendar, the Senator from Pennsylvania (Mr. SCHWEIKER) be recognized for 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ORDER FOR TRANSACTION OF ROUTINE MORNING BUSINESS TOMORROW

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that, following the remarks of the able Senator from Pennsylvania (Mr. SCHWEIKER) on tomorrow, there be a period for the transaction of routine morning business with statements therein limited to 3 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

## MAJORITY OF AMERICANS FAVOR CUT IN MILITARY SPENDING

Mr. PROXMIRE. Mr. President, today's publication of the Gallup poll brought additional proof of public support for congressional cuts in military spending. According to Gallup, a majority of the American people now favor a reduction in military spending. The Gallup pollsters asked the following question:

> Congress is currently debating how much money should be spent for military purposes. Would you like to have your Congressman vote to keep spending for military purposes at the present level, increase the amount, or reduce the amount?

MAJORITY FAVOR CUTTING

In reply, 49 percent said they would like to have their Congressman vote to reduce military spending. Another 34 percent favored keeping spending at the present level. Only 10 percent nationwide favored increasing military spending. Seven percent had no opinion. Thus, the majority of those with an opinion favored the cut.

In every section of the country except the South over 50 percent of all those asked favored cutting military spending. Even in the South, a total of 77 percent either favored cutting below the present military spending levels—36 percent—or in holding the line at the present level—41 percent.

I ask unanimous consent that a table giving the results of this latest Gallup poll be printed at this point in the RECORD.

There being no objection, the results were ordered to be printed in the RECORD, as follows:

[In percent]

| | Present level | Increase | Reduce | No opinion |
|---|---|---|---|---|
| National | 34 | 10 | 49 | 7 |
| East | 32 | 8 | 53 | 7 |
| Midwest | 32 | 9 | 53 | 6 |
| South | 41 | 12 | 36 | 11 |
| West | 34 | 11 | 51 | 4 |
| College background | 29 | 6 | 60 | 5 |
| High school | 38 | 11 | 45 | 6 |
| Grade school | 34 | 13 | 40 | 13 |
| 21 to 29 years | 29 | 8 | 60 | 3 |
| 30 to 49 years | 36 | 11 | 46 | 7 |
| 50 and over | 35 | 9 | 46 | 10 |
| Republicans | 37 | 8 | 46 | 9 |
| Democrats | 36 | 11 | 46 | 7 |
| Independents | 30 | 9 | 55 | 6 |

12,500 WISCONSINITES AGREE

Mr. PROXMIRE. Mr. President, the results of this Gallup poll are not surprising. Last month I sent a questionnaire to my Wisconsin constituents in which I asked them specifically how they would vote on President Nixon's proposed spending levels for a number of major programs. I received about 12,500 replies. In the case of the President's proposed $73.6 billion military spending for fiscal year 1971, I received the following answers:

| Program | Billions proposed spending | Cut below proposed level (percent) | Hold at proposed level (percent) | Increase above level (percent) |
|---|---|---|---|---|
| National Defense | $73.6 | 66 | 30 | 4 |

I want to point out that the question I asked my constituents was based on the spending level the President proposed for fiscal year 1971. It cannot be argued, therefore, that the cuts which Congress made in the President's requests last year of about $6 billion are sufficient. The $73.6 billion figure is the reduction occasioned by the huge cut which Congress made last year. The public therefore wants a further cut in military spending.

When the votes for either holding the line on military spending or cutting it are combined, the results are even more spectacular.

*Hold line or cut below present levels*

ADMINISTRATION SPOKESMEN OUT OF STEP

Yet while the public overwhelmingly favors a cut in military spending, spokesmen for the administration are calling for no more cuts. In the last few weeks there have been a series of statements by top-level military or budget officials saying we should cut no more.

Speaking at a press conference on the 6th of August, Secretary of Defense Melvin Laird had this to say:

> The Chairman of the House Appropriations Committee had indicated he believes our budget will be cut by one billion dollars. I'm going to do everything I can to see that it isn't. I think we have submitted a rock bottom budget this year.

The Assistant Secretary of Defense for International Affairs, Mr. Warren Nutter, had this to say in an address before the Western Economic Association's annual meeting in Davis, Calif., on August 28:

> In brief we have cut defense enough for the present. It is time to look elsewhere for relief from the heavy burden of taxes and for resources better employed in meeting pressing domestic needs.

And he concluded by saying that:

> Those whom you have entrusted with responsibility for the nation's security speak with one voice in sending this message to you.

TAXPAYER'S REGRET

I am certain that the American taxpayer must regret these inflexible stands against cutting defense expenditures on the part of the leading spokesmen for the Pentagon in the administration.

Not only is there vast waste in the military, but according to the very best estimates we now have, the Government faces a budget deficit of at least $10 billion for the 1971 fiscal year.

The only place where significant cuts can be made which would both reduce that deficit and affect the inflationary pressures which have brought it about, is in the military spending area. That is where the cuts must be made.

The administration is clearly out of step with the views of the people of my State. From today's results in the Gallup poll, they are out of step with the views of the majority of the people in the Nation.

The time has come to cut military spending, provide additional resources for high-priority programs, and give the hard-pressed American taxpayer some long-overdue relief.

I ask unanimous consent that the entire article from today's New York Times on the results of the Gallup poll be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

49 PERCENT IN POLL FAVOR DEFENSE-COST CUT—GALLUP FINDS SHIFT IN VOTERS' VIEWS IN LAST 10 YEARS

PRINCETON, N.J., Sept. 23—A majority of voters in all major regions of the nation except the South would like their Congressmen to vote for a reduction in military spending, the Gallup Poll reported today.

For the nation as a whole, the latest Gallup survey found that 49 per cent believed spending should be reduced, 10 per cent thought it should be increased and 34 per cent favored keeping it at its present level.

The two groups most in favor of a reduction in military spending were the college-educated and young adults. Little difference was found between the opinions of Democrats and Republicans.

Opposition to military spending stems largely from frustration over the Vietnam war and the belief that the war is diverting much-needed funds from problems at home, the Gallup organization said.

Total military spending (including Vietnam expenditures) accounts for about half the Federal budget, which totaled about $195-billion in 1970.

QUESTION ASKED OF 1,474

The following question was asked of 1,474 adults in a survey conducted Sept. 11–14 in more than 250 localities across the nation:

Congress is currently debating how much money should be spent for military purposes. Would you like to have your Congressman vote to keep spending for military purposes at the present level, increase the amount, or reduce the amount?

Here are the findings:

[In percent]

| | Present level | Increase | Reduce | No opinion |
|---|---|---|---|---|
| National | 34 | 10 | 49 | 7 |
| East | 32 | 8 | 53 | 7 |
| Midwest | 32 | 9 | 53 | 6 |
| South | 41 | 12 | 26 | 11 |
| West | 34 | 11 | 51 | 4 |
| College background | 29 | 6 | 60 | 5 |
| High school | 38 | 11 | 45 | 6 |
| Grade school | 34 | 13 | 40 | 13 |
| 21 to 29 years | 29 | 8 | 60 | 3 |
| 30 to 49 years | 36 | 11 | 46 | 7 |
| 50 and over | 35 | 9 | 46 | 10 |
| Republicans | 37 | 8 | 46 | 9 |
| Democrats | 36 | 11 | 46 | 7 |
| Independents | 30 | 9 | 55 | 6 |

EARLIER SURVEYS SIMILAR

Two earlier nationwide surveys conducted during the last year showed the public favoring reductions in military spending, with results closely comparable to those reported today.

The polling organization said a "dramatic change" in public attitudes on military spending had come about in the last 10 years, based on previous survey evidence.

In April, 1960, during a period of relative peace, 18 per cent of Americans believed the United States to be spending "too much" for defense. Twenty-one per cent said "too little," while 45 per cent thought the amount being spent was "about right."

Still earlier, just before the outbreak of hostilities in Korea, more than six out of every 10 voters favored an increase in the outlay for national defense.

Before World War II, in the face of Hitler's growing power in Gemany, the public expressed concern over the inadequacies of our defense program and called for greater expenditures for this program.

## S. 4393—INTRODUCTION OF A BILL TO PROVIDE FOR PHYSICAL DISABILITY SEPARATION FROM SERVICE OF MILITARY PERSONNEL AND TO PROVIDE CIVIL COMMITMENT

Mr. DODD. Mr. President, I introduce for appropriate reference a bill to amend title 10 of the United States Code which would provide the opportunity for drug dependent military personnel to be separated from service on a physical disability basis and to be civilly committed and treated for their drug dependence.

This amendment to our laws is long overdue in my estimation and we should not delay in moving it through the Congress to the President's desk for enactment into law.

Clearly, the evidence presented before the Juvenile Delinquency Subcommittee during recent hearings points to the need for this bill.

Much has been said by Members of this body concerning our political-military involvement in Indochina, little however, is mentioned about a related problem which poses a serious threat to the United States both in that theater of operations and here at home.

Narcotics addiction and drug abuse are certainly not new in the military. In recent years, however, the problem has intensified. It has become more complex and it now demands that efforts be undertaken to provide adequate medical assistance and treatment to those servicemen who either become addicted or drug dependent while in the military.

While the Defense Department now acknowledges that there is a drug abuse problem in the military, they are not willing to acknowledge that drug addicted servicemen should be separated from service on physical disability bases.

Basically the Defense Department's position on this issue is that drug addicted individuals or servicemen habituated to drugs are usually involved in some additional form of misconduct during their tour of service. This they feel, should preclude service personnel from receiving an honorable discharge from the services on medical grounds.

In keeping with this line of reasoning one of the recommendations of the Department of Defense's Task Group on Drug Abuse was the retention of present discharge provisions which do not allow the drug addict to be discharged medically. The specific recommendation states:

> The Discharge System now in effect in the Armed Forces represents a fair and proper method of categorizing service. Changes in it should not be made for the sole reason of allowing drug abusers to receive Veterans benefits.

I do not believe that the basic point at issue is Veteran's benefits. It is the well being of the individual soldier who has become addicted to or habituated to narcotics and who should receive a medical discharge with provisions for treatment and rehabilitation.

The U.S. Supreme Court in the Robinson decision—370 U.S. 660 (1962)—recognized that narcotics addiction, per se, was not a crime and the court went on to allude to the medical nature of addiction as an illness rather than a crime.

And while the military clings to the theory that addicts tend to be criminals, studies conducted by a former Army social worker who served in Vietnam, Roger Roffman, do not substantiate this.

He stated in testimony before the Juvenile Delinquency Subcommittee:

> We found, for example, that while 28 percent of our entire sample had received at least one Article 15 (a non-judicial punishment generally for a minor infraction), some 39 percent of the users had received such punishment. There was no trend, however, in the incidence of courts-martial. Moreover, there was no greater proportion of users seeking professional help for emotional problems.

Mr. President, I believe that we must acknowledge drug addiction for what it is, namely, an illness that must be treated.

This is the position I take and the bill that I introduce today reflects this view.

The ravages of narcotics addiction are certainly known in the United States. The countless numbers of lives that are lost to this scourge and the millions of dollars that are wasted each year by drug addicts are factors that are known to the Congress and to the American people.

And the fact is, Mr. President, that our involvement in Indochina may be compounding this problem because of the number of drug dependent military personnel who return to the United States with their drug habits or dependencies and are unable to take their place in an orderly society nor make any contribution to that society.

The Federal Government has long been concerned with the rehabilitation of narcotics addicts. Our Federal hospitals at Lexington and Fort Worth have been in the fore in treating and in attempting to rehabilitate those who become addicted to narcotic drugs.

The Federal Government's concern for this problem was further recognized with the enactment of the Narcotic Addict Rehabilitation Act of 1966, which for the first time provided an alternative to jail for those Federal offenders adjudged to be addicts and likely to be rehabilitated. That effort, only recently begun, is a signal effort and one which will in time show positive results.

Unlike our domestic policy toward the narcotic problem, the problem with which I am concerned today has not been met by the Federal Government. The result is that drug dependent military personnel, many of whom either have served or are now serving in Vietnam or Cambodia, or other areas of the world, are not considered to be eligible for medical discharge for their drug abuse or dependency.

The result is that, if they are subsequently discharged administratively or on other than honorable grounds, they are returned to their communities and continue their drug habits without any assistance or rehabilitation.

The legislation that I propose today would do much to correct this situation.

My concern with this problem is not new.

The subcommittee which I chair, the Juvenile Delinquency Subcommittee, has conducted public hearings and investigations into this controversial area since 1966.

Before elaborating on these subcommittee efforts, I would first remind Senators who have questioned our jurisdiction in this matter that the subcommittee by resolution of the Senate is charged with the responsibility of examining, investigating, and studying the adequacy of existing provisions of law, including the youthful offender provisions of title 18 of the United States Code. This is in addition to our specific responsibility to determine the extent to which juveniles and youthful offenders are violating Federal narcotics laws.

I believe that this mandate is clear and I find no conflict in jurisdiction.

Certainly the treatment and rehabilitation of narcotic addicts or drug dependent persons falls within the purview of the term "correctional action taken with respect to youthful offenders by Federal courts" included in the subcommittee's resolution. The chapter of title 18 dealing with the treatment of youthful offenders extends jurisdiction to the age of 22, an age at which many, if not most, of our military men have served their terms of service.

It is this youthful age group within the military with which we are concerned. The testimony before the subcommittee confirms the fact that it is this very age group that is most involved in illicit drug use.

The testimony further reflects the inadequacy of treatment or corrective action for drug dependent military personnel, the preponderance of whom are young men.

Because of these facts, I concluded long ago that the subcommittee is well within its mandate in inquiring into the problem of drug abuse in the military.

I am hopeful that my colleagues, including those who have questioned this jurisdiction, would accede to this view and support the bill that I propose today to help correct a very real and pressing problem.

I would now turn to a brief legislative history of the subcommittee's inquiries with regard to the problem of narcotics and drug abuse in the military and especially in overseas theaters of operation.

The dimension of this aspect of the drug abuse problem was brought home to me as long ago as 1966 when Dr. Robert Baird, director of the Haven Clinic in New York City, made these remarks in his appearance before the subcommittee:

> The important point that I am trying to make this morning is that I am concerned about the increased amount of addiction of boys in the Armed Services. There is a small percentage of men who are dropouts, with 3 years or less of high school, who are getting drugs in the Armed Services, and who have either experimented with drugs before entering the service or are psychologically extremely susceptible to the suggestion of others to take drugs.

He then observed:

> I have come across servicemen in every branch—the Army, the Navy, the Air Force and the Marines—who have gotten narcotics, marihuana, barbiturates and amphetamines, known as goof-balls and pep pills, in every place from their own home stations, training, grounds, and towns, to overseas, in France, Italy, Germany, Greece, Sweden, Korea and Vietnam.

Dr. Baird indicated that based on his knowledge of the problem he would estimate that there were some 10,000 to 15,000 addicts in the service and about 100,000 marihuana smokers in the Military Establishment.

Mr. President, those estimates were hard to accept then, but I believe that time has proven that Dr. Baird's estimates were more accurate than official Defense Department figures.

Appearing with Dr. Baird at those hearings in 1966, was an ex-marine, who had served in Vietnam and had flown approximately 125 combat missions as a crew chief and a gunner on a helicopter. The former marine was an addict who told us that drugs were readily available to him while he was in the service, both in the United States and overseas.

He related a personal experience with drugs while serving as a gunner aboard a helicopter in Vietnam where he shot and wounded friendly troops thinking they were the enemy.

The point, Mr. President, is that this young marine had taken a quantity of "goof balls," that is, barbiturates before that mission; and while on that mission under the adverse illusionary influence of those drugs, he machinegunned two friendly Vietnamese soldiers.

That marine told the subcommittee that he personally knew 12 heroin addicts and numerous other men who abused other drugs, including hashish, pep pills, and goof balls.

It was during those hearings that testimony was given relative to the handling of military personnel who are either drug abusers or drug dependent.

Dr. Baird when asked to outline the types of discharges afforded these men stated:

> I have reviewed some of these things. Some of these discharges are undesirable discharges, some of them are character disorder discharges. But I don't think I have come across one that has said the individual was discharged because of drug addiction.

I would add at this juncture that the picture in that regard has not changed and today there is no physical disability discharge available for either drug abusers or drug dependent persons.

One question that must be explored, of course, concerns whether drug addiction and drug abuse among the military are detectable while the individual is in service.

If the drug condition is not established while the individual is in the military, then the bill that I propose could not be operable. I am convinced, however, based on the testimony of former military doctors that the drug addict and the chronic drug abusers in the military in the majority of cases are not only detected, but are actually seeking assistance for their problem, assistance which in most cases may be inadequate at best or not available at worst.

When the subcommittee next held hearings on this aspect of the drug abuse problem in March of 1968 I requested that the Defense Department furnish us with an evaluation of the drug situation in the military establishment.

I did so because of the fact that additional testimony, citing the prevalence of marihuana use among service personnel in Vietnam, was heard by the subcommittee.

The witness, John Steinbeck IV, a former soldier who had served in Vietnam, told the subcommittee that he estimated that 60 percent of the men in Vietnam, between the ages of 19 and 27, were smoking marihuana whenever they thought it reasonable to do so.

He went on to opine that upwards of 75 percent of that same age group would be involved with marihuana as they became more sophisticated in its use.

The picture painted by Steinbeck was that marihuana was a relatively harmless drug, a view that he said was also accepted by the military.

The response of the Defense Department in the form of testimony before the subcommittee was that drug abuse in the military was a minimal problem and that statistics reflected that "there is virtually no addiction to the so-called hard narcotics and a low rate of incidence of drug abuse in the Armed Forces."

This testimony presented in early 1968 represented an evaluation of the drug abuse problem through calendar year 1967, the last year for which statistics had been compiled at the date of the subcommittee's 1968 hearings.

It is axiomatic that official statistics concerning drugs abuse rarely, if ever, indicate the true incidence of such abuse whether it be military or civilian in nature. Statistics usually simply represent apprehensions, that is, those who have been detected and arrested for illicit drug involvement.

One is not going to come forward and acknowledge that he is either violating a Federal law or one of the Articles of the Uniform Code of Military Justice by acknowledging drug involvement.

In the military such an admission is punishable as a violation of the Uniform Code.

Thus, one can reasonably conclude that official and reported statistics do not present an accurate picture of illicit drug use and abuse. However, they certainly are indicators which can be used to evaluate developing patterns especially changes in the incidence of arrests or apprehensions.

With this in mind, certain questions may be put to the Department of Defense relative to the figures that were furnished the Subcommittee in 1968. This is especially true in view of recent knowledge of the problem that was made available in testimony presented before the Juvenile Delinquency Subcommittee.

Did the Defense Department know the extent of drug abuse at that time?

Did they ignore it?

Did they attempt to cover it up?

Were they honestly unaware of the magnitude of the problem?

Or, was there, as official figures seem to indicate, a relative minimal problem at that time?

A definitive answer on my part would be speculative. However, I can point to testimony before this subcommittee which indicates that there is a serious drug abuse problem in the military establishment and that legislation such as I propose today is urgently necessary.

My bill, since it provides for physical disability separation from service, would in effect be of assistance in determining the true incidence of drug abuse in the military in that it provides that such abuse be handled medically rather than punitively, as is now the case under present military law.

It would thus serve as an incentive for drug abusers to come forward in order to seek the treatment that is necessary for their rehabilitation.

What then are the drug abuse conditions in the military today towards which this legislation is directed?

I can only characterize the problem as massive, dangerous, unabated, and growing.

It is a problem with which the military has not yet come to grips and the result of this lack of responsiveness is that drug addicted or drug dependent servicemen are returning home, unknown to civilian authorities, with only one way to go, a continuation of their drug oriented way of life.

While there is certain controversy over the effects of marihuana smoking, the fact is that the ultra strong Vietnamese variety has particular and discernible adverse effects, which have been described before the Juvenile Delinquency Subcommittee in terms of toxic psychosis, in other words, drug-induced insanity.

The marihuana toxic psychosis is a cerebral cortex malfunction due to toxins in the body due to the marihuana smoked or ingested. This condition has already been described in the medical literature as existing among Vietnam servicemen who are marihuana smokers.

The manifestations of this condition are readily discernible and include a loss of reality testing, paranoid feelings or feelings of suspiciousness, disorientation, confusion, and auditory and visual hallucinations.

These conditions are usually temporary.

But we have heard of cases where the individual soldier remains schizophrenic even after having come out of the acute toxic state.

Mr. President, in layman's terms the above medical descriptions of the adverse reactions to marihuana smoking means that the soldier in Vietnam who smokes marihuana may react violently, hysterically or in other aberrant behavior patterns.

This is particularly true because of the fact that our servicemen in Vietnam are under great stress, they are under great tension and undoubtedly are fearful for their lives in combat situations.

The point to be stressed here is that one's mental set and the social-psychological conditions under which one smokes marihuana to a large extent determine the individual's response to it.

Therefore, if one is under great stress, great tension, and is fearful for his life, the marihuana episode can enhance that mental condition and can result in violence, including murder, rape and assault.

This behavior has been described to us and I certainly have no reason to question it.

It is a matter of record at the Long Binh jail in Vietnam.

A case in point concerns the death of a U.S. soldier in Vietnam who jokingly told his companion that he was Ho Chi Minh. The companion who had smoked marihuana only minutes before experienced a panic reaction and shot the man to death.

While the reference to Ho was made jokingly, the confused and hallucinating marihuana smoker reacted in a disoriented manner and shot his comrade.

In addition to the above behavior patterns, we have been told of cases where the individual pot smoker, if he is a heavy user of marihuana, will experience "trips" similar to those experienced upon ingestion of LSD, a potent hallucinogenic.

An anamoly concerning the marihuana experience is that the soldier who smokes marihuana believes that the drug relaxes him and makes him better able to function, while in truth, his functioning is severely impaired.

Whether the soldier is in a combat unit or a support unit, his marihuana smoking impairs his functioning, his judgment, and his ability to carry out his assigned mission.

One witness told the subcommittee that he had a standing order with the men of his squad that marihuana was not to be smoked prior to any military operation. His rationale was that the marihuana smoker could not function and would impair the success of the mission and, in fact, endanger the lives of those assigned to the mission.

Further evidence of this anomalous situation is to be found in a taped interview with servicemen from Vietnam which was summarized in Family magazine, a sunday supplement to the Army Navy and Air Force Times publication.

The interviewer questioned the men on instances where servicemen, who were under the influence of marihuana, may have been adversely influenced by the drug.

The following is one incident cited by these active duty military men:

> There was an incident in Korea. We were going on patrol across the DMZ and we were walking through a mine field. He (another trooper) was the point man and he stepped on a mine and had his leg blown off. But I mean that really wasn't his mistake because he just read the map wrong. But yet, I mean *he was high at the time.*

Another case from the interview gives us a glimpse of the confused state of mind resulting from marihuana smoking:

> We got caught in an ambush. I was just sitting there eating chow and instead of going for my rifle when they started shooting . . . it happened just like this . . . I looked at him (a comrade who had just smoked marihuana) and said, "Oh no! My man got hit" and instead of going for my rifle I went for his 79 because at that time in my mind I was high and I said, "What's the use of having this puny M–16 when I've got a hell of a lot more fire power over here on my righthand side?" You know, I just started plugging away with the M–79 and we got out of there.

In summary, the man under the influence of marihuana hysterically grabbed the wrong weapon and fired at the enemy.

The interview, which lasted for 2½ hours, is a chilling documentary on the reactions of these troops in combat and frontline situations. The most dramatic aspect of the statements made by these soldiers is the difference between their subjective reactions to marihuana smoking and the actual facts surrounding their performances in combat.

They thought they were doing just great.

In reality, they and their befuddled buddies were getting killed, wounded, and routed because they were reacting in the confused, unreal, distorted world of marihuana intoxication.

Additional evidence of the problems created in combat by marihuana abuse in Vietnam, were brought to our attention during our most recent hearings on the issue.

I questioned Vice Adm. William P. Mack, a Defense Department expert on drug abuse, about the combat readiness of our troops in Vietnam and the possible impairment of functioning of the men as the result of marihuana smoking.

He replied:

> We also agree with you that there are many instances where a platoon or a squad endangers some of its members. Maybe a squad mission cannot be carried out. We know this has happened, or helicopter mission, and there have been people killed who should not have been killed, but we are looking at it really from the overall point of view that we do not feel at this moment that our ability to do what we want to do in Vietnam is, for instance, endangered. We are talking about a higher level. At the lower level we agree with you.

The point is that when you get down to cases, marihuana smoking does impair the functioning of men who abuse the drug. And in a combat situation this means unnecessary deaths and loss of unit efficiency.

Examples of such losses were given by two former veterans. Jon Steinberg, who served in Vietnam told the subcommittee of cases such as the following in which a unit suffered losses because of a psychotic episode following marihuana use:

> The release of assaultive behavior happened to a soldier in Saigon. This particular soldier was on guard duty and smoking pot in a bunker with four buddies. He had smoked marihuana on three other occasions without any trouble. All those experiences were pleasurable. This time, after smoking his normal amount of pot, he picked up his M16 and emptied a magazine into his four friends. They did not all die following this initial burst of gunfire, so he put another magazine into his rifle and stopped their crying with bullets.

Additionally, Dr. John K. Imahara, a former Army psychiatrist, who served in Vietnam, testified to the loss of effectiveness of combat units because of marihuana use by many members of a given squad or company:

> A military lawyer told me about an incident in which a helicopter began to receive gunfire at night. The helicopter swooped down and strafed the area. The following morning, American soldiers were found dead with evidence of marihuana in the guard post. There were stories about how bunkers were overrun or break-throughs into the base camps by the enemy with the evidence of marihuana cigarettes present. I cannot enumerate all of the many situations in which marihuana and/or other drugs were involved. Needless to say the use of marihuana and other drugs can contribute to a more dangerous situation in the combat zone.

Mr. President, I believe that the evidence of adverse reactions to marihuana smoking in Vietnam is sufficient to justify labeling that particular drug as dangerous.

What then is the estimate of the incidence of such drug abuse in Vietnam?

Again, based on our record, as high as

80 percent of the men in Vietnam have used marihuana at least once. The incidence of chronic marihuana use has not been determined definitely. Figures do indicate that at least 30 percent of the men in Vietnam can be classified as chronic users of marihuana.

Dr. Joel Kaplan, a psychiatrist who was a U.S. Army major with a year's tour in Vietnam, told the subcommittee that 70 percent of the outpatients who he saw in Vietnam, some 3,000 men, were heavy drug users.

In addition, 50 percent of the inpatients seen by Dr. Kaplan during his tour in Vietnam were heavy drug users.

Thus, in Dr. Kaplan's words, 3,500 men about whom he knew personally were heavy drug users in Vietnam requiring medical and psychiatric assistance for their drug abuse and dependence.

When describing what he considered chronic drug use Dr. Kaplan put it this way:

> When I refer to drug abusers, I am not referring to the soldier who smokes marihuana once a week or even once every few days. I am referring to a soldier who is using drugs heavily day in and day out.

Dr. Kaplan's view of the seriousness of this problem is shared by other professionals.

Dr. James Teague, another psychiatrist, who had served a year's tour of duty in Vietnam with the U.S. Army Medical Corps told the subcommittee that prior to his going to Vietnam and experiencing firsthand the adverse reactions to marihuana smoking, he considered the drug to be relatively harmless.

He has since changed his appraisal of marihuana abuse because of his professional experience with the drug among servicemen in Vietnam and he considers Vietnamese marihuana to be a potentially dangerous substance.

Evidence of the potential dangers of drug abuse is contained in figures concerning drug overdose deaths in Vietnam that have been furnished the subcommittee by the Department of Defense.

From 1965 through 1967 there were no deaths attributed to drug overdose among U.S. Army personnel in Vietnam. However, in 1968, seven such deaths were recorded and in 1969 the number of troops who died from overdoses jumped to 18.

We can be thankful that drug overdose deaths are no higher than indicated.

While the consensus of the witnesses who appeared before the subcommitee would indicate that medical assistance is available in Vietnam to treat drug abusers and drug dependent persons, they insisted that available medical assistance is inadequate to meet the problem.

There is evidence of a need to detoxify drug abusers and to hospitalize chronic marihuana users in order to stabilize their conditions and hopefully return them to duty.

Dr. Kaplan told the subcommttee of his treatment efforts with regard to drug abusers including reliance on group therapy sessions.

While these efforts to treat and stabilize chronic drug abusers are utilized in Vietnam, the testimony reflects that they are currently inadequate and that more must be done not only with regard to treatment, but with regard to drug abuse education and preventive efforts.

If the treatment programs are not adequate, an alternate approach must be available which would provide for the physical disability discharge of drug addicted or dependent servicemen. However, under current military law, that is impossible.

Drug abuse and/or drug addiction are not considered by the Army to be grounds for a medical or psychiatric discharge. Such symptomatology must be subsumed under the hearing of character behavior disorders which must be then handled through administrative channels. Such a situation now means a discharge, under existing Army regulations, for an underlying personality disorder. As a result of this procedure, the individual is not treated upon his discharge and continues his drug habit upon his return home.

And the fact is, Mr. President, that we have now begun to see the results of this problem at home.

Dr. Myron Feld, a former psychiatrist with the Veterans' Administration recently spoke out on this problem and indicated that the heavy abuse of drugs by servicemen in Vietnam is responsible for a high rate of mental breakdown among Vietnam veterans. He went on to point out that the breakdowns are occurring after discharge, and are due to the heavy use of ultrastrong Vietnamese marihuana and to other drugs including LSD and amphetamines.

Feld pointed out:

> Our troops find it necessary to enter combat under the influence of drugs and, further to continue their use on return to the United States.

Mr. President, it is my firm belief that the Congress must now recognize the serious nature of the drug abuse problem in the military and must take immediate action to provide means to alleviate not only the immediate, but the long-term results of drug abuse by servicemen.

I believe that the legislation that I now propose would go a long way toward achieving such a goal.

If a man cannot function in the military because of drug addiction or drug dependence, he must be medically separated from service, treated and hopefully rehabilitated under an organized program of care.

The bill that I propose would do just this.

It provides:

For the physical disability separation from service of drug dependent and drug addicted military personnel.

For their civil commitment to treatment under titles III and IV of the Narcotic Addict Rehabilitation Act of 1966.

For penalties for drug offenses that are commensurate with those provided for in the Controlled Dangerous Substances Act.

I believe that if this bill is enacted, that we will make inroads into a problem of serious dimensions not only in the military, but here at home where drug abuse and dependency must not be compounded by returning servicement who have become "dope fiends" while in military service.

We should provide the very best of care for our returning veterans and this includes adequate treatment for drug dependency.

I urge my colleagues to give this bill their favorable consideration.

The PRESIDING OFFICER (Mr. NELSON). The bill will be received and appropriately referred.

The bill (S. 4393) to authorize members of the Armed Forces to be discharged from active military service by reason of physical disability when such members are suffering from drug addiction or drug dependency, to authorize the civil commitment of such members after their discharge, and for other purposes, introduced by Mr. DODD, was received, read twice by its title, and referred to the Committee on Armed Services.

---

## LET US OFFER EXCHANGE OF PRISONERS OF WAR—OFFERING ON BASIS OF 35 FOR ONE OF OUR MEN

Mr. YOUNG of Ohio. Mr. President, at this time Americans have reason to believe that approximately 1,500 American fighting men, most of them officers of our Air Force, are being held as prisoners of war in prison camps in North Vietnam and in South Vietnam. Most of these officers and men were known to have been shot down over North Vietnam or South Vietnam or over the Gulf of Tonkin or South China Sea. Their planes were damaged or destroyed. When the downed pilots were not found alive, they were listed as missing in action. They have been presumed to be killed in combat or prisoners of war. A large majority according to American observers who saw the war planes shot down or were in rescue helicopters directly after these incidents or based on other information obtained, are believed to be prisoners of war.

It is believed that this total may approximate 1,500 American fighting men still being held as prisoners of war. Information servicemen known by their names are presently being held as prisoners of war by the forces of the National Liberation Front in South Vietnam or by the authorities in North Vietnam. An additional 1,100 are missing in action. It is hoped and believed that particularly all of them are prisoners of war.

Mr. President, I have no means of knowing how many of the 36,000 VC and North Vietnamese held as prisoners by the friendly forces of South Vietnam are officers. Probably relatively few are, in fact, officers.

It is an unfortunate policy that prisoners taken by our GI's are turned over to ARVN forces who do but very little fighting.

Veterans of World War II never beheld a German prisoner of war hooded and with his hands manacled behind him. We should by all means offer to exchange all these 36,000 prisoners of war for the 1,500 Americans. This operation, of course, to be handled entirely

by the International Red Cross and in accord with the Geneva agreement pertaining to the humane treatment of prisoners of war to which we are signatory. Whether or not the militarist government of Thieu and Ky have also signed the Geneva agreement for the humane treatment of prisoners, I do not know.

David Poling in the Christian Herald recently stated:

> There is no doubt that there are thousands of Americans in North Vietnamese prisons.

From the thousands of helicopters and planes shot down alone, we understand a goodly percentage of personnel have been rescued and held prisoner by the North Vietnamese. The treatment of prisoners of war even by the most civilized nations does not always follow the Geneva Convention on rules of war. In the Vietnam conflict the Americans themselves do not show up too well in this connection. We turn over the captured enemy to the South Vietnamese to do with as they like, and the reports on conditions in South Vietnam prison camps are shocking. Torture of the most fiendish sort is inflicted, care of the wounded and sick is practically nil, and starvation is rife.

We know from pictures on our screens that invariably VC taken prisoners are immediately tortured by the South Vietnamese. Americans witnessed on their television screens a VC officer murdered by General Loan immediately after being turned over by Americans to whom he had surrendered.

Here is a proposal which might be accepted as Pentagon claims VC are suffering a shortage of manpower due to heavy losses.

In the history of warfare not only in wars in which the United States has been involved but almost universally there have been prisoner-of-war exchanges.

I am today making a constructive suggestion which I hope will be acted on by officials of the International Red Cross. Also, that leaders in the executive branch of our Government will work in trying to bring about the release of a thousand or more Americans held as prisoners of war by offering this exchange of approximately 36,000 prisoners most of whom were captured by our GI's. We should insist that President Thieu and Vice President Ky of the Saigon militarist regime go along and obey us on this or does the little tail wag the dog?

We Americans would gain a great deal if we received a thousand or more American prisoners of war through the work of the International Red Cross, and gave back to the VC and the North Vietnamese on the basis of 35 to 1 some 36,000 prisoners we have taken in this war.

Mr. President, in the entire history of our Republic including throughout two world wars and the Korean conflict our generals never adopted that abominable brutal system termed "body count." This was concocted by officers in the Pentagon some years ago about 1963 or 1964. This so-called body count policy has been followed from that time to the present time in reporting casualties supposedly suffered by the VC and North Vietnamese in the course of the undeclared war we are waging in Southeast Asia, first in Vietnam and now in recent months expanded and escalated to fighting in Cambodia, Laos, and Thailand.

Pentagon officials and the generals of our Joint Chiefs of Staff no longer refer to this as the Vietnam war but term it the Indochinese war. They have adhered to this body county policy although no knowledgeable American believes these highly exaggerated body count figures issued regularly from the Pentagon. Were these body count figures accurate, anyone would wonder how it comes there are any men left to fight on the side of the VC or forces of the National Liberation Front.

This Indochinese war became the most unpopular war ever waged in the history of our Republic very shortly following the time that President Lyndon Johnson on his own, in the absence of a declaration of war from Congress, had more than 500,000 U.S. troops in Vietnam at one time. In the administrations of Presidents Eisenhower and Kennedy we had military advisers in Vietnam—no combat troops. On the day President Eisenhower left the White House we had 687 military advisers in Vietnam—no combat troops. On the day that President Kennedy was assassinated we had approximately 16,200 military advisers in Vietnam—no combat troops.

Waging a major war in Southeast Asia is the most horrendous mistake made by a U.S. President. Vietnam is of no importance whatever to the defense of the United States. This is the most unpopular war our Nation has ever waged. It is an undeclared war. It is the longest war in point of time. With the exception of World War II, it is the most costly war in the loss of priceless American lives.

## ORDER OF BUSINESS

The PRESIDING OFFICER. Is there further morning business?

Mr. YOUNG of Ohio. Mr. President, I ask unanimous consent that I may proceed for 3 additional minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

## CARL McINTIRE: PREACHER OF HATRED

Mr. YOUNG of Ohio. Mr. President, Carl McIntire, the rightwing extremist preacher of hatred who has invited Vice President Ky of the militarist Saigon regime to come to Washington and participate in his so-called march for freedom, has long been recognized in religious circles as a charlatan and heretic.

The fact is that Carl McIntire is a bigot in clerical clothing. He was defrocked in disgrace in 1936 by leaders of the United Presbyterian Church. Today, the United Presbyterian Church has a membership of 3,172,760. By comparison, Mr. McIntire's group of misguided followers in the splinter Bible Presbyterian Church he established number 1,800. The United Presbyterian Church is more than 1,500 times the size of McIntire's group of followers.

Mr. McIntire spews forth his brand of hatred from a dilapidated building in Collingswood, N.J. His organization prints the Christian Beacon, a weekly compilation of the preacher's opposition to legitimate political and religious groups as well as printing books, tracts, and position papers.

Last year, Reverend McIntire, so-called, was expelled from the executive committee of the American Council of Christian Churches due to his extremist views and his reputation as a spewer of hate.

Mr. President, yesterday Vice President AGNEW stated that Vice President Ky's scheduled appearance at the October 3 rally would not serve any "useful purpose." I am in complete agreement with the Vice President.

When I was in Vietnam in 1968, I interviewed Vice President Ky of the Saigon militarist regime for nearly an hour. He is an abominable fellow. This minidictator, who is a fraud and a phony air marshal, was born and reared in Hanoi. He, along with nine generals born in North Vietnam who overthrew the legal civilian government in Saigon in June 1965, fought with the French Armed Forces seeking to reestablish their tyrannical colonial Indochinese empire. In 1954, Ky was in the French Air Force as were those nine generals opposing their fellow countrymen fighting for national liberation then termed "Viet Minh," now Vietcong. Ky proudly displayed on his flamboyant flying jacket a decoration he was awarded by the French. He is really a traitor to his nation now the same as he was at the time of Dienbienphu.

He and President Thieu stalled for 4 weeks before sending delegates to join Ambassador Averell Harriman at the Paris conference. Their refusal caused a halt to all proceedings toward peace. During a period when 200 or more Americans were being killed in Vietnam each week, he and President Thieu refused to join the conference.

In addition, Vice President Ky personally receives $15,000 per week from the receipts of the Saigon racetrack. In 1967, Ky admitted he was receiving this racetrack money and said he used it from time to time to help disabled war veterans. He had, up to that time, paid out the total sum of $65 for this purpose.

Our Ambassador to South Vietnam, Ellsworth Bunker, who in 1968 made the astonishing statement that the Tet lunar offsensive was "a resounding military defeat for the Vietcong," accompanied Ky to the airport when he left Saigon last week on his trip to Paris and Washington. Perhaps Ambassador Bunker personally had reason to rejoice and state that the Tet offensive of the Vietcong was "a resounding military defeat." He fled and escaped with his life from the U.S. Embassy compound. The Vietcong breached the fortress-like wall, invaded our Embassy, killed American soldiers and civilians in the Embassy compound, and held possession of the Embassy for 7 hours.

In this same Tet lunar offensive of February 1968, the Vietcong invaded Saigon and released thousands of prisoners in jail and they forcibly invaded and took possession of 37 of 44 provincial capitals in South Vietnam, in every instance releasing prisoners from jail, con-

scripting many of the young men in their armed forces and seizing possession of many tons of rice. They held possession of Hue, the ancient capital, for a month. Our marines finally drove them out after suffering heavy casualties.

It was reported at the time that Ambassador Bunker escaped and was secluded in a safe place. He was able, however, to return after some 7 hours, probably feeling happy to be alive.

Mr. President, it is disgraceful to contemplate that Vice President Ky and Reverend McIntire, so-called, would stand in the shadow of the Washington Monument and the Capitol calling for the American people to rally for all-out military victory in waging an immoral war in a tiny country in a remote part of Southeast Asia that we have devastated.

In any event this flamboyant Vice President Ky, instead of coming to Washington to participate in the demonstration, would be well advised if he would go to Hong Kong or Switzerland and rendezvous with his unlisted bank accounts in both places, or continue to take $15,000 almost every week in receipts from the militarists in Saigon which he controls.

Reverend McIntire, so-called, and Vice President Ky are advocates of blood and tears and fighting on to a complete American military victory in Southeast Asia even though that might cause another 50,000 young Americans to be killed in combat.

## A TRUTH WE ALL AGREE ON

Mr. HANSEN. Mr. President, some truths bear constant repetition. When Col. Frank Borman addressed a joint meeting of Congress concerning his diplomatic mission on behalf of American prisoners of war, he spoke a simple truth on which we all agree.

The humanitarian aspect of this question is above all political and military aspects. Regardless of what our individual opinions are on the Vietnamese war, we unite in our concern for these unfortunate captives.

They have been denied the minimum treatment prescribed in the Geneva Convention on prisoners of war. The North Vietnamese Government is a signatory to that treaty. We are determined to make every effort to persuade that Government to rise to that minimum level in its prisoner-of-war policy.

## MAKING CONGRESS MORE EFFECTIVE

Mr. HART. Mr. President, I call attention to a study report just released which I believe will stimulate a broad and constructive discussion. It is a statement by the Research and Policy Committee of the Committee for Economic Development.

I ask unanimous consent that at this point in the RECORD the membership report of that committee be printed.

There being no objection, the membership list was ordered to be printed in the RECORD, as follows:

RESEARCH AND POLICY COMMITTEE

Jervis J. Babb, New York, New York.
Joseph W. Barr, President, American Security and Trust Co.
Frederick S. Beebe, Chairman of the Board, Newsweek.
William S. Beinecke, Chairman of the Board, The Sperry and Hutchinson Company.
S. Clark Beise, President (Retired), Bank of America N.T. & S.A.
William Benton, Publisher and Chairman, Encyclopedia Britannica, Inc.
Joseph L. Block, Chairman, Executive Committee, Inland Steel Company.
Marvin Dower, Director, McKinsey & Company, Inc.
John L. Burns, President, John L. Burns and Company.
Rafael Carrion, Jr., Chairman and President, Banco Popular de Puerto Rico.
Emilio G. Collado, Executive Vice President, Standard Oil Company (New Jersey).
Robert C. Cosgrove, Chairman of the Board, Green Giant Company.
Marion B. Folsom, Rochester, New York.
William C. Foster, Washington, D.C.
John M. Fox, Chairman, United Fruit Company.
Co-Chairmen: Emilio G. Collado, Executive Vice President, Standard Oil Company (New Jersey).
Philip M. Klutznick, Chairman, Urban Investment and Development Company.
Vice Chairmen: Howard C. Petersen, Chairman, National Economy, The Fidelity Bank.
John A. Perkins, President, Improvement of Management in Government, Wilmington Medical Center.
Philip M. Klutznick, Chairman, Education and Urban Development, Urban Investment and Development Co.
William M. Roth, International Economy, San Francisco, California.
David L. Francis, Chairman, Princess Coal Sales Company.
William H. Franklin, President, Caterpillar Tractor Co.
Richard C. Gerstenberg, Vice Chairman of the Board, General Motors Corporation.
Ellison L. Hazard, Chairman and President, Continental Can Company, Inc.
H. J. Heinz, II, Chairman, H. J. Heinz Company.
William A. Hewitt, Chairman, Deere & Company.
Charles Keller, Jr., President, Keller Construction Corporation.
Robert J. Kleberg, Jr., President, King Ranch, Inc.
Philip M. Klutznick, Chairman, Urban Investment and Development Co.
Ralph Lazarus, Chairman, Federated Department Stores, Inc.
Thomas B. McCabe, Chairman, Finance Committee, Scott Paper Company.
George C. McGhee, Washington, D.C.
John F. Merriam, Chairman, Executive Committee, Northern Natural Gas Company.
Raymond H. Mulford, Chairman, Owens-Illinois Inc.
Robert R. Nathan, President, Robert R. Nathan Associates, Inc.
Alfred C. Neal, President, Committee for Economic Development.
John A. Perkins, President, Wilmington Medical Center.
Howard C. Petersen, Chairman, The Fidelity Bank.
C. Wrede Petersmeyer, President, Corinthian Broadcasting Corporation.
Philip D. Reed, New York, New York.
Melvin J. Roberts, President, Colorado National Bank of Denver.
William M. Roth, San Francisco, California.
Robert B. Semple, President, Wyandotte Chemicals Corporation.
S. Abbot Smith, Boston, Massachusetts.
Philip Sporn, New York, New York.
Allan Sproul, Kentfield, California.
William C. Stolk, Chairman, W. C. Stolk & Associates, Inc.
Alexander L. Stott, Vice President and Comptroller, American Telephone & Telegraph Company.
Wayne E. Thompson, Vice President, Dayton-Hudson Corporation.
H. C. Turner, Jr., Chairman, Turner Construction Company.
Herman L. Weiss, Vice Chairman, General Electric Company.
Frazar B. Wilde, Chairman Emeritus, Connecticut General Life Insurance Co.
Walter W. Wilson, Partner, Morgan Stanley & Co.
Theodore O. Yntema, Department of Economics, Oakland University.

Mr. HART. Mr. President, this distinguished group has captioned its statement, "Making Congress More Effective." It is a statement which generated considerable discussion among the committee members themselves. One can notice from the footnotes the sincere effort by each member of that distinguished group to clarify particular individual attitudes of the individual, all of whom joined the general statements of conclusions of the committee.

To encourage my colleagues and others in the country to read the full statement, I ask unanimous consent that the "Summary of Conclusions and Recommendations" of the committee be printed at this point in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SUMMARY OF CONCLUSIONS AND RECOMMENDATIONS

Facing issues of unprecedented magnitude and scope, Congress—like most other human institutions—is reluctant to modify its long-established, habitual ways of doing business. Continuing delay in modernization of Congressional structures and procedures, however, will surely be injurious to the national interest and can lead only to further erosion in influence and effectiveness of the Legislative Branch.

Recognizing the complexities and obstacles standing in the way of change, we have limited the recommendations in this statement to proposals designed to overcome weaknesses without undertaking a complete remodeling of the present system. No further reference is made, for example, to the possible substitution of multi-member for single-member districts in the House of Representatives, or to changes that would require amendment of the Constitution.

In the following chapters we advocate significant modifications that are both pragmatic and immediately practicable, dealing with three separate though interrelated fields of action. First, we urge fundamental improvements in the Congressional handling of fiscal-economic decisions. Second, we propose readjustment of the entire committee structure and of the procedures associated with it. Third, we strongly support divestment by Congress of inessential and unsuitable administrative burdens, together with other measures that would strengthen public confidence in its objectivity.

The present Congressional approach to fiscal affairs is indefensible. When budget decisions are extended long past the beginning of the fiscal year for which they are intended, when there is no Congressional mechanism to tie revenues and appropriations into a coherent pattern, when no legislative procedure exists to initiate actions based on a comprehensive view of the economy, then national stability is endangered. When Congress permits its evaluation and oversight

of programs to be carried out in ways that allow the continuance of obsolete programs and the wasteful management of potentially useful ones, then both the credibility and the effectiveness of the entire national government are seriously harmed. To correct these conditions we recommend that:

Means for comprehensive review of the annual budget be established and used, relating total revenues and expenditures to the state of the economy.

Annual authorizations be discounted; instead, authorizations should be made along program and project lines, fully funded, for minimum terms of four years.

Evaluation of program performance, in terms of objectives as well as dollars, be heavily stressed.

The federal fiscal year be changed to coincide with the calendar year, so that appropriations may always precede expenditures.

Congress establish and observe deadline dates for both authorizations and appropriations.

The committee system has the crucial role in Congressional decision making. As it now operates, however, decisions are fragmented; problems demanding a broad policy approach are handled in piecemeal fashion and hence poorly by the many autonomous committees and their innumerable subcommittees. These committees carry out much of their work in obscurity or secrecy which can be and often is maintained—even against the inquiries of other Members—in defiance of the elementary tenets of democracy. Through the assignment system that determines their makeup, and by means of restrictive procedures, committees can be dominated by small groups of Members with special interests held in common—or even by the desires of a powerful and autocratic chairman. These conditions prevent Congress from making open and effective response to urgent national needs. Therefore, we recommend:

Fewer standing committees, with broader jurisdiction for each.

Better use of joint and select committees.

More flexible subcommittee arrangements, with rotating chairmanships.

Abandonment of seniority as the sole criterion in selecting committee chairmen.

Democraticized procedures, with many more open hearings.

Better informational and analytical resources for committees.

There is no doubt that there has been an erosion of popular respect for Congress. This is injurious to the nation as well as to Congress as an institution. Citizens are now insisting that every level and branch of government become more responsive, more open to the demands of all the people, more attuned to current priorities, and less bound by traditional approaches or endless red tape. In the face of these trends Congress has appeared to fold in upon itself. Its endless involvement with minor details of administrative management and its open and attentive solicitude for special interest groups contrast with its negative reaction to many concerns of the general public. Prompt action on several fronts is needed to restore public trust. Hence, we propose:

Relinquishment of detailed direction of all administrative functions unsuited to management by a legislative body or by any committee of such a body.

Stronger "Codes of Ethics."

Assurance of majority rule on major issues in both chambers.

Installation of modern voting procedures which would eliminate the secrecy surrounding teller, standing, and voice votes in the House of Representatives.

Thorough reform of campaign finance, with full disclosure and tax incentives for contributions.

Prohibition of committee meetings while sessions of the chamber are in progress.

Acceptance of these recommendations would do much to improve Congressional operations and to enhance the Congressional image.[3] Fortunately, there are no legal barriers to their adoption; changes in House and Senate rules, modification of outmoded customs, or statutory enactments in some few cases, would suffice. The Members can make the necessary changes whenever the majority chooses. Congress has considered and debated many of them in recent years, so far to little or no avail.[4] It is now time to correct obvious weaknesses. The defects of Congress are not congenital; its wounds are self-inflicted.

Mr. HART. Finally, Mr. President, three of the recommendations appear to me to have particular appeal. The first is the recommendation that the Federal fiscal year be changed to coincide with the calendar year. The other two deal with the matter of congressional authorization and appropriation procedure. The committee recommends that annual authorizations be discontinued; that authorizations should be made along program and project lines, fully funded, and for a minimum term of 4 years. It proposes that the appropriations process should be designed to modify long-range programs in terms of short-range capabilities in light of performance.

The statement makes many other challenging suggestions with most of which I find myself in agreement.

Again, I thank the distinguished Americans who made up the Research and Policy Committee of the Committee for Economic Development. In the past, CED has published studies bearing on executive management in the Federal Government, Federal budgetmaking, presidential succession, modernizing local government, modernizing State government, financing a better election system, statements on a fiscal program for a balanced federalism, and reshaping of government in metropolitan areas.

Some of the policy recommendations made in those earlier statements already have been adopted. Others, I am sure, will be.

In this most recent report "Making Congress More Effective," there are recommendations which ought to be adopted by the Congress. In any event, given the quality and experience, the source from which this study comes, each of the recommendations reflected in that statement should have the most serious study and attention from all of us in Congress.

## COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters which were referred as indicated:

PROPOSED AMENDMENT OF THE DEFENSE PRODUCTION ACT OF 1950

A letter from the Director, Office of Emergency Preparedness, Executive Office of the President, transmitting a draft of proposed legislation to amend the Defense Production Act of 1950, as amended, to eliminate the restriction on guaranteed transactions under section 301 (with an accompanying paper); to the Committee on Banking and Currency.

PROPOSED LEGISLATION RELATING TO SERVICES OF CONSULTANTS IN CONNECTION WITH CIVIL FUNCTIONS OF THE CORPS OF ENGINEERS

A letter from the Secretary of the Army, transmitting a draft of proposed legislation to amend the Act of July 3, 1930, as amended, relating to the services of consultants in connection with civil functions of the Corps of Engineers (with an accompanying paper); to the Committee on Public Works.

PROPOSED LEGISLATION RELATING TO PAY OF CIVILIAN MEMBERS OF THE BOARD ON COASTAL ENGINEERING RESEARCH

A letter from the Secretary of the Army, transmitting a draft of proposed legislation to amend Section 103 of the River and Harbor Act of 1960, pertaining to the pay of civilian members of the Board on Coastal Engineering Research (with an accompanying paper); to the Committee on Public Works.

## PETITIONS

Petitions were laid before the Senate and referred as indicated:

By the PRESIDENT pro tempore:

A resolution adopted by the Association of Midwest Fish and Game Commissioners, Denver, Colo., relating to prevention of pollution in the Arctic; to the Committee on Commerce.

A resolution adopted by the Association of Midwest Fish and Game Commissioners, Denver, Colo., relating to loss of wet lands and sports fisheries caused by stream channelization under the Small Watershed Act; to the Committee on Commerce.

A resolution adopted by the Association of Midwest Fish and Game Commissioners, Denver, Colo., relating to consideration of fish and wildlife aspects in water resources management; to the Committee on Commerce.

A resolution adopted by the Association of Midwest Fish and Game Commissioners, Denver, Colo., relating to legislation modernizing the P–R and D–J Acts; to the Committee on Commerce.

A resolution adopted by the Association of Midwest Fish and Game Commissioners, Denver, Colo., relating to regulation on shipment of diseased fish; to the Committee on Commerce.

A resolution adopted by the Association of Midwest Fish and Game Commissioners, Denver, Colo., relating to need for "new product" clearing house at the Federal level; to the Committee on Commerce.

A resolution adopted by the City Council of the City of Philadelphia, Pa., memorializing the President and the Congress to declare a boycott of the Arab States; to the Committee on Foreign Relations.

A resolution adopted by the Association of Midwest Fish and Game Commissioners, Denver, Colo., relating to continued efforts on public land law review; to the Committee on Interior and Insular Affairs.

A resolution adopted by the Association of Midwest Fish and Game Commissioners, Denver, Colo., relating to need for population control to maintain a quality environment; to the Committee on Labor and Public Welfare.

A resolution adopted by the Association of Midwest Fish and Game Commissioners, Denver, Colo., relating to required course in environmental science; to the Committee on Labor and Public Welfare.

A resolution adopted by the Association of Midwest Fish and Game Commissioners, Denver, Colo., relating to research on mercury contamination of the environment; to the Committee on Public Works.

[3] See Memorandum by Mr. Richard C. Gerstenberg, page 62.

[4] See Memorandum by Mr. Joseph L. Block, page 63.

A resolution adopted by the Association of Midwest Fish and Game Commissioners, Denver, Colo., relating to establishment of a National Water Bank; to the Committee on Public Works.

A resolution adopted by the Association of Midwest Fish and Game Commissioners, Denver, Colo., relating to coordinated advance planning on projects affecting environmental quality; to the Committee on Public Works.

## REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. RANDOLPH, from the Committee on Labor and Public Welfare, with an amendment:

S. 2461. A bill to amend the Randolph-Sheppard Act for the blind so as to make certain improvements therein, and for other purposes (Rept. No. 91–1235).

By Mr. JAVITS, from the Committee on Labor and Public Welfare, with an amendment:

S. 3425. A bill to amend the Wagner-O'Day Act to extend the provisions thereof to severely handicapped individuals who are not blind, and for other purposes (Rept. No. 91–1236).

By Mrs. SMITH of Maine, from the Committee on Armed Services, without amendment:

S. 752. A bill to authorize the conveyance of all right, title, and interest of the United States reserved or retained in certain lands heretofore conveyed to the State of Maine (Rept. No. 91–1237).

By Mr. INOUYE, from the Committee on Armed Services, without amendment:

S. 4187. A bill to authorize the Secretary of the Army to convey certain lands at Fort Ruger Military Reservation, Hawaii, to the State of Hawaii in exchange for certain other lands (Rept. No. 91–1238).

By Mr. BYRD of Virginia, from the Committee on Armed Services, without amendment:

H.R. 14373. An act to authorize the Secretary of the Navy to convey to the city of Portsmouth, State of Virginia, certain lands situated within the Crawford urban renewal project (Va-53) in the city of Portsmouth, in exchange for certain lands situated within the proposed Southside neighborhood development project (Rept. No. 91–1239).

By Mr. DOMINICK, from the Committee on Armed Services, with an amendment:

S. 3795. A bill to amend the Soldiers' and Sailors' Civil Relief Act of 1940, as amended, in order to extend under certain circumstances the expiration date specified in a power of attorney executed by a member of the Armed Forces who is missing in action or held as a prisoner of war (Rept. No. 91–1240).

By Mr. JACKSON, from the Committee on Armed Services, with amendments:

H.R. 17604. An act to authorize certain construction at military installations, and for other purposes (Rept. No. 91–1234).

By Mr. FULBRIGHT, from the Committee on Foreign Relations, with amendments:

H.R. 18306. An act to authorize United States participation in increases in the resources of certain international financial institutions, to provide for an annual audit of the Exchange Stabilization Fund by the General Accounting Office, and for other purposes (Rept. No. 91–1241).

## EXECUTIVE REPORTS OF A COMMITTEE

Mr. STENNIS. Mr. President, from the Committee on Armed Services, I report favorably three nominations of general and flag officers in the Army and Navy. I ask that these names be placed on the Executive Calendar.

The PRESIDING OFFICER (Mr. NELSON). Without objection, it is so ordered.

The nominations, ordered to be placed on the Executive Calendar, are as follows:

Maj. Gen. John Norton, U.S. Army, to be assigned to a position of importance and responsibility designated by the President, for appointment to the grade of lieutenant general while so serving;

Adm. Ephraim P. Holmes, U.S. Navy, for appointment to the grade of admiral on the retired list; and

Vice Adm. Charles K. Duncan, U.S. Navy, for commands and other duties determined by the President, for appointment to the grade of admiral while so serving.

Mr. STENNIS. Mr. President, in addition, I report favorably 8,027 promotions in the Navy in the grade of captain and below and 323 appointments in the Marine Corps in the grade of colonel and below. Since these names have already been printed in the CONGRESSIONAL RECORD, in order to save the expense of printing on the Executive Calendar, I ask unanimous consent that they be ordered to lie on the Secretary's desk for the information of any Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations, ordered to lie on the desk, are as follows:

James W. Abraham, and sundry other officers, for temporary appointment in the Marine Corps;

Richard C. Adams, and sundry other officers, for permanent promotion in the Navy;

Arnold T. Stevens, a temporary disability retired officer, for reappointment in the Marine Corps;

Carl Andrew Armstrong, Jr., and sundry other officers, for temporary promotion in the Navy;

Herman Carl Abelein, and sundry other officers, for temporary promotion in the Navy; and

Arthur R. Anderson, Jr., and sundry other officers, for temporary appointment in the Marine Corps.

## BILLS AND A JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. DODD:

S. 4393. A bill to authorize members of the Armed Forces to be discharged from active military service by reason of physical disability when such members are suffering from drug addiction or drug dependency, to authorize the civil commitment of such members after their discharge, and for other purposes; to the Committee on Armed Services.

(The remarks of Mr. DODD when he introduced the bill appear earlier in the RECORD under the appropriate heading.)

By Mr. MILLER:

S. 4394. A bill to amend title 18, United States Code, to make a misdemeanor the flight, in interstate or foreign commerce, by any person who is the parent of a minor child or who is a married man, if such person so flees with the intent of evading his legal responsibilities with respect to the support or maintenance of his minor child or his wife; to the Committee on the Judiciary.

(The remarks of Mr. MILLER when he introduced the bill appear below in the RECORD under the appropriate heading.)

By Mr. HARRIS:

S. 4395. A bill for the relief of Adelaida M. Alinsagay; to the Committee on the Judiciary.

By Mr. SCOTT (for himself, Mr. RANDOLPH, Mr. GORE, Mr. METCALF, Mr. PERCY, Mr. SCHWEIKER, and Mr. YOUNG of Ohio):

S. 4396. A bill to amend Title XVIII of the Social Security Act to provide Medicare benefits (financed from general revenues) for disabled coal miners without regard to their age; to the Committee on Finance.

(The remarks of Mr. SCOTT when he introduced the bill appear below under the appropriate heading.)

By Mr. MANSFIELD:

S.J. Res. 237. Joint resolution to establish the Mineral Resources Commission to study and submit recommendations concerning laws and procedures relating to the administration of the mineral resources in the public lands and other lands of the United States; to the Committee on Interior and Insular Affairs.

(The remarks of Mr. MANSFIELD when he introduced the joint resolution appear below under the appropriate heading.)

## DIRECT POPULAR ELECTION OF THE PRESIDENT AND THE VICE PRESIDENT—AMENDMENT

AMENDMENT NO. 946

Mr. ERVIN submitted an amendment, in the nature of a substitute, intended to be proposed by him, to the joint resolution (S.J. Res. 1) proposing an amendment to the Constitution to provide for the direct popular election of the President and Vice President of the United States, which was ordered to lie on the table and to be printed.

## S. 4394—INTRODUCTION OF A BILL TO MAKE A MISDEMEANOR THE FLIGHT IN INTERSTATE OR FOREIGN COMMERCE BY A PERSON LEGALLY RESPONSIBLE FOR THE SUPPORT OF A WIFE OR MINOR CHILD

Mr. MILLER. Mr. President, I introduce, for appropriate references, a bill to make it a Federal crime to cross State lines for the purpose of evading legal responsibility for the maintenance or support of a wife or minor child.

The Senate Finance Committee recently completed hearings on the House-passed family assistance plan. The House bill contains a provision creating an obligation to the United States on the part of a deserting parent equal to the total amount of family assistance benefits received by the deserting parent's spouse and children. This amount could be collected from amounts otherwise due or becoming due the deserting parent from any agency of the United States or under any Federal program. During the hearings and discussion on this particular provision it became clear that something further is needed to help assure that husbands would not desert their children and wives but would continue to provide support for them. One of the most effective ways to accomplish this result is to discourage the flight across State lines for the purpose of

evading these marital or parental responsibilities. The bill I am introducing would be a step, I believe, in that direction.

The bill would merely provide that any parent of a child under the age of 18 or a married man who travels across State lines with the intent of evading any obligation for the maintenance or support of such child or his wife would be subject to a fine of not more than a $1,000 nor imprisonment for more than 1 year, or both. The bill would establish a presumption that such interstate movement was with the intent referred to above if as a result of such movement: First, the individual is outside the jurisdiction which imposes the support obligation and the wife or child remains within the jurisdiction; second, at the time of such movement the child or wife is destitute; and third, the individual fails to notify his wife or children of his whereabouts for a period of more than 1 month.

Since this proposal deals with establishing a crime, I assume the bill will be referred to the Senate Judiciary Committee. I am hopeful that the committee will act quickly on it so that it might be considered in connection with the welfare reform.

The PRESIDING OFFICER (Mr. JORDAN of Idaho). The bill will be received and appropriately referred.

The bill (S. 4394) to amend title 18, United States Code, to make a misdemeanor the flight, in interstate or foreign commerce, by any person who is the parent of a minor child or who is a married man, if such person so flees with the intent of evading his legal responsibilities with respect to the support or maintenance of his minor child or his wife, introduced by Mr. MILLER, was received, read twice by its title and referred to the Committee on the Judiciary.

## S. 4396—INTRODUCTION OF A BILL RELATING TO EXTENSION OF MEDICARE TO THE NATION'S DISABLED COAL MINERS

Mr. SCOTT. Mr. President, I introduce, with the distinguished senior Senator from West Virginia (Mr. RANDOLPH) as its primary cosponsor, a bill to extend full medicare benefits under social security to the Nation's disabled coal miners, regardless of age.

We are pleased to be joined as additional cosponsors in this effort by our able colleagues, the Senators from Tennessee (Mr. GORE), Montana (Mr. METCALF), Illinois (Mr. PERCY), Pennsylvania (Mr. SCHWEIKER), and Ohio (Mr. YOUNG).

Mr. President, our bill is addressed to the men who bear the scars of mining accidents and diseases. These men represent a national problem—one which cannot be overlooked simply because it is often hidden in the hills and valleys of Appalachia or in other remote coal mining areas.

The black long provisions of the recently enacted Coal Mine Health and Safety Act deal with only one specific problem. Unfortunately, neither these provisions, nor the medical coverage provided by the United Mine Workers of America welfare and retirement fund, have been sufficient in a great many cases to take care of the needs of disabled coal miners. The spiraling cost of medical care, together with the uniquely hazardous nature of mining work, places in an extremely precarious position the miner who is disabled, but not qualified for other benefits.

The social security law makes men who have worked a lifetime, and who retire at age 65, eligible for "medicare" benefits. This program has been of immeasurable benefit for America's elderly who can no longer work because of age.

It is our belief that disabled coal miners should be afforded similar treatment under the law. They have given the full of their working lifetime to America—a lifetime which is measured in disability, if not in years. We believe it is justifiable that the nation should provide medical and hospital care for men crippled and otherwise disabled during the course of their work in our coal mines.

We offer our bill as proof that America has not forgotten its disabled coal miners. We urge prompt and favorable consideration of this vital legislation.

The PRESIDING OFFICER (Mr. JORDAN of Idaho). The bill will be received and appropriately referred.

The bill, S. 4396, to amend title XVIII of the Social Security Act to provide medicare benefits—financed from general revenues—for disabled coal miners without regard to their age, introduced by Mr. SCOTT, for himself and other Senators, was received, read twice by its title, and referred to the Committee on Finance.

## SENATE JOINT RESOLUTION 237—INTRODUCTION OF A JOINT RESOLUTION TO ESTABLISH THE MINERAL RESOURCES COMMISSION

Mr. MANSFIELD. Mr. President, I introduce today a joint resolution calling for the creation of a National Mineral Resources Commission. Very generally, it would be the duty of this Commission to study and submit recommendations concerning laws and procedures relating to the administration of the mineral resources in the public lands and other lands of the United States. As set forth in this resolution, it would be the declared policy of Congress that all mineral resources in this Nation should be: First, located, retained and managed; or, second, disposed of, all in a manner to provide for the maximum benefit of the general public.

The Commission would have a 2-year life. It would be composed of three majority and three minority Members of the Senate; three majority and three minority Members of the House of Representatives, and six persons appointed by the President of the United States from among members of the public who have particular knowledge and expertise with respect to our minerals and minerals policies.

The Commission would study existing statutes and rules and regulations governing the location, the retention and management and the disposition of our mineral resources. Studied as well would be the various incentive and subsidy programs relating to our minerals with a view to their effectiveness and their adequacy. Additionally, the Commission would review the policies and practices of all of the Federal agencies that are charged with jurisdiction over these resources. The Commission would also compile data necessary to understand and determine the various demands on our mineral resources today and in the foreseeable future. Finally, the Commission is to recommend such modifications in existing laws, in rules and regulations and in current policies and practices, including the various incentive and subsidy programs, as will best serve the public interest.

Established in an advisory capacity to the Commission would be the Mineral Advisory Council. The Council would be comprised of the representatives of the various agencies having jurisdiction over our minerals, together with 20 additional members representing various major citizens groups interested in problems relating to the minerals of this Nation.

In closing, Mr. President, I would only say that I think this resolution goes further than any I have seen in granting to a proposed Minerals Commission the authority to study the full range of problems that will confront this Nation with respect to its minerals in the years ahead. Interests of consumers, of producers, and investors, and of workers as well, must be served. They must be served in a manner that will best suit the public as a whole.

I ask unanimous consent that the joint resolution be appropriately referred and that it be considered along with other measures relating to this same matter.

I also ask unanimous consent that the joint resolution be printed in the RECORD.

The PRESIDING OFFICER (Mr. JORDAN of Idaho). The joint resolution will be received and appropriately referred; and, without objection, the joint resolution will be printed in the RECORD.

The joint resolution (S.J. Res. 237) to establish the Mineral Resources Commission to study and submit recommendations concerning laws and procedures relating to the administration of the mineral resources in the public lands and other lands of the United States, introduced by Mr. MANSFIELD, was received, read twice by its title, referred to the Committee on Interior and Insular Affairs, and ordered to be printed in the RECORD, as follows:

S.J. RES. 237

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That (a) it is hereby declared to be the policy of Congress that the mineral resources in the public lands and other lands of the United States be (1) located, retained and managed, or (2) disposed of, all in a manner to provide the maximum benefit for the general public.

(b) As a result of the fact that laws of the United States relating to its mineral resources have developed over a long period of years through a series of Acts of Congress and are not fully correlated with each other and because such laws may be inadequate to meet the current and future needs of the

American people, the Congress declares that it is necessary to have a comprehensive review of those laws and the rules and regulations promulgated thereunder, and to determine whether and to what extent revisions thereof are necessary.

SEC. 2. (a) For the purpose of carrying out the policy and purpose set forth in the first section of this Resolution, there is hereby established a commission to be known as the Mineral Resources Commission, hereinafter referred to as the "Commission".

(b) The Commission shall be composed of nineteen members, as follows:

(1) Three majority and three minority members of the United States Senate to be appointed by the President pro tempore of the Senate;

(2) Three majority and three minority members of the House of Representatives to be appointed by the Speaker of the House of Representatives;

(3) Six persons to be appointed by the President of the United States from among members of the public who have particular knowledge and expertise with respect to minerals and numerals policies; and

(4) One person, elected by majority vote of the other eighteen, who shall be the Chairman of the Commission.

(c) Any vacancy which may occur on the Commission shall not affect its powers or functions but shall be filled in the same manner in which the original appointment was made.

(d) The organization meeting of the Commission shall be held at such time and place as may be specified in a call issued jointly by the senior member appointed by the President pro tempore of the Senate and the senior member appointed by the Speaker of the House of Representatives. The Commission shall select a Vice Chairman from among its members.

(e) Ten members of the Commission shall constitute a quorum, but a smaller number, as determined by the Commission, may conduct hearings.

(f) Members of Congress who are Members of the Commission shall serve without compensation in addition to that received for their services as Members of Congress; but they shall be reimbursed for travel, subsistence, and other necessary expenses incurred by them in the performance of the duties vested in the Commission.

(g) The members appointed by the President shall each receive $100 per diem when engaged in the actual performance of duties vested in the Commission, plus reimbursement for travel, subsistence, and other necessary expenses incurred by them in the performance of such duties.

SEC. 3. (a)(1) The Commission or, on authorization of the Commission, any committee of two or more members, at least one of whom shall be of each major political party, may, for the purpose of carrying out the provisions of this resolution, hold such hearings, take testimony or receive evidence under oath and sit and act at such times and places as the Commission or such authorized committee may deem advisable. The member of the Commission presiding at any such hearing is authorized to administer the oath to witnesses. Subpenas for the attendance and testimony of witnesses or the production of written or other matter may be issued only on the authority of the Commission and shall be served by anyone designated by the Chairman of the Commission.

(2) The Commission shall not issue any subpena for the attendance and testimony of witnesses or for the production of written or other matters which would require the presence of the parties subpenaed at a hearing to be held outside of the State wherein the witness is found or resides or transacts business.

(3) A witness may submit material on a confidential basis for the use of the Commission and, if so submitted, the Commission shall not make the material public. The provisions of sections 102–104, inclusive, of the Revised Statutes (2 U.S.C. 192–194) shall apply in case of any failure of any witness to comply with any subpena or testimony when summoned under this section.

(b) The Commission is authorized to secure from any department, agency, or individual instrumentality of the executive branch of the Government any information it deems necessary to carry out its functions under this resolution and each such department, agency, and instrumentality is authorized and directed to furnish such information to the Commission upon request made by the Chairman or the Vice Chairman when acting as Chairman.

(c) If the Commission requires of any witness or of any governmental agency production of any materials which have theretofore been submitted to a government agency on a confidential basis, and the confidentiality of those materials is protected by statute, the material so produced shall be held confidential by the Commission.

SEC. 4. It shall be the duty of the Commission to—

(1) study existing statutes and rules and regulations governing the location, retention, management, and disposition of the mineral resources in the public lands and other lands of the United States including various incentive and subsidy programs with a view to determining the consistency, effectiveness, and adequacy of existing Government policies, plans, and programs involving such resources;

(2) review the policies and practices of the Federal agencies charged with administrative jurisdiction over such resources insofar as such policies and practices relate to the location, retention, management, and disposition of such resources;

(3) compile data necessary to understand and determine the various demands on such mineral resources which now exist and which are likely to exist within the foreseeable future, and the existing and long-range supply outlook with respect to such mineral resources; and

(4) recommend such modifications in existing laws, rules and regulations, policies, and practices including various incentive and subsidy programs as will, in the judgment of the Commission, best serve to carry out the policy set forth in the first section of this resolution.

SEC. 5. The Chairman of the Commission shall request the Secretaries of State, Defense, Interior, Commerce, and Health, Education, and Welfare; the chairmen of Federal Power Commission and the Atomic Energy Commission; and the Directors of the Office of Emergency Preparedness and the Office of Science and Technology to appoint, and the head of such department or agency shall appoint, a liaison officer who shall work closely with the Commission and its staff in matters pertaining to this resolution.

SEC. 6. (a) There is hereby established Mineral Advisory Council, which shall consist of the liaison officers appointed under section 5 of this Resolution, together with twenty additional members appointed by the Commission. Members appointed by the Commission shall be representative of the various major citizens' groups interested in problems relating to the location, retention, mangement, and disposition of the mineral resources in the public lands and other lands of the United States, including the following: organizations representative of State and local government, private organizations representative of consumer interests, conservation interests, landowner interests, mining interests, oil and gas interests, commercial and sport fishing interests, commercial outdoor recreation interests, industry, labor, education, and public utilities. Any vacancy occurring on the Advisory Council shall be filled in the same manner as the original appointment.

(b) The Advisory Council shall advise and counsel the Commission concerning matters within the jurisdiction of the Commission.

(c) Members of the Advisory Council shall serve without compensation, but shall be entitled to reimbursement for actual travel and subsistence expenses incurred in attending meetings of the Council called or approved by the Chairman of the Commission or in carrying out duties assigned by the Chairman.

(d) The Chairman of the Commission shall call an organizational meeting of the Advisory Council as soon as practicable, a meeting of such Council each six months thereafter, and a final meeting prior to the approval of the final report by the Commission.

(e) The Chairman of the Commission shall invite the Governor of each State to designate a representative to work closely with the Commission and its staff and with the Advisory Council in matters pertaining to this resolution.

SEC. 7. (a) There is hereby authorized to be appropriated such sum, not to exceed $3,000,000, as may be necessary to carry out the provisions of this resolution and such moneys as may be appropriated shall be available to the Commission until expended.

(b) The Commission is authorized, without regard to the provisions of chapter 51 and subchapter III of chapter 53 of title 5, United States Code, relating to classification and General Schedule pay rates, to fix the compensation of its Chairman, and to appoint and fix the compensation of its staff director, and such additional personnel as may be necessary to enable it to carry out its functions. Such appointments may be made and such compensation fixed without regard to the provisions of title 5, United States Code, governing appointments in the competitive service and the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates; except that any Federal employee subject to the civil laws and regulations who may be employed by the Commission shall retain his civil service status without interruption or loss of status or privilege.

(c) The Commission is authorized to enter into contracts or agreements for studies and surveys with public and private organizations and, if necessary, to transfer funds to Federal agencies from sums appropriated pursuant to this resolution to carry out such aspects of the review as the Commission determines can best be carried out in that manner.

(d) For the purposes of Chapter 11 of title 18, United States Code, service of an individual as a member of the Advisory Council, as the representative of a Governor, or employment by the Commission of an attorney or expert in any job or professional field on a part-time or full-time basis with or without compensation shall be considered to be service or employment rendered as a special government employee.

SEC. 8. The Commission shall, not later than December 31, 1972, submit to the President of the United States and the Congress its final report. The Commission shall cease to exist six months after the submission of such report or on June 30, 1973, whichever first occurs. All records and papers of the Commission shall thereupon be delivered to the Administrator of General Services for deposit in the Archives of the United States.

SEC. 9. As used in this Resolution, the term "public lands" includes (a) the public domain of the United States, (b) reservations, other than Indian reservations, created from the public domain, (c) lands permanently or temporarily withdrawn, reserved, or withheld from private appropriation and

disposal under the public land laws, including the mining laws, (d) outstanding interests of the United States in lands patented, conveyed in fee or otherwise, under the public land laws, (e) national forests, (f) wildlife refuges and ranges, and (g) the lands defined by appropriate statute, treaty, or judicial determination being under the control of the United States in the Outer Continental Shelf.

## ADDITIONAL COSPONSOR OF A BILL

S. 4297

Mr. BYRD of West Virginia. Mr. President, on behalf of the Senator from Massachusetts (Mr. KENNEDY), I ask unanimous consent that, at the next printing, the name of the Senator from Washington (Mr. MAGNUSON) be added as a cosponsor of S. 4297, to create a health security program.

The PRESIDING OFFICER (Mr. MONDALE). Without objection, it is so ordered.

## SOCIAL SECURITY AMENDMENTS OF 1970—AMENDMENT

AMENDMENT NO. 947

Mr. CANNON. Mr. President, I rise at this time to submit an amendment to H.R. 17550, the House-passed social security amendments of 1970, which is now before the Senate Finance Committee. I ask unanimous consent for the printing in today's RECORD of my amendment in order that my colleagues may review this proposal. Rather than waiting for the social security bill to reach the Senate floor, I am offering my amendment at this time so that the finance committee may study this proposal along with the other alternatives under consideration. Essentially, I am offering an amendment which would require the States to disregard all social security benefit increases in determining need for public assistance.

Many retired citizens have pointed out to me that the social security increases authorized by the Congress are offset by State action which reduces old age assistance payments in proportion to the social security increase. In other words, the retired citizen may receive no benefit at all as the social security increase is taken away by a reduction in State assistance. My amendment attempts to resolve this inequity by requiring the States to disregard social security benefit increases authorized by the Congress when determining their income need figure for public assistance. This proposal will not place any great financial burden upon the States, but it will help ease the economic crisis facing many of our retired citizens.

The PRESIDING OFFICER (Mr. HANSEN). The amendment will be received and printed, and will be appropriately referred; and, without objection, the amendment will be printed in the RECORD.

The amendment (No. 947) was referred to the Committee on Finance, as follows:

AMENDMENT NO. 947

At the end of the bill, add the following new section:

"DISREGARDING OF SOCIAL SECURITY BENEFIT INCREASE IN DETERMINING NEED FOR PUBLIC ASSISTANCE

"SEC. 302. Notwithstanding the provisions of section 2(a)(10), 1002(a)(8), 1402(a)(8), and 1602(a) (13) and (14) of the Social Security Act, each State, in determining need for aid or assistance under a State plan approved under title I, X, XIV, or XVI of such Act, shall disregard (and the plan shall be deemed to require the State to disregard), in addition to any other amounts which the State is required or permitted to disregard in determining such need, any amount (or any portion thereof) paid to an individual under title II of such Act (or under the Railroad Retirement Act of 1937 by reason of the first proviso in section 3(e) thereof) if—

"(1) for the month preceding the first month that monthly insurance benefits payable under title II of the Social Security Act are increased by reason of the enactment of section 101 of this Act—

"(A) such individual received aid or assistance under such State plan;

"(B) such individual was entitled (on the basis of an application filed in or before such month) to monthly insurance benefits under section 202 or section 223 of the Social Security Act; and

"(2) such amount (or portion thereof) is attributable to the increase, in monthly insurance benefits payable under title II of the Social Security Act, resulting from the enactment of section 101 of this Act."

## COSPONSOR OF AN AMENDMENT

AMENDMENT NO. 858 TO H.R. 18515

On behalf of the Senator from New York (Mr. JAVITS), the Senator from New York (Mr. GOODELL) was added as a cosponsor of amendment No. 858 to H.R. 18515, the HEW-Labor appropriation bill.

## NOTICE CONCERNING NOMINATIONS BEFORE THE COMMITTEE ON THE JUDICIARY

Mr. EASTLAND. Mr. President, the following nominations have been referred to and are now pending before the Committee on the Judiciary:

Roger C. Cramton, of Michigan, to be Chairman of the Administrative Conference of the United States for a term of 5 years, vice Jerre S. Williams, resigned.

Irving W. Humphreys, of West Virginia, to be U.S. marshal, Southern District of West Virginia for the term of 4 years, vice Cornelius J. McQuade, retired.

Fred C. Mattern, Jr., of Virginia, to be Examiner in Chief, U.S. Patent Office, vice Nogi A. Asp, resigned.

John H. Schneider, of Virginia, to be Examiner in Chief, U.S. Patent Office, vice Peter T. Dracopoulos, resigned.

Saul I. Serota, of Maryland, to be Examiner in Chief, U.S. Patent Office, vice Pasquale J. Federico, resigned.

Curtis C. Crawford, of Missouri, to be a Member of the Board of Parole for the term expiring September 30, 1976, vice Ziegel W. Neff, term expiring.

Paula A. Tennant, of California, to be a Member of the Board of Parole for the term expiring September 30, 1976, vice Charlotte P. Reese, term expiring.

On behalf of the Committee on the Judiciary, notice is hereby given to all persons interested in these nominations to file with the Committee, in writing, on or before Thursday, October 1, 1970, any representations or objections they may wish to present concerning the above nominations, with a further statement whether it is their intention to appear at any hearing which may be scheduled.

## NOTICE OF HEARING ON CERTAIN NOMINATIONS

Mr. EASTLAND. Mr. President, on behalf of the Committee on the Judiciary, I desire to give notice that a public hearing has been scheduled for Thursday, October 1, 1970, at 10:30 a.m., in room 2228, New Senate Office Building, on the following nominations:

Max Rosenn, of Pennsylvania, to be U.S. Circuit Judge, Third Circuit, vice David Stahl, deceased.

John Paul Stevens, of Illinois, to be U.S. Circuit Judge, Seventh Circuit, vice Elmer J. Schnackenberg, deceased.

Cornelia G. Kennedy, of Michigan, to be U.S. District Judge, Eastern District of Michigan, vice Thaddeus M. Mackrowicz, deceased

Frank J. McGarr, of Illinois, to be U.S. District Judge, Northern District of Illinois, vice a new position created under Public Law 91–272, approved June 2, 1970.

Edwin L. Mechem, of New Mexico, to be U.S. District Judge, District of New Mexico, vice a new position created under Public Law 91–272, approved June 2, 1970.

At the indicated time and place persons interested in the hearing may make such representations as may be pertinent.

The subcommittee consists of the Senator from Arkansas (Mr. MCCLELLAN); the Senator from Nebraska (Mr. HRUSKA), and myself as Chairman.

## ADDITIONAL STATEMENTS OF SENATORS

### PART III—THE DIRECT-ELECTION BOONDOGGLE

Mr. GOLDWATER. Mr. President, in two previous speeches I have spelled out my strong reason for opposing the direct-election plan. In each of these statements, I have sought to document as clearly and fully as possible the specific grounds on which I base my belief that the adoption of this scheme would shake the very foundation of our society.

To my mind, the direct-election proposal is undemocratic, inconsistent, chaotic, divisive, and dangerous. In other words, this plan is nothing more than the proverbial "can of worms."

It is undemocratic because it dispenses with the concept of majority rule. Instead, it substitutes a procedure under which a candidate might be elected without capturing a plurality in even one State. So long as he gathers 40 percent of the vote nationally and none of the other candidates receives more, he will be the winner. Thus, a person can be elected President when 60 percent of the people are dead set against him, if they have split their votes among more than one candidate.

The direct-election system is inconsistent because it does not provide for an accurate determination of the "people's choice," as promised by its advocates. Instead, it is arbitrarily assumed that in a runoff the majority of voters would turn to the same person who has won a 40-percent or higher plurality the first time around. This is an incredible assumption to make, and it is clearly disproved when projected against an election similar to the one held in 1968.

In that election President Nixon received 43.4 percent of the total count, and Mr. Humphrey had 42.7—a difference of less than 1 percent. It does not take much stretch of the imagination to picture these results being reversed. In this event, Mr. Humphrey would have been declared the winner had the direct election method been in effect.

However, this would have completely ignored the fact that 10 million votes were cast in the election for third-party candidates. The authors of direct election would pick up these votes and, in effect, transfer them into the Humphrey column. They would do this by making the arbitrary decision that Mr. Humphrey was "the people's choice." Their plan would also have the arbitrary effect of depriving the true majority of voters of any opportunity to express their will up or down on the two leading candidates.

The fact that the bulk of third-party voters were diametrically opposed to continuing the policies of the National Democratic Party in 1968 would mean nothing. Their votes would be canceled out as if they had no right to vote at all. And this would be done in the name of a so-called reform that was supposed to count every man's vote equally.

Mr. President, the direct election plan is chaotic because it would lead to a rash of vote contests that would spread throughout the Nation whenever the election was reasonably close. This would be true whether or not fraud was charged. The inevitable occurrence of human and mechanical error would be sufficient by itself to make it worth while for a losing candidate to challenge the election outcome. When the impact of a mistaken count in one city or county is no longer insulated within the boundaries of a single State, but can directly affect the result across the entire Nation, it will be mandatory for losing candidates to demand a recount in almost every political unit in the United States.

Once any recounts get started all 180,000 precincts will be involved. A switch of votes in Illinois will no longer affect the outcome in that State alone. It might change the result nationwide. And so it goes down the line.

By the time candidates get through filing petitions for recounts the election outcome would be thrown into a state of utter confusion. It would take several months to exhaust the many avenues of legal proceedings and appeals that must be granted in order to satisfy the basic requirements of due process. All the while the country would be living in a giant nightmare without any recognized head-of-State. It would be an intolerable, unthinkable situation.

Mr. President, I also charge that the direct election of our Chief Executive would be divisive at a time when the people urgently need stability and accommodation. In my last speech on this subject, I quoted from no less than seven outside witnesses who made the same prediction before the Senate Judiciary Committee.

As Richard Goodwin noted:

> Direct election would not come at a worse time . . . All around us we see an increasing tendency to political fragmentation and ideological division. Direct election might almost be just the trigger, perhaps accidental trigger, to transform such divisions into political conflict.

Mr. President, direct election would feed the fires of dissension by fostering a proliferation of one-issue candidates, by allowing one region of America to control an election, and by increasing the chances for electing a President who does not have the votes or backing of a majority of the people.

What is more, Mr. President, direct election is destructive of our Federal system. Yes, Mr. President, I am aware of the intricate calculations made by certain authorities who seek to measure the relative voting power of different groups of citizens. I realize some of these studies claim to show a surprising disparity in voting power for residents of the smaller States.

But, Mr. President, what all of these mathematical-computer analyses are incapable of programing is the human factor. Even if these involved simulations are correct insofar as mathematical disparities are concerned, they do not and cannot take account of the human psychology which governs real-life politics.

These ivory-towered calculations blithefully fail to consider the identity of the States as communities of citizens who hold a feeling of association with each other. The harmful effect that direct election would have on this frame of mind was clearly described by Theodore H. White, who warned the Senate Judiciary Committee as follows:

> This new proposal would take away an equally vital part of the political system in abolishing the sense of community in our various States. The States vote as communities. They are proud of how they vote. People like to be New Yorkers or Kentuckians or Missourians or Hoosiers. To deprive them of this sense of belonging to a voting unit and being sunk in the electronic dots that go over a tote board, that could be perhaps the gravest political danger that this new resolution invites.

Richard Goodwin, a former assistant to Presidents Kennedy and Johnson, offered the same frank appraisal to the Senate committee. In commenting on the drastic effect which the Bayh amendment might have on the relative importance of large and small States, Mr. Goodwin noted that the psychology of presidential campaigns is one "in which today's candidates think in terms of States rather than numbers."

He added:

> Today, nearly every state has a swing vote which, even though very small, might win that state's electoral vote. Thus, nearly every state is worth some attention. If the focus shifts to numbers alone, then the candidate will have to concentrate almost exclusively on the larger states. This is where the people and where the most volatile vote is to be found.

The importance of the present system, as a means of supporting the federal system, was accurately recognized by Mr. Goodwin when he stated that:

> The Electoral College, along with the Senate, is one of the few mechanisms we have to influence those of the center of affairs to visit outlying citizens, so as to learn about them and pay some attention.

Mr. President, the fear that direct election will diminish the importance of peoples in small States, as well as minority groups in general, was also shared by another witness before the Senate Judiciary Committee, Representative WILLIAM L. CLAY, of Missouri. Representative CLAY told it as it is when he charged that the Bayh amendment will diminish or eliminate the voice of minorities in our system.

While Representative CLAY was particularly concerned about the dissipation of power for ethnic groups, he expressly added that "it affects other cohesive groups and it affects small States to the same proportion."

In other words, Mr. President, the same inherent nature of the electoral system that induces national candidates to listen to racial minorities requires that they listen to other minorities as well, including peoples in the sparsely populated smaller States.

Mr. President, the Senate committee also heard the same viewpoint from Prof. Charles Black of Yale Law School, who has written many articles about our constitutional structure. Professor Black emphatically declared his belief that the strength and durability of the American form of government lies within the Federal system—or as Professor Black put it, "with the fact that we have divided power between the National Government and the States."

One essential ingredient of this concept according to Professor Black, is "that in constituting the Government and selecting both the legislative and the executive branch, we have hitherto dealt with the States one by one as independent entities."

Indeed, Professor Black credits the electoral college system with being one of the "political safeguards of federalism in dealing with the States as entities." On the other hand, he cautioned:

> An election which pays no regard to State lines, which is simply totally nationwide . . . would tend to diminish this attention to the states, one by one as political entities.

Mr. President, speaking as one who has closely studied the workings of the political machinery by which our Chief Executive is selected, I am convinced these warnings are accurate. To my mind, the adoption of direct election as the method for choosing the President would constitute a mortal blow to our Federal system. Regardless of what the Whiz Kid computer crowd turns up in a laboratory setting, I predict that the use of direct election on a national scale would ultimately destroy the concept of States as separate, important entities having their own sense of community.

In fact, I view the direct election scheme as no less than a device for gnawing away the lifeblood of federalism as we know it. Once the interests and feelings of peoples in the small States are no longer considered important to the major candidates, and once a candidate can no longer afford to make concessions to the less populated areas for fear of jeopardizing his position in the larger States, then I do not care what the computers show. Direct election will tear down the last pillars of federalism. The final reservoir of power and influence held by the smaller States will crumble. With the disembowelment of the States as separate entities, the all-mighty Central Government will extend its presence, control, and influence into every detail of man's activity.

In short, the proposed change would do much to destroy the elements of accommodation and compromise that have kept our political system healthy. On top of this, it would weaken the already precarious structure of federalism. This is why I must view this so-called simple reform as being fraught with dangers so great that it is capable of undermining our entire society. It is one of the most far-reaching and radical schemes that has ever been put before Congress, and I must urge its rejection by the Senate.

Mr. President, although I cannot accept the direct election scheme as a sensible election reform, this does not mean I am opposed to making any changes at all in our national election machinery. To the contrary, I have introduced proposed legislation to carry out three substantial reforms of our voting procedures, and will have at least two more to suggest today.

First, Mr. President, I might mention that I have had the privilege to author an amendment to the voting rights law which will secure the right to vote for President and Vice President for every U.S. citizen without regard to residence requirements or where he may be in the world on election day. This amendment was sponsored by 29 other Senators, and it became a part of the law of the land on June 22 this year.

So that no one may doubt that this Congress has acted to improve our election machinery, I would like to run through four of the primary reforms made by the new law. First, with this law, Congress has abolished residence requirements as a precondition to voting for President. Second, for the first time, citizens who move into a new State after the voting rolls are closed will be able to vote for President and Vice President either by absentee ballot or in person in their last State of residence. Third, the new law grants to all U.S. citizens, both new and long-time residents of a State, the right to register absentee and to vote by absentee ballot in presidential elections. Fourth, it will require each State to keep its voting rolls open for all citizens up to at least 30 days before the election, whether or not they have moved their homes.

Mr. President, the combined effect of these changes might benefit more than 10 million Americans. Consequently, with this one action alone Congress will have expanded the franchise in presidential elections by nearly 14 percent.

But this is not all of the electoral progress that has been achieved in this Congress. Have we already forgotten the giant step taken when Congress reduced the minimum voting age to 18? Again, it was my pleasure to have joined as a sponsor of legislation which brought about this much-needed reform. In fact, I might recall that I was one of two Senators who appeared before the Senate Subcommittee on Constitutional Amendments to argue the case for handling this change by statute, rather than by the ponderously slow route of a constitutional amendment. This provision, too, could add up to 11 million new voters to our election rolls.

Therefore, it must be recognized that the 91st Congress deserves credit for having enabled over 20 million additional American citizens to join the ranks of eligible voters in future elections. This is an increase of almost 30 percent in the number of persons who participate in the election of a President.

For this reason, I do not think we have to hang our heads over refusing to accept the ill-considered plan which is now before the Senate. We have already made outstanding progress in clearing away the barrier of outmoded legal technicalities that deprive citizens of the right to vote. And, if Congress is still in the mood to take action in this field, I would like to suggest three other practical ways in which we could carry on our efforts to overhaul the Nation's election system.

First, I might mention a bill I have authored which is specifically designed to broaden the effective voice of our citizens in the selection of their Chief Executive. My bill, S. 1911, provides that the time for voting in presidential elections shall be expanded to allow each citizen a full 24-hour period during which he can vote. The legislation also provides that this period shall be uniform throughout the United States. This means that the polls will open and close across the Nation at the same moment.

Mr. President, from my experience in having been my party's nominee for President in 1964, I believe this easily implemented reform would make it considerably more convenient for millions of citizens to vote.

My study indicates there may be as many as 10 million Americans who were unable to vote in the last presidential election primarily because of the limited time for going to the polls.

For example, the 1968 postelection survey by George Gallup discovered that 3 million citizens were barred from casting ballots because they were unable to leave their work. Seven million more citizens were sick or disabled on the day of the election. In both cases, it is my belief that several millions of these persons and others who stayed home for different reasons would find it possible to vote if the voting period was stretched to 24 hours and if people were given a choice of convenient times for balloting on portions of 2 calendar days rather than only 1.

The period I have chosen, which is from 6 p.m. to 6 p.m., central standard time, is designed to permit voters to use the polls at the end of normal working hours on the first day, through the evening and night of that day, prior to going to work on the second day, and up to mid-afternoon on the second day. I am convinced that such a broad range of choices would enable many millions of citizens to find a time when it is easy for them to go to the polls, but who find themselves hindered from voting by temporary illness or unavoidable demands on their time.

As an additional benefit, my bill could eliminate many of the criticisms arising because of the reporting of significant election returns from some States before the polls close in all other States. With voting spread over a 24-hour period covering convenient parts of 2 different calendar days, the possible influence of vote projections should be considerably reduced. People in all areas of the country will possess an equal opportunity to vote at a favorable hour right up to the end of the election and, of course, the election will not stop in one region before it does in any other.

Mr. President, if we truly wish to retain momentum for the cause of election reform, I suggest it would be more constructive for us to undertake serious consideration of the type of change which I have recommended, rather than to be chasing abstract principles based upon computer simulations.

There is definite room for improvement in our election procedures. But it is not to be found in axing the electoral college. The area on which we should be focusing our attention is the quest to make it possible for the maximum number of citizens to register or to obtain ballots and to cast those ballots. In other words, we should put our minds to devising methods by which the greatest number of citizens will be eligible and able to vote.

As for the electoral college, I suggest the least tinkering we do with it, the better. One sensible change would be the elimination of the "faithless elector" problem. I would certainly accept the wisdom of requiring the electoral votes of each State or district to be cast automatically for the candidates winning that unit's popular vote contest.

Also, I think it would be a solid step toward bringing the electoral system into line with the 20th century if we would make it mandatory for each State to choose its electoral votes by the will of its people. While it is an almost forgotten fact, the Constitution allows the individual State legislatures to determine the manner by which presidential electors are chosen. In the early days of our history, the legislatures themselves often made this choice. In fact, the State legislature in South Carolina continued this practice until 1860 and it was used in Colorado in 1868 and in Florida in 1876.

Now, it is inconceivable that the people would ever want this right to be taken away from them again, and it is for that

reason I believe an amendment is in order to absolutely prevent the State from appointing electors by any means other than direct popular vote. Here is one setting in which direct election is the only acceptable method.

In summary, I can only say that many avenues are still open to us by which we can build upon the progress that has already been made in the 91st Congress on the road to election reform. While I must reject the direct election scheme as a means for choosing the President, I will be glad to devote my strongest efforts to making other practical revisions which will provide for the widest possible participation by our people in the election of their President.

## DIRECT ELECTION OF THE PRESIDENT

Mr. CANNON. Mr. President, before political parties, conventions and preferential primaries were conceived, it was the opinion of a majority of the delegates to the constitutional conventions that the people would not be sufficiently informed as to the qualifications of the various candidates to make a wise choice. Electors, on the other hand, carefully chosen in each State, would be among the most knowledgeable and capable persons in the country.

In a new Nation of a few States and small population, the electoral college was generally approved. Today, however, the complex elective process has eliminated the need for informed, knowledgeable, and capable electors. They perform a mere ministerial function, and even in the performance of that routine act sometimes betray the voters of a State.

Arguments favoring the abolition of the electoral college of presidential electors are so forceful and widely known as to make unnecessary the need for further comment. The electoral vote, though, is of far greater importance and of deeper significance.

While some delegates to the constitutional convention favored direct popular election of the President and Vice President, others argued that the electoral system providing for at least three electors for each State, regardless of population, gave the small States some protection against domination by large States. That argument is considered by historians to have had considerable weight in swaying the convention in favor of the electoral system and still carries weight today.

Retention of the constitutional guarantee of at least three electoral votes per State is still a substantial factor in the feeling of equality which smaller States have with regard to the large industrial States in our Nation. Fifteen States and the District of Columbia, all with populations of less than a million each, have three or four electoral votes apiece and an overall total of 58 electoral votes. In every instance, each of those electoral votes gives fewer people in lesser populated States a voice equal to a greater number of people in larger populated States.

For example, the Washington Post on Monday, March 3, 1969, published an editorial on the electoral college reform. It cited Alaska as having one electoral vote for each 75,389 persons whereas California has only one electoral vote for each 392,930 persons. Some use those figures to demonstrate an inequity between citizens of large and small States but again, the State with lesser population is merely retaining its constitutional protection of electoral vote minimums.

Mr. President, my bill, Senate Joint Resolution 33, proposes that the Constitution be amended so as to eliminate presidential electors and the electoral college. It proposes, further, the retention of the electoral votes on the basis of the whole number of Senators and Representatives to which a State is entitled, but in no case less than three electoral votes.

Briefly, after the date of a presidential election, the official election returns of each State would be forwarded to the President of the Senate. Early in January the votes would be counted and each person for whom votes were cast for President in each State and the District of Columbia would be credited with such proportion of the electoral votes as he received of the total popular vote cast by the voters for President. In computing the electoral vote, fractional numbers less than one one-thousandth would be disregarded.

The person having the greatest aggregate number of electoral votes would be President if he had at least 40 percent of the total number of electoral votes.

Otherwise, from the persons having the two greatest numbers of electoral votes, the Senate and the House of Representatives, sitting in joint session, would choose the President immediately by ballot. A majority of the votes of the combined membership of the Senate and the House of Representatives would be necessary for election. The same procedure would be followed for the election of the Vice President.

This is a so-called proportional proposal under which the States and the District of Columbia would retain their electoral votes but the office of Presidential elector would be abolished. Lists of the popular vote for all candidates in each State and the District of Columbia would be sent to the Congress as at present, and on January 6 the votes would be counted by Congress. Each State's electoral votes would then be divided among the candidates for President in proportion to their shares of the total popular vote within the State and within the District of Columbia. Computations would be carried to not less than one one-thousandth. Total electoral votes thus computed would be determined and a candidate who received at least 40 percent of such votes would be elected President.

If no candidate received at least 40 percent of the whole number of electoral votes, or if two persons received an identical number of electoral votes which would be at least 40 percent of the whole number, then from the candidates having the two greatest numbers of electoral votes for President, the Senate and the House, sitting in joint session, would choose immediately by ballot, the President. A majority of the votes of the combined membership of the Senate and the House would be necessary for a choice.

The Vice President would be elected in the same manner.

The proportional plan eliminates the unit rule, the office of elector, and contingent election in the House of Representatives with each State having one vote.

By retaining the electoral vote system, it retains State influence in presidential elections. Dividing the electoral vote of a State in proportion to the popular vote therein won by each candidate would make the electoral system much closer to a direct, popular vote, and it would more accurately reflect the popular vote than the existing system.

The distortion built into the electoral vote system would remain, however, with the proportional plan, because each State would continue to have two electoral votes for its two U.S. Senators.

The plan would reduce the chances of electing a President with less than a majority of the popular vote, without eliminating entirely the political balances achieved with the electoral vote system.

The proportional plan, however, would tend to favor the middle-sized and smaller States which are more politically homogeneous than the large, pivotal States. In the 1896 presidential election, Bryan would have won instead of McKinley, under the proportional plans. Bryan had only 47 percent of the popular vote and carried only 17 States, of which 11 were in the South. His large electoral votes in the Southern States, however, plus the electoral votes he would have won in the Northern States, would have beaten McKinley who, although he carried 28 States, would have lost many more electoral votes outside the South because of Democratic minority votes than he would have gained from Republican minority votes in the solidly Democratic South. Bryan would have been elected as a "minority" President.

The same would have happened in the 1880 election. The Democratic candidate, Hancock, with 7,000 fewer popular votes than the Republican, Garfield, would have won under the proportional system. The Democratic candidate could have lost one of the large, Northern, pivotal States by under two electoral votes, but could have won one of the Southern States by seven or eight electoral votes.

Electoral vote totals would have been much closer under the proportional system than under the existing system. McKinley, for instance, would have won in 1900 under the proportional system by 217.3 to 217.2 electoral votes, whereas under the existing system he won by 292 to 155. The results of certain other elections would have been changed. In 1876, Tilden, the Democrat, would have beaten Hayes, the Republican, by 188.1 electoral votes to 177.1 under the proportional system—Hayes' victory was by 185 to 184. In 1888, Cleveland, the Democrat, would have beaten Harrison, the Republican,

by 202.9 to 185.8—Harrison's victory was by 233 to 168. In 1960, Nixon, the Republican would have beaten Kennedy, the Democrat, by 266.1 to 265.6—Kennedy's victory was by 303 to 219.

The proportional plan would eliminate the "exaggeration factor" in the winner's electoral vote margin under the existing system, but because of electoral vote distortion, it would not always reflect accurately the popular vote as it is demonstrated by the elections of 1880, 1896 and 1960. Nevertheless, of all the reform proposals, the proportionate system comes closest to electing a President by popular vote of the people while at the same time preserving each State's relative electoral strength in the election of the President.

OFFICE OF PRESIDENTIAL ELECTOR

This potential danger in the electoral system would be eliminated under the proportional plan.

ABOLITION OF THE UNIT-RULE

This would, of course, be eliminated under the proportional system.

CONTINGENT ELECTIONS IN THE HOUSE OF REPRESENTATIVES

The proportional plan replaces contingent elections in the House when each State has one vote, with election by a joint meeting of the Senate and the House with each Member having one vote and a majority of the votes of the combined membership being necessary for a choice. This is a progressive step forward in that it eliminates an unfair "compromise" felt to be essential for the ratification of the Constitution, and it is a substitute for the electoral colleges. Under Senate Joint Resolution 33, such an election would be carried out by Members of the House, all of whom would be newly elected, and by Senators, one-third of whom would be newly elected.

It would be compatible with federalism in that representatives of States and of people would be making the choice.

On the other hand, section 4 of Senate Joint Resolution 33 no more solves the problem of how to place the District of Columbia into a contingent election system than does the 23d amendment. Second, 12 percent of the contingent electors—the 66 Senators who were not up for reelection the previous November—would not be newly elected. These could be in sufficient number to swing a close, contingent election yet some of them would represent the choice of voters 4 years earlier.

The concept is a vast improvement on the existing system, but it does contain some flaws of its own. A possible significant flaw is that if the Presidential candidate is a first term candidate and expects to run for a second term, his election by the Congress could make the President too dependent upon Congress.

LARGE PIVOTAL STATES

As in the direct, popular plan, the proportional system, by splitting the vote of the large pivotal States, would also diminish the emphasis now placed upon such States. A closely divided popular vote would result in a closely divided electoral vote.

In addition, the influence of minority groups in such States on the outcome of election would be reduced because they could not swing the State's entire bloc of electoral votes. The political balance between urban and nonurban areas in the Nation could be altered to the disadvantage of the former.

However, States with large electoral votes, by virtue of large populations, would continue to be prime sources of substantial electoral votes. For instance, one-half of the electoral votes of New York would be worth more than the combined electoral votes of the seven smallest States. Candidates would still be expected to be greatly concerned with the voting results in such States.

SURE STATES

Under the proportional plan no State would be a sure State to the extent that one candidate would win all its electoral votes. Splitting the electoral vote statewide would strengthen the two-party system and encourage the development of maximum party support in every State.

Nevertheless, since the smaller States tend to be more politically homogeneous than the large, pivotal States, States with dominant parties may well continue that way to the advantage of the candidate of such a party. This consequence might be countered by splinter groups breaking off from the dominant party or by the formation of new parties each of which would be seeking a share of the electoral vote of a State.

It cannot be predicted with complete certainty how the sure States would vote in a proportional scheme but their influence on the presidential election would be substantially greater than now. Small popular vote margins in these States could produce larger electoral vote gains than large popular vote margins in heavy voting States where the parties were closely competitive.

EFFECT ON OUR TWO-PARTY SYSTEM

The effect of the proportional plan on the two-party system has been noted to some extent. It would be in good part similar to the effect that direct, popular election would have; that is, there would be a fair possibility of the development of splinter and minor parties. Every party would get its share of the electoral vote, and minority groups would find this a good way to maximize their potential for influence.

Proponents of the proportional plan deny this consequence, arguing that most voters want winners and will not be apt to cast their votes for a third-party candidate who has no chance of winning the national election. The requirement of having to secure only 40 percent of the electoral votes for election is cited as a deterrent to minor parties because it insures that a third party would not be able to throw the election into the Congress with less than 20 percent of the total electoral vote.

It is also argued that the proportional system, in dividing electoral votes so as to more accurately reflect popular votes, would minimize the influence of pressure factions and multiple parties, particularly in what are now large, pivotal States. Under the present system of the unit rule, a minor party in a State such as New York can throw the entire election in that State to one major party or the other, depending upon whether it supports the presidential candidate of one of the major parties or supports its own candidate. Such would not be possible under the proportional system.

However, the proportional system, by allowing minority groups to secure a percentage of the electoral votes in a State, might result in diminished activity by the major parties to secure the votes of minority groups. A strength of the existing, unit rule system is that particularly in the large, pivotal States, the major parties recognize and seek to represent the legitimate interests of minority groups. The proportional plan, by reducing the political importance of minority groups in such States, would make it possible for the major parties to give less attention to the interests of these groups. They could, in consequence, become underrepresented with a disadvantageous effect to the national political balance.

INFLUENCE OF FRAUD OR ACCIDENT

In a close race, the influence of fraud or acts of God could be substantial in moving an electoral vote or part of a vote either way in several States. Aggregate totals of electoral votes could be sufficiently changed to affect the outcome of the election.

It would not, however, be essential to nationalize the State laws on recount and election contests as it would be under the direct, popular election system. Far more control over the elections would be left to the States as at present.

EFFECT ON ELECTION DATES

The proportional system would not change the existing election date structure. If an election were to be decided by the Congress, a resolution thereof would probably be secured prior to Inauguration Day, January 20. The possibility of obtaining a resolution of a contingent election prior to January 20 would seem to be greater under the method proposed in Senate Joint Resolution 33, than by the runoff system proposed by Senate Joint Resolution 1, unless the dates of the general election and the runoff election were advanced for the latter system.

VOTING QUALIFICATIONS

Under section 2 of Senate Joint Resolution 33, the determination of voting qualifications would be left to the States where they have historically rested. Section 2 would authorize the States to provide lesser residency requirements for voting in presidential elections. The effect of this provision would be to authorize State legislatures to take this step directly without the necessity of amending the constitutions of the States first. Congress, of course, would be authorized to prescribe voter qualifications for the District of Columbia.

REGULATION OF THE MANNER OF HOLDING SUCH AN ELECTION

The "manner" clause in section 2 of Senate Joint Resolution 33 is the same as that in article I, section 4, of the Constitution. Congress would be granted by

this provision an authority it does not now possess over presidential elections. As a consequence, it could enact uniform standards for recounts and contested elections—although it probably will not—absentee voting, counting and canvassing of votes, prohibitions and penalties, and so forth. The requirement in section 4 that State returns be sent to the President of the Senate by 45 days after the November election, "or at such time as Congress shall direct," provides flexibility so as to allow sufficient time for the resolution of recounts and election contests by the States prior to the counting of the votes by Congress on January 6. Since Senate Joint Resolution 33, as a whole, leaves to the States primary responsibility over elections under the proportional plan, it would remain to be seen if Congress would exercise such authority unless there were urgent necessity for so doing.

ENTITLEMENT TO INCLUSION ON THE BALLOT

Senate Joint Resolution 33 contains no such provision. Authority in this regard would remain with the States subject to adherence to the standards of the equal protection of laws clause of amendment XIV—see *Williams* v. *Rhodes*, 393 U.S. 23, 1968. No possible congressional regulation of the nominating process would be authorized by Senate Joint Resolution 33.

CANDIDATES FOR PRESIDENT AND VICE PRESIDENT AS A PAIR

This requirement is not included in Senate Joint Resolution 33. It is a practical necessity in a direct, popular election system with a runoff in order that the same pairs of candidates who ran in the general election be the candidates in a runoff.

Under the existing system where the House chooses the President in a contingent election and the Senate chooses the Vice President, the two officials thus elected could be chosen from different political parties.

The same result would be possible under Senate Joint Resolution 33, but highly improbable since the majority of Members of the Senate and House combined, voting in joint session, and voting as party representatives, would undoubtedly select the presidential and vice presidential candidates of their own party.

Of course, if the majority of the Senate and the House were of a party different from that of the presidential and vice presidential candidates who had received the greatest number of electoral votes absent 40 percent, the Congress could choose as President and Vice President the candidates who had received the second highest number of electoral votes. The same result would be true as regards a runoff election under the direct, popular election system however.

About the only way to circumvent such a result would be to declare elected those candidates for President and Vice President who had received a plurality of the electoral votes—or of the popular vote under the direct, popular election system. Such a standard would have so many disadvantages, however, that it is perhaps feasible to adopt the method of contingent election by the Congress with the awareness that the possibility exists that the candidates who had received the second highest number of electoral votes, absent 40 percent, could be elected President and Vice President.

THE 40-PERCENT ELECTORAL VOTE REQUIREMENT

This is a virtual necessity under the proportional plan since the aggregate electoral vote would more closely reflect the popular vote than under the existing unit rule system. Reasons for a 40-percent electoral vote standard are substantially the same as for a 40-percent standard under the direct popular election system. Arguments contrary to such a requirement would also be substantially the same as under the direct popular election proposal.

It is essential if the proportional plan is to work with a minimum of elections thrown into the Congress.

DEATH OF THE WINNING PRESIDENTIAL CANDIDATE

Senate Joint Resolution 33 contains no provision in this regard where a winning presidential candidate with 40 or more percent of the electoral votes dies before the popular votes are counted and the appropriate apportionment is made by the Congress in January.

The situation would seem to be somewhat the same as that commented upon in a House committee report on the resolution which became the 20th amendment.

> An analysis of the functions of Congress indicates that no discretion is given and that Congress must declare the actual vote (where the President-elect dies between the voting by the electors and the counting of the electoral votes by Congress). The votes at the time they were cast were valid. . . . Consequently, Congress would declare that the deceased candidate had received a majority of the (electoral) votes. (H. Rept. 345, 72nd Congress, 1st Sess., p. 5 (1932).)

Then, pursuant to section 3 of amendment XX, the Vice-President-elect shall be sworn in as President.

Senate Joint Resolution 33 contains no provision declaring what would happen should the winning presidential candidate die between election day in November and the counting of the popular vote and the apportioning of the electoral vote by Congress in January. Since the winning candidate would technically be the President-elect even before Congress counted and apportioned the vote—assuming the latter function to be primarily a ministerial duty—the vote for him would be counted even though he was deceased, and the Vice-President-elect would be sworn in as President on Inauguration Day—amendment XX, section 3.

DEATH OR WITHDRAWAL OF ANY CANDIDATE FOR PRESIDENT OR VICE PRESIDENT

Senate Joint Resolution 33 makes no provision for this contingency, and so the matter would be handled as it is now with the national committees being empowered by the conventions to name a substitute candidate up until the day before election day.

DEATH OF BOTH THE PRESIDENT-ELECT AND THE VICE-PRESIDENT-ELECT

Senate Joint Resolution 33 makes no provision for this contingency. Section 3 of amendment XX, which declares that Congress may by law provide for the case wherein neither a President-elect nor a Vice-President-elect shall have qualified, would be applicable, and under title 3, United States Code, section 19, the Speaker of the House would resign from the House and be sworn in as Acting President.

PROVISION FOR RESOLUTION OF A TIE

Since it is possible under Senate Joint Resolution 33 for two candidates to be tied in electoral votes at 40 percent or 42 percent each, section 4 thereof provides for the contingent election of the President from the two such candidates by the Congress in joint session.

If three candidates are tied at 33 percent of the electoral vote each, for instance, the contingent election would still go to the Congress assembled in joint session pursuant to section 4 of Senate Joint Resolution 33.

SIMPLICITY AND COMPREHENSION

The proportional plan would have the same defects in this respect as the present system, that is, the necessity to understand the electoral vote system. An added confusing element could well be the apportionment of the vote of a State among the candidates in the ratio of the popular vote they had received therein with the figures carried to the nearest thousandth. While such figuring by Congress should be completed, with modern equipment, in a relatively short time, it is possible that the apportioning could carry over to the following day. In such circumstances lack of voter understanding could exist and popular anxiety arise.

The 40-percent requirement could be another confusing element.

It is not really possible to say how understandable the proportional system would be except that it would not be as comprehensible as direct, popular election.

EFFECT ON FEDERALISM

The proportional system should have an effect upon the maintenance of federalism that is less than the existing system but greater than direct, popular election. The States would remain as electoral units and would retain authority over voter qualifications. Congress would be granted increased power over the regulation of presidential elections.

The subtle balance of the existing system would be altered, however. Urban minorities in large, swing States would lose the significant role they play in the election of the President, and the executive branch might not be as responsive to their needs as under the present system.

Smaller States that are politically homogeneous would have larger roles in the election of the President, however, and this consequence might be to the advantage of federalism where such States tend to be somewhat conservative.

Mr. President, a choice, if necessary, by the House and the Senate would be less cumbersome, less time-consuming and less expensive than a run off election.

Unlike any of the other proposed alternatives, a proportional vote amendment would best reflect the popular strength of the candidates and still maintain our federal system. The proportional automatic system comes clos-

est to electing a President by popular vote while at the same time preserving each State's relative electoral strength.

In place of the present method which diminishes the people's voice in the most important decision the U.S. citizens can make, a proportional plan would eleminate arbitrariness and enhance the role of the individual and the State in electing the President.

In conclusion, I believe that the proportional plan for distribution of electoral votes down to one one-thousandth of a vote meets the aims of the proponents of the direct popular election system while at the same time preserving the constitutional balance of the States by retention of the electoral votes.

## DICKEY-LINCOLN AND THE ELECTRIC POWER SHORTAGE

Mr. MUSKIE. Mr. President, today marks the third day in a row of a serious electric power crisis. This power shortage threatens the health and safety of millions of citizens.

This crisis is the result of an inadequate national policy and an obstinate industry which for many years refused to acknowledge the imminent crisis and which still refuses to take adequate steps to protect the public.

Two days ago, while the lights in the Chamber were dimmed, the House of Representatives refused to appropriate additional planning funds for a viable and necessary public power project.

When the authorization for the Dickey-Lincoln School hydroelectric facility was passed in 1965, consumer rates for electricity in New England were the highest in the Nation because New England had no "yardstick." This situation has not changed.

At that time, New England and the east coast faced a shortage of fuel and electricity. This situation has not changed.

And at that time, it was clear to many people that the shortages of electric power in the East were becoming so serious that a crisis was imminent. Since then, we have had a major blackout and a growing crisis of unreliable and inadequate electric power.

Blind opposition to this project threatens the health and welfare of all the people in the Eastern United States. It is the kind of attitude which weakens faith and confidence in both public and private institutions.

As we run out the string on available sources of pollution-free electric power, the pressure to continue with the construction of the Dickey Dam will increase. The sooner the House and the private utilities recognize this fact, the sooner the public will be protected.

## ARAB HIJACKERS

Mr. GOLDWATER. Mr. President, the American people have been aroused over the crimes perpetrated by the Arab guerrillas against innocent people more than anything in my memory. In seeking an answer, we harken back to the days of piracy on the Barbary Coast and how the United States handled that situation, but it can be argued that times have changed and that other nations might not stand by for the type of reprisal most Americans feel should be brought to bear. Frankly, I have yet to see a sensible, workable plan to this end, let alone reprisal, so an editorial written by a former colleague and leader of ours, William Knowland, published in the Oakland Tribune, brings a ray of light to the prevention of these outbursts. I ask unanimous consent that the editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Oakland (Calif.) Tribune, Sept. 9, 1970]

AN ULTIMATUM TO THE ARABS

The outrageous crimes against civilized society being committed by vicious air pirates must come to an end.

Arab terrorists this past weekend once again vented their ugly hatreds and cowardly brand of warfare upon innocent men, women and children of several nations.

It is obviously no difficult task for armed men and women to commandeer one of today's passenger-laden jet airliners in midflight. No amount of special passenger precautions can ever be devised to successfully detect and thwart every resourceful and conscienceless air criminal.

The only certain deterrent to air piracy is the absolute knowledge that no matter where the hijacked plane eventually lands on the face of our earth, certain, swift and the harshest of punishment awaits the hijacker.

There can be no bargaining for amnesty—no matter what the stakes—and no safe haven in any land, no matter whose politics are involved.

The success, thus far, of the Arab terrorists in three hijackings this past weekend is directly attributable to the fact that no such certain punishment awaited them upon their return to Egypt and Jordan.

For this, the blame rests squarely upon those Arab leaders who, in the past, have shown either an inability or unwillingness to capture and punish guerrilla hijackers. Such hijackers too often found their actions not only tolerated but even encouraged. Many now walk the streets as heroes in their homelands.

This is no time for further handwringing and indecisive "searching for solutions" on the part of our own government and other responsible governments of the world. There is only one solution: to force the Arab nations henceforth to treat their hijacker terrorists as the vicious criminals that they are.

To accomplish this, we propose that:

1. All international air traffic to Arab nations immediately be suspended.

2. All nations and all airlines henceforth refuse air travel to any passenger bearing a passport from an Arab nation implicated in air hijacking or in giving refuge to the air pirates.

The impact of any such air travel boycott would, of course, be tremendous. It should bring tremendous internal pressure to bear upon the leaders of the Arab countries. Arab citizens would most certainly insist that prompt action be taken to restore their access to the world's airways.

Service could be resumed to any one of the nations involved as soon as firm assurances were received that all hijackers would face certain capture and imprisonment and that full restitution would be made for any injury or death to a passenger or crew member and for any economic loss to airline carriers.

Until such individual commitments were made, the Arab world would rightfully suffer the isolation from modern air travel that the actions of its guerrillas and inaction of its leaders had earned for it.

The present conduct and ultimatums of the Arab hijackers are nothing short of barbaric. They must no longer be tolerated by the responsible nations of the world.

## INFLATION GRINDING DOWN

Mr. PEARSON. Mr. President, yesterday's report from the Bureau of Labor Statistics that the Consumer Price Index has registered its smallest increase since December 1968, is indeed very encouraging news. This report, along with other indicators, suggests that the inflation which has plagued this economy for the past several years is grinding down. It is still not possible to say that the inflation has definitely and finally been stopped. However, accumulating volumes of evidence suggest that the policies of the Nixon administration are proving to be effective. This is good news for the American consumer and for the economy in general.

This latest report of the decline in the cost of living increase follows the announcement 2 days ago that the major banks were lowering their prime interest rate. There are also increasingly favorable reports about the rate of business activity.

Thus we are beginning to see the possibility of the inflation being controlled and the economy beginning to move forward at full steam. The Nixon administration had made the attainment of full prosperity without inflation one of its principal goals. This goal has not yet been fully realized, but we are well on the way to achieving it and this is indeed an historic accomplishment.

## INCREASED WHITE HOUSE EXPENDITURES

Mr. DOLE. Mr. President, last week the junior Senator from Hawaii (Mr. INOUYE) protested what he said are increased White House expenditures for staff.

The Sunday previous, the Washington Post published a letter from Caspar W. Weinberger, Deputy Director of the Office of Management and Budget, pointing out that the White House cut back by $650,000 on its fiscal year 1971 budget and by 28 in personnel.

I ask unanimous consent that Mr. Weinberger's letter be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

WHITE HOUSE ON STAFF EXPENSES

An article appearing in your paper recently left the impression that the White House was doubling its staff in fiscal year 1971. Such an impression would be not only unfortunate, but quite incorrect.

The appropriation requested for the White House Office for fiscal year 1971 is in fact a decrease from the actualities of fiscal year 1970 both in personnel and in funds. For fiscal year 1970 the appropriation for the White House Office was $3,940,000, with another $2,500,000 appropriated for special projects. In addition, personnel detailed to the White House Office from the departments and agen-

cies under authority of law resulted in basic compensation costs to those departments and agencies at the rate of $2,820,000. Thus, the 1970 level of operation was in excess of $9,200,000, involving 576 employees.

The President, when preparing the 1971 fiscal year budget, decided to discontinue the use of the special projects fund and personnel details from other agencies to augment funds available for the regular White House Office staff. He has thereby adopted a policy of bringing all regular employees of the White House directly onto the White House payrolls. This seemed to the President a more honest way of presenting the full cost of the White House operation.

Therefore, the budget request for fiscal year 1971 is for 548 employees, and funds in the amount of $8,550,000 for the White House Office. This is a substantial *decrease* of more than $650,000 in funds, and 28 in personnel—a lesson that should certainly not be lost on those who have attacked the President without benefit of the facts.

CASPAR W. WEINBERGER,
*Deputy Director, Office of Management and Budget.*

WASHINGTON.

Mr. DOLE. Mr. President, I believe that President Nixon is doing a remarkable job in holding the line on his White House budget and staff, especially when one considers that he has been faced with a Democrat-built inflation and an ever-burgeoning bureaucracy that calls for more and more attention from the White House.

I believe those who complain about White House costs should look at what has happened to their own costs in the last 2 years and maybe the increase in salary they gave themselves just last year.

I believe that we who served in Congress when the custom at the White House was to hide the White House staff on departmental payrolls should praise the President for his honesty and openness. It is a refreshing change that I am sure the junior Senator from Hawaii will appreciate.

## THE GENOCIDE CONVENTION: WHAT DOES IT MAINTAIN?

Mr. PROXMIRE. Mr. President, I have been speaking before the Senate for almost 4 years urging our ratification of the Genocide Convention. It is pertinent to review the major features of this human rights convention.

Genocide has been defined as any act designed to destroy a national, ethnic, racial, or religious group. Member nations, who are parties to the convention, agree to punish any person committing an act of genocide, committing an act inciting genocide, or engaging in complicity in genocide.

The convention also makes provision for the punishment of any person, be he public official or private citizen, who commits an act of genocide. I would like to point out that the convention intends for each member country to bring to trial individuals who have committed acts of genocide within their territory. The convention does not establish a world court, as some have maintained. It does allow, however, for an international penal tribunal whose jurisdiction has been accepted by the involved parties to try those charged with genocide. It is important to emphasize again that the convention does not establish any world court, nor does it supersede the authorized courts of any nation.

Article VII states that genocide will not be considered a political crime and extradition should be granted in accordance with the laws and treaties of the country. If there is a question or dispute between any two countries, article IX allows for the dispute to be settled in the International Court of Justice.

From this brief survey of the basic points of the Genocide Convention, it is clear to me that it would be in the best interest of the United States for us to ratify this human rights document. We must go on record as completely opposed to this monstrous crime.

## DEATH OF VIRGINIA BLUE, STATE TREASURER OF COLORADO

Mr. ALLOTT. Mr. President, I wish to express on behalf of Mrs. Allott and myself and for all citizens of the State of Colorado our deep sorrow over the loss of Mrs. Virginia Blue, our beloved State treasurer, who died on Wednesday, September 16.

Virginia Blue was an uncommon woman. In this age when we increasingly hear about women's rights, she, decades ago, began practicing women's responsibilities in a most exemplary and outstanding fashion. Her contributions served Colorado as well as the Nation.

She was the first chairman of the Status of Women, an organization dedicated to the equality of womanhood in our system.

She was at one time president of the American Association of University Women and later served on the National Committee for the American Association of University Women.

A prominent realtor in Colorado for many years and a partner in Blue and Blue Realty, she was a member of the National Association of Real Estate Boards and in 1962 became the first and only woman ever elected Denver Realtor of the Year.

She was one of only five women ever elected to the board of regents of the University of Colorado.

In her capacity as State treasurer, she also served as chairman of the Association of Western State Treasurers.

Her many accomplishments are noted in Who's Who in Colorado, Who's Who in the West, Who's Who in American Women, and Who's Who in Education.

She was a recipient of the Norlin Award of the University of Colorado for outstanding alumni.

Her prominent efforts included being selected the first woman to serve on the revenue and estimation committee of the State of Colorado, the first woman member of the University of Colorado Alumni Association, and 4 years ago, when she was elected State treasurer, she became the first woman ever elected to an executive office in the State of Colorado.

Her awards and achievements could fill many pages. However, Virginia Blue, despite all of her many prominent ventures, was down to earth and always direct in her approach.

All Coloradans feel her loss deeply, but most especially, we send our heartfelt sympathy to her husband, Jim, and her family who loved her so much.

An editorial published in the Rocky Mountain News of September 18, paid Virginia Blue a most fitting tribute. I ask unanimous consent that the editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Rocky Mountain News, Sept. 18, 1970]

VIRGINIA BLUE

In the death Wednesday of State Treasurer Virginia Neal Blue, Colorado loses a gracious woman as well as a dedicated state executive who more than lived up to every campaign promise she ever made.

Before she was cut down by an illness related to cancer at age 60, her career had so many facets it is difficult to see how one person made so much of time.

She won many high national honors in her lifetime—as a banker, as a University of Colorado regent, as a longtime Denver realtor, as Colorado's treasurer these past four years, first woman ever elected to such a high state executive post.

Despite the acclaim, she never forgot the little things of life that made her, as Gov. Love put it, "a great person and a great lady—we all will miss her very much."

She proved out the observation that a small town bank is one of the best training grounds for life. She was the daughter of the late Meeker banker, Joseph M. Neal, who first came to Colorado from Missouri at 21 in 1896 to teach school 35 miles from Meeker.

At the turn of the century, he entered the cattle business and from 1917 to 1934 he operated the largest cattle ranch in the Meeker area.

After she was graduated from the University of Colorado in 1931 with a degree in finance, Mrs. Blue returned to Meeker and a post in her father's bank.

As state treasurer she made it a point to visit scores of Colorado banks. She always said the real way to learn about a bank is to walk inside and talk to its officials. She made it a point to know a lot about the institutions in which state money was lodged as certificates of deposits.

Mrs. Blue had $190.7 million in state funds invested in government securities and deposit certificates in 212 banks.

When she first campaigned as a Republican for state treasurer, she said the millions of dollars in the state treasury should be put to work more effectively to earn interest for taxpayers between the time the revenues flowed in and the time the state paid out the money.

As deputy treasurers she brought in first Mrs. Dorothy McRae and later Mrs. Julia E. Swearingen. And for the first time she brought in a fulltime investment officer, Mrs. Marguerite Larsen.

And the interest really rolled in. For the year ended June 30, it hit a whopping $11.2 million. The year before that it was an all-time record $7.1 million. Before that it was $5.1 million and before that $4.5 million.

The News observed recently Mrs. Blue and her tidy money managers were better at the task than the males who preceded them.

She had exquisite taste. When flowers came in, they didn't just decorate the front office but the whole office and the back rooms.

One night in mid-summer the Business and Professional Women's Club presented Mrs. Blue an award in Fort Collins and accompanied it with a huge wreath of red roses bound together by wires.

Mrs. Blue was tired that night, but the state treasurer spent more than an hour near midnight in her motel room unbinding the wires into which the roses were woven, and packing the bright roses in wastebaskets filled with ice—so they would be fresh when carried back to the Statehouse.

Mrs. Blue seemed to live by this philosophy: To heal old wounds and get people back on the track—and this applied to bankers and money dealers and everyone with whom she dealt.

Colorado has gained much by the likes of this lady.

## PROSPECTIVE APPEARANCE OF VICE PRESIDENT KY, OF SOUTH VIETNAM

Mr. MILLER. Mr. President, like many Senators, I have become increasingly concerned about the prospective appearance of Vice President Ky at a Victory-in-Vietnam rally in the Nation's Capital.

Already there has been too much divisiveness among the people of our country over the war—most of it, I must in fairness point out, by those who follow a peace-at-any-price approach. Now that there have been fair debate and decision in Congress, with a strong majority supporting our President in his efforts to disengage from the war as soon as practicable, consistent with our commitments, reinforced by national polls reflecting comparable sentiment among our people, it is important that efforts toward unity—not disunity—should be made by all factions.

The appearance and, no doubt, the address by Vice President Ky at the rally would have a divisive, rather than a unifying, impact at this time. I express the hope that Vice President Ky will understand this and will act accordingly, in the best interests of both the United States and his own country, which the United States has for so long and at such great cost supported in the cause of freedom.

## A GREAT DAY FOR KANSAS

Mr. DOLE. Mr. President, many encouraging observations have been made concerning President Nixon's appearance at Kansas State University, September 16.

Not the least of these is that the President's visit provided the Nation an opportunity, via national television, to see and hear the reactions of more than 15,000 students and faculty at Kansas State University.

An accurate appraisal of this reaction at Kansas State is provided by Thad Sandstrom, vice president of WIBW–TV in Topeka, Kans. His views were broadcast in an editorial on September 20.

I ask unanimous consent that Mr. Sandstrom's remarks be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

WIBW EDITORIAL

This was a great week for Kansas. On Wednesday, President Richard M. Nixon flew to Manhattan to speak at the Landon Lecture Series at Ahearn Fieldhouse at Kansas State University. Perhaps no event in history has reaped so much good publicity nor done so much for the image of Kansas and its youth. The President spoke on "Order in Our Society."

When a couple of dozen creepy kids who had no common courtesy for the office of the President nor for the 15,500 who came to listen to the President began shouting, it was obvious they were really in the minority—by a ratio of about 500 to 1—and about as effective as a raindrop in the ocean. The response of the K–State students was overwhelming. With coverage on all three national television networks and a number of independent stations, the radio networks, and numerous big city daily newspapers from coast to coast, it was indeed a bright day in America and in Kansas—for clearly the K–State students supported the concept of working within the system to bring about change.

What impressed us was the response around the country. KSU President, Dr. James A. McCain, received telegrams from all over America applauding K–State and its students. In New York City the next day, I visited with several people. Everyone brought up the Nixon speech at K-State. They commented on the "good-looking students," the well-behaved, respectful crowd, and the enthusiasm. Indeed, all three major New York TV stations featured lengthy stories on the late evening newscasts and one New York station re-ran the entire speech Wednesday night. The New York Times was most complimentary of K–State and termed it Nixon's finest performance.

So . . . it was a great day for Kansas and especially Kansas State for it showed again that here in the heartland of America are the really great people of our country—the ones whose background and up-bringing give them a really fine understanding of what life in America is all about.

To the Kansas Congressional delegation—especially Senator Bob Dole—a vote of thanks for urging the President to come to Kansas State.

To Kansas Governor Robert Docking—a salute for the non-partisan way in which he welcomed the President to Kansas.

To Alf Landon—thanks for giving K-State the vehicle through which it has been possible to attract men of great distinction to Kansas State.

But a special vote of thanks goes to K-State's President, Dr. James A. McCain. It was Dr. McCain who envisioned the Landon Lecture Series. His idea of having Governor Landon invite men of both parties to come to K-State has given Kansas State a *real* place in history.

Indeed . . . the Landon Lecture Series has made a great university even greater and on Wednesday showed America on national television that in Kansas . . . the people make the difference.

## SERIOUS CONDITION OF AMERICAN RAILROADS

Mr. ALLOTT. Mr. President, the recent collapse of the Penn Central Railroad and the difficulties facing other lines have brought into dramatic focus the very serious condition of a vital means of transportation.

In the spate of newspaper commentary on the Penn Central debacle, one of the most articulate analyses was written by Tom Shedd, the editor of Modern Railroads. Mr. Shedd points out the very serious problems created for the Penn Central by management conflicts and by haphazard diversification. He goes on to comment on the broader problems facing the entire industry and makes this wise comment:

The time is long past when the railroads could consider themselves as a strictly private enterprise like a department store or a widgit-maker. Yet to completely nationalize the U.S. railroads, as has been done in other countries of the world, would be fantastically expensive.

He urges the industry to demonstrate that it is trying to solve its own problems before seeking Federal help. In the months ahead, I am certain that Congress will have to grapple with the serious situation of the rail industry—a situation created in part by unwise governmental policies.

Mr. Shedd's wise observations are most helpful and I am sure they will be of interest to Senators.

Mr. President, I ask unanimous consent that the editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE CHOICE: CONSTRUCTIVE ACTION NOW—OR NATIONALIZATION

(By Tom Shedd)

The collapse of Penn Central is a shocking event. It is especially jolting in view of the high hopes that were held for the Penn Central merger two years ago.

And yet PC's petition to reorganize under Section 77 of the Bankruptcy Act can prove to be a turning point in the history of rail transportation in the U.S. Depending mainly on the reaction in Washington, but also on what the rest of the industry does, this event will either open the way toward restoration of the railroads as healthy industry—or it will solidify and make irreversible the present trend toward some sort of government takeover.

(The first reactions in Washington were not too encouraging. Rep. Wright Patman (D. Tex.) seemed determined to find a scapegoat—predictably the fat, rich, sinister bank interests. The role of mankind in the conduct of the railroad business might well stand some study; but it apparently never cocurs to politicians like Rep. Patman that the government's own policies toward the railroads are a fundamental—and possibly the single most important—cause of the disaster.)

Exercising 20–20 hindsight, it is not too difficult to find some reasons for what happened at Penn Central.

To begin with, the former Pennsylvania and New York Central railroads were the wrong merger partners. As many observers contended at the time, a better balanced combination would have been produced with NYC–C&O–B&O in one company, and PRR–N&W in the other. Instead, we now have Penn Central and the proposed N&W–C&O merger. The latter will doubtless be long delayed, if not killed altogether as a result of PC's troubles.

MERGER PRICE TOO HIGH

Moreover, it now seems clear that Penn Central accepted too many onerous conditions in order to get its merger through. It signed a highly restrictive labor agreement; it also agreed to take on the operating losses of the New Haven railroad. As was evident to some railroaders even at the time, these handicaps were too much to pay for the merger.

Penn Central was also caught in the general economic squeeze—the "liquidity crisis" that is affecting many businesses and individuals today. One cause of this liquidity crisis has certainly been the 25 years of basically "boom psychology" and inflation that have triggered a rapid rise in debt of

all kinds. We are now reaping the inevitable result of this kind of psychology; if we are not very careful the present "crisis of confidence" could easily lead to a depression like that of 1929.

Beyond these quite evident reasons for PC's downfall lie other factors that are perhaps less obvious. The internal conflicts between the former NYC and former PRR officers—"the green team and the red team"—have been widely noted. Both companies had many very competent managers; but the PRR clearly dominated the top managerial positions in the early days of the merger, and far too many of the young, aggressive team that NYC had built up became discouraged and left. (Interestingly, ex-NYC-ers are now playing a much more prominent role.) As one veteran observer told us, "No corporation is strong enough to stand a civil war in the executive suite."

Then there is this question: did Penn Central's diversification into other types of businesses help or hurt the railroad operation? True, in recent months especially, the non-railroad enterprises of Penn Central did pour many millions of dollars into keeping the railroad in operation.

On the other hand, at the very least, the emphasis on non-railroad affairs must surely have diverted top management time and attention from the urgent problems of the railroad, which after all is the principal business of the company. And, going back to the beginning, didn't the resources that enabled PC to diversify into other businesses—the N&W stock, the money received from the sale of the Long Island, for example—really derive from railroading? And wouldn't it have been wiser to invest such funds in badly needed modernization of the railroad plant and equipment?

We think it would have; but the money managers can point to the low rate of return earned by even the most prosperous of the major railroads as a reason for not putting more money into railroading. Here we come up against the real culprit—government policies toward railroads that neglect their needs but heavily favor and subsidize the other modes; while taking a basically punitive approach in regulating the railroads.

We believe the mad rush to diversify out of railroading is bad, both for the railroads and for the nation, but we cannot really fault the industry's managers for doing so when the govrnment has made it impossible for even the best-run railroads to earn profits comparable to those of other industries.

When all is said and done, most of the problems that combined to force PC to its knees are present on *all* the railroads—even those that still show some black ink in their financial statements. With the biggest railroad in the country already in reorganization, and a number of others either in or close to the same state, surely Congress and the Administration will now recognize the seriousness of the railroad crisis and get behind moves to correct the conditions that caused it.

The time is long past when the railroads could consider themselves as a strictly private enterprise like a department store or a widgit-maker. Yet to completely nationalize the U.S. railroads, as has been done in the other countries of the world, would be fantastically expensive.

The answer, it seems to us, is more federal participation short of nationalization. The AAR's ASTRO report, released just at press-time, suggests the lines such participation might take. But before the railroads can expect any real help from Congress, we believe they'll have to demonstrate that they are also working constructively *as an industry* to help solve their own problems.

At any rate, Penn Central's downfall has demonstrated that the railroads can no longer go it alone. If the *entire industry* will really get behind *a politically realistic* program, maybe the politician can also be convinced that now is the time for constructive action. We hope so; because otherwise the nation will get nationalization, whether it wants it or not.

Pending reorganization (and that may take many years) Penn Central will be kept running. And if PC's disaster finally leads to a united railroad industry and triggers the overhaul of the federal government's policies toward that industry it may yet prove to be the key to the railroads' bright future!

## ENVIRONMENTAL CRISES

Mr. NELSON. Mr. President, on September 22 Dr. Ralph E. Lapp delivered an address on "Environmental Crises" at Iowa State University. The crucial question that Dr. Lapp raises is: How can our Nation preserve both the environment and the economy?

In an effort to protect the environment from polluted air, stiffer restrictions will have to be placed on fossil fuels. Yet at the present state of technology these standards might not be met and the amount of necessary power could not be produced. This would result in people living in cold houses in the winter and hot houses in the summer—a fact the east coast is experiencing today.

The per capita consumption of electric energy has risen by a factor of 125 since 1900. At present rate of increase the United States will be generating 10 billion kilowatt-hours of electric power by the year 2000. The question then arises as to what mix of fossil and nuclear fuels will be needed to insure the demands of society are met while at the same time the quality of the environment is protected.

Therefore, we must begin to search out ways to make the best use of our natural resources—ways that will protect our fragile environment and supply the energy to run the country.

Mr. President, I ask unanimous consent that Dr. Lapp's excellent and timely speech be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

### ENVIRONMENTAL CRISES

Although you have invited me to speak on the "environmental crisis" I have pluralized the title. Unfortunately, we are not permitted the luxury of a single crisis because man's interaction with his environment involves a series of multiple collisions.

One reason why we have been slow to recognize the true nature of the ecological upset wrought by our civilization is that the collisions were highly muffled or remote. Occasionally we were jolted by news of eco-fatalities as for example, 23 years ago when a blanket of poisonous air snuffed out the lives of twenty people at Donora, Pennsylvania. But when these warning blips faded on the screen, society went to sleep—the crisis was soon forgotten.

Meanwhile ecological insults multiplied and intensified. Man's solid and liquid wastes were dumped in ever-increasing quantities into the air, the waterways and onto the soil. Lakes sickened and poisoned marine life and even winged creatures fell victim to the chemical agents that drained into the water. Certain forms of man's chemical warfare were outlawed when birds stopped flying. But in Southeast Asia environmental warfare has been waged with a vengeance, using chemical agents of unparalleled toxicity.

Last month Senator Gaylord Nelson led an attempt to outlaw the "environmental warfare" in Vietnam i.e. the use of herbicides and anti-plant chemicals to defoliate forests and kill food crops. U.S. Armed Forces have sprayed more than 100 million pounds of chemical agents on over 5 million acres of Vietnam. These include ORANGE, a liquid solution of 2,4,5-T and 2,4-D now banned; BLUE an anti-crop dessicant arsenic compound and WHITE, a mixture of 2,4-D and picloram. Senator Nelson's amendment to ban herbicides and anti-plant agents failed to pass but the Senate debate on the subject served to illuminate the issue. It's clear that no substantial body of scientific evidence exists on which to appraise the long-term impact of such chemical assault on the environment.

The toxicity of modern chemical agents is illustrated by a recent tragedy in Carolina's tobacco country. When I was vacationing near there last month I learned that a 7-year-old boy, the son of a tobacco farmer, died as a result of helping his father spray tobacco plants with Big Bad John—a U.S. Dept. of Agriculture-approved insecticide. An environmental crisis may seize a single family in its lethal grip or it may spread itself over a whole nation and persist for many years.

U.S. metropolitan areas are beginning to resemble chemical retorts in which noxious fumes accumulate. In general three classes of pollutants afflict U.S. cities:—the obvious particulates that fall out as soot, ash and grit; the hydrocarbons most of which are emitted by fossil-fuel burning cars and trucks; and the chemical oxides, namely of sulfur, carbon and nitrogen. About 65 million tons of these pollutants are emitted per year in 27 metropolitan areas embracing a total of 140,000 square miles. That averages about 460 tons per square mile or 1450 pounds per acre.

Gross statistics about total emissions are not too meaningful in assessing the pollution hazard; we need to deal with specific concentrations of the hazards within the metropolitan area and with the persistence in time of these pollutants. Metropolitan areas may be thought of as immense pill boxes which form gas chambers whose top is normally open. When sufficient air sweeps into the volume the ventilation serves to remove most of the noxious gases and airborne pollutants. But given an atmospheric statis, so to speak, nature slams a lid on the box and the concentration of offensive gases builds up. In effect, the air above the densely-populated region becomes a closed system—a huge gas chamber.

The natural geography of the Los Angeles area forms a basin into which vehicular emissions rise and are trapped. Low-lying temperature inversion layers serve to close off the Los Angeles chemical retort and the California sunshine produces photochemicals which are irritating and injurious to human and organic tissue. The resulting smog can be sighted from the air as a massive brownish incursion stretching from the ocean to the barrier mountains. The California experience with smog was viewed as one peculiar to that region, but today the major American cities all are subject to the peril of atmospheric pollution.

Man's lust for energy must be reckoned as the primary cause of air pollution. That—and his concentration of population in a very small fraction of the U.S. land area. Population alone is not the big factor in air pollution; after all, the U.S. population has only tripled since the turn of the century. But the shift from the farm to the city and the advent and mass production of motor cars have compressed the American population so that 76 million people—the total U.S. population in 1900—are crowded into 0.3 of 1 percent of the U.S. land area.

This urban squeeze, by itself, would not have created serious air pollution hazards if

men had been content with a 1900 life style. To illustrate the dramatic changes in American life style I have prepared a series of charts whose base line stretches from 1900 to the year 2000. Such a centurywide time sweep allows us to project our way of life ahead for 3 more decades—assuming, of course, a constancy of change. I shall read off a few 1900 and 1970 comparative values:

ANNUAL VALUES PER CAPITA

| | 1900 | 1970 | Factor |
|---|---|---|---|
| Electric energy (kw.-hr.) | 60 | 7,500.0 | 125 |
| Prime mover horsepower | .9 | 100.0 | 110 |
| Natural gas (cubic feet) | 3,300 | 100,000.0 | 30 |
| Petroleum (barrels) | .5 | 20.0 | 40 |
| Motor vehicles | .0001 | .5 | 5,000 |

All of these items involve energy conversion and this is primarily, at least up to now, a matter of burning a fossil fuel. Hydropower is very limited in its potential and nuclear power is just beginning to make its mark in providing electric power.

The effluents from automotive exhaust pipes and from the smoke stacks of power plants constitute the pollution hazards that have overpowered the self-cleansing ability of the atmosphere above U.S. cities. The hazard arises from the inevitable combustion products formed when fossil fuels are burned and from the impurities, such as sulfur, present in coal and oil. A free-wheeling American economy has permitted motor car manufacturers to market automobiles, which until very recently, had no restrictions on their exhaust emissions. Steam-electric generators were allowed to burn high-sulfur coal. As a consequence, city-dwellers conducted a form of gas warfare against themselves.

The control of the motor car and of the fuel-burning plant became a necessity in the late sixties. This was not only because of the present danger but because any realistic projection of the nation's future needs makes graphic the magnitude of the pollution control problem in the coming decades. The U.S. power economy is increasingly shifting to electrification and by the year 2000 we will probably see a total of 10 trillion kilowatt-hours of electric power generated. Engineers have nudged the limits of efficiency in burning fossil fuel and these limits have to be approached with caution in the nuclear power industry. Therefore, we can predict with some confidence the amount of heat that will be required in the year 2000 to supply the U.S. electric power needs.

The generation of 10 trillion kw-hrs of electricity will require the release of almost $10^{17}$ British thermal units (Btu) of heat energy. If all this energy came from petroleum, it would mean an annual consumption of 15 billion barrels. To this one would have to add the petroleum consumed as gasoline or as non-fuel products. One immediately senses that we are not dealing so much with a pollution problem as we are with a sheer natural resource situation. Where in the world will we get such a flow of oil?

Admittedly, we will not depend on oil for all our electric energy. Nuclear power should supply half the nation's kilowatt needs by the end of the century, but allowing for hydropower, this will still leave some 45 percent to be generated by combustion of fossil fuels—oil, natural gas and coal. Our natural gas is an ideal fuel, both from a transmission and a pollution standpoint but it is going to be in short supply and will probably not be available for central station power in quantities comparable to oil on a Btu basis. Coal reserves are immense but low sulfur bituminous beds are not generally favorable for exploitation in eastern U.S.A. This probably means that fuel oil will have to be used for electric power generation and, inevitably, this will have to come from a tanker supply route.

The trend of central station power plants to opt for larger and larger power outputs, especially in the case of uranium-burning plants, means that by the year 2000 the most modern plants will all be several thousand megawatts in power rating. This will mean a localized thermal pollution problem i.e. overheating waterways and intruding upon the ecological status quo of larger bodies of water. Higher capacity power plants make for greater efficiency but this advantage is not an unalloyed blessing. Nuclear power is beset with its own species of problems, including the unique radiation hazard which, in my opinion, makes it mandatory that uranium-burning plants be located at sites remote from dense concentrations of population. Wise site selection, careful consideration of reactor design, establishment of adequate radiation standards and prudent regulation of power plant construction and operation should make it possible for nuclear power to provide the nation with clean kilowatts.

Those who spurn the promise of nuclear power must recognize that there are only two alternatives. One, obviously, is to fall back on the conventional fossil fuels, leaving us to solve the problems of pollution and fuel supplies. The other is to "bend the 20th century over" i.e. to depart from the 70 year pattern of providing cheap and plentiful electric power. This would be curtailing the kilowatt and would ration electric energy to present customers and deny it to new ones. At the present time about a third of the kilowatts supply residential power, somewhat more than a fifth go to commerce and the bulk turns the wheels of industry. Consider the consequences of curtailing the electric energy supply for industry. This would not only crimp production and produce unemployment, it would bar productivity increases so essential to a rising Gross National Product. Clamping down on the residential kilowatts would also limit the market for electric-energy appliances and thus affect industry; it would also discourage home-building and set off a wave of unemployment in the building trades. A community caught in a kilowatt squeeze might have to forbid the sales of major electric appliances like air conditioners and clothes dryers.

Given such restrictive measures, a black market in air conditioners and other devices would spring up. After all, there would be a real discomfort felt by a person lacking an air conditioner, especially when his next door neighbor had one. Imagine the plight of apartment dwellers in Manhattan who would be forced to dry their laundry the old-fashioned way—by hanging it on a line. Manhattan would be festooned with a gala bunting.

The fact is that our way of life and our economy is hooked on the kilowatt. We are affluent as a nation because we have enjoyed a generous energy endowment. It is unrealistic to project a leveling off or a decline in the production of electric energy. On the other hand our energy exuberance need not escalate to unnecesasry incandescence. The finiteness of our fossil fuel resources makes it essential that the United States practice conservation of its premium fuels, oil and natural gas.

Research and development in the fossil fuel sector, especially in coal, has been a pitifully weak-kneed national effort. High priority should be assigned to the gas conversion of solid coal so that our supply of natural gas can be supplemented. Unless the motor industry manages to curb the pollution of gasoline engines, it may be necessary to turn to a new fuel. It must be understood that motor vehicles account for six-tenths of all air pollution. Specifically, they contribute more than 90 percent of the carbon monoxide pollution, 63 percent of hydrocarbons and 46 percent of nitrogen oxides. The electric car, running on battery power, is a clean solution to the motor vehicle pollution problem, but it is far from being an acceptable substitute for the internal combustion engine. Furthermore, one must remember that the electric power has to be generated for battery power. If nuclear power supplies this electricity then the electric car is truly clean, but if fossil fuel plants generate the power, then all we have done is to transfer the source of pollution from the tailpipe to the smokestack. Of course, there would be some gains, since carbon monoxide levels in metropolitan streets would be drastically lowered. But this would be at the expense of adding to the sulfur oxide emissions from power plants. In the next thirty years it is estimated that sulfur oxide emissions will increase five-fold unless adequate controls are imposed on fossil fuel power plants.

For almost two-thirds of this century industrialists and motorists have polluted the city and the highways with virtually no restraint. With the advent of air travel, beginning in the late twenties, man added a new dimension to air pollution by injecting combustion products into the lower atmosphere. It is now proposed that the United States should undertake development of the supersonic transport (SST) which would fly at an altitude of 65,000 feet. This SST venture involves a third tier of pollution in a rarefied atmosphere where the injection of combustion products and moisture formation may produce ecological effects which are not presently calculable. Aside from the questionable economics of the SST which is keyed to a passenger seat capital cost of three times that of the 747, and possibly much more, it now appears that instead of a cost-benefit analysis, the SST should be viewed in terms of its detrimental eco-effect.

We have relatively little experience in the matter of assessing the adverse effects of technology. In the past we have proceeded almost blindly, genuflecting to the dictates of a technological imperative. In order for a technologically-based project to be authorized, it was sufficient that it be within the realm of feasibility. If an A-bomb could be made—it would be made. If made, it would be used. If an H-bomb could be made, it would be made. And it was. If one could go to the moon, then we would go. And we did. In connection with the H- or superbomb, I would like to go back and discuss some details of the weapons project which may have escaped your notice.

In July of 1953, before the Atomic Energy Commission had tested an operational H-bomb, a group of military men and experts gathered in Santa Monica, California with officials of the RAND Corporation. The single purpose of this conference of 49 people was to assess the worldwide impact of testing a superbomb whose power would be in excess of 10 million tons of TNT equivalent i.e. 10 megatons. It was a highly secret meeting and no word about it leaked out to the public—or even to officials in other government agencies. Yet this conference was essentially for the purpose of evaluating a global health hazard, namely, the entry into the biosphere of highly toxic and long-lived radioactive species such as strontium-90.

Some of the scientists at the RAND–AEC conference were distinguished physicists, even Nobel prizewinners but only one biologist present was really compentent in the field of radiation health protection. Consider the complicated chain of events intervening between the splitting of an atom in the bomb and the ultimate fate of these split atoms. The radioactive species attach themselves in various chemical forms to particles of microscopic and macroscopic size. They are injected at various altitudes and may fall out

locally, troposperically or circle the earth in the stratosphere. They may or may not thereafter drift to various latitudes. Their descent to the far corners of the earth is highly uncertain, varying with the season. Once deposited they become available to enter food-chains of animals and humans. The passage of various radioactive species through the many links in the food-chains is complex and was, in the summer of 1953, largely unknown. Yet in the face of all these uncertainties, scientists were called upon to come up with their estimates of safe levels for testing superbombs.

The veil of secrecy has not been fully pulled aside for us to judge what really happened at the Santa Monica conference, but we do know that no scientist saw fit to protest the *Castle* series of nuclear tests which began March 1, 1954. We have here an example of the Atomic Energy Commission, a single governmental agency, acting on its own in assessing a global health hazard. We are also witness to the obedience of some of the nation's greatest scientists in bowing to the will of the AEC.

On March 1, 1954 the AEC exploded its *Bravo* bomb with a yield of 15 megatons. The globe-circling nuclear debris let loose in this test is in all of us today—the reindeer-eating Lapps bear a body burden of cesium-137 which is taken up in lichen on which the deer feed—our teeth and bones contain measurable amounts of strontium-90 which follows the calcium route in food chains. Those closer to the *Bravo* blast were caught in local fallout and experienced loss of hair, skin lesions and other effects of radiation injury. AEC experts were confident that the effects were transitory and that everyone would be all right but they did not reckon with the delayed effects of radiation. Yet within 12 years after exposure 80 percent of the Marshallese children who were irradiated while under 10 years of age developed thyroid nodules.

In 1954 the experts did not know the ecological consequences of the *Bravo* bomb test; they did not even know enough to consult fully with other experts who might have helped out in analyzing the problem. Technology ruled the day with an assist from a weapons-oriented Atomic Energy Commission.

Today it is fashionable to raise alarm about the harmful or potentially injurious aspects of science and technology. In 1954 it was much more hazardous for a scientist to dissent with the Establishment. Things have even gotten to the point where AEC scientists are quarreling with the AEC! The Atomic Energy Commission doesn't exactly welcome this internal dissent, but it is perplexed by the discord. I am sure that AEC officials long to fire the critics, but they know that this ejection technique would simply fan the fire of controversy.

If we had had effective dissent in 1954 I believe history might have been set on a different course. I personally regret that I was so slow on the draw that it was not until after the *Bravo* test that I started to study fallout and began criticizing the AEC. Had we been able to open up the weapons test issue in 1953 when the secret conference took place at Santa Monica, then it is possible we could have altered events. The Defense Department and the AEC were hell-fire bent on testing the superbomb and perhaps the momentum was too much to overcome. But if public discussion of the test and its ecological effects had occurred, we might have inhibited the testing of very high-yield bombs. Conceivably, we could have secured a Nuclear Test Ban Treaty long before 1963 and got started on Strategic Arms Limitation Talks (SALT) with the Soviets before we fielded a thousand Minuteman ICBMs and the Soviets followed suit.

A policy of official secrecy on nuclear weapons has restricted public discussion of the most vital issues of the day. It has encouraged a headlong propagation of nuclear weapons and weapons systems and only tardily do we sense the folly of blind obedience to a technological imperative. Our one thousand Minuteman missiles are not only a wasting asset—one costing us in excess of $20 billion—but we are now told we must throw up ABM defenses to defend them and this will cost another $8 billion. But, worse yet, it takes us into a non-negotiable area of arms control.

We can depend on the photographic acuity of satellite cameras to inspect for missiles of ICBM quality, but this orbital surveillance is more ambiguous when it comes to inspecting missiles like Sprint and Spartan. In addition, we have pushed forward on MIRV (multiple, independently targeted, reentry vehicles) technology, again prostrating ourselves before the altar of high technology.

Allow me to expand on this MIRV topic. It serves to illustrate the difficulty of dissent in the area of complex technology. We have just concluded Phase II of the SALT talks at Vienna—discussions in which the Administration maintained it was essential for the Congress to approve the Safeguard ABM program as a "bargaining chip" in the negotiations. It was argued that it was necessary for the United States to begin deployment of ABMs in four states to provide protection of Minuteman bases against the threat of a Soviet first strike with SS–9 missiles. Then the Soviets might be induced to stop making more SS–9s. We could agree on a SALT treaty setting a limit to SS–9s and to other missiles as well—and we would dismantle the ABMs. The senators who used the bargaining chip argument did not spell out how a treaty would effectively freeze the Soviet S–99 threat. Merely putting a limit on the deployment of SS–9 launchers would not freeze the strategic threat. One would also have to freeze the number of MIRVs on board each SS–9. No pro-ABM senator explained how this would be done.

The fact is that the SS–9 threat can not be limited unless the U.S. and the Soviet Union enter into a MIRV agreement. We know that the Soviets have the capability of throwing three 5 megaton RVs with their massive SS–9 launcher. They know that our Poseidon missile throws 10 RVs. To be sure these are a hundred times less powerful, but it's the multiplicative technique that counts. What is to prevent the Soviet weapons experts from mounting six or seven 1 megaton warheads on a single SS–9? With the present level of 300 SS–9s, this would give the Soviets a throw potential of 1,800 RVs. This would in effect give the Soviets a first strike capability against 1,000 missile silos housing our Minuteman ICBMs. Providing, of course, that the Soviets can drop these warheads close enough to destroy the silos. This means reliability of launch and RV accuracy. The MIRVing mechanism that dispatches individual warheads on their trajectories to specific aim points must function properly. The accuracies required to achieve a 95 percent probability of knocking out a Minuteman silo correspond to a circular error of probability (CEP) of 280 yards for a 1 megaton warhead. The Soviets can not hope to achieve such accuracy without extensive testing—missile firings and MIRV dispatches which we can monitor with inspection apparatus located far from the Soviet test sites. Therefore, if the Soviets would agree to a MIRV test ban—and to placing a limit on the SS–9 deployment—we could effectively "freeze" the Soviet first-strike threat of the SS–9.

However, we must consider the Soviet view of a SALT treaty. The Soviets know that the United States has concluded the research and development test phase of its strategic MIRV program for equipping Minuteman III and Poseidon with multiple warheads. We have already deployed some Minuteman III missiles in the North Dakota fields and Poseidon becomes operational on the *James Madison* submarine next January. From the Soviet viewpoint the MIRV situation is quite asymmetric and a MIRV test ban would be a one-sided affair. From their viewpoint a production-deployment ban on MIRV is required to forge an equitable SALT agreement on missile limitation.

Now this asymmetric situation presents the United States with a dilemma. Given the backward condition of Soviet MIRV technology, we can trust our national means of inspecting for illicit MIRV tests by monitoring the Soviet Union, but the Soviets would have to rely on on-site inspection to make sure that MIRVs were not deployed in Minuteman silos. It is futile to argue that our Minuteman III warheads are much lower power than the SS–9s, being about 0.2 megatons each, and therefore requiring greater accuracy to target SS–9 silos. Actually the difference is less than 100 yards and the Soviets would have to assume the worst, namely, that we are deploying a first strike system. That is, unless they can inspect the silos and verify that each Minuteman contains only one warhead.

The U.S. sophistication in missile weaponry has placed us in an awkward negotiating position. Will we accept what amounts to a unilateral on-site inspection system? Would we allow Soviet inspectors to roam about Montana, North and South Dakota, Wyoming and Missouri? Would these visitors be permitted to peer inside our silos and inspect the missile shrouds? I find it difficult to believe that the present Administration would agree to any such proposal. It would, indeed, insist on on-site inspection of Soviet silos. Our experience in negotiating the Nuclear Test Ban Treaty gives little hope that the Soviets will agree to having U.S. teams check their missile silos. Presumably the U.S. Senate would insist on a mutual on-site inspection system, thus creating a stalemate.

I cite this MIRV missile dilemma to illustrate the complexity of an issue of high technical content which is resolved by introducing it into a political decision-making process. So far as the Safeguard ABM decision was concerned, purely technical consideration should have made the decision an easy one—specifically, the Senate should have refused to authorize deployment funds for it. But only a handful of senators fully comprehend the technology involved; the point here is that a democratic decision on a technical problem is confronted with the difficulty of requiring politicians to vote on it before the public has had a chance to understand it. In the ABM debate it was noteworthy that scientists who opposed Safeguard took their arguments directly to the senators rather than appealing for public support as their primary means of persuasion.

I have also explored the nuclear-missile issue because nuclear war would be the supreme ecological catastrophe for mankind. In the past the United States has been able to remain isolated from strategic assault because of its isolation and expanse. Today a missile can hurl its lethal payload over intercontinental range in a space of 25 minutes. A single warhead carried by an SS–9 reentry vehicle can contain the equivalent of 25 million tons of TNT. A strike force of 300 such RVs adds up to 7,500 megatons or 7.5 billion tons of TNT equivalent. An inherently dirty design for these weapons would lay down the equivalent of 5 billion tons of fission-energy products with a potential for coating 5 million square miles of area with serious-to-lethal radioactive fallout. This is 2 million square miles more than the land area of the U.S.A. A radiation assault on this nation would not only strike at the total human population of our nation, it would kill off animal life on the farms and poison much of the plant life for years to come.

Dissent in an age of sophisticated technology clearly must be based on awareness of potential hazards and a degree of scientific and technical competence to evaluate these. This more or less burdens the scientist with a responsibility to speak out on issues which he feels may bring significant harm to society. I should narrow down the responsibility to independent scientists, thus eliminating those who are employed by industry and with few exceptions those who are dependent on federal funds. This pretty much localizes dissent to the campus.

The voice of the scientist is still strong and will be heard. I have in mind a number of recent instances in which a very few scientists provoked public discussion of a local issue and were productive in causing agencies like the Atomic Energy Commission to pay attention to them. For example, the Colorado Committee for Environmental Information was instrumental in opening up the plutonium contamination issue surrounding the Rocky Flats fire. Scientists were also effective in the case of the AEC's Project Rulison underground nuclear test last year.

Unfortunately the scientific and technical community has no collective conscience and it lacks organization for the easy expression of its dissent. Of course it has the discipline to correct error within itself when dealing with matters of science. Any researcher who publishes is quickly challenged if his results do not check out, but the area of science and public affairs the scientific community is not self-policing. The result is that when experts disagree in public confusion is propagated. The professional societies are most reluctant to engage in settlement of such disputes. The most august organization of science, the National Academy of Sciences, is most prestigious but operates on the slopes of Mt. Olympus. There is thus no High Court of Science to hand down decisions in matters of controversy involving the intersection of science and public affairs.

Environmental problems are particularly difficult to tackle because they involve so many disciplines and so many unknowns. A scientist who is an expert in a specialized field has to make an extraordinary effort to embrace many disciplines when he makes an ecological study. For example, the bomb-to-bone sequence of strontium-90 involves nuclear physics, particle chemistry, meteorology, classical physics, plant sciences, biochemistry, physiology, radiochemistry and other fields. Universities encompass many disciplines and have the potential for mounting the best attack on environmental problems. However, the various departments on campus are difficult to interlink in interdisciplinary activities. In general one requires some kind of institute to penetrate the ramparts of each department. It so happens that the National Aeronautics and Space Administration funded more than a score of Space Institutes on the major campuses. In view of the irrelevance of the U.S. space activity to the nation's pressing environmental problems, I would urge that half of these institutes be converted into Environmental Institutes.

As we attempt to insure the quality of our environment, we must recognize that extremism in cleaning up the atmosphere can produce an energy crisis. In the short term, if we impose restrictions on the sulfur content of fossil fuels on too stringent a basis, we can throttle the power output of many electric power plants, especially on the east coast. This summer the United States experienced power deficiencies which could be the forerunners of more widespread emergencies this winter. This could produce a pollution backlash, especially if the power cutbacks keep plants idle and hard-hat workers are presented with value judgments in the form of paychecks vs possible air pollution.

In a sense, we should be thankful for the power emergencies of 1970 because they draw attention to the long term problem of providing the nation with abundant power. Against this backdrop, a favorable scenario has been set for the creation of a National Commission on Fuels and Energy. Senator Jennings Randolph introduced S. 4092 this summer to authorize such a commission to study overall problem of U.S. energy requirements for the next 20 to 30 years and to make recommendations for a national energy policy. Hearings on the measure were started this month and it appears very likely that the commission will be established. It will permit a thorough-going analysis of a multiplicity of problems which have heretofore never been attacked as a whole.

The nation needs to emulate the Dutch who take a half-century view of reclaiming land from the sea, except that our problem must be assuring an adequate supply of coal, oil, gas and electric power while also making sure that this is clean power. We can certainly find the fuel resources to drive the nation's economy in the year 2000 if we do not worry about pollution. But if so, we may end up coughing our way into the 21st century.

On the other hand, if we go overboard on pollution controls for fossil fuel burning, we may end up with a clean cold America.

I believe that we can protect the environment and provide the necessary power to run our factories, light our streets and warm our homes—if we plan for the year 2000 and examine all the alternatives and explore the research and development possibilities in tapping the vast reserves of energy which still rest untouched in U.S. soil.

---

## MONDALE DEPLORES VIOLENCE AND COLLUSION SURROUNDING FARMWORKERS' ORGANIZATION EFFORTS

Mr. MONDALE. Mr. President, I must express my deep concern over the reports of violence and collusion against striking farmworkers in the Salinas Valley in California. The organizing effort of the United Farm Workers Organizing Committee is one of the few hopeful movements which promises to end the exploitation of our most powerless citizens—the migrant and seasonal farmworker.

Powerful forces seem determined to perpetuate that powerlessness and to deny these workers the right to select the union of their own choice. I am disturbed by the following reports of violence, intimidation, and harassment from Salinas:

That the general counsel of UFWOC, Jerry Cohen, was beaten unconscious and sustained a concussion and other serious injuries when he was trying to protect the lives and safety of striking farmworkers;

That several striking workers have been shot at and some wounded by gunwielding vigilantes;

That roving caravans of trucks and cars filled with persons acting without apparent legal authority, have threatened the life of some picketers, and beaten others, smashed windows of cars with baseball bats, and intentionally provoked violence;

That the UFWOC headquarters in Salinas has had to be evacuated because of bomb threats;

That local law enforcement officials have made mass arrests of picketers under a legally questionable temporary restraining order against picketing, but did not arrest a self-proclaiming citizens justice committee which through mass picketing, in violation of a court order, closed down for a week the trucking plant of Interharvest, a grower that signed with UFWOC;

That many instances of violence reported to the police, including the beating, threatening, and shooting of union workers and organizers, have resulted in few arrests by local law enforcement officials.

Acts of violence, harassment, and intimidation have pervaded the otherwise peaceful and prosperous Salinas Valley in the past month. They are related to the July 27 announcement by UFWOC and the California table grape growers that the 5-year farmworker organization effort had culminated in collective bargaining agreements, and that the international boycott of table grapes was over. Following close on the heels of that settlement, the same vegetable growers in the Salinas Valley who for years had vigorously resisted farmworker organizing efforts, voluntarily approached another union, not UFWOC, and willingly signed contracts covering their farmworkers. Growers apparently feared a UFWOC organization drive in Salinas, and they signed contracts without consulting their workers.

A committee of Catholic bishops, together with both unions involved, was aware of the potential violence of a full-blown jurisdictional dispute and negotiated a settlement agreement.

Pursuant to that agreement, some new contracts were negotiated by UFWOC with amenable growers, but other growers have not yet recognized the expressed interest of their workers in UFWOC representation. In addition to the implication that present contracts may not be with unions that represent their employees, the growers' bitter resistance to signing contracts with UFWOC, while willingly signing with other unions, perpetuates agribusiness' ability to more easily obstruct legitimate farm union organizing. The result of the breakdown of the jurisdictional pact is violence, intimidation, and harassment.

I condemn this resort to violence. It would be unconscionable if farmworkers are denied their right to choose a union of their own because of resort to physical brutality, and varied forms of threats and reprisals. The intimidation, harassment, and interference with legitimate organizing efforts in the Salinas Valley cannot be justified nor tolerated, and is a total anathema to the heretofore expressed, and observed, commitment to the principles of nonviolence to which Cesar Chavez and UFWOC are dedicated. In fact, consistent with those principles, and because of the heightening violence together with legally questionable injunctions against legitimate union organizing activity, UFWOC has called off their strike in the Salinas Valley, and instead, called for a boycott of all non-UFWOC lettuce grown in California and Texas.

I understand that after many requests by union officials and others, an investigation into this violence and intimidation has been initiated by the State attorney general of California. I am hopeful that this investigation will result in the restoration of law and order in the valley and the recognition that agricultural workers have the right to organize and choose their own union without intimidation.

Additionally, as chairman of the Migratory Labor Subcommittee, I intend to watch the situation in Salinas closely, and I have directed the staff of the subcommittee to investigate the recurring charges and allegations of violence and intimidation.

I hope other Senators will also look into this matter.

I think we all have an obligation to assure, in every way possible, a peaceful and nonviolent resolution of the farmworkers' struggle for justice and dignity.

## CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

## DIRECT POPULAR ELECTION OF THE PRESIDENT AND THE VICE PRESIDENT

The PRESIDING OFFICER. Pursuant to previous order, the Chair lays before the Senate the unfinished business.

The Senate resumed the consideration of the joint resolution (S.J. Res. 1) proposing an amendment to the Constitution of the United States relating to the election of the President and the Vice President.

Mr. BYRD of West Virginia. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ALLEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ALLEN. Mr. President, I am delighted to have the opportunity of speaking in opposition to Senate Joint Resolution 1.

First, I wish to commend the distinguished Senator from Indiana for his hard work, and for his dedication to the cause of the resolution which he is espousing. I am glad, though, that he is willing at this time to allow some other Senators to be heard on this question. This matter has been under debate in the Senate for more than a week, and it has been the practice, up until the last legislative day, that the consideration of Senate Joint Resolution 1 would be the order of business. The distinguished Senator from Indiana would come in, deliver a speech of from 1 hour to an hour and and a half, to 2 hours, and then the matter would be laid aside and the second shift of the Senate would start work. Very little opportunity was given to those in opposition to this measure to speak. The junior Senator from Alabama on one occasion, did have the opportunity of speaking for an hour or so.

Mr. BAYH. Mr. President, will the Senator yield just briefly?

Mr. ALLEN. I will say to the distinguished Senator from Indiana that I prefer to finish my remarks, because the distinguished Senator from Indiana has, from time to time, asked that those who oppose this resolution take the floor and speak out against it, and then when some of the Senators have done that, the distinguished Senator from Indiana would interrupt to ask questions or carry on colloquy.

So I would suggest to the distinguished Senator from Indiana that the junior Senator from Alabama will be delighted to yield to him on the conclusion of his remarks.

Mr. BAYH. I appreciate that. I am sure the Senator from Alabama does not want to leave the impression that the Senator from Indiana has done something contrary to normal Senate procedure in seeking the opportunity to develop colloquy with his colleagues.

Mr. ALLEN. No. The Senator is within his rights under the rules. If the Senator from Indiana had been here when I started my remarks, he would have heard me commend him for his hard work and for his dedication in this matter.

He has engaged in colloquies with the opponents of the measure, and has consumed considerable time that the opponents of the measure could have been using.

The Senator from Alabama, however, regrets that the distinguished Senator from Indiana has threatened to grind the Senate proceedings to a halt; and in furtherance of that plan, to object to the customary meeting of the Senate committees during sessions of the Senate, and that, now that the period set aside for the transaction of morning business has been closed, the committees, because of the objection of the distinguished Senator from Indiana, are unable to meet.

These committees have many important bills before them, on which they will not be able to hold their sessions, as is the custom in the Senate, the Senator from Alabama understands, because of the objection of the distinguished Senator from Indiana.

He threatens, too, in a letter which all of the Senators received, to do away with the two-shift system under which the Senate has been operating for the last 10 or 12 days, which has resulted, as the distinguished Senator from North Carolina remarked just the other day, in passage of a greater number of important bills by the Senate than in any comparable period of which he had personal knowledge.

So the discussion that has been taking place with regard to Senate Joint Resolution 1 has not stopped consideration of important measures coming before the Senate. It has not prevented, up until today, the meeting of Senate committees. But now all of that is to be a thing of the past, because the proceedings in the Senate are to be ground to a halt by the distinguished Senator from Indiana, exercising the power that he has under the Senate rules.

The Senator from Alabama certainly does not say that the distinguished Senator from Indiana is acting contrary to the rules, because he is not. I suggest, however, that the Senator, under the state of affairs existing in the Senate at this time, is the filibusterer, rather than those who are opposing the passage of Senate Joint Resolution 1.

Why do I say that? Mr. President, what is a filibusterer? A filibusterer is a person in a parliamentary body, in this case the Senate of the United States, who stops, impedes, or obstructs the flow of legislation and of legislative action through parliamentary devices, artifices, and use of the rules of that body.

So, whereas the limited discussion of those of us who want to be heard with respect to this amendment to the Constitution has, up to now, prevented a vote on the amendment—on one amendment—the action of the distinguished Senator from Indiana is preventing and will prevent action on dozens of important measures pending before the Senate.

So who is the filibusterer in this case? Not, I submit, those who oppose Senate Joint Resolution 1, because they have not been heard on the floor of this body since this bill was laid down as the pending business, I daresay, for as many as 20 hours.

The distinguished Senator from Nebraska (Mr. HRUSKA) several days ago pointed out that during this Congress, the 91st Congress, the Senate on one occasion considered an amendment to a bill pending before the Senate for 49 days; and during that entire time no cloture motion was filed, no effort was made to choke off that debate, committees were not prevented from meeting, and this Senate debated that measure for 49 days. I believe this is the 12th or 13th day that this matter has been debated. And again I say that the debate that has taken place has been of such short duration that it has permitted the Senate to act on more than a dozen important bills in that time.

Mr. President, we have pending in the Senate some six or seven appropriation bills for the operation of various departments and agencies of this Government, which cover the period from July 1, 1970, to July 1, 1971. We are already into that period. We have been in that period since the first of July. Yet, these bills have not been passed. The distinguished Senator from Indiana says, "You're not going to get an opportunity to pass those bills. You have to act on Senate Joint Resolution 1, or I am not going to let you pass those bills."

So who is the filibusterer? Is it the opponents of Senate Joint Resolution 1, who are speaking against a measure that cannot even be put into effect until 1976? What is so important about it? Yet, weigh that against bills that would carry on the operation of this Government.

So what is the hurry about passing Senate Joint Resolution 1? Between now and 1976, even the distinguished Senator from Indiana might change his mind. The Members of the Senate and the

House might change their minds a half dozen times on what is the right measure to submit to the States for action.

It has not been too many years ago since the distinguished Senator from Indiana was not espousing direct election of the President; he was espousing the automatic system of casting the electoral vote in favor of the successful candidates in the various States. That was not a bad amendment. But the Senator from Indiana has changed from that plan over to the direct election plan.

Mr. President, the Senate itself has changed in recent years. At one time, back in the 1950's, the U.S. Senate passed by in excess of a two-thirds vote the proportional plan, the plan under which each candidate would receive a fractional number of electoral votes in proportion to his popular vote in the various States. That plan was submitted by the Senate.

So here we have the distinguished Senator from Indiana at one time pushing the automatic plan and the Senate itself putting through the proportional plan. Now they say, "Let us try the direct plan."

There is not even unanimity among the various Senators whose names appear on the back of this document, Senate Joint Resolution 1, as sponsors of the amendment. They are not all agreed. I think the most eloquent and scathing, if you please, denunciation of the Bayh plan for the runoff comes from the distinguished Senator from Michigan (Mr. GRIFFIN) and the distinguished Senator from Maryland (Mr. TYDINGS). They are highly critical of the runoff plan. Yet, we find their names—Mr. GRIFFIN and Mr. TYDINGS—on the back of Senate Joint Resolution 1, which provides for a 40-percent President, if any candidate receives 40 percent, or, failing in that, going into a runoff.

So Mr. TYDINGS and Mr. GRIFFIN say that we should not have the runoff. Yet, we find them as sponsors of this measure. So where is the unanimity?

Mr. President, where, in fact, is the enthusiasm for this plan? Not one Senator present in the Chamber is for this plan. I beg the pardon of the distinguished Presiding Officer, the distinguished Senator from Wisconsin (Mr. NELSON), I believe he has joined as one of the cosponsors. Aside from the distinguished Senator from Wisconsin, not one Senator in the Chamber supports Senate Joint Resolution 1. Where is the enthusiasm for this plan?

Here is a plan that cannot take effect until 1976, and yet the Senate is ground to a halt. "No more bills are to be passed," says the distinguished Senator from Indiana, "not until you vote on my joint resolution"—a joint resolution that will become effective with the 1976 presidential election.

Mr. President, what is the hurry? Once this plan is submitted to the States, it is provided that it has 7 years to be adopted.

Mr. ERVIN. Mr. President, will the distinguished Senator from Alabama yield for several questions, with the understanding that he will not lose his right to the floor. I am induced to ask them because of the fine and accurate observations the Senator from Alabama made a moment ago.

Mr. ALLEN. I will yield to the distinguished Senator from North Carolina on the theory that we have been challenged by the proponents—I shall not say proponents because there are not enough of them—but we have been challenged by the proponent of the measure to put up our case against Senate Joint Resolution 1. In the firm belief, hope, and understanding that the distinguished Senator from North Carolina will seek to elicit information or make points regarding opposition to the measure, the junior Senator from Alabama is delighted to yield to the distinguished Senator from North Carolina.

Mr. ERVIN. Did the Senator from North Carolina accurately hear the distinguished Senator from Alabama make an observation a few moments ago, to the effect that Senate Joint Resolution 1, even if it were submitted to the States by Congress and ratified by the States, would not be made effective prior to the election of 1976?

Mr. ALLEN. In answer to the question of the distinguished Senator from North Carolina, the junior Senator from Alabama would say that that is the practical effect of it, for this reason: The resolution, by its express terms, states that it shall not become effective until 1 year after the first April 15 following its ratification, so that would mean that, in order to be applicable in 1972, this measure would have to be submitted by Congress to the States and ratified by both houses of 38 States, or in the case of Nebraska, the one house, between now and April 15, 1971.

The junior Senator from Alabama submits that that is, in fact, an absolute impossibility, and that a resolution to change the system of electing the President could not become effective or applicable until the 1976 election; that is correct.

Mr. ERVIN. The Senator from North Carolina would like to ask the distinguished Senator from Alabama if there does not appear on page 8 of the Senate's Calendar of Thursday, September 24, 1970, that is today, that there is pending before this body, a bill entitled S. 734, introduced by the distinguished Senator from Nevada (Mr. CANNON), which is a bill to revise the Federal election laws.

Mr. ALLEN. Yes, sir. That bill does appear on page 8 of the Senate's Calendar.

Mr. ERVIN. Is the Senator from North Carolina right in the assumption that the bill offered by the distinguished Senator from Nevada (Mr. CANNON) would be applicable to the election to be held in November 1970 rather than the election to be held in November 1976?

Mr. ALLEN. That is the understanding of the junior Senator from Alabama.

Mr. ERVIN. Does not the distinguished Senator from Alabama agree with the Senator from North Carolina that we should be more concerned with the passage of legislation which requires only a majority vote of Congress and which is designed to create rational and fair rules for the conduct of an election in November 1970, rather than to be concerned with an election in November 1976?

Mr. ALLEN. Yes, sir. That would be the view of the junior Senator from Alabama, that we should put first things first, and things that come up first should be attended to ahead of things that would not come up until 1976.

Mr. ERVIN. Does not the distinguished Senator from Alabama agree with the Senator from North Carolina that the able and distinguished Senator from Indiana (Mr. BAYH), in the exercise of his undoubted right under the rules of the Senate, insists that we not act upon the proposal of the distinguished Senator from Nevada (Mr. CANNON) to revise the statutory laws governing Federal elections which relate to the election of November 1970 until after we have dealt with a matter that relates to the election of 1976?

Mr. ALLEN. That is correct, but the junior Senator from Alabama would like to make one qualification at that point and that is that the distinguished, able, and eminent Senator from Indiana (Mr. BAYH) has, thus far, only threatened to prevent Senate Joint Resolution 1 from being laid aside so that other business can be taken up this afternoon.

Now, along, I am sure, with the distinguished Senator from North Carolina, the junior Senator from Alabama received a letter from the distinguished Senator from Indiana, stating that that was his purpose and that was his plan, and that he was going to prevent other matters from coming up. But the junior Senator from Alabama is hopeful that the distinguished Senator from Indiana, realizing the importance to the country of these measures on the Calendar and in Senate committees, will allow these matters to be brought up and will allow Senate Joint Resolution No. 1 to be temporarily laid aside this afternoon. Thus far, we have had only the threat on the part of the distinguished Senator from Indiana (Mr. BAYH) and we hope that it will not become an actuality.

Mr. ERVIN. Will not the distinguished Senator from Alabama agree with the Senator from North Carolina that, in the words of William Shakespeare, the Bard of Avon, " 'tis a consummation devoutly to be wish'd."

Mr. ALLEN. Yes indeed. I would agree with the Bard and with the distinguished Senator from North Carolina.

Mr. ERVIN. I would like to ask the distinguished Senator from Alabama if the Senate Calendar for today does not show that Senate Joint Resolution 207, a joint resolution to establish a joint committee on the environment, is pending on the Calendar and would be subject to Senate consideration upon being called up by the majority leader?

Mr. ALLEN. Yes, sir. That is correct.

Mr. ERVIN. Does not the Senator think and agree with the Senator from North Carolina that the environment in which we now live certainly demands priority over what is going to happen in the election of 1976?

Mr. ALLEN. That would be the judgment and the opinion of the junior Senator from Alabama.

Mr. ERVIN. I would like to ask the distinguished Senator from Alabama if he does not agree with the Senator from North Carolina that unless we do some-

thing about our environment, many persons now registered voters in the 50 States of the Union may die as a result of pollution and not remain here on earth to vote in the general election of 1976?

Mr. ALLEN. That is correct, in the judgment of the junior Senator from Alabama.

Mr. ERVIN. I would like to ask the distinguished Senator from Alabama whether the Senate Calendar does not show, on page 9, that House Joint Resolution 1366, to provide for a temporary extension of the Federal Housing Administration Insurance Authority, is pending on the calendar and is in order for Senate consideration when called up by the majority leader.

Mr. ALLEN. Yes, sir. That is correct.

Mr. ERVIN. Does not the distinguished Senator from Alabama recognize, as does the Senator from North Carolina, that the ability of thousands, indeed of hundreds of thousands, of Americans to purchase homes is dependent upon the extension by Congress of this insurance authority in the Federal Housing Administration?

Mr. ALLEN. Yes. I certainly agree.

Mr. ERVIN. Does not the distinguished Senator from Alabama agree with the Senator from North Carolina that promoting the health and well-being of hundreds of thousands of Americans in this particular field should have priority over something that is to be applied for the first time in the history of this Nation to the election of 1976?

Mr. ALLEN. The junior Senator from Alabama certainly agrees with the distinguished Senator from North Carolina.

Mr. ERVIN. I would like to ask the distinguished Senator from Alabama whether the Senate Calendar for today does not disclose, and I refer to page 9, that H.R. 12807, an act to amend the act of February 11, 1903, commonly known as the Expediting Act, and for other purposes, is now upon the Senate Calendar and in a position to be acted upon by the Senate when called up by the majority leader?

Mr. ALLEN. The Senator is correct.

Mr. ERVIN. Mr. President, does not the Senator from Alabama recognize, as does the Senator from North Carolina, that this is a proposed amendment which would expedite the trial of antitrust actions?

Mr. ALLEN. That is the understanding of the junior Senator from Alabama.

Mr. ERVIN. And does not the Senator from Alabama agree with the Senator from North Carolina that expediting antitrust trials and the disposition of antitrust actions, which are necessary for the economic protection of the American people, ought to have priority over a proposal which can only take effect for the first time in the general election of 1976?

Mr. ALLEN. That is certainly the feeling of the junior Senator from Alabama. Further, it is my hope that the distinguished Senator from Indiana will abandon the Bayh filibuster against the calendar and will allow us to proceed toward the enactment of some of these measures on the calendar.

Mr. ERVIN. Mr. President, will the Senator from Alabama yield to the Senator from North Carolina to let the Senator from North Carolina express his hope that the able and distinguished Senator from Indiana will so far resume his customary geniality as to permit these proposals which ought to have priority over what is going to happen in the election of 1976 be acted upon by the Senate?

Mr. ALLEN. Mr. President, I yield for that purpose. The junior Senator from Alabama has that hope and expresses the fervent wish that the Senator from Indiana will abandon his obstructionist tactics—which are permitted under the rules, let the junior Senator from Alabama hasten to add.

Mr. ERVIN. Mr. President, I would like to invite the attention of the Senator from Alabama to page 9 of today's calendar and ask him if it does not disclose that S. 3650, a bill to amend section 837 of title 18, United States Code, to strengthen the laws concerning illegal use, transportation, or possession of explosives, and the penalties with respect thereto, and for other purposes, is ready for Senate action when called up by the majority leader.

Mr. ALLEN. The Senator is correct. It is there and could be called up if the distinguished and eminent Senator from Indiana would permit it.

Mr. ERVIN. Mr. President, would the Senator from Alabama agree with the Senator from North Carolina that we are having entirely too many illegal bombings throughout the length and breadth of the United States at this moment?

Mr. ALLEN. Very definitely.

Mr. ERVIN. Mr. President, does not the Senator from Alabama agree with the Senator from North Carolina that getting adequate legislation to stop, if possible, and to punish, if necessary, such illegal bombings ought to have priority over a proposal which cannot take effect prior to the general election of 1976?

Mr. ALLEN. The junior Senator from Alabama has that opinion, and he feels confident that the distinguished Senator from Indiana has the same opinion and that he is going to relent from his conduct of the Bayh filibuster.

Mr. BAYH. Mr. President, will the Senator yield? I dislike interrupting this colloquy, but perhaps I could put this question to rest if the Senator would permit me. I am sure there is much to be gained by listening to this intelligent dialog. But if the Senator would permit me to do so, I could answer the question that has been asked 13 times by the distinguished Senator.

Mr. ALLEN. Mr. President, the junior Senator from Alabama pointed out that the junior Senator from Indiana has called upon the opponents of this measure to state their opposition to this measure. All too often in the past few days, when some of the opponents have risen to speak, the distinguished Senator from Indiana, in his zeal and in his great knowledge and great learning on this subject, has asked the speakers to yield so that he could expound further on the measure.

The junior Senator from Alabama feels that, until he has concluded his remarks, he would like to seek to present some of the case against this measure, at which time he will be delighted to yield to the distinguished Senator from Indiana. But he would like to maintain the continuity of his thinking on the subject.

Mr. BAYH. Mr. President, one word of explanation. I do not like to interrupt, but the Senator had propounded direct questions to the Senator from Indiana, and I thought, because of the Senator's sincerity, he would want them answered. The Senator from Indiana would be glad to answer them.

The PRESIDING OFFICER. Does the Senator from Alabama yield?

Mr. ALLEN. The Senator from Alabama has propounded no questions to the Senator from Indiana.

The PRESIDING OFFICER. Does the Senator from Alabama yield?

Mr. ALLEN. The junior Senator from Alabama has told the Senator from Indiana in all courtesy that he will yield to the heart's content of the distinguished Senator from Indiana as soon as the junior Senator from Alabama has concluded his remarks.

Mr. ERVIN. Mr. President, will the Senator from Alabama yield to the Senator from North Carolina so that the Senator from North Carolina may propound to the Senator from Alabama some additional interrogations similar to those that the Senator from North Carolina has heretofore propounded to the Senator from Alabama?

Mr. ALLEN. Mr. President, the junior Senator from Alabama yields to the distinguished Senator from North Carolina on the theory that the distinguished Senator from North Carolina will elicit information in opposition to Senate Joint Resolution 1. And that is what the junior Senator from Alabama is seeking to do at this time.

Mr. ERVIN. Mr. President, does not page 10 of today's Senate Calendar disclose that H.R. 16710, an act to amend chapter 37 of title 38, United States Code, to remove the time limitations on the use of entitlement to loan benefits, to authorize guaranteed and direct loans for the purchase of mobile homes, to authorize direct loans for certain disabled veterans and for other purposes, is now ready for Senate consideration and will be so considered whenever the majority leader has an opportunity to call it up?

Mr. ALLEN. If the distinguished Senator from Indiana would relent from his attitude; the Senator is correct.

Mr. ERVIN. Does not the Senator from Alabama agree with the Senator from North Carolina that it would certainly be a gracious and a just act for the Government of the United States, acting through Congress, to make it possible for disabled veterans who have served their Nation in time of war and bared their breasts to the bullets of the enemy, to acquire loans in order to acquire mobile homes?

Mr. ALLEN. Yes, indeed. That would be the opinion of the junior Senator from Alabama.

Mr. ERVIN. Mr. President, is it not true that as long as the able and dis-

tinguished Senator from Indiana persists in his present announced plan, this Congress cannot pass this bill to make loans to disabled veterans, veterans who have been disabled in the service of their country?

Mr. ALLEN. The Senator is correct.

Mr. ERVIN. Mr. President, the Senator from North Carolina would like to ask the distinguished Senator from Alabama if page 11 of the Senate Calendar for today does not show that Senate Joint Resolution 236, a joint resolution authorizing the publication and printing of a revised edition——

Mr. ALLEN. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order. Senators will take their seats.

Mr. ERVIN. Mr. President, the Senator from North Carolina asks this question of the distinguished Senator from Alabama. Does not page 11 of the Senate Calendar for today show that Senate Joint Resolution 236, a joint resolution authorizing the preparation and printing of a revised edition of the Constitution of the United States of America, is now pending on the Senate Calendar and in due order would be considered by the Senate on motion of the majority leader?

Mr. ALLEN. The Senator is correct.

Mr. ERVIN. Mr. President, does not the Senator from Alabama agree with the Senator from North Carolina that it would be highly desirable to have a revised edition of this great book explaining the Constitution of the United States for the perusal of the Senator from Alabama, the Senator from North Carolina, and also for the perusal of the able and distinguished Senator from Indiana before we vote to change that Constitution?

Mr. ALLEN. That would seem to be wise.

Mr. ERVIN. Mr. President, will it not be impossible for the Congress of the United States to publish such a revised edition of this great book on the Constitution and make it available to Senators and Representatives for their study unless the distinguished Senator from Indiana repents of his present purpose and permits the majority leader to call up this proposed legislation?

Mr. ALLEN. The Senator is correct.

Mr. ERVIN. Does not the Senator from Alabama recall that during the present week we had a joint meeting of the Senate and the House of Representatives to hear the distinguished astronaut Col. Frank Borman present to Congress the plea of the wives of those who were serving in our Armed Forces in Southeast Asia, and who are now listed as missing in action or as prisoners of the enemy?

Mr. ALLEN. Yes, we had that session.

Mr. ERVIN. I ask the Senator from Alabama if page 11 of the Senate Calendar for today does not show that there is now pending in the Senate and ready for consideration just as soon as the distinguished Senator from Indiana relents in his present purpose, a bill, S. 3785, to amend title 38, United States Code, to authorize educational assistance and home loan benefits to wives of members of the Armed Forces who are missing in action or prisoners of war.

Mr. ALLEN. Yes, and the junior Senator from Alabama would like to call to the attention of the distinguished Senator from North Carolina that Col. Frank Borman, in his very fine remarks during the joint session urged Congress to do everything it possibly could for the families of the prisoners of war and soldiers who are missing in action. This is one thing Congress could do if the distinguished Senator from Indiana would allow this bill to be brought up.

Mr. ERVIN. Does not the Senator from Alabama join the Senator from North Carolina in paying tribute to these wives who have made such great sacrifices on the altar of patriotism, and who endure the agony of not knowing whether their husbands are dead or alive?

Mr. ALLEN. Yes.

Mr. ERVIN. Can the Senator think of any more efficacious manner to manifest our appreciation for their scarifices than enabling them to have this educational assistance?

Mr. ALLEN. And homes, also.

Mr. ERVIN. Yes. I would like to ask the distinguished Senator from Alabama this question. Does not page 12 of the Senate's Calendar for this day show that there is now pending and ready for Senate consideration H.R. 370, an act to amend chapter 39 of title 38, United States Code, to increase the amount allowed for the purchase of specially equipped automobiles for disabled veterans and to extend benefits under such chapter to certain persons on active duty?

Mr. ALLEN. The Senator is correct.

Mr. ERVIN. Does the Senator from Alabama agree with the Senator from North Carolina that nothing could show more deeply the gratitude and appreciation of this Nation to those who have incurred disability in serving their country than the passage of this particular law?

Mr. ALLEN. Yes, indeed.

Mr. ERVIN. Yet these legislative proposals which would give these benefits to disabled American veterans, which would make it possible for wives of American soldiers, sailors, and Marines who are listed as missing in combat or as prisoners of war to acquire educations and homes and which would provide the credit to veterans for acquiring homes, cannot become law unless the able and distinguished Senator from Indiana relents in his announced purpose and permits the Senate to consider these matters.

Mr. ALLEN. The Senator is absolutely correct.

Mr. ERVIN. Will the distinguished Senator from Alabama permit the Senator from North Carolina to say that the Senator from North Carolina agrees with the observation of the distinguished Senator from Alabama that if there is any filibustering going on and if there is any prevention or obstruction of legislation on the floor of the Senate, then it has to be attributed, if the truth is to be observed, to the able and distinguished Senator from Indiana, who is acting perfectly within his rights as a Member of the Senate.

Mr. ALLEN. It occurs to the Senator from Alabama that the distinguished Senator from Indiana is conducting a filibuster against the entire calendar, whereas the distinguished Senator from North Carolina and the junior Senator from Alabama have sought repeatedly the opportunity of coming to the floor of the Senate and voicing some of their objections to this plan.

Mr. ERVIN. Has it not been the purpose of the distinguished Senator from Alabama, as well as the Senator from North Carolina, merely to educate Members of the Senate, including the able and distinguished Senator from Indiana, and to persuade the able and distinguished Senator from Indiana of the error of his ways and to try to get him to join us and to act in a righteous manner in making a reasonable kind of amendment to the Constitution?

Mr. ALLEN. The Senator is correct, because the junior Senator from Alabama recalls the change of the Senator from Indiana from the automatic plan to the direct plan, and it is possible we might get him to change back to the present electoral plan or some reasonable modification of the electoral college plan.

Mr. ERVIN. Does not the fact that the distinguished Senator from Indiana has, on a previous occasion, altered his point of view give some hope to the Senator from Alabama that perhaps on further consideration and especially if he would stay here and heed the debate, he might change his mind a second time and arrive at a correct conclusion on this subject?

Mr. ALLEN. Yes; that is certainly to be hoped and whether he reaches that conclusion or not, as being for some other plan than his present plan, he may relent from his declared purpose of stopping consideration of these measures. Thus far it has only been a threat, but the junior Senator from Alabama would like to point out to the distinguished Senator from North Carolina that not only these bills on the calendar are involved, but the distinguished Senator from Indiana by his action this morning in objecting to the Senate committees meeting while the Senate is in session is choking the Senate committees and is impeding the regular flow of bills from these committees that would go on the calendar for action by the Senate.

Mr. ERVIN. Does not the distinguished Senator from Alabama hear a rather persistent rumor to the effect that a cloture motion will be laid before the Senate tomorrow and under rule XXII it will have to be voted on 1 hour after the Senate meets on next Tuesday?

Mr. ALLEN. The junior Senator from Alabama has heard recurring rumors to that effect, but the junior Senator from Alabama is encouraged by hearing other expressions, not just rumors on the part of Senators who are not greatly pleased with the Bayh filibuster of cutting off the regular flow of legislation and legislative action on the important

bills pending before the Senate, and it may be that the number of Senators who voted against the application of cloture the last time it was tried may go up significantly.

Another thing that the junior Senator from Alabama would like to call to the attention of the distinguished Senator from North Carolina is the fact that in the face of a 54 to 36 vote the press analized that vote by saying that the proponents came six votes short of a two-thirds vote.

Either there is something wrong with their arithmetic or with the arithmetic of the junior Senator from Alabama, because when you add six votes to the 54, they add up to 60 votes for cloture, against 36. With 36 against cloture, you have to have 72 to apply cloture, 72 plus 36 is more than the entire membership of the Senate. So they fell far short of six votes in trying to apply cloture.

Does the Senator from North Carolina agree?

Mr. ERVIN. The Senator from North Carolina agrees with the Senator from Alabama.

I put this question to the Senator from Alabama: Does not the arithmetic which the distinguished Senator from Alabama studied in the schools of Alabama agree with the arithmetic that the Senator from North Carolina studied in the schools of North Carolina, which shows that with a vote on cloture of 54 to 36, those seeking to impose the gag rule lack not six votes but 18 votes of the number necessary to impose cloture?

Mr. ALLEN. That is correct—90 Senators voted. The opponents of cloture got 36 votes. So if all 10 of the missing Senators had been here and had voted for cloture, it still would not have been two-thirds, because obviously 34 would prevent there being two-thirds on the other side.

Mr. ERVIN. In other words, is not the Senator from Alabama stating in substance that it would require the presence of 108 Senators in the Senate Chamber with two-thirds of them voting for cloture to impose cloture under those circumstances?

Mr. ALLEN. According to the arithmetic I have read and heard about on the part of those who are proposing that we agree to the resolution.

Mr. ERVIN. The Senator from North Carolina would like to ask the Senator from Alabama if the people of Alabama, as do the people of North Carolina, sometimes use the ancient English or Anglo-Saxon word "mommick up" or "mummick up" to express "messing up things"?

Mr. ALLEN. Yes.

Mr. ERVIN. Does the Senator from Alabama agree with the Senator from North Carolina that Senate Joint Resolution 1 will "mummick up" the Constitution?

Mr. ALLEN. Yes.

Mr. ERVIN. Does the Senator from Alabama agree with the Senator from North Carolina that it would be bad for Senate Joint Resolution 1 to "mummick up" the Constitution, and that it would be almost as bad to "mummick up" plain arithmetic?

Mr. ALLEN. Yes.

Mr. ERVIN. I thank the Senator from Alabama for yielding to me so I could propound these few little interrogatories to him.

Mr. ALLEN. I appreciate these questions, which have brought out some information that the junior Senator from Alabama had not brought out, and which certainly strengthen the case against approval of Senate Joint Resolution No. 1.

Mr. President, the junior Senator from Alabama, before responding to some of the questions of the distinguished Senator from North Carolina, was inquiring as to where the enthusiasm was for this plan. He made the statement a few moments ago that there was not a single Senator in the Chamber who favored Senate Joint Resolution No. 1, but then, looking up on the rostrum and seeing the distinguished Senator from Wisconsin (Mr. NELSON), whose name appears as one of the sponsors of Senate Joint Resolution 1, he had to qualify that statement.

The junior Senator from Alabama now is of the opinion, with the distinguished Senator from Arkansas (Mr. FULBRIGHT) presiding, there is not now in the Chamber a single Senator who favors passage of Senate Joint Resolution No. 1.

Where is the enthusiasm? It is lacking. And why? Because it cannot be made effective until 1976. Who is worried about what is going to happen in 1976, when the people are wondering how they are going to pay their bills? Why worry about a presidential election in the distant future of 1976 when we have not even had the one in 1972?

The junior Senator from Alabama also pointed out that there has been so much change, so many changed views, with regard to a change in the plan for electing the President and the Vice President that there might be a half dozen more changes in the sentiment in the Senate and in Congress and in the country between now and 1976. So why set up action on Senate Joint Resolution 1 and say that it has priority over 100 bills pending on the calendar and in Senate committees?

As the junior Senator from Alabama pointed out, some of those bills are appropriation bills making appropriations for the fiscal year we started on July 1 of 1970. We are well into the year, and those bills have not been passed. But, under the threatened terms of the Bayh filibuster, we are not going to have an opportunity to vote on those important bills—we will have to take action on Senate Joint Resolution 1.

If that is not a rule-or-ruin attitude, I do not know what such an attitude would be. We have got to vote to make provision for the 1976 election before we take action on bills that are needed today.

That is where the junior Senator from Alabama takes issue with the Senator from Indiana, all the while conceding that the distinguished Senator from Indiana is a shrewd and able parliamentarian and that he is availing himself of the clear rights that he has under the rules of the Senate.

Mr. President, Senate Joint Resolution No. 1, if two-thirds of the Senate and two-thirds of the House vote approvingly on it, will be sent to the States. That is pretty much like a comet. A comet takes 70 years to go out in its orbit and come back to the same point in space. An amendment to the Constitution is customarily, and in this instance that is the case, sent to the States and given 7 years to come back with ratification by the legislatures of 38 States.

That would mean that for this measure to be used in 1972, it would have to be submitted to the States and be approved in 76 legislative bodies—or 75, because each State except the State of Nebraska has a House and a Senate, Nebraska having a unicameral system.

So it would take a minimum of 75 legislative bodies in 38 States to take action, approvingly—not just take action, but take action approvingly on this amendment—by April 15 next year, before it could apply in 1972, because the wording of the amendment states that it does not become effective until 1 year after the first April 15th following its ratification. So if it were not ratified by 38 States until the 20th day of April, 1971, we would have to go, then, to the 20th day of April, 1972, for the year to start running. That would carry us, then, until April 20, 1973, which would be beyond the date of the 1972 elections.

Mr. President, there are many citizens in the country who believe that the electoral college system of electing the President and Vice President should be modified. So some come up with proposals for direct election.

Direct election: That sounds fine until we start studying it a little bit, and then it does not seem so good.

Change for change's sake should not be resorted to, and every change is not good reform. Every change that is made is not reform in the sense that it is better than what we had. So why exchange the certain for the uncertain? Why change the tried and true for the untried? Why change from a system that has worked well in this country for more than 180 years to a system that creates many more problems than it will solve, that has pitfalls at every turn, that has a potential of tearing this country apart?

Mr. President, if this direct election system is adopted, if the Bayh amendment is adopted, it would make for, not a majority president, but a plurality president; because, amazingly, it provides that if the leading candidate gets as many as 40 percent of the popular votes throughout the country, he is elected President, and his running mate becomes Vice President. Under this plan, of course, the candidates for President and Vice President run as a team, and it would be impossible for one to be elected without the other, which is a theoretical possibility under the present system.

But if the leading candidate receives as many as 40 percent of the votes, he is elected President and his running mate becomes Vice President.

The complaint is made by some of the advocates of Senate Joint Resolution 1 that under the present system the winning candidate does not always have a mandate from the people, that he could possibly have a majority in the electoral

college and be elected, and not have a majority of the popular votes. They argue that that would leave him in such a position, as the distinguished Senator from Indiana has stated over and over, that it would affect his credibility, his power to govern. But yet, under Senate Joint Resolution 1, a 40-percent plurality ticket can be elected.

Mr. President, what sort of mandate is that, 40 percent of the voting?

They say under the present system it is winner take all in a State, that those who did not vote for the winner in that State not only lose, but their votes are added to the winning side, which is hard for me to follow, because someone has to win, anywhere.

Mr. President, in the judgment of the junior Senator from Alabama, we should not at this time take action on Senate Joint Resolution 1, because during the 7-year period that this amendment would be before the States for consideration, it would effectively stop the House of Representatives and the Senate from considering any other type of change or reform, because it would naturally be the attitude of the House of Representatives and the Senate that, "Well, we have got something out there before the States now, some States have adopted it and others are considering it, so why permit something else?"

So for 7 years, any electoral reform would stand little chance, during the pendency of the measure before the States.

So those who favor some type of electoral reform regarding the method of choosing the President and the Vice President should not favor Senate Joint Resolution 1 just because it offers a change, because a change is not sufficient. A change is not always reform. It re-forms, yes, but it does not necessarily reform. There is a difference in the emphasis.

Mr. President, the runoff provision of the Bayh amendment has the potential of tearing this country apart. It would have the effect of proliferating splinter parties.

Why? Well, under the present system, for any party to register in the electoral college, it must carry the votes of at least one State. That has prevented the formation of many splinter parties, because they might know that throughout the country, throughout the 50 States, they might poll as many as 2, 3, 4, or 5 million votes and not get a single electoral vote. Henry Wallace, in 1948, got some 2 million votes and did get not a single electoral vote.

So a splinter party, a party other than the two great parties in the country, would be encouraged to offer candidates. They would mushroom all over the country, because their votes, however few they might be, would be taken into account in ascertaining whether the leading candidate got 40 percent of the vote. They would be taken into account in the runoff. There would be bids of one sort or another for the support of these splinter parties in the runoff.

Mr. President, the 40-percent plan of the distinguished Senator from Indiana would provide that a man would be elected President of the United States and his running mate the Vice President on receiving as few as 40 percent of the vote, never receiving a majority vote. I submit that under the present plan, the electoral college plan, no person can be elected President or Vice President unless he receives a majority of something. Under Senate Joint Resolution 1, he does not need a majority of anything. Forty percent will elect him if he is the high candidate. Under the present electoral plan, however, a candidate, to be elected, must receive a majority of the electoral votes, which would mean States having a majority of the Members of the House and the Senate. If he does not get a majority in the electoral college under the present plan, the election is thrown into the House of Representatives, and the three highest are voted on by the House.

There is the runoff, Mr. President. Under the present plan, if the candidate gets a majority in the electoral college, there is no runoff. That is the runoff under the present plan. And the candidate must receive a majority of the electoral college votes to win the runoff. So under the present plan, we have the requirement that a candidate receive a majority of something, either the votes of the electoral college or, failing in that, the votes in the House of Representatives, with each delegation having one vote.

Yes, Mr. President, under the plan of the distinguished Senator from Indiana, there would be a proliferation of splinter parties that are discouraged under the present system, because under the present system, unless the party carries at least one State, it will not register in the electoral college.

Another reason why parties would proliferate under the 40-percent plan with the runoff attached is that it would be likely, if not certain, that with a proliferation of parties, with a number of parties involved, there would be a runoff. So that we would find, from a practical point of view, that a voter would be more inclined to vote for the candidate of his geographical affinity or his ideological affinity.

Frequently, we hear a man say, "I would vote for such and such a candidate but I don't think he has a chance, and I am going to vote for another candidate." I think a great deal of that feeling abounded in the 1968 presidential election. The public opinion polls showed that one of the candidates, the third party candidate, approximately a month before election day, had about 21 percent of the popular vote; but on election day, or from that time to election day, there was an erosion in his strength as the voting public realized that he probably would not be one of the top two candidates. So there was a great erosion of his strength down to about thirteen and a half percent on election day. But if those people had known there was going to be a runoff, they would have voted with their hearts the first time, knowing that they would then have another choice in the runoff.

Yes, they talk about the confusion that might be caused by the failure of a candidate to get a majority of the electoral vote under the present system. Look at the confusion that would be caused in this country if no candidate got the 40 percent; 40 percent would not be desirable. You would have a nonmajority President. You would have a plurality President. But even that would be better than having to go out before the country again in a runoff.

Mr. President, under the direct election plan, splinter parties would be increased in number, because they would have some effect in the runoff; they would have to be talked to, possibly bargained with, assured of political concessions or any, I assume, honorable proposal that could be made.

On page 3 of the committee report on the Pastore bill putting a limit on the amount of money that could be spent by candidates for television and radio, are listed—and I was amazed at the number—in the 1960 Presidential election, 14 other Presidential candidates other than the two major candidates, listed as follows:

C. Benton Coiner, Conservative Party of Virginia; Merritt Curtis, Constitution Party; Lar Daly, Tax Cut Party; Dr. R. L. Decker, Prohibition Party; Farrell Dobbs, Socialist Workers Party, Farmer Labor Party of Iowa.

He apparently got the endorsement of both those powerful parties. Socialist Workers and Farmers Party, Utah; Orval E. Faubus, National States Rights Party; Symon Gould, American Vegetarian Party; Eric Hass, Socialist Labor Party, Industrial Government Party, Minnesota; Clennon King, Afro-American Unity Party; Henry Krajemski, American Third Party; J. Bracken Lee, Conservative Party of New Jersey; Whitney Harp Slocomb, Greenback Party; William Lloyd Smith, American Beat Consensus; Charles Sullivan, Constitution Party of Texas.

Mr. President, I call attention to the splinter parties that existed in 1960 for that particular election, not thinking that any Member of the Senate had heard of more than one or two, but to show that even with the safeguards in our electoral college system, a third party does not register in the electoral college unless it carries at least one State.

We have a proliferation of 14 parties which the committee staff knew of—there were doubtless many more; but if that many would exist where they had no chance whatsoever of carrying a State, think how many would exist if their votes would be taken into account with the direct election system, even if they get no more than 1,000 votes. It would have some effect, because their votes might spell the difference between whether a candidate got 40 percent and was elected President, or 39.9999 percent. Thus, every single splinter party would have a direct and important effect on the election. Then we will have in the runoff the possibility of bidding for the support of these parties by the two major candidates.

Someone suggested in the debate, while I was here on the floor, that under the present system with the electoral college, it is entirely likely that the second choice of the people might be elected President, the person receiving fewer of

the popular votes but a majority in the electoral college or a majority in the House of Representatives, if no one got a majority, certainly under the direct election plan, there is a definite possibility, even the likelihood, that the man who comes in second—all candidates getting fewer than 40 percent—might win in the runoff.

Let us assume an election in which there are four parties—and four parties would be a mighty small number of parties in years to come if we had the direct election system. Every time there is a national convention, feelings are real intense one way or another—and we have seen that type of convention in our time—what would there be to prevent a candidate who fails to get the nomination of his party saying, "All right, I am going to start a party of my own."

Politics today is a whole lot more on a personal basis, an image basis, the man basis, than it has been in the past; and less adherence to party and more seeking the best man.

Thus, it is entirely likely that some disgruntled candidate at a national convention, who might have been the people's choice but not the choice of those who had influence in the convention, might decide to run for President, saying, "I am not satisfied with the actions of the convention." There would be nothing to prevent him from running for President. There would be nothing to prevent him from getting 5 million or 10 million votes, just as the third party candidate in 1968 got nearly 10 million votes.

Mr. HANSEN. Mr. President, will the Senator from Alabama yield?

Mr. ALLEN. Mr. President, I am going to yield, on this basis, that I declined to yield to the distinguished Senator from Indiana on the theory that he has challenged the opponents of Senate Joint Resolution 1 to come in and make known their views. In the past, when we have done that, the distinguished Senator from Indiana has interrupted and has interposed his views from time to time, and I have declined now to yield to him until the conclusion of my remarks. But, feeling that the distinguished Senator from Wyoming would like to elicit information that might possibly have a bearing on the opposition to Senate Joint Resolution 1, I am delighted to yield to the Senator from Wyoming.

Mr. HANSEN. Mr. President, I have been listening with a great deal of interest to the very wise, valid, and logical observations of the distinguished Senator from Alabama. I am particularly intrigued by his most recent comments relating to the fact that Senate Joint Resolution 1 would encourage the proliferation of splinter parties.

The distinguished Senator from Alabama has already spoken about the third-party candidate in 1968. Is it the opinion of the distinguished Senator from Alabama that Senate Joint Resolution 1 would encourage "far out" candidates? I am not trying to identify any one end of the political spectrum; but rather I refer to those who do not find themselves comfortable within either major party. Would it not be the opinion of the distinguished Senator from Alabama that if this joint resolution were to be passed, a person who could not hope for any significant support as a candidate on one of the two major political party tickets might see an opportunity, under the direct election system, to project himself into public prominence and acquire significant name recognition throughout the United States by espousing causes, issues, and positions that did not necessarily reflect the opinions or have the support of more than a small minority of the people in this country?

Would it not be true that this type of candidate would be entitled to be afforded an opportunity to jump into the ring? If there were a number of candidates that shared the conviction that the two-party system no longer serves this country well, then it is reasonable to expect that these candidates would take votes away from the two major candidates. In view of this fact, would it not be true that there would be every inducement for persons who do not reflect the wishes, the aspirations, the hopes, and the desires of most citizens of this country to get into the race and take strength away from the other candidates? This type of faction would undoubtedly, then, become a vital bargaining force in a runoff election, or in whatever subsequent maneuvers were required?

There are many different kinds of proposals, although I recognize that Senate Joint Resolution 1 provides for a runoff election.

It would seem to the Senator from Wyoming that this sort of amendment to the Constitution would give every encouragement to people who would, indeed, seek to divide and tear the country apart. They would have an inclination not to compromise and not to try to find the mainstream that could be followed, a stream which, I submit, we have followed successfully for almost 150 years. The last time we had any trouble with the present system was in 1824. Would it be the opinion of the Senator from Alabama that this sort of amendment would provide such an opportunity and encouragement?

Mr. ALLEN. Mr. President, I certainly agree with the view expressed by the distinguished Senator from Wyoming. I feel that he has put his finger on a very vital point, a glaring defect in the direct election system. Certainly it would encourage, as the Senator says, way out candidates to run. Certainly it would encourage one-issue candidates to run.

I do not think that it would be very difficult for us to suggest right now four or five one-issue parties that would come in under the direct election plan.

Certainly direct election would tear our two-party system apart. It is entirely likely that it would be a disadvantage to have the endorsement or the nomination of one of the major parties.

There could be something of a television blitz dealing with an image drive. We could wake up one day and find someone whom no one knew, someone whom we had only seen and heard on television, elected President. We would know absolutely nothing about the extent of his loyalty to the country, what his views were, or how he would conduct the high office of President of the United States.

That is why I say that the direct election plan has the potential of tearing the country apart. That is the reason I oppose it so vigorously, and I feel sure that is the reason why the Senator from Wyoming opposes it so vigorously.

Mr. HANSEN. Mr. President, with the Senator's further indulgence, I should like to ask if he does not share the opinion of the Senator from Wyoming that one of the great strengths of our constitutional Republic, under which we have made such great progress, has been the encouragement that has been given to the two-party system and the urgency and necessity for compromise. It provides a constitutional means to reach accord and get together enough people so as to move forward in a meaningful manner, with the sole conviction that a majority of the citizens are in support of the philosophy, generally, of the banner carrier for one or the other of the two major parties.

Mr. ALLEN. Mr. President, certainly the country has fared well with our system of political parties which the direct election system would tear asunder. I think it is entirely likely that we would have 50 to 100 splinter parties if the direct election system were to go into effect.

I invite the attention of the Senator from Wyoming to a fairly amusing little situation that happened in my State of Alabama. It is easy to start a political party in Alabama. Just a handful of people can start one. A man there who is a great grandson of the last Whig Governor of Alabama—I believe he served in the early 1860's, possibly—conceived the idea of running for Governor. He is running for Governor of Alabama now on the Whig ticket.

Nine people got together in a convention and named the party the Whig Party. They nominated the man, John Watts for Governor. His name has to go on the ballots in Alabama. His name will have to be on every ballot in Alabama.

It would be just as easy, throughout the country, for the way-out candidates we speak of to do likewise. Every kook in the country could come in, set up a little party, and by petition get on the ballot. It might not be as easy as it was in my State. But it is rather easy, by petition, to get on the ballot. The voting machines would not be able to hold the names of all candidates who would qualify from the splinter parties.

The sad part is that they would get some votes. Almost any candidate would get some votes. So their votes would have to be taken into account in determining whether the leading candidate got 39.99 percent of the national vote or whether he got 40 percent and was elected President.

Mr. HANSEN. Mr. President, I would like to ask the distinguished Senator from Alabama an additional question: Observation, charges, and countercharges have been made about what

would happen in the event of a contested election. What is the opinion of the Senator from Alabama as to the implications of this proposed amendment if a charge were made of voter irregularity and a challenge were made with a demand for a recount?

Mr. ALLEN. It would just create chaos, because the direct election plan makes of the present 184,000 election precincts in the country one great big election precinct, as the distinguished Senator from North Carolina has described it.

If there were an allegation of fraud, and it was contested, or even a recount were made, for that matter, it would require an interminable amount of time. If a charge of fraud were made chaos would result throughout the country, because the amendment is silent on that matter.

It does contain the 40-percent requirement, but it does not prescribe any rules and standards. We would not know who certifies the returns. We would not know who made the final certification. Then, too, the amendment is defective because different States have different laws as to voting requirements.

One State might allow practically everybody to vote, whereas another State might have different requirements. The State having loose requirements would obviously have a greater vote than States where the franchise was in any way restricted. That would result in an imbalance among the various States, depending on their laws; whereas under the present system it does not matter what the requirements are so long as it is determined who received the vote in the State, because the election is decided State by State. Under the direct plan all the votes would be thrown into a big pot, and nothing would be certain about how the vote was to be counted, who counted the vote, or who made the final certification.

## ORDER OF BUSINESS

Mr. ALLEN. Mr. President, I ask unanimous consent that I may yield to the distinguished senior Senator from Alabama to make an introduction, with the understanding that I not lose my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

## VISIT TO THE SENATE BY THE VICE PRESIDENT OF THE GRAND NATIONAL ASSEMBLY OF RUMANIA

Mr. SPARKMAN. Mr. President, I introduce a distinguished visitor who is with us today, Miss Maria Groza, Vice President of the Grand National Assembly of the Socialist Republic of Rumania. Miss Groza is in the United States as a member of the Rumanian delegation to the 25th session of the United Nations General Assembly and is Chairman, at this session, of the Third Committee of the General Assembly.

The Subcommittee on European Affairs of the Foreign Relations Committee entertained Miss Groza at lunch today. A number of Senators were present and had an opportunity to meet Miss Groza at that time. The meeting was in the nature of a preface to a visit to Rumania which members of the U.S. delegation to the Interparliamentary Union Conference will be making next week.

I ask unanimous consent to have printed at this point in the RECORD a brief biography of Miss Groza.

There being no objection, the biography was ordered to be printed in the RECORD, as follows:

MISS MARIA GROZA, VICE PRESIDENT OF THE GRAND NATIONAL ASSEMBLY OF THE SOCIALIST REPUBLIC OF ROMANIA

Born in Hunedoara—Romania, on September 1st, 1918; daughter of the late President (1952–1958) and Premier of Romania (1945–1952).

Graduated the Bucharest Academy for Economic Sciences.

PROFESSIONAL ACTIVITIES

Senior officer in the Ministry of Foreign Affairs;

Assistant professor at the Academy for Economic Sciences.

STATE AND PUBLIC ACTIVITIES

Vice President of the Grand National Assembly since 1965;

Vice President of the Women's National Council of Romania since 1958.

ACTIVITY IN THE FOREIGN RELATIONS FIELD

Member of the Romanian delegation to the United Nations General Assembly's 18, 20, 21, 22, 23 and 25 Sessions;

Representative of Romania in the United Nations General Assembly's Third Committee at the 18th, 20th, 21st, 22nd and 23rd Sessions;

Chairman of this Committee at the 25th Session;

Member of the Romanian delegation to the UNESCO World Congress for Education of Youth (Grenoble—France—1964);

Representative of Romania to the U.N. seminars on Woman's Political and Civic Education (Helsinki—1967), on the Woman's Condition in the Family Law (Bucharest—1961) and on the Impact of the Scientific and Technical Development on the Woman's Condition (Yasi—1969).

OTHER ACTIVITIES

Miss Maria Groza is very active in the fields of journalism, international affairs and social-political sciences.

Mr. SPARKMAN. Mr. President, in order that Senators may meet our distinguished visitor, I ask unanimous consent that the Senate stand in recess for 2 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS

Thereupon, at 2:22 p.m., the Senate took a recess for 2 minutes, during which the Vice President of the Grand National Assembly of the Socialist Republic of Rumania was greeted by Members of the Senate.

On expiration of the recess, the Senate reassembled and was called to order by the Senator from Idaho (Mr. JORDAN).

## MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Berry, one of its reading clerks, announced that the House had passed the bill (S. 2224) to amend the Investment Company Act of 1940 and the Investment Advisers Act of 1940 to define the equitable standards governing relationships between investment companies and their investment advisers and principal underwriters, and for other purposes, with an amendment, in which it requested the concurrence of the Senate; that the House insisted upon its amendment to the bill, asked a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. STAGGERS, Mr. MOSS, Mr. MURPHY of New York, Mr. SPRINGER, and Mr. KEITH were appointed managers on the part of the House at the conference.

The message also announced that the House had disagreed to the amendment of the Senate to the bill (H.R. 17255) to amend the Clean Air Act to provide for a more effective program to improve the quality of the Nation's air; asked a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. STAGGERS, Mr. JARMAN, Mr. ROGERS of Florida, Mr. SPRINGER, and Mr. NELSEN were appointed managers on the part of the House at the conference.

The message further announced that the House had passed a joint resolution (H.J. Res. 1346) authorizing the President to declare the week beginning the third Sunday in September 1970 as "National S.S. *Hope* Week", in which it requested the concurrence of the Senate.

## HOUSE JOINT RESOLUTION REFERRED

The joint resolution (H.J. Res. 1346) authorizing the President to declare the week beginning the third Sunday in September 1970 as "National S.S. *Hope* Week", was read twice by its title and referred to the Committee on the Judiciary.

## DIRECT POPULAR ELECTION OF THE PRESIDENT AND THE VICE PRESIDENT

The Senate continued with the consideration of the joint resolution (S.J. Res. 1) proposing an amendment to the Constitution of the United States relating to the election of the President and the Vice President.

Mr. ALLEN. Mr. President, I was engaged in colloquy with the distinguished Senator from Wyoming.

Mr. HANSEN. I appreciate very much the courtesy of the Senator in extending to me the opportunity better to understand the full impact of Senate Joint Resolution 1. I would like to ask the distinguished Senator if it is not a fact that in 1960 the late President Eisenhower gave serious consideration to requests that were made to him for a recount in that very close election. In pursuing the subject, he had occasion to examine the statutes that apply to the several States and he found the complete lack of uniformity, to which the Senator has just alluded. Because of this fact, he concluded that if a recount were to be undertaken, in even some of the States where there was a close race—despite the relatively obvious ease that would occasion that sort of recount as contrasted with recounting all the votes in each of the 50 States of the United

States and the District of Columbia—he concluded that the time lapse, the interval between the time when the people would know who their President was on the one hand, and the determination of that recount on the other, would pose too great a burden upon our Government.

After having reflected on all the elements involved in the mechanics of a recount, and the delay between the time he would have vacated the office and his successor would have been duly declared. President Eisenhower concluded that the burden on our Government was so great as to convince him not to proceed with the recount. This is true despite the fact that there were many who thought a recount might have resulted in a different outcome.

Mr. ALLEN. That is the understanding of the junior Senator from Alabama from reading publications since that time. I believe the Senator from Wyoming inadvertently said "Eisenhower" instead of "Nixon" at the start of his remarks. Since the Senator referred to the 1960 election, it was President Nixon who had that dilemma.

Mr. HANSEN. No. I meant to say, and perhaps I am wrong; but I did say President Eisenhower deliberately. He was President at that time and continued until the late John F. Kennedy was inaugurated on January 20, 1961, as a recall. It was my understanding that this appeal for a recount was made to the President of the United States, President Eisenhower, and I thought it was he, not Mr. Nixon, who made the decision not to have a recount, however, I would be happy to have that clarified.

Mr. ALLEN. I was under the impression the decision was presented to now President Nixon.

Mr. HANSEN. I see.

Mr. ALLEN. He would have had to make the decision. The Senator is exactly right. That was the conclusion I understand he made.

Mr. HANSEN. The Senator means that as the loser, or the defeated presidential candidate, Nixon at that time had the choice.

Mr. ALLEN. Yes.

Mr. HANSEN. I see.

Mr. ALLEN. It would have thrown the country into turmoil.

One advantage of the present system is that fraud or an inaccurate count is insulated and set aside, with a fence around it, so to speak, and even under that condition it is difficult to contest in time for the count in House Chamber. As the Senator pointed out, magnify that 50 times and we have the problem that would be created by just one precinct, in trying to recount all the votes. It would be an insurmountable task, an absolutely impossible task.

Mr. HANSEN. One further question: I cannot recall whether it was Theodore White, or Professor Bickel, who made the observation that our present system has the capacity or capability of insulating fraud. Whoever the author of the statement is, he likened it to a ship with compartments in it. He said the outside of the ship could be ruptured, but the ship would not flood with water and sink because the water could not get into every other part of the ship under our present system. He said we may have fraud in one State, but it cannot destroy the whole election process. It cannot thwart the will of the Republic, because each of the other 50 States, under our present system, is insulated from that fraud.

So, despite what may happen in the State of Illinois, as an illustration, if there should be corruption and fraud there, it cannot spill over into the State of Indiana or the State of Iowa. If there is to be a recount, it is a much simpler task to have it only in the area where fraud is suspected or where there has been a very close race and it is necessary for a recount to take place only in that State.

Does the distinguished Senator from Alabama consider that to be a very vital reason for the retention of some sort of electoral college system of choosing a President as we now have?

Mr. ALLEN. Yes; I think it is a very effective argument and a most persuasive one. I like the analogy of comparing the States to various compartments in a ship where, if there were some fault or flooding of one compartment, it would not necessarily sink the entire ship; it would be localized. That would be the case of fraud or an inaccurate count in a State. It would simplify the problem. The problem would be only one-fiftieth what it would be in trying to recount for the whole Nation.

Another thing that occurs to the junior Senator from Alabama is that the proposed amendment does not provide for who is going to certify those returns. Are they going to continue to be certified in the States? Are they going to set up Federal election boards? Under the present provision, Congress has that power, but nothing is said about it in the amendment. Who makes the final certification? Who counts the votes? Does each State send in an adding machine tape and say, "This is it"? It is not provided for. There is no provision for a joint session of Congress to do it, as presently provided, wherein Congress examines the returns now and the Vice President announces the result. Nothing is said about that in this proposal.

The amendment would create more problems than it would solve. It is so indefinite. The two definite features that are sought to be written into the Constitution are the two worst features. One is election by a 40-percent plurality. That is the worst feature. Then, the second worst feature is the runoff. So the two pernicious features are written into the basic law of the land.

If we submit the amendment to the States and we realize we have made a mistake, it will be difficult to submit another amendment. I do not know whether we could withdraw what had been done or not. Probably not. It would already be out there. I do not know whether it could be repealed while it was going around to the States or not. But it would certainly stop any effort toward meaningful reform if we had this proposed amendment before the States for ratification.

The junior Senator from Alabama pointed out earlier that there had been a lot of changes in the thinking of individual Senators and of the Senate as a whole in recent years. The distinguished Senator from Indiana at one time was opposed to the direct plan, and he was backing the automatic plan. So he has changed. The Senate passed the proportional change. They are not talking about passing that. They are talking about the direct election. So there has been individual change. There has been a collective change.

The junior Senator from Alabama pointed out that, on a method of electing the President and Vice President that cannot be put into effect until 1976, with 6 years between now and then, there may be a half dozen changes in the thinking, under changing conditions. So why hurry? Why rush this thing through? Why put it ahead of important measures on the Senate Calendar and in committees? The Senator from Indiana, conducting the Bayh filibuster, has already prevented the Senate committees from continuing to meet today during the session of the Senate and he threatens that this afternoon, when the effort is made to lay this business aside and get on to some of the important work of the Senate, he is going to object.

The Senator from Alabama hopes that the Senator from Indiana will relent on that declared intention; that he will not continue this filibuster. It is a filbuster against the calendar. The Senator from Alabama would like to point out to the Senator from Wyoming that the Senator from Indiana is not having a discussion on just one measure, which could not become effective until 1976; his filibuster is applicable to the entire calendar and the entire agenda of each Senate committee.

Mr. HANSEN. Will not the effect of it be essentially to bring to a grinding halt all of the really effective work the Senate might otherwise be able to accomplish?

Mr. ALLEN. Yes; very definitely. The junior Senator from Alabama pointed out we have six or seven appropriation bills, appropriating billions of dollars, one of them the military appropriation bill. All we passed was the authorizations; the appropriation bill has not been passed. If that bill cannot be turned out by the committee, how are we going to vote on that? We are already into this fiscal year, which started July 1. If they are going to say we have to vote on the pending measure, which cannot go into effect until 1976, and on which we might change our minds a half dozen times between now and then, and if we have to hold up action on really important bills to try to put something into effect in 1976, it just seems that, as a matter of priority, we ought to get down to work on the calendar.

But a filibuster is being conducted by the distinguished Senator from Indiana on the calendar, so we will have to just weigh the priorities. Which is more important? Is it the whole calendar, which the Senator from Indiana seeks to prevent us from reaching, or is it this measure, which will not apply until 1976? The issue seems clear to the Senator from Alabama.

Mr. HANSEN. It seems to the Senator

from Wyoming that it is most unfortunate that the distinguished Senator from Indiana, for whom I have the highest regard and respect, would seek to invoke such a harsh penalty on the Senate, which will, in effect, deprive it of its ability to get on with its work.

What is not generally understood is that, to the casual observer, when he comes into the gallery and looks down upon the Senate, he is unaware of the fact that most of the Senators are engaged in committee hearings; they are considering the respective bills that have been introduced, and that are before Congress, and they are listening to testimony in their various committees. As a member of the Finance Committee, I have been listening for the last several days to testimony on the President's family assistance program. I and my colleagues would like to understand it better. We hope that we can hear from people who know what effect this overhauling of the welfare program may have upon this country. The question is if the program will give the incentive to people now on welfare to move from welfare and to take jobs, or to enroll in job training programs, or in schools, so as to upgrade their abilities and their talents, and thereby enable them to be better qualified for a job.

This is some of the work that will come to a stop if the distinguished Senator from Indiana were to take this extreme measure. But before dwelling further on that, I do wish to go back one step, and ask my distinguished friend from Alabama about one further thing.

I would like to ask the distinguished Senator from Alabama about the provision in the bill whereby we could have a President elected with 40 percent of the vote. As I understand the provisions of Senate Joint Resolution 1, if a candidate received 40 percent of the popular vote, and received more than any other one candidate, then, under the provisions of this bill, is it correct that he would be declared to have been elected President of the United States? Am I correct about that?

Mr. ALLEN. Under the resolution, if he was the high man and got as much as 40 percent of the entire popular vote of the country, he and his running mate, running as a team, would be declared elected.

Mr. HANSEN. I recall, as the then Governor of Wyoming, the tragic sequence of events which happened when the late and beloved President John F. Kennedy was assassinated. Each of the 50 Governors was invited to come to Washington to pay the respects of the State he represented to the assassinated President.

I shall not forget that when we assembled for the services in St. Matthew's Cathedral, a very old and hallowed Catholic church, we saw parade before ourselves as well as the newsreel cameras and the television cameras of the world, a deeply saddened entourage of officials from literally everywhere in the world. They had come to America to pay the respects of their countries. A unique feeling overcame me because I realized that many of our visitors were amazed that such a tragic and traumatic event could take place; and yet, under the process of government and of succession in office that characterizes this Republic of ours, no American citizen for a moment ever considered the possibility of this Government failing, of this country's legal authority being overthrown.

That never entered any American's mind, but it was very much on the minds of a great number of the foreign heads of state who were here, because, as the Senator from Alabama knows, all too often, when a president is assassinated in any of a great number of other nations, that means the end of that government. It means the necessity for bringing a new government into being; and yet here they were, this great entourage of persons who had come to pay their respects, not so much because of their personal friendship or personal knowledge of John F. Kennedy, but rather they were here because they recognized the strength of the Government of the United States. They recognized the important role that the United States plays in world affairs; and I say this with no intent to discredit the hallowed name of John F. Kennedy, but rather as a fact.

There were people who came to that sad occasion who had never met the President of the United States; but they were well aware of the extremely important post he occupied in this country, and the extremely important role that was his and would become that of his successor in world affairs.

So they were here, not so much to view the casket, but rather because they recognized the importance of this country. They were here to pay their respects to the United States as well as its fallen leader.

Our present electoral college system is old, granted, and many say it is antiquated, that it no longer serves us well and, therefore, that we ought to get rid of it, that we should throw it out, that almost anything would do a better job. I disagree. There are all kinds of ideas, as the Senator from Alabama knows, that could be substituted for it, and the sponsors of these various proposals will tell you, "Well, my idea is better, and so is someone else's, and someone else's; almost anything could be better," I would say this: Until we have reasonable assurance that we will be making an improvement, let us not be too hasty to cast aside something that has served us well. And to those who find fault with the system by which we have chosen Presidents, let me say that I know of no country in the world today that can boast of a higher standard of living than that of the average, typical American. I know of no country which has been able to bring into effect the force of its productive capability better than has the United States of America. I suggest that we remember that since the end of World War II, this people, this productive machine that we call the United States of America, has given away, to friend and foe alike, between $150 billion and $175 billion if you add together the Marshall plan assistance, all of the foreign aid, and all of the various different kinds of aid we have given to people throughout the world. It is my contention that any system of government which has the stability we have been able to demonstrate, which has the resiliency that was apparent when President Kennedy was killed, which can carry on in good times and bad, which can stand almost alone—as we have so often stood—in defending freedom in the farflung corners of this world, then I say, let us not be too quick to cast aside a system that is able to deliver this kind of government.

I say, too, that we should not be too hasty to cast our procedures aside, despite the weaknesses we find in our government today, despite the discrimination which we find in some places, despite all of the inequalities of opportunity which are called to our attention by our detractors and by those, as well, who would seek to improve our system. Despite all of these things, I say that I know of no country that has a greater record of achievement for all its people than does the United States.

I happened to hear Al Capp a few weeks ago and he was telling about the achievement made by the average citizen in this country. I am not certain that I recall precisely the figures, but, as I recall in the last decade or two the average American has seen his average annual income increased by 50 percent, and the average black is within about 6 months of having achieved the same level of educational attainment as the average white; and the average black, if I recall the figures that were presented, now has an income that approaches or perhaps exceeds $7,000 annually.

All I am saying is that any country which can do as good a job as we have done ought to examine very closely and very carefully and very critically those processes by which we have selected our leadership. I am sure that not all our leaders have been great, but, generally speaking, I think we have moved forward; we have made significant social gains; we have made significant gains in extending freedom equally and impartially to all our people. I think we have made gains educationally. We have made gains in the progress of all our people, no matter what minority they may compose.

In Wyoming, we have 2½ times as many Indians as we have blacks. There is much left to be done among the Indians, and I am one of the first to admit that. But I say: Show me another country that has done as well as we have done.

I am not ready to say that simply because this system is nearly two centuries old that it is outmoded, and that it is no longer serving us. I am not sure that I agree with those who say that because one of our electors became faithless to the implied pledge that he took when he agreed to have his name submitted as an elector in 1968, that we should throw the whole system out. I would hope that the people of this country and the Members of the Senate would consider very carefully what we have accomplished and look about the world and compare the United States, compare our Government, compare the stability of our institutions with those of almost any other foreign

country, and ask themselves whether it is not better to have a system which fosters and encourages a strong, viable two-party system, so that regardless of who may be leading this country, we are going to have the steadying assurance that comes from the firm knowledge and conviction that the person who has been chosen under this electoral college process has the support of a majority of our people.

To me, these are some of the considerations that I know are very much in the mind of the Senator from Alabama. I think he is making a wonderful contribution to our Government, to a better understanding of this entire issue, in presenting, as he does, in the knowledgeable and lucid way that he does, his observations and comments, spelling matters out in detail. It is important that it be done in this fashion, because things can elude us too easily if we do not take the time to stop and listen and ponder and consider, as we are privileged to do by the presentation of the Senator from Alabama this afternoon.

I would like to express my appreciation to the Senator for his having yielded. I am grateful to him. I ask whether he shares at least some of the views I have just expressed as he has afforded me the opportunity to comment on his very remarks here today.

Mr. ALLEN. I appreciate very much the outstanding contribution which the distinguished Senator from Wyoming has made to this discussion. Certainly, I approve of his inspirational remarks. His remarks have been to the point and have pointed out the greatness that is America, the greatness we have achieved under our Constitution, the fact that we should not depart from the old landmarks that have served us so well, and that we should not abandon them and turn to the untried, the indefinite, the uncertain, the plan that would create many more problems than it would solve.

I think, too, that the Senator from Wyoming has put his finger on one of the factors that does make America great—that makes our system of government the greatest in the world—and that is the matter of the orderly succession about which he has spoken so movingly, the orderly succession to the office of President of the United States.

The distinguished Senator from Wyoming did not state it, but I believe that at the time of the assassination of the late, great John F. Kennedy, the distinguished Senator from Wyoming was serving as Governor of his State and was representing the people of his State; and he saw firsthand and heard firsthand the heads of states of other goverments, the surprise—and I am sure the wonder and appreciation—that they expressed at the greatness that is America, the provision for the orderly succession to the office of President of the United States.

Yes, he referred movingly to the late, great President John F. Kennedy. We recall that on the floor of the Senate, time and again, the argument has been made by the distinguished Senator from Indiana that if a given number of voters in one State had voted one way and a given number of voters in another State had voted another way, President Nixon, then candidate Nixon, in 1960, would have been elected President of the United States, even though he got fewer popular votes than did President Kennedy.

Let us see what Mr. Kennedy, then Senator Kennedy, had to say about the electoral college system. I read, from page 30 of the hearings of the Senate Judiciary Committee, the statement of Theodore H. White:

> I would like to use as my text a remark made by John F. Kennedy of Massachusetts on March 5, 1956, in Senate debate. He was discussing an amendment similar to this. He began by saying that "On the whole, our system has given us able Presidents, capable of meeting the increased demands upon our society. No urgent necessity for change has been proven."

Mr. President, those words spoken in debate here today would be just as applicable as when they were uttered on the Senate floor by then Senator John F. Kennedy, of Massachusetts.

> No urgent necessity for change has been proved.

This is Senator Kennedy, later President, speaking:

> When all these factors are considered, it is not only the unit vote for the presidency we are talking about, but the whole solar system of government power. If this proposal changes the balance of power in any one of the elements of the solar system, it is necessary to change all of them.

Those words could be uttered today and would be just as applicable as they were on that occasion.

Mr. HANSEN. Mr. President, will the Senator from Alabama yield on that point?

Mr. ALLEN. I am delighted to yield to the Senator from Wyoming.

Mr. HANSEN. A number of learned students of the subject of elections and electoral reform draw analogies between the electoral system, the federal system, and the composition of the U.S. Congress. As I read their testimony, it goes something like this: The electoral system is a further reflection of the federal system of the 50 States. Except as required by a runoff in the House, where each State has one vote—except in that rare, rare instance—we find reflected in the electoral college system the population of each of the 50 States along with a reflection of the entities of the States. In other words, my State of Wyoming is second only to Alaska in having the smallest population of the 50 States. Wyoming has three votes—three out of 538 electoral college votes, as I understand it.

A much larger State has more than several votes. It has votes that reflect the number of persons present in the State, plus the two votes represented by the Senators of the State. There are those who say the proposed change would give greater strength to the voice of the smaller States. I am unable to follow this logic. I am unable to see how Wyoming would gain in power if this system were to be adopted.

At present, it is my understanding that Wyoming has 3 out of 538 electoral votes. If we were to go into a direct election process, as is proposed by the distinguished Senator from Indiana (Mr. BAYH), strictly on the basis of the number of people residing in Wyoming compared with the total number in the United States, my arithmetic inclines me to believe that our strength would be diminished from three five hundred and thirty-eight thousandths to about one six hundred and thirty thousandths, because roughly we have in the neighborhood of a third of a million people in Wyoming. If the information I have is correct, there are some 210 million people in the United States today, give or take a million or two.

If Wyoming has a third of a million people, then we would have one six hundred and thirty thousandths of the total power. So I do not see how this can possibly augment the strength, increase the voice, or magnify the influence of a small State.

There are those who take this argument and turn it around and say that it shows the system needs to be changed because it is not wholly fair.

I ask those who make such a statement: If that be true, would it not be logical to take it to the next step, which would be to abolish the Senate? What reason is there to recognize in the Senate the presence of the States if we are going to rule out the electoral college system and the individuality of the States. For very good reasons, the individuality of the States was in the minds of the framers of the Constitution in constructing the election process which has served this country so well to date. If the electoral college is abolished, I suspect it will not be long until someone will come along and say, "We have instituted the one-man one-vote concept. We have had to reapportion all the legislatures which have not faithfully fulfilled the judicial concept of the one-man, one-vote. We have eliminated the electoral college system, so let us go all the way, be consistent, and abolish the Senate."

I leave it to Senators to answer my question. Would that be in the best interests of the country? Can it be demonstrated that our system of government has failed this country?

I have heard, during the few years I have been here, that the Senate is archaic. That statement does not refer exclusively to the age of its Members, but rather to the system; that it has outlived its usefulness; that our rules have made it possible for a willful group of people to hold up and impede legislation; and that this is all bad.

To those who think that, I always have to recall the words of our late, great Senator Dirksen. I regret that I cannot quote him verbatim, but essentially he said something like this:

"I have been around here a few years and have never seen an instance, when an idea came into its time and needed to be adopted, that it was possible for a willful little group of Senators to prevent its accomplishment into law."

He stated further:

"I have seen many times, and thanked God for it, when I have been able to witness that what started out as poorly conceived legislation, not adequately debated

and only partially understood, resulted, thank goodness for a little willful group of men, in further exploration of the idea, further consideration, and the further necessity on the part of all Senators to seek that happy sort of compromise that results in men of somewhat differing ideas joining together and marching forward in one direction, when, without the leveling influence that is so much a part of the character of the Senate, there would have resulted a real loss to our country."

So I am convinced that our system is good. I am convinced that it is unnecessary to seek to justify our system here amid what we have accomplished. All the major nations of the world today agree that the United States of America has the unique distinction of being the oldest continuing form of government on the face of the earth, the only important nation that has not changed its system.

Of course, there are those who predict that our time has about run out, that we have only a few years left. It has not been hard, in going around the country in recent years, to find people who find fault with everything we do. But I am not disillusioned or bereft of hope because of these prognostications of doom.

I look at the young children of the country—our young Americans. For the most part, they are fine, decent, and inspired of just as good ideals as were the people of my generation.

I do not think we are about to give up the ghost in this country. I do not think we are going to lie down and die merely because someone says that we are almost 200 years old. I do not think that this Government is going to collapse or that the system by which we select a President will fail us now simply because some say: "It could be made better. Let us junk the whole process and take in something that has not been tried, something that has all the attributes that have brought about the splintering of opinions and the splintering of parties in Europe, which make that part of the world what it is today."

It is the failure to develop a majority of people in a country wanting to march in one direction that I think is of real concern to many foreign governments today. This is not characteristic of our country, because our system has insured that that will not happen here. I think ours is a great system of government.

Mr. ALLEN. Mr. President, I thank the Senator from Wyoming for the contribution he has made.

Mr. GURNEY. Mr. President, will the Senator yield without losing his right to the floor?

Mr. ALLEN. Mr. President, I yield to the Senator from Florida without losing my right to the floor.

The PRESIDING OFFICER. The Senator from Florida is recognized.

Mr. GURNEY. Mr. President, I have listened with great interest to the colloquy between the distinguished Senator from Alabama and the distinguished Senator from Wyoming on the subject of what Senate Joint Resolution 1 would do as far as some small States are concerned. It has been stated that this measure would take away some of the voting strength held now under the electoral college system by the small States. And in the case of the very small States, like Wyoming, Vermont, and Nevada, it would take away quite a bit of the leverage those States now enjoy under the electoral college system.

I certainly agree with the remarks heretofore made. That, of course, was the whole idea of setting up the electoral college in the first place by the Founding Fathers, to give the small States a greater leverage and a little more advantage in order that they could make their weight felt in our system as opposed to the States that were considerably larger.

I get the opinion that if this argument was a sound one almost 200 years ago when the country was sparsely populated, with only Thirteen Original States, that the difference was not too great between some of the States then as to population. However, now there is a vast chasm between the population of the State of Wyoming, with one Representative in the other body, and a State like New York which has, I think, 41 Representatives, which is indicative of the massive difference in population.

Certainly I think it makes all kinds of sense. Today, it makes even more sense. There is a stronger argument to preserve the weight of the small States in the presidential election in the whole system of the Federal Republic which we have.

Another thought occurs to me along the lines of small States opposed to the larger States. I think the argument also applies to the larger States that are more in the smaller city class rather than in the larger city class. My State of Florida would be one of those. It is a large State, but it still does not have tremendous cities such as New York, Chicago, Los Angeles, or places like that.

It occurs to me that, if we do away with the electoral college system and substitute this direct-election method which is proposed here in Senate Joint Resolution 1 pending before the Senate, we would run into another problem. It seems to me that we completely overemphasize the importance of a presidential election in those areas which are large urban areas now and States which contain the great cities. We have the State of New York with the city of New York. We have the State of Illinois with Chicago. We have the State of California with Los Angeles.

Why should presidential candidates be interested in campaigning in a State like Wyoming or a State like Vermont, or even in a State like Alabama, the State of the distinguished Senator, when they can go to just a few areas in the country and get the number of votes they need?

Take the area around New York City. That area encompasses not only the tremendous metropolitan area of New York—the second largest city in the country, I believe—but also includes the contiguous States of Pennsylvania, New Jersey, Connecticut, Rhode Island, Massachusetts, and Ohio.

While those other States are not large States geographically, they are densely populated areas. Within that one area alone, within 200 miles of the State of New York, we have an enormous percentage of the population of this country. For example, compared with California, the Representatives from the States of New York, New Jersey, Pennsylvania, and Ohio comprise today more than one-fourth of the total membership of the House of Representatives. That is just those four States out of the 50 States.

Obviously it seems to me that a presidential candidate would concentrate his time there, get on the television stations in New York, Chicago, California, and perhaps in a few other scattered areas in the United States—maybe around Kansas City and St. Louis, which are big cities, and perhaps in Texas, Dallas and Houston. He could cover that area on one television media. That is all he would be interested in.

Of course those areas are important. No one downgrades their importance.

We recognize that our colleagues who represent those States have enormous interests to give voice to here and in the House of Representatives.

The point I want to make is that the problems of the smaller States are just as vital to the people who live there as are the problems of the larger States and the people who live in those areas.

I would think that under the direct election system, such as proposed in Senate Joint Resolution 1, a presidential candidate might completely overlook the problems of the small areas that may be agricultural in nature or perhaps mineral in nature and have nothing whatsoever to do with the problems concentrated in the larger cities.

Certainly the smaller areas have no ghetto problems. There are not any ghettos there. I think there are a great number of the States in the United States that lack those problems.

We know that the Governors of the larger States particularly and the mayors of the larger cities are constantly coming down to Washington for more money. We know they need more money. However, at the same time, we cannot overlook the problems of other States of the Union to take care of just a few.

Yet, if we had this direct election method, I tend to think that a presidential candidate would direct his attention only to those more populous States where the voters are. Certainly all of us in politics and in campaigns know very well how we orient our campaigns. We always say, "Go where our votes are. Do not waste your time in the areas where you cannot get enough votes to sway any election."

It seems to me that the direct election method invites that kind of political direction to only one or two areas in this country, or three or four to the neglect of the other.

Would the Senator from Alabama feel that was a weakness in this direct election method?

Mr. ALLEN. Mr. President, I appreciate the comments of the distinguished Senator from Florida. I very definitely agree with him. I think he has certainly put his finger on a very important point regarding the small States.

I think that whether a State is a small State, whether it has greater in-

fluence in the electoral college, whether the percentage of the electoral college is larger than its percentage of the total popular vote is of very little importance actually. That is not the important thing, and I do not oppose this measure because I am from the South or because I am from a relatively small State. I oppose it because I am an American and I feel that this provision, the direct election of the President, with the 40-percent proviso or the runoff proviso, would tear this counrty apart, and the effort of a candidate to receive in excess of 40 percent of the vote rather than to achieve a majority of the electors would, as the Senator so eloquently stated, cause the candidate to go to the great population centers to the exclusion of the other areas of the counrty in order to carve out his 40-percent plurality.

The dangers that are inherent to our country in that system are what cause me and, I am sure, the Senator from Florida, to oppose the plan—the danger of a plurality President, the danger of proliferation of third parties, the danger of choosing a man for President who represents no views known to the public generally, the danger of electing a President who is a television personality, who with a television blitz in the large areas would be able to necessitate 40 percent of the popular vote.

I think that is the point the Senator stresses and I agree with him on it.

Mr. GURNEY. Mr. President, will the distinguished Senator yield further?

Mr. ALLEN. Yes, I am delighted to yield to the distinguished Senator from Florida.

Mr. GURNEY. I was extremely interested and taken with the Senator's point of the 40 percent, which I neglected to mention in my argument, and the likelihood of a candidate to go to the larger States. Of course, only a 40-percent requirement—at least on the first go-round—makes it even easier and more likely for a candidate to go to the metropolitan centers. I have pointed out that four States; New York, New Jersey, Pennsylvania, and California, represent better than 25 percent of the representation in the House, so I assume they represent more than 25 percent of the population. One would not have to go to more than one or two other places to pick up the 40 percent.

Another thing occurs to me in this business of concentrating upon the larger States, which I think poses a danger. Here again I use my own State of Florida as an example. I mentioned the rural States and that the presidential candidate would neglect those States. In a larger State, like Florida, which is now No. 8 in size in the United States, a very sizable State, and yet we do not have any really great metropolitan areas, I am not sure a candidate would spend too much time campaigning in my State if he could pick up the votes he needs in those States which have the large cities which would make his campaigning easier.

There is another point I would like to join in discussing with the distinguished Senator from Alabama. Earlier in the afternoon the Senator engaged in colloquy with the Senator from Wyoming speaking about the danger of splinter parties which would perhaps be encouraged by Senate Joint Resolution 1, which provides for the direct election of the President.

There has been a great deal of discussion about that here in the days we have been spending on the argument on Senate Joint Resolution 1. Certainly, this is a point we all know has troubled scholars throughout this Nation, in and out of universities, about this matter. I know I have read a great deal of copy in newspapers and periodicals by very distinguished and knowledgeable Americans, who are knowledgeable about government and politics, worrying about the growth of splinter parties.

It occurs to me we do not have to speculate this might happen. It seems to me we have a very good example that it is happening. Take the great State of New York, which was first in size in the United States. I think that now that the census has been taken it is No. 2 and California is No. 1, but still it is a sizable State.

Already in this State we have a splintering of the political parties. Where they used to have the Democratic Party and the Republican Party, now they have the Liberal Party and the Conservative Party.

I remember being in New York for a political rally of my own Republican Party about 7 or 8 years ago when I first went to the House of Representatives. At that time the Conservative Party was just beginning in New York. I remember talking to some of the members at that particular gathering at the rally and asking, "Why are you starting this party up here? Won't it weaken the parties you have already established?" The same thing is true of the Liberal Party in New York, which started up about that time. They said, "No, we do not think it will do that. We are more conservative than some of the other people. If we start a new party, we can hold their feet to the fire and bring them around to more philosophical thinking."

I do not think the people I was talking to in the Conservative Party felt the party would amount to much, and neither did I. It is 7 or 8 years later now and we know that both splinter parties, the Conservative and the Liberal Parties, are wielding a good deal of clout. That was particularly true in the election for mayor here recently and the primaries in both parties in New York recently. These splinter parties, these Liberal and Conservative Parties are, indeed, doing the very same thing that the distinguished Senator from Alabama and the distinguished Senator from Wyoming were talking about earlier this afternoon. They are acquiring members and voting strength. They are gaining with each election and as they do this kind of strength gives them the power to negotiate with the other parties and candidates, and perhaps achieve what they want to achieve.

I am not arguing that this is right or wrong, whether it is good or bad, but I think it makes a perfect case in being right now in New York, one of the greatest States in the country, where you have this very same splinter party effect which we fear under Senate Joint Resolution 1 if it goes into effect.

In New York I suppose it has not made too much difference in the legislative process so far because the parties are too young, but it will. If that same thing happens and we adopt Senate Joint Resolution 1 and we get in this body in which we are now speaking and the other body on the other side of the Capitol four or five or six parties, with Senators and Representatives in these four, five, or six parties, the wheeling and dealing that is going to occur on this floor and on the floor of the other body is something we cannot imagine. It will be something like what happened in France year after year, where De Gaulle was President, and some parties would not last more than 24 hours. There would be splinter parties like leaves falling off the trees in my native State of Maine.

I certainly share the apprehension that the distinguished Senator from Alabama has with respect to the splinter party question.

This is really the question I was going to pose: Does not the Senator see occurring in the U.S. Senate and the House of Representatives what occurred in New York recently, with the four parties they now have, if Senate Joint Resolution 1 is adopted?

Mr. ALLEN. I appreciate the Senator's remarks. I would say definitely that is a harbinger of what will happen throughout the country and here in the Senate and in the House. But the New York situation is not nearly as strong a case to show the proliferation of parties on the national scene as under Senate Joint Resolution No. 1, because Senate Joint Resolution 1 calls for a runoff, and that encourages third parties. In the general election in New York, that ends it; there is no runoff. If there were a runoff, the splinter parties could have an influence on the runoff, and we would see more splinter parties. So in the United States, under the Bayh amendment, with the runoff, we would see more splinter parties, because they would realize that the electorate could vote for their candidate in the first race knowing full well that there was going to be a runoff after the first race.

It would encourage them to form splinter parties so that they could have an influence on the bargaining going into the runoff. So there is a much stronger case to show the proliferation of parties in the United States than to use the example of what occurs in New York, where there is no runoff in the general election.

Of course, another factor that discourages the splinter parties, or third, fourth, or fifth parties, in the United States under the electoral plan is that to register at all in the electoral college, a third party, or any party for that matter, must carry the popular votes of at least one State. So they have to carry one State, and that discourages the formation of a third party. But under the Bayh plan, they would be encouraged

because if they got only 10,000 votes, or 1,000 votes, for that matter, it would have to be a part of the grand total and it might be the difference between the candidate's getting 40 percent of the popular vote and being elected President, along with his running mate, the Vice President, or getting 39.9999 percent of the votes and having to go into a runoff. So they would be very important in the overall scheme of the national election, and the amendment would encourage the formation of third parties so that they could influence the election and it would give them a sense of importance; whereas, under the present plan, if they do not carry one State, they do not get any electoral votes at all.

On the matter of proliferation of parties, I was somewhat surprised to read something in the report on the Pastore bill. The bill provided for a limit candidates can spend on TV and radio advertising. There was a provision for equal time for all candidates for President. Free time, I believe, was arranged for the major candidates. It used to be the rule—it still is; the law has not been finally enacted—that they had to give equal time to all candidates for President. This would work a hardship because there were so many splinter parties. Some of the splinter parties are listed in the report. There were at least 14 that were discovered, going back to 1960. They ran with the provision, of course, that they had to carry a State to get any electoral votes.

Let me mention some of the splinter parties: Conservative Party of Virginia; Constitution Party; Tax Cut Party.

There again we have a proliferation of parties. We have one-issue parties.

The Anti-War Party. Reduced Taxes Party. Every issue one can think of is in there. The proposed amendment would make for more and more one-issue, one-ideology types of parties.

Going on with the list: The Prohibition Party. It had a candidate for the Presidency in 1960. Socialist Workers Party. Farmer Labor Party of Iowa. Socialist Workers and Farmers Party of Utah. National States Rights Party. Afro-American Unity Party. American Third Party. Conservative Party of New Jersey. Greenback Party. And on and on and on in 1960.

So there would be third parties that would have an influence in the election of major party candidates, who would have to offer concessions, or whatever candidates do, to gain support in a runoff. They would be forced to contend with them. So under the proposed plan we would see more and more splinter parties started.

Another fruitful source of splinter parties would be defeated candidates at national conventions where things did not go too harmoniously and a large number of candidates thought they should have been chosen instead of the ones who were chosen. They would be very disgruntled and would say, "Well, if I can't get it they are not going to get it and I will start a party." We would then find some major candidates running for President——

Mr. GURNEY. Mr. President, will the Senator yield at that point?

Mr. ALLEN. I yield.

Mr. GURNEY. That is a point extremely well made, because the possibility of a defeated candidate wanting to start his own rump party and running for the Presidency not only would be likely to happen, but actually would happen, because we have seen instance after instance in just about every election we have in this country now, I suppose, within the States, where people run perhaps for Governor or for Senator. They may not make it in the party primary, if they have a convention-type primary, or, for that matter, if they do not make it in the primary where votes were cast, there is nothing in the world to stop those people from running again in a general election. That frequently happens.

As a matter of fact, one of our distinguished colleagues was telling us only yesterday that in his State the defeated candidate for Governor in the primary has done exactly that. He started his own party and is going to run in the general election as a candidate. He is obviously a spoiler. He is so disgruntled at not having won that he does not want the person who won the primary to win, either. So we have that situation, and we have always had it within our political battles in the primaries in the several States.

The reason for it is that we do not have the majority provision we have under the national election system. If we had a rule which provided that the man receiving a majority of the votes would get the nomination and nobody else would run, that would end it. In fact, that is what the electoral college does. It does not say that, but, in practice, it works that way.

So the Senator from Alabama is exactly right, and we have examples like that right now, in practically every election year. But in the competition for the great big prize, the Presidency of the United States, for somebody to run—and I was not aware of all these splinter parties that exist today; that even surprises me—the temptation would certainly be very great, and I agree with the Senator that that is exactly what we would have, candidates running on every issue, all over the land.

The Senator makes another very good point, which I think ought to be amplified, and he ought to be complimented on it: That if we have this direct election method under Senate Joint Resolution 1, then what we are going to have, as he so aptly put it, is a one-issue President—the Greenback Party, the Prohibition Party, or the Women's Liberation Party, perhaps; that seems to be well up on the docket today. The Peace Party; we certainly have that now. As a matter of fact, in my home State of Florida, we had a party of very liberal people, far left-wingers, last time called the New Party. They were mostly the very long-haired variety; and I suppose they might be a political party in another campaign.

The point of the matter is that this is the very strength of our political system now. We have two great political parties. The distinguished Senator from Alabama belongs to one and I belong to the other. And yet both of these parties are able to encompass and embrace people of all political shades. Some of us are conservative. The Senator from Alabama and I happen to be of that political persuasion, I would expect, if we were to categorize ourselves. Certain parts of the country tend to produce people of one political philosophy; other parts of the country tend to produce people of another. The fact that all of these people are encompassed within the two great political parties, to me, gives the system strength.

I find nothing wrong with the fact that there are, within my own political party, people who have a different political philosophy than I do. I think it has a good tempering effect upon some of the beliefs that I have; and I would hope that some of the beliefs that I have, perhaps, would have a tempering effect upon those of my party who may differ from me in philosophical matters.

But if we have this Senate Joint Resolution 1 direct election kind of thing, it seems to me we are going to lose that, and we are going to have people who are keenly apprehensive, perhaps, about one small issue, getting into the party that believes in that issue, and we are going to lose the all-encompassing and all-embracing kind of philosophical types we have now.

This would be a great loss to the country. Does the distinguished Senator from Alabama think there is a danger here?

Mr. ALLEN. I think there is a very definite danger, and that is one of the reasons why the junior Senator from Alabama opposes Senate Joint Resolution 1.

The fragmentation of our political party system, the proliferation of third parties and splinter parties, the confusion that would be caused, the great danger of the runoff provision, where all of these various splinter parties and people have been polarized over this specific issue that the Senator from Florida was speaking of—not part of the two political philosophies, conservative or liberal—they would be standing for one issue, and they would have a definite effect on the runoff, so that these one-issue people, by combining forces, might very well cause the election of a person who was not the choice of the people of this Nation.

It might be someone with whose views the people were not familiar. It might be someone who had conducted a television blitz and become something of a household word in a matter of a few days or a few weeks, after an expenditure of large sums on television.

I think that these splinter parties could combine and, in practice, elect a member of one splinter party, or have a major candidate so beholden to them that he could not govern the country effectively. I think there is a very definite and real danger, that might shake the very foundations of our American governmental system, if Senate Joint Resolution 1 is allowed to be passed.

Mr. GURNEY. Will the distinguished Senator yield further at that point?

Mr. ALLEN. I should be delighted.

Mr. GURNEY. The Senator's comment

about the possibility of a candidate for the Presidency who engaged in a television blitz being elected, I think, is a very viable point, and one that could easily happen. And, of course, again in recent years, we have had examples of that. I suppose television has been perhaps the most effective way of politicking, probably, since the beginning of—well, I expect in the Kennedy-Nixon election campaign for the Presidency; and following the very effective use of television in that campaign by the winner, President John F. Kennedy, all candidates began to use television more and more in their political campaigns.

I know when I first ran for the House of Representatives in 1962, I devoted the major portion of my budget in that year to television, and I have constantly done that. I did that also when I ran for the Senate in 1968. But I think the interesting thing is what has happened in very recent years. The very thing that the Senator from Alabama is warning against here, a television blitz, has happened on numerous occasions in the last, I would say, 2 to 4 political years, and, without naming names, so that no one will be embarrassed, or no political party will be embarrassed, there are clearly at least two instances of nominees running for the U.S. Senate right now who are nominees because of a television blitz in their States. And, incidentally, those happen to be very large States, with large metropolitan areas.

One of these candidates was entirely unknown before he launched his television blitz and became the nominee, and he knocked off a candidate that everyone thought was going to win. The only way he was able to do it was by television.

The other one I am thinking of was better known politically in a small area, but not throughout the State. At least two, I think, of the candidates he was running against were better known than he was, but he had a much better financed campaign. He spent a lot more money on television, and he also was nominated. And, of course, I know of an even closer instance, in my own State, where that very thing also happened, where a political unknown, never in politics before, managed to present a very formidable campaign by a very extensive use of television in his county. I think the figures ran nearly a million dollars.

So we have examples. I have mentioned three that I can think of, but, as the distinguished Senator knows and as I know, there are other examples, too.

This year, 2 years ago, and 4 years ago, in the big political campaigns around the country for the Senate, for the governorships, and for the House of Representatives, where a well-packaged, Madison Avenue-type advertising campaign has presented a candidate the same way that you would present Camel cigarettes or Ivory soap, or anything you want to name, a picture that is a best selling item, the candidate was presented that way, and the people have bought him on election day.

So the Senator is eminently correct when he expresses concern and apprehension and fear that this is exactly what might happen if we went this Senate Joint Resolution 1 route and had a popular election.

More and more, people of great wealth in this country are interesting themselves in politics. I have talked to one or two of these types myself. Their reasoning has been that they have been very successful in business, they have amassed many millions of dollars, the challenge is over as far as business is concerned, now they are interested in something else, so they decide to go into politics and government. I do not say there is anything wrong with that; I simply say that those are the facts of the matter.

So all of a sudden, overnight, they want to be elected to public office. I am not exactly sure whether a person with no experience of any kind in politics and government is best suited to take on the onerous or representing large numbers of people in large areas. But there certainly is that possibility under Senate Joint Resolution 1.

I think it is always true that every election usually has only a few major issues. If we reflect back to 1968, the presidential election of that year, we had, as I recall, three major issues. One, of course, was the war in Vietnam. Another was the law and order business, the rising crime rate and what to do about it. The other issues, of course, was heavy government spending or inflation. As a matter of fact, those three issues are around today. They may have a little different emphasis. I think inflation probably is a bigger issue than the other two. But they are back with us again.

What I am saying is that elections always are concentrated on just a few issues. So let us say that a candidate who never ran for public office before and belonged to one of these splinter groups, never worked within the great Democratic Party of the Senator from Alabama or my great Republican Party, decided that he wanted to be President of the United States. Let us say that the issue happened to be law and order, a great issue, or perhaps the election might occur at a time when there was a Cambodian crisis or perhaps when the price of meat and coffee and bread and potatoes was more severe than at any other time. He could take that one issue and get himself a high priced Madison Avenue, New York, advertising firm and say, "I'm willing to spend $x$ millions of dollars." There is no question that, if he could not win the election, he certainly could win a sizable number of votes, so that neither candidate of the major political parties could win the election.

Then the very thing the Senator from Alabama has spoken of would happen—we would have a runoff election, and perhaps the glamor boy with all the money, who seized upon this one issue and managed to get that message across to the people, would be in the runoff. He might end up as the resident at 1600 Pennsylvania Avenue, the President of the United States, with little or no experience about politics and government, no knowledge of how it works, no acquaintance with the people in it, either in the Senate or the House, or, for that matter, the executive branch of Government, or any of the other people who work in the political arena and the governmental arena of this great country.

I think the distinguished Senator is eminently correct. We have examples now in which that has happened in some of the biggest elections of the country for the Senate or for the governorship, in some of the biggest States, and those elections really are not different from an election for the Presidency of the United States, except that they are a little smaller in size.

So I agree with the Senator that that not only is a very real danger, but also, it has occurred in elections right now.

Mr. ALLEN. I thank the distinguished Senator from Florida for his most eloquent and persuasive contribution to this discussion. Certainly, he has highlighted the danger of the proliferation of third or splinter parties, a danger that would come about by one-issue parties.

I should like to suggest to the distinguished Senator from Florida, for his consideration, that under the runoff provision as provided in the Bayh measure, Senate Joint Resolution 1, this would encourage and foster third parties, in that it would permit members of the splinter parties to vote twice in the election; because with such a proliferation of third parties or splinter parties, it would be almost certain that there would be a runoff. This would allow members of the splinter parties to vote with their hearts rather than with their heads, in the first election as to who they really want to be President of the United States.

Under the present system, each voter is entitled to vote only once. He knows that he is going to be allowed to vote once and that that is final. He will not have a runoff or second chance. So he naturally votes for the man or woman he thinks would make the best President. Not so under the Bayh runoff plan. He would vote for the party or the man in closest affinity to him from the standpoint of geography or ideology, knowing full well that in the runoff he could vote for the person he thought was next best qualified to be President of the United States. This encourages the growth of splinter parties. It encourages their proliferation. So that we would find not the 14 splinter parties that we had in 1960, but we might have 50, 75, or a hundred, or even more, each and every one of them having a definite influence and effect on the outcome of the presidential election; because the votes they receive would be included in the total overall vote, and that would have an effect on whether or not the leading candidate received the 40 percent required for his election without a runoff.

Mr. President, approximately an hour ago, I suggested that some of the proponents of this measure say that under the present system it is possible to elect a man to the Presidency who is the second choice of the people, in that he would receive fewer popular votes than his opponent, even though he might receive a majority in the electoral college, and therefore, the person chosen might be the people's second choice.

Let us see what might happen under the direct election plan. Let us suppose

that in a four-way race—and, as I say, a four-way race certainly would be possible and likely, in addition to several dozen minor candidacies—the leading candidate received 39 percent of the vote, the next candidate received 21 percent of the vote, totaling then 60 percent, and the remaining votes were divided between the other two candidates, 20.5 percent and 19.5 percent. This, of course, would cause a runoff between the 39-percent candidate and the 21-percent candidate. In all likelihood, the 39-percent candidate would have been regarded as the leading candidate, during the race the front runner in the race, and the other candidates would be opposed to him and would band together in the runoff and could very likely cause the election of the 21-percent candidate. So that under this plan we would certainly end up with the second choice of the American people being elected as President of the United States.

Now, Mr. President, I spoke earlier of the lack of unanimity as to this resolution and the wisdom of submitting it in its present form. I call attention to the fact that some of the very sponsors of the legislation have questions about it. Some of the very people whose names are printed on the resolution are highly critical of certain phases in it.

I also call attention to page 16 of the Judiciary Committee report, number 91–1123, and find:

> On the other hand, under the 40-percent plurality required for direct election, a minor party or combination of minor parties need only approach 20 percent of the popular vote in order to reach a strong bargaining position. The prospect of two minor party candidates, one regional and one ideological, amassing 20 percent of the vote is quite realistic in the near future of American politics.
>
> In view of this attractive political framework, the direct election plan, as embodied in Senate Joint Resolution 1, opens the door to public political bargaining with the most far-reaching consequences. Concessions wrung from major party candidates either before or after the first election would be made in a heated atmosphere conducive to the creation of public distrust. Given the fact that bargaining before the runoff election would take place under conditions of division and disappointment, cynical political moves might in themselves lead to a crisis of respect and legitimacy in the selection of the President. Undoubtedly, the aura of legitimacy would be all the more in doubt where the runner-up in the initial contest wins the runoff by wooing third-party support. In such a case, the question of legitimacy is sharpened even further if the turnout in the second election is substantly lower than in the first election.

Well, Mr. President, this is the express view, then, of the distinguished Senator from Michigan (Mr. GRIFFIN) and the distinguished Senator from Maryland (Mr. TYDINGS). I note that these Senators are cosponsors of Senate Joint Resolution 1. Even they are highly critical of it because of the runoff provision. In fact, these two Senators have introduced—and it is the pending business—an amendment to do away with the runoff provision.

The point I make is that there is no unanimity of opinion in the resolution even among those who list themselves as cosponsors of it.

Mr. President, if they are not even agreed on it as the proper plan to submit out to the States for ratification, how could the States feel that the best possible plan is being submitted?

What does the Griffin-Tydings amendment provide that is different from Senate Joint Resolution 1?

Well, it has the same provisions as to 40 percent electing the President. If the leading candidate receives 40 percent, then he and his running mate who, of course, would get 40 percent also, would be declared elected President and Vice President. If the leading candidates receive fewer than 40 percent, if they recevie 39.9999 percent of the vote, there would be a runoff. That is where all the pressure will be, to get every last vote counted because it might mean the difference between a runoff or none at all. This would make the vote of every splinter party most important because even a party that got only a thousand votes would have an effect on whether a candidate received 40 percent.

All right. Under Senate Joint Resolution 1, the Bayh plan, if no candidate, no team of candidates for President and Vice President, or no group of candidates received 40 percent, then a runoff is to be held at some unspecified time.

But under the Griffin-Tydings amendment, if no candidate receives 40 percent of the electoral votes, then it goes to the next step, a setup similar to the electoral college. Here again, every single one of the many plans being suggested, except this one providing for direct election, is built in some way around the electoral college or some modification thereof.

So under the Griffin-Tydings amendment, which is pending by these supposed sponsors of Senate Joint Resolution 1, they are taking issue with it to the point of filing a basic change in it. Then, instead of having a runoff, it is to be ascertained whether any candidate receives a majority, or if he carried States that had a majority of Senators and Representatives. Of course the electoral college is based on the number of Senators and Representatives. So that is an electoral college format without the electors. In fact, it is the automatic electoral plan originally sponsored by the Senator from Indiana (Mr. BAYH). Then, if any candidate receives a majority in this counterpart of the electoral college, which would be carrying States that would have a majority of the Members of House and Senate, then such candidates for President and Vice President would be declared elected.

Then, if no candidate received a majority in the pseudo-electoral college, the automatic casting of the electoral votes, then the matter would be decided between the top two candidates, which is different from the existing plan as provided by the 12th amendment, of voting on the top three candidates in the House of Representatives.

The Griffin-Tydings plan or amendment would provide for a joint session of the House and Senate of the incoming Congress to decide between the top two candidates so that there could be no tieup there in the House of Representatives. The Members of the House and Senate would vote, with each Member casting one vote, rather than voting as States under the present plan.

The point I make, Mr. President, is that two of the sponsors of this measure say they disapprove of it to the extent that they are submitting an amendment, and have submitted it, that would change it to the extent of doing away with the runoff and retaining a vestige of the electoral college system. So, the two Senators, who have been most critical of the runoff provision in Senate Joint Resolution 1, are two of the proposed sponsors of the measure.

Mr. President, there are numerous alternate plans that have been suggested through the years. The Senate itself, back I believe in 1956, long before I came to the U.S. Senate, passed and sent to the House the proportional plan which would divide the States' electoral votes among the candidates in proportion to the popular vote they received in the respective States. That was the Senate plan back in 1956.

The distinguished Senator from Indiana at one time sponsored the automatic plan which is now being espoused by former Attorney General Katzenbach. It would do away with the electoral college and would call for the automatic casting of the electoral vote of each State for the candidate carrying each respective State. That resolution is before the Senate. I believe it is Senate Joint Resolution 191.

The distinguished Senator from Missouri (Mr. EAGLETON) and the distinguished Senator from Kansas (Mr. DOLE) have a plan. Almost everyone has a plan to change this. But the fact remains that all of the plans, except Senate Joint Resolution 1, do have some phases of the electoral college remaining. In the more than 180 years of our existence under the Constitution, there has never been sufficient unanimity of opinion to pass in any Congress any change in the electoral college.

The distinguished Senator from Missouri (Mr. EAGLETON) and the distinguished Senator from Kansas (Mr. DOLE) have what they call a Federal plan. It provides for a popular election. I believe they changed it in recent weeks. There again that shows that no matter what we agree on now, it might not be what we want in 1976, and that is the earliest this provision can become activated. Under the Eagleton-Dole plan there is a popular election. But there is no one runoff.

That is what seems to cause most of the consternation, the idea of the runoff tearing this country asunder. The Dole-Eagleton plan has the popular election provision. It does not have any requirements as to percentage, though I understand they now require that if a candidate got 50 percent, he would be elected automatically. Originally it provided that there would be a popular election and the leading candidate would be be declared elected if he carried a majority of the States or if he carried States casting half of the total nationwide vote in the election.

If neither of those circumstances prevailed, if he did not carry 26 States or if he did not carry States casting sufficient votes to constitute a majority of the votes cast throughout the country, then the matter would be submitted to the electoral college. If no one then received a majority of the electoral college votes, we would drop all of the candidates except the top two. We would then divide the electoral votes of the other candidates among the top two candidates in proportion to the vote they received in the States carried by the splinter parties. Of course, that would elect one of the candidates at that time without a runoff. That is a pretty complicated plan.

The point is that is shows the vast differnce of opinion among the Members of the Senate as to what the best plan is.

A most intriguing plan was introduced by the Senator from Virginia (Mr. SPONG). It provides for the present system, but requires a majority of the electoral college. If the candidate who received a majority in the electoral college did not also lead in the popular vote, then there would be a runoff. In other words, that would do away with the possibility that the distinguished Senator from Indiana mentions time and time again, of the candidate getting a majority in the electoral college not being the popular candidate. That is an intriguing plan.

There is another plan. By the way, this plan has been pushed for about 150 years since the 1824 presidential election when John Quincy Adams, though he ran second in the electoral college, was elected by the House of Representatives.

Gen. Andrew Jackson—possibly it was not until after he became President—supported the district plan. There is a resolution to that effect. Its chief sponsor is the distinguished Senator from South Dakota (Mr. MUNDT), who has been ill and has not been able to be present to push it. It provides for allocating the electoral vote to the winner in the respective congressional districts, with two electoral votes for each State going to the State winners. That is the district plan and that was recommended by Andrew Jackson. There has never been unanimity behind that plan or any other plan to get it through Congress.

Mr. HOLLAND. Mr. President, will the Senator yield?

Mr. ALLEN. I am delighted to yield to the distinguished Senator from Florida.

Mr. HOLLAND. Is it not true that although desirable for some purposes, the district plan still leaves the winner-take-all principle in effect in each district?

Mr. ALLEN. Yes, sir.

Mr. HOLLAND. That is, a minority of citizens find their votes completely eliminated by the final result in the statewide weight of electors in the same way, so that the losers statewide are eliminated entirely and their votes are not counted at all in the final counting for President and Vice President. Is that right?

Mr. ALLEN. The Senator is correct. There would be a winner take all for each congressional district and for the State as regards the two electors assigned in effect for the two Senators in the U.S. Senate.

Mr. HOLLAND. Mr. President, will the Senator yield further?

Mr. ALLEN. I yield.

Mr. HOLLAND. It seems to the Senator from Florida that for that reason alone the fractional system is preferable because it allows the actual counting down to one-thousandth point of every electoral vote, or the vote of every citizen. Under that system, the electoral votes of the State are proportioned among the several candidates in direct proportion as the popular votes are cast in that State so that everybody's vote counts.

It seems to the Senator from Florida that that feature alone makes the fractional system greatly more desirable than the district plan. The Senator from Florida would prefer the district plan greatly to the present winner-take-all plan under which electors are still left with their personal right to differ entirely from the expressions of those who elected them.

I wonder if the Senator from Alabama agrees with that distinction between the district plan and the fractional plan.

Mr. ALLEN. Certainly the Senator's arguments are most persuasive at that point. He said he would prefer the district plan, I believe, to the present plan; I believe he would also prefer the district plan to the direct election plan, would he not?

Mr. HOLLAND. The Senator, of course, is correct. The proposal now pending, Senate Joint Resolution 1, would be the most radical departure from the original concept of the Founding Fathers ever advanced here, as the Senator knows, in that it would make our Nation, instead of a republic—a representative government in the selection of President and Vice President—a simple democracy; and nothing was further from the plan and thought and from the principle that was incorporated in the original Constitution, than the pending program, Senate Joint Resolution 1.

The Senator from Florida is glad the Senator from Alabama has called attention to the fact that while the Senator from Florida had indicated the fractional plan was superior in his opinion to the district plan and also to the present plan in the Constitution, it is infinitely preferable to the proposed radical plan that is embodied in Senate Joint Resolution 1.

Will the Senator yield further?

Mr. ALLEN. I am delighted to yield further.

Mr. HOLLAND. The Senator from Florida believes the States still have considerable interest, as States, in who becomes President or Vice President. Does the Senator agree?

Mr. ALLEN. I agree, and that is an integral part of the federal system.

Mr. HOLLAND. The dovetailing of local and State responsibilities and State jurisdiction, and the passage of laws affecting daily lives of citizens with the federal system which is centered at Washington, is such, in my opinion, that the States, as such, always have not only a substantial but a vital interest in the selection of President and Vice President. The Senator from Florida is completely out of sympathy with Senate Joint Resolution 1 because it proposes to downgrade and eliminate entirely any State's right to have anything to say as a State in the selection of President or Vice President.

I hope the Senator from Alabama agrees with that.

Mr. ALLEN. I agree 100 percent. That is one of the major defects in Senate Joint Resolution 1, as the distinguished Senator from Florida so ably pointed out.

Mr. HOLLAND. Knowing the wisdom and sound judgment of the Senator from Alabama, I am not at all surprised to find that is his conclusion and strong feeling.

The Senator from Florida has been particularly anguished by the fact that Senate Joint Resolution 1 proposes to give to the District of Columbia—which has no sovereignty and does not pass laws for the protection and governing of its citizens and it has no jurisdiction as a State—weight at such a great rate that the weight of the District of Columbia would exceed the weight of the 11 sovereign States which happen to have populations smaller than the District of Columbia. To the Senator from Florida that appears to be about the best illustration of the radical nature of the program suggested by Senate Joint Resolution 1.

Does the Senator from Alabama feel that way also?

Mr. ALLEN. Yes, I certainly do. I would like to suggest this to the Senator for thought. With direct election there could very conceivably be as great a difference between the votes of two major candidates in the District of Columbia as there is difference between those candidates in the rest of the country and it could be that the District of Columbia, in effect, would be the tail wagging the dog of 50 States of the Union because its margin for one candidate might be more than the margin of the whole of the United States for the other candidate.

Mr. HOLLAND. Of course, the Senator is completely right, and that is a possibility. Perhaps it would never be a very great probability but it is a possibility and Senators are entitled to look at the things that can happen and would be permitted to happen under Senate Joint Resolution 1.

One of the most abhorrent and one of the most extreme things is that which the Senator from Alabama has suggested. The Senator from Florida has noted that the population in the District of Columbia would enable the District of Columbia in the election of President and Vice President by popular vote to outweigh, in several cases, two States combined. I am sure the Senator from Alabama has knowledge of that fact.

Mr. ALLEN. I have.

Mr. HOLLAND. That seems peculiarly illustrative to the Senator from Florida of the radical nature of this proposal. Here, only a few days ago, we granted the District of Columbia the right to have one nonvoting representative in the House of Representatives at the other end of this Capitol. Yet at the same time we are debating here on the floor a pro-

posal which would give the District of Columbia such very great power, greater weight in a presidential election than that of each of 11 separate States, greater weight than several of them taken together.

It seems to the Senator from Florida that is an illustration of the way we are going—not in one direction, but moving in various directions, one day giving one nonvoting delegate to the District of Columbia in the House of Representatives, the very next day debating on the floor of the Senate a proposal which would give the District of Columbia such tremendous weight in the selection of Presidents and Vice Presidents.

Is the Senator from Alabama of a somewhat similar opinion?

Mr. ALLEN. Yes, sir; that seems to be inconsistent.

Mr. HOLLAND. I suppose we should not expect consistency any more, but the very idea of the Senate having passed one day a proposal which went to the White House, because it had been passed before by the House of Representatives, which has now become law, finally giving to the District of Columbia one nonvoting Member in the House of Representatives, and the very next day taking up this proposal to give the District of Columbia such a disparate weight in the selection of President and Vice President—as if we can do those two things consistently—seems to me to be hopelessly inconsistent and shows unsound thinking of those who support Senate Joint Resolution 1. It leaves the Senator from Florida rather despairing of any idea that we are pursuing a course of action, in debating this particular resolution which is not at all consistent either with the idea of a Federal Government as it has existed so happily for nearly 200 years or with the idea which we carried out in other fields relative to the District of Columbia only a few days ago.

I thank the Senator for yielding to me. I appreciate the fine efforts he is making in this regard, which I hope will be successful. It seems to the Senator from Florida that we are wasting our time in complete futility, because he cannot see that there would be a chance in the world of the smaller States, or, for that matter, the larger States that approved of the Federal form of government, approving or ratifying this amendment if it were submitted to the States for ratification, which the Senator from Florida hopes will never be done.

In this time when the world is in confusion, in this time when we have more to do than we can do, and most of us are tied up in conferences all day long, as the Senator from Florida has been on the farm bill conference for 4 successive days now, it seems like such a great waste of good time and good effort to give all this time in the Senate to such a futile expression as this would be, if it were adopted, because he does not see how it would ever be ratified by the 38 States that would be required to ratify it.

Does the Senator from Alabama feel somewhat that way about it?

Mr. ALLEN. Yes, sir; I certainly do. I do not feel there is any chance that 38 States will ratify it. It cannot become effective, from a practical viewpoint, until the 1976 presidential election. And while we are discussing this matter, why it is insisted that this matter be brought to a conclusion, when it does not apply until 1976 and we have literally dozens of important bills that need the action of the Senate, is something I cannot understand.

Mr. HOLLAND. The Senator from Florida agrees completely, and he thanks the distinguished Senator from Alabama for the sturdy position which he has taken in opposing Senate Joint Resolution 1.

Mr. ALLEN. I thank the distinguished Senator.

Mr. ERVIN. Mr. President, if the Senator will yield, may I commend the Senator for his most eloquent and thoughtful, and what should be most persuasive, exposition of the evils of Senate Joint Resolution 1. I am sure there are so many evils in it that, despite the diligent efforts of the Senator from Alabama on this occasion pointing out those evils, the Senator from North Carolina will have to point out some of its evils in the future.

Mr. ALLEN. Mr. President, I am about to yield the floor. I see the Senator from North Carolina——

## MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the Senate by Mr. Leonard, one of his secretaries.

## DIRECT POPULAR ELECTION OF THE PRESIDENT AND VICE PRESIDENT

The Senate continued with the consideration of the joint resolution (S.J. Res. 1) proposing an amendment to the Constitution of the United States relating to the election of the President and the Vice President.

Mr. ALLEN. Mr. President, before I yield the floor, I do wish to comment briefly on the Bayh filibuster in which the Senate is engaged. The distinguished Senator from Indiana this morning, as he has a right to do under the rules, objected to the meeting of the Senate committees during the session of the Senate. He has threatened to object as he has a right to do under the rules to the request when an effort is made around 5 o'clock by the majority leader to lay this business aside so that we can take up some of the most important bills on the calendar.

The measure under discussion, Senate Joint Resolution 1, cannot, from a practical point of view, become effective until the 1976 presidential election. The effort of the opponents of this measure in seeking to make and address remarks to the measure have to do only with one item, a measure to take effect in 1976, whereas the distinguished Senator from Indiana is threatening, under the rules, to prevent consideration of bills that are needed by the country now.

We have some six or seven appropriation bills either in committee or on the calendar, dating from July 1 of this year, covering the period starting July 1, 1970; and we are well into that year.

The distinguished Senator from Indiana states that he is going to object to taking those bills up and require the Senate to stay on the consideration of a measure that would go into effect in 1976. What sort of priority is that?

Mr. President, according to my understanding of a filibuster, and what a filibusterer is, I would understand a filibusterer to be a person who stops or impedes the flow of legislation in the Senate or other legislative body by the use of parliamentary devices and rules, as he is permitted to do under the rules of the Senate.

Mr. President, the stopping of the flow of legislation and the consideration of legislation must be laid at the door of the distinguished Senator from Indiana, and I say that in all due respect, because the distinguished Senator from Indiana, by merely agreeing, could allow the Senate to go on to the consideration of these important, urgently needed matters of legislation.

I say that if there is a filibuster in opposition to Senate Joint Resolution 1—and I submit there is not—the Senate debated one issue here in Congress for 49 days, and no cloture motion was filed. We have already had a cloture motion filed as to the consideration of this measure, and it is said that another cloture motion will be filed tomorrow; and we have only been on it for some 12 or 13 days. Moreover, during that time, by laying the matter aside, we have passed more important legislation here in the Senate, in this period, than, according to the distinguished Senator from North Carolina, has been passed by the Senate in any other comparable period during his tenure in the Senate.

So what kind of filibuster is that? There is no filibuster on Senate Joint Resolution 1. But, Mr. President, in the opinion of the junior Senator from Alabama, we are in the midst of what must be, to identify it, called the Bayh filibuster against the calendar. So we see before us the prospect of a filibuster against the calendar on the part of the distinguished Senator from Indiana, acting as he has a right to do, if he chooses to do so, under the Senate rules.

Mr. President, I yield the floor.

Mr. ERVIN. Mr. President, the second section of rule XXII provides, in part, as follows:

> Except by unanimous consent, no amendment shall be in order after the vote to bring the debate to a close, unless the same has been presented and read prior to that time.

This being so, I request, in order that certain amendments which I have proposed may be presented and read within the purview of this provision of rule XXII, that the clerk at this time read amendment No. 900, amendment No. 901, amendment No. 931, and amendment No. 942.

Mr. BAYH. Mr. President, reserving the right to object, may I first address a parliamentary inquiry? Is a parliamentary inquiry in order?

The PRESIDING OFFICER. Will the Senator from North Carolina yield for that purpose?

Mr. ERVIN. Yes, I will yield for a parliamentary inquiry, but for no other purpose.

Mr. BAYH. The Senator from Indiana did not want to interrupt the Senator from North Carolina for any other purpose.

Is the request made by the Senator from North Carolina a request that must be denied for failure of any one Senator to consent?

The PRESIDING OFFICER (Mr. GOLDWATER). Under the rule, the amendments can be read after the motion has been made, but before the vote.

Mr. BAYH. One further question. Let the record show that the Senator from Indiana did not want to object to the motion made by his friend from North Carolina. But neither did he want to preclude any other Senator who had an amendment either already submitted or to be submitted in the future from having a similar opportunity.

Is it accurate to suggest that if a cloture motion is filed, it is necessary to have any amendment read after the time of filing, if it is to be considered after cloture is invoked, but before the vote on final passage?

The PRESIDING OFFICER. It would have to be presented after that.

Mr. BAYH. After the filing of the cloture motion?

The PRESIDING OFFICER. Yes.

Mr. BAYH. I thank the Chair.

Mr. ERVIN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. ERVIN. Suppose a Senator's proposed amendment cannot get to the floor; what happens to his amendment?

The PRESIDING OFFICER. That is a situation we have not been confronted with.

Mr. ERVIN. The Senator from North Carolina is prospectively confronted with that situation.

The PRESIDING OFFICER. The Chair would observe that he has not noticed that.

Mr. ERVIN. Would it be in order for the Senator from North Carolina to request the Chair to give him some instruction on the Senate rule in that respect, so that the Senator from North Carolina may guide himself accordingly?

Mr. BAYH. Mr. President, another parliamentary inquiry.

The PRESIDING OFFICER. If a motion is filed, the Senator would take his chances of getting the floor and presenting amendments at that time.

Mr. ERVIN. That would mean that if I could not get the floor, the great work that I am trying to do in behalf of the American people would, like the best laid plans of mice and men, go "agley"?

The PRESIDING OFFICER. The Chair observes that in his experience, he cannot recall a Senator having too much difficulty in getting the floor, or being denied the floor. That is the right of the Senator.

Mr. ERVIN. The Presiding Officer, I am sure, has observed what has happened in times past. There is such a possibility as that precedents may be set. We have had the precedents of that past shattered by our able and distinguished friend from Indiana objecting to virtually everything that occurs in the Senate of the United States.

Therefore, Mr. President, I should like to propound a unanimous-consent request. Notwithstanding the fact that no motion to put an end to debate under rule XXII has thus far been filed, I ask unanimous consent that my amendments Nos. 898, 899, 900, 901, 931, 942, and the one I introduced this morning be considered as presented and read in a manner satisfying rule XXII, or in the event a motion to put an end to debate is hereafter filed under rule XXII.

The PRESIDING OFFICER. Is there objection?

Mr. BAYH. Mr. President, reserving the right to object, the Senator from Indiana feels that inasmuch as he has been classified as such an objecting individual, perhaps he should not let his reputation be ruined by not living up to it.

I shall feel compelled, at the end of this observation, to take advantage of my right to object. But I suggest to my friend from North Carolina, so that his amendments will not be precluded because of the rule, the Senator from Indiana will not object if he will expand his motion to include all amendments presently pending or to be introduced on the bill. However, the Senator from Indiana feels that, inasmuch as there are some Senators not now present, it is his duty to protect them.

Otherwise, with all deference to the Senator from North Carolina and with personal apologies, I do object.

Mr. ERVIN. Mr. President, I deeply regret that the able, distinguished and eminent Senator from Indiana has singled me out as an object of objection on his part. But in order to comply with his suggestion, I hereby make a unanimous-consent request that in the event a motion is filed to bring the debate upon Senate Joint Resolution 1 to a close and in the event such motion is approved by two-thirds of those present and voting, all the amendments I have enumerated and all the amendments which have been submitted heretofore to Senate Joint Resolution 1, and all amendments which may hereafter be submitted to Senate Joint Resolution 1, be considered as present and read as required by rule XXII.

The PRESIDING OFFICER. Is there objection?

Mr. BAYH and Mr. HANSEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Wyoming is recognized.

Mr. HANSEN. Mr. President, reserving the right to object—and it is not my intention to object—I should like clarification of this issue.

If such a unanimous-consent request were granted, would it invalidate the germaneness rule?

The PRESIDING OFFICER. Not if the Senator is asking, as he has asked, compliance with that portion of rule XXII that requires amendments to have been read before cloture is invoked in order to be considered.

Mr. HANSEN. What is the interpretation of the Chair? Does the Senator make such a request?

The PRESIDING OFFICER. The understanding of the Chair is that the Senator from North Carolina has made an all-encompassing request as suggested by the Senator from Indiana, that all of the enumerated amendments be considsidered as having been read.

Mr. HANSEN. But it does not violate the germaneness rule?

The PRESIDING OFFICER. No, it does not.

Mr. HART. Mr. President, reserving the right to object, was it the intention of the Senator from North Carolina in his unanimous-consent request to include amendments which were presented and read, presented after the invocation of rule XXII, or is he seeking to protect only those that are filed up until then?

Mr. ERVIN. I am glad the distinguished Senator from Michigan has raised that point.

I modify my unanimous-consent request so as to make it apply to those amendments which are submitted prior to the time that cloture is invoked, if it should be invoked.

Mr. HART. Continuing the reservation, would not that right be available under rule XXII with respect to such amendments?

The PRESIDING OFFICER. Under the rule, the amendments should be read after the motion is filed but before the vote is called.

The Chair might say that if this unanimous-consent request is granted, it is the opinion of the Chair that this would be in compliance with what the Senator from Michigan is asking.

Is there objection?

Mr. HANSEN. Mr. President, I suggest the absence of a quorum.

Mr. BAYH. Mr. President, the Senator from Indiana has no objection.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. BAYH. Mr. President——

Mr. ERVIN. Mr. President, I suggest the absence of a quorum.

Mr. BAYH. Mr. President, I do not want to interfere with any Senator who has extended remarks to make, but the Senator from Indiana would like to take approximately 5 minutes of the Senate's time to respond to some of the assertions that were made earlier in the day by some of those who addressed themselves to the issue before the Senate.

Mr. HANSEN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER (Mr. GOLDWATER). The Senator will state it.

Mr. HANSEN. The Senator from Wyoming is confused. I had suggested the absence of a quorum, and I thought the distinguished Senator from Indiana did not object. Did I misunderstand?

The PRESIDING OFFICER. The Senator did not object, and the Senator from North Carolina yielded the floor.

The question now is, will the Senator from Indiana yield for the calling of a quorum?

Mr. BAYH. The Senator from Indiana has no objection to a quorum being

called, but I understand there was a little misunderstanding, and I will proceed with my remarks, so that some other Senator who might have something else to say on this subject will have the opportunity to do so.

Repeated reference has been made to the Senator from Indiana. In fact, as a relatively junior Member of the Senate, I must say that perhaps my name has been referred to more in the last 2 or 3 hours than in the last 8 years that I have had the good fortune to serve in the Senate. Because of this, I feel compelled at least to interject a thought or two at this time.

Repeated reference was made to a letter that the Senator from Indiana addressed to his colleagues. Indeed, the Senator from Indiana did address such a letter to his colleagues, and I think the RECORD will show that the letter went to friend and foe alike, proponents and opponents of the amendment that is now the pending order of business. There was no effort to try to conceal this letter.

Mr. President, I ask unanimous consent to have the letter printed at this point in the RECORD, since it has been referred to.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
*Washington, D.C., September 23, 1970.*

DEAR SENATOR: As you know, the Senate has been debating the question of electoral reform since returning from the Labor Day recess. The Senate already has considered S.J. Res. 1 for a longer period of time than it has devoted to the consideration of any constitutional amendment adopted in the past 100 years.

In view of a public statement by opponents of S.J. Res. 1 to the effect that they would never permit it to come to a vote, the Majority Leader was obliged to file a cloture petition. The first cloture petition failed by only six votes—a rather narrow margin considering past first attempts at cloture. Since that first vote, several Senators have indicated a willingness to consider voting for cloture but only if the Senate would make an all-out effort to debate the matter fully. I intend to see that the Senate has that opportunity.

S.J. Res. 1 was introduced in the Senate on January 10, 1969. Lengthy hearings were held on this and other electoral reform resolutions by the Subcommittee on Constitutional Amendments and by the full Judiciary Committee. The resolution, in amended form, was finally reported out of the Subcommittee on May 26 and became the pending order of business before the full Committee in September, 1969. From September, 1969, until late in February, 1970, the matter was not discussed because the Committee members had been informed of Senator Thurmond's intention of not permitting it to come to a vote.

During that period, and while the Committee was meeting during sessions of the Senate, the Committee calendar was cleared. Of course, it required the consent of the Senate to permit the Committee to meet. By the same token, when I requested permission for the Committee to meet to consider S.J. Res. 1, Senator Thurmond on three occasions interposed objections.

Finally, Senator Thurmond was forced to relent—but only after I refused to continue the practice of laying S.J. Res. 1 aside for other matters. On April 23, the Committee voted 11–6 to report favorably the direct popular vote resolution, S.J. Res. 1. After the filing of the majority report, the minority required an additional 11 weeks in which to file their views.

During the 12 days that S.J. Res. 1 has been before the Senate, I have not objected to committees meeting during the period of debate on the resolution. Nor have I objected to the laying aside of S.J. Res. 1 during the day so that other legislative matters could be considered and the calendar cleared. In short, the Senate has been afforded the unusual opportunity of conducting business as usual in the midst of a filibuster.

On three different occasions during the course of the debate I have tried to secure a unanimous consent agreement to consider any or all of the 13 amendments introduced to S.J. Res. 1. On each occasion, objection was heard. Ironically, on a number of occasions, the objecting Senator was objecting to the consideration of his own amendment. As a result, I have reluctantly been forced to the conclusion that a concerted effort is underway to deny the Senate an opportunity to vote on any type of electoral reform.

It appears, therefore, that a few of our colleagues are determined to use the rules of the Senate—which is their right—to prevent a vote on this crucial issue. Those of us who are committed to electoral reform, recognizing as we do the imminent danger of a constitutional crisis because of a malfunctioning of the present electoral system, have a sober responsibility to be as resolute in our determination to bring this question to a vote. This responsibility, as you know, weighs heavily on my shoulders as Chairman of the Subcommittee on Constitutional Amendments and as the principal sponsor of S.J. Res. 1.

After weighing this responsibility against the rush to adjournment, I have reluctantly decided to require those who are filibustering to bear the true burdens of a filibuster. Beginning tomorrow, I will object to committees sitting during the day and I will no longer consent to the laying aside of the unfinished busiess after only a few hours of speeches. The opponents of electoral reform, therefore, will be forced to speak continuously.

I recognize that this means a certain amount of inconvenience for individual Senators and for the Senate as a whole. I am hopeful that those Senators who are insistent on delaying action will realize this and permit the Senate to vote on—not necessarily for—S.J. Res. 1.

Because of my reluctance to follow this course of action and because I am aware of the hardships it imposes on you, I wanted you to know what events have transpired, thus leaving me no alternative. Again, I deeply regret the inconvenience this is causing you.

With best regards, I am
Sincerely,

BIRCH BAYH.

Mr. BAYH. Mr. President, the purpose of that letter was to explain to my colleagues why the Senator from Indiana was doing what he is doing. The Senator from Indiana did not take this step lightly, but only after serious consideration of the grave consequences that might befall him or the Senate or the country. Although I took this step reluctantly, once having taken this step, I am resolute in my determination to pursue this course until the matter before the Senate is presented to the Senate and we have a chance to vote on it.

I have been accused by one of my very distinguished and illustrious colleagues this afternoon of having prevented the opponents from having the opportunity to present their views. I invite anyone who reads these eloquent remarks to read back over the RECORD of the past 12 days or so and then judge for himself whether the Senator from Indiana monopolized the floor and prevented the opponents from having the opportunity to be heard.

Also, I invite them to investigate the accusation that I had continuously interrupted the opponents and prevented them from having a reasonable dialogue. I think the RECORD will put that accusation to rest. The Senator from Indiana has on occasion asked questions of his colleagues just as they have asked questions of him. Somehow or other, I thought that was the purpose of the United States Senate—to have a free discourse, a free flow of differing ideas—and I still think that such a discourse is the main vehicle we use to discuss differences and ultimately to work the will of the Senate.

I think the RECORD will show, for anyone who cares to peruse it, that on several occasions the Senator from Indiana suggested that, so far as he was concerned, the proponents had made their case.

Repeatedly, I have invited, and still invite those who share different views, to take advantage of the opportunity to be heard. But, I must say, and I think the RECORD will show, there is a little different interpretation being placed on my invitations. Our distinguished colleague the junior Senator from Nebraska, said there were eight or 10 speakers that had to be heard. But then we went for almost a week without hearing from any of them. Some opponents of the matter sat here and let the pending order of business be put aside. My good friend from North Carolina, who is an eloquent statesman and a good friend of all of us here, on one occasion even suggested that he had a long speech to make, and then, two sentences later, suggested that he did not want to take the time of the Senate on that particular occasion to make that speech. I find a little inconsistency in the argument presented by the opponents today, inconsistency in the thoughts of those who normally have great perception and great consistency. On the one hand they criticize the Senator from Indiana for suggesting that we should not put aside the pending order of business but stay here and debate it. On the other hand, the Senator from Indiana is also being criticized for having permitted the pending order of business to be put aside on previous days, thus supposedly denying us the opportunity to debate.

We have to fish or cut bait. We will either stay here and debate, or we will not. The Senator from Indiana suggests that this matter should be debated, and then we should vote it up or down.

I would take issue with the assessment that has been made by my colleagues here this afternoon that the Senator from Indiana has been arbitrary and dilatory in preventing committees from meeting, in preventing the pending order of business from being put aside, and in preventing a two-shift business from being followed by the Senate, and in stopping all the legislation.

I should like to suggest a reading of

the rules of the Senate for the consideration of my colleagues. Rule XXV, section 5 reads as follows:

No standing committee shall sit without special leave while the Senate is in session. . . .

That is what the Senate rule says about what is happening right now. In other words, we are following a normal course of action.

Little has been said about the fact that the distinguished Senator from South Carolina on three occasions last December actually prohibited the Judiciary Committee from meeting to consider the very matter now before us.

If one Member of this body had not stressed that the rules be complied with, we would not even be here right now. If that same person had not personally filibustered that measure in the Judiciary Committee from September to February, we would not be here right now. If we are going to abide by the rules of the Senate, we should abide by them.

If one group of opponents are going to stick to the rules, then the whole Senate should. That is why we are here. I shall not even deal with the suggestion that I am filibustering because, with all respect, it is too ridiculous to require rebuttal.

The important legislation which is before us is of significant concern to the Senator from Indiana. I have listened with amazement and concern as some of my well-intentioned colleagues have gone down the calendar. Perhaps, since they overlooked some of it, maybe they would want to put the whole calendar in the RECORD, as two or three bills were left out.

But, to suggest that the Senator from Indiana as being against motherhood, orphan children, crippled veterans, against cleaning our streams and lakes and the air—my goodness. Of course these matters are on the calendar. And they are important matters. The Senator from Indiana is extremely anxious to get down to their consideration.

But let me suggest that we will have a chance to vote on them all, as soon as these few individuals who seem to feel they have the right to deny the Senate the opportunity to vote on the pending order of business decide to stop their filibustering.

Mr. President, I ask unanimous consent that, pursuant to the questions which were raised between my distinguished friend from Alabama and North Carolina, at 2 o'clock on Tuesday afternoon next, the Senate have a final vote on Senate Joint Resolution 1.

Mr. ERVIN. Mr. President, I object.

The PRESIDING OFFICER (Mr. MONDALE). Objection is heard.

Mr. BAYH. Thank you, Mr. President.

Mr. ERVIN. Mr. President—Mr. President, will the Senator yield for a unanimous-consent request—permit me to make a unanimous-consent request?

Mr. BAYH. I would be very glad to hear the Senator's unanimous-consent request, as soon as I get through with all my own.

Mr. ERVIN. Well——

Mr. BAYH. Mr. President, I do not want to be impolite to my good friend from North Carolina, as much as I have become accustomed to the Senator's objections to my unanimous-consent requests—I think he objected to 13 being considered on each of three different occasions, but that is not a bad average; 39 out of 39 is a good record, even in the Senate. I thought, perhaps, in the ensuing period of time, he would change his mind, and his normal wisdom would surface once again and he would permit the Senate temporarily to put aside Senate Joint Resolution No. 1 until 2 o'clock on Tuesday next, and to suggest a final vote at that time, since this was suggested as a way to get some of this legislation considered. We now see that it has been objected to.

One last reference, Mr. President, as I see my 5 minutes have stretched to 7. There has been some concern about dealing with immediate legislation. There has been some reference to the fact that we cannot deal with this problem until 1976.

I do not believe that that is necessarily the case. I would be the first to suggest that we have a difficult job before us, if we are to get this enacted by the Senate, correct all the differences with the House, and then get ratification by three-fourths of the State legislatures. I, for one, do not think anything is impossible. We have a reasonable crack at each legislature. There are 46 legislatures meeting during the period of time which we specified on Senate Joint Resolution 1. Four others might indeed be meeting in special session.

The Senator from Indiana feels that the problem before us is very much like putting a shingle on a leaky roof. When it is raining and the water is pouring down, and the wall, the upholstery, the rugs, and the wallpaper and clothing are all being destroyed, then it is of fundamental importance to correct the hole in the roof. It is a crisis. But, after the rain stops, we will play golf, or mow the lawn, or do something else, because it is not leaking any more.

I suggest that we are not living up to our responsibilities unless we correct this flaw in our system right now, because the rain has stopped, or because the specter of 1968 has dimmed in our minds, or because we hope that this will not be the situation in 1972.

We must not leave it to chance, but move now, because the House has passed this by a 339-to-70 vote. It is before the Senate now. I hopefully and respectfully suggest to my colleagues that we have a responsibility to live up to the finest traditions of the Senate and provide some leadership for the country and correct this flaw now—now. Because, having gone through the ordeal of the 25th amendment, following the terrible assassination of our late beloved President Kennedy, it is the judgment of the Senator from Indiana that the election of 1968 once again pricked the conscience of the Nation and showed another weakness in our constitutional fabric.

Before the passage of the 25th amendment, a weakness existed in the presidential disability provisions. But it took a tragedy to get something done. Now that we have witnessed the near tragedy of 1968, there is heightened public interest.

The further we get from election day 1968, the less this interest is going to be felt in the country. Let me suggest that if we have a crisis, if indeed we have a repeat of 1968 in 1972 and there is a change of 40,000 votes so that a third party candidate is able to go to one of the two major-party candidates and say, "What am I bid to make you President," and a deal is made in a smoke-filled room, that candidate will then become part of the government. And there is no way that we can correct that then. He will then be part of the Government structure.

It seems to me that the case is in. Let us move on.

I have spoken for 10 minutes. I hope that my friends will forgive me, after having listened to them all day, for filibustering for 10 minutes.

UNANIMOUS-CONSENT REQUESTS

Mr. ERVIN. Mr. President, I ask unanimous consent that every committee be authorized to meet tomorrow notwithstanding the fact that the Senate may be in session.

Mr. BAYH. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. ERVIN. Mr. President, I ask unanimous consent that the Committee on Aeronautical and Space Sciences be permitted to meet tomorrow notwithstanding the fact that the Senate may be in session.

Mr. BAYH. Mr. President, reserving the right to object, I think the Senator from Indiana has made his position very clear.

Mr. ERVIN. Mr. President, I have the floor. I do not think it is in order for the Senator from Indiana to do anything more than to object.

The PRESIDING OFFICER. Objection is heard. The Senator from North Carolina propounded a unanimous-consent request. The Chair can entertain reservations of objections at his discretion.

Mr. BAYH. Mr. President, reserving the right to object, I think that the Senator from Indiana has made his position very clear.

With great reluctance, in order to make the Senate move on the pending business, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. ERVIN. Mr. President, I ask unanimous consent that the Committee on Agriculture and Forestry be permitted to sit tomorrow notwithstanding the fact that the Senate may be in session.

Mr. BAYH. Mr. President, reserving the right to object respectfully, pursuant to the previous explanation of the Chair. I do in fact object, with great apologies to my friend, the Senator from North Carolina, who I know is trying to pursue the business of the Senate.

The PRESIDING OFFICER. Objection is heard.

Mr. ERVIN. Mr. President, I ask unanimous consent that the Committee on Armed Services, which is charged with the duty of protecting the national security of our country, be permitted to sit tomorrow notwithstanding the fact that the Senate may be in session.

Mr. BAYH. Mr. President, reserving

the right to object, and with all deference to the importance of the security of our country, the Senator from Indiana suggests that the basic security of our country would be greatly enhanced if the Senator from North Carolina uses his influence to pass the pending business of the Senate. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. ERVIN. Mr. President, I ask unanimous consent that the Banking and Currency Committee, which is charged with the primary responsibility of keeping the dollar sound, be permitted to meet tomorrow notwithstanding the fact that the Senate may be in session.

Mr. BAYH. Mr. President, reserving the right to object, and recognizing the great interest in finance of my friend, the Senator from North Carolina, and the importance of the Banking and Currency Committee, nevertheless under the previous explanation of the Chair, I do object.

The PRESIDING OFFICER. Objection is heard.

Mr. ERVIN. Mr. President, I ask unanimous consent that the Committee on Commerce, which is charged with clearing the channels of interstate and foreign commerce, be permitted to sit tomorrow notwithstanding the fact the Senate may be in session.

Mr. BAYH. Mr. President, reserving the right to object, the Senator from Indiana would make the observation that perhaps the commerce of the country would come to its knees if we had a constitutional crisis in which no one was elected President. Thus, I am forced to object.

The PRESIDING OFFICER. Objection is heard.

Mr. ERVIN. Mr. President, I ask unanimous consent that the Senator from Indiana lose his fear of George Wallace.

Mr. BAYH. Mr. President, reserving the right to object, the Senator from Indiana will lose that fear automatically if the Senator from North Carolina will throw his prestige and influence behind the passage of the pending resolution before the Senate.

Mr. ERVIN. Mr. President, I cannot do that, because Senate Joint Resolution 1 is an open invitation for George Wallace and everyone else to run for President with the assurance of getting just as many votes as they receive.

The PRESIDING OFFICER. Objection is heard.

Mr. ERVIN. Mr. President, I ask unanimous consent that the Senate Committee on Finance, which is charged with the responsibility of recommending legislation to obtain enough taxes to keep our Government operating, be allowed to meet tomorrow notwithstanding the fact that the Senate may be in session.

Mr. BAYH. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. HANSEN. Mr. President, would the Senator from North Carolina yield for a question?

Mr. ERVIN. Mr. President, I yield to my friend, the distinguished Senator from Wyoming.

Mr. HANSEN. Mr. President, is the Committee on Finance the committee charged with the responsibility of considering the welfare reform proposal that has been passed by the House and which has been subscribed to by a number of Senators, I think not excluding the distinguished Senator from Indiana?

Mr. ERVIN. The Senator is correct. Not only that, but as I understand it, it has a subcommittee that has jurisdiction over veterans' affairs.

Mr. BAYH. Mr. President, if the Senator will yield——

Mr. ERVIN. Wait a minute. I would like to know what I am being asked to yield for. I have the right to the floor.

Mr. BAYH. If the Senator will yield without losing his right to the floor.

Mr. ERVIN. Mr. President, I would like to know what I am yielding for. I will yield for a question.

Mr. BAYH. Mr. President, the Senator would like to propound a question to his friend, the Senator from North Carolina. The question asked by my distinguished colleague relating to the Finance Committee has struck a compelling note of reason in the heart of the Senator from Indiana. If the Senator from North Carolina would just rephrase that unanimous-consent request referring to the Finance Committee meeting, the Senator would not object.

The Senator from Indiana would suggest to the Senator from North Carolina that if he would extend his request a bit further and ask unanimous consent that the Finance Committee be permitted to meet tomorrow, and that Senate Joint Resolution 1 be voted on finally at 2 o'clock on Tuesday, the Senator from Indiana would not object.

Mr. ERVIN. Mr. President, I want no part of such request. I care too much for the welfare of my country to make such a unanimous-consent request.

I propose again my unanimous-consent request that the Committee on Finance, which is charged with the solemn responsibility of recommending legislation which will bring into the Treasury enough shekels to keep the Government running, be permitted to meet tomorrow, notwithstanding the fact that the Senate may be in session.

Mr. BAYH. Mr. President, I respectfully object.

The PRESIDING OFFICER. Objection is heard.

Mr. ERVIN. Mr. President, we live in a most troubled era in this world. It is a very precarious world. We have trouble in the mid-East. We have trouble in Asia. We have trouble looming on all horizons.

For that reason, Mr. President, I ask unanimous consent that the Senate Committee on Foreign Relations, which is charged with grave responsibilities in this field, be permitted to meet tomorrow notwithstanding the fact that the Senate may be in session.

Mr. BAYH. Mr. President, reserving the right to object, the Senator from Indiana might make the brief observation that perhaps our whole foreign affairs and the impression our country makes on other nations large and small throughout the world would be far greater if we had a system that guaranteed that the President would be the one who received the most votes in the election and that everyone's vote would count, and that all the people would be permitted to vote for their President.

I must respectfully object.

The PRESIDING OFFICER. Objection is heard.

Mr. ERVIN. Mr. President, I suggest that we need something better than Senate Joint Resolution 1. It provides that 40 percent of the votes will count and that the other 60 percent will be thrown away.

Mr. President, our great Government has to keep operating. We have to investigate to insure efficiency and economy in the field of Government operations if we are going to act wisely.

For that reason I ask unanimous consent that the Senate Commitee on Government Operations, which has jurisdiction of legislation affecting the Federal Government and the structure of the Federal Government and the power to investigate economy and efficiency in all departments and agencies of the Government, be permitted to meet tomorrow notwithstanding the fact that the Senate may be in session.

Mr. BAYH. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. ERVIN. Mr. President, the Committee on the Judiciary handles more than 50 percent of all legislative proposals which come to the Senate.

For this reason, I ask unanimous consent that this important committee be permitted to meet tomorrow, notwithstanding the fact that the Senate may be in session.

The PRESIDING OFFICER. Is there objection?

Mr. BAYH. Mr. President, reserving the right to object, the Senator from Indiana, who is a member of that committee, has not received notification that that committee has any intention of meeting tomorrow. Therefore, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. ERVIN. Mr. President, while the Senator from Indiana put the objection on specific grounds, his objection prevents that committee from meeting, even though that committee might wish to meet and even though the Senator from Indiana may receive notice that it wishes to meet.

Mr. President, I ask unanimous consent that the Committee on Labor and Public Welfare be permitted to meet tomorrow, notwithstanding the fact that the Senate may be in session.

The PRESIDING OFFICER. Is there objection?

Mr. BAYH. I object.

Mr. ERVIN. Mr. President, I make the same request with respect to the Committee on Post Office and Civil Service.

The PRESIDING OFFICER. Is there objection?

Mr. BAYH. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. ERVIN. Mr. President, I make the

same request with respect to the Committee on Public Works.

Mr. BAYH. Mr. President, will the Senator from North Carolina repeat that request so that we can hear it in full?

Mr. ERVIN. Mr. President, I ask unanimous consent that the Committee on Public Works, which has jurisdiction over legislation which permits the development of our rivers and harbors and many other important public projects, be permitted to meet tomorrow notwithstanding the fact that the Senate may be in session.

The PRESIDING OFFICER. Is there objection?

Mr. BAYH. Mr. President, reserving the right to object, as a member of that committee, and not knowing of any planned meetings scheduled, I think it would be very inequitable to other committees if I did not object. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. ERVIN. Mr. President, I make the same unanimous consent request that any of these committees which may desire to meet tomorrow be permitted to meet notwithstanding the fact that the Senate may be in session.

The PRESIDING OFFICER. Is there objection?

Mr. BAYH. Mr. President, reserving the right to object, I have all deference for my friend from North Carolina and his deep concern that the business of the Senate be continued. Sharing his concern that present business be disposed of and believing that the present course of action is the only way to reach that goal, I object to that request.

The PRESIDING OFFICER. Objection is heard.

Mr. ERVIN. Mr. President, I ask unanimous consent that the majority leader, if he be so moved, may be permitted to call up tomorrow the bill S. 734 now on the Legislative Calendar, a bill to revise the Federal election laws, and for other purposes.

The PRESIDING OFFICER. Is there objection?

Mr. BAYH. Mr. President, reserving the right to object, as one member of the Senate, I would consider that request if and when it is presented by the majority leader. Thus, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. ERVIN. Mr. President, I ask unanimous consent that the majority leader may call up tomorrow, or tonight, for that matter, S. 3785, a bill to amend title 38, United States Code, to authorize educational assistance and home loan benefits to wives of members of the Armed Forces who are missing in action or prisoners of war.

The PRESIDING OFFICER. Is there objection?

Mr. BAYH. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. BAYH. Mr. President, with the same stipulation as before.

Mr. ERVIN. What is the stipulation?

Mr. BAYH. That the Senator from Indiana will be glad to consider that if and when the majority leader presents it to the Senate. The Senator from Indiana believes the rules of the Senate should be adhered to. Rule XXV, section 5, is clear, and the Senator from Indiana feels compelled at this time to see that we live up to that rule.

The PRESIDING OFFICER. Objection is heard.

Mr. ERVIN. Mr. President, I make these requests to illustrate the fact that I object to action on only one resolution, namely, Senate Joint Resolution 1, until it has been fully debated. I think my unanimous consent requests clearly demonstrate that my able and distinguished friends from Indiana objects to everything.

I am reminded of the story they tell up in Mitchell County, N.C., about John Gudger. John Gudger would never agree with anybody on any proposition. He found out that cabbage did not agree with him and from then on he would not eat anything but cabbage.

I want to warn my good friend from Indiana not to get into a situation such as John Gudger got into by reason of his objecting to everything.

Mr. President, I suggest the absence of a quorum.

Mr. BAYH. Mr. President——

The PRESIDING OFFICER. Does the Senator withdraw his request for a quorum?

Mr. ERVIN. Yes.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. BAYH. Mr. President, I must say I share the dedicated concern of my friend from North Carolina for the interest of our country and for the important business that the committees to which he referred contribute to the well-being of our country.

But, Mr. President, I also feel that the Senator from North Carolina is correct in suggesting that the present matter should not be considered until it is fully debated. I would suggest perhaps that we can actually fully debate Senate Joint Resolution 1 if we stop spending so much time talking about the Senator from Indiana.

Mr. HART and Mr. ERVIN addressed the Chair.

The PRESIDING OFFICER. The Senator from Michigan is recognized.

Mr. HART. Mr. President, I shall disregard the counsel which has been given by the Senator from Indiana. I rise only to say that as one Senator I think the Senator from Indiana has been extraordinarily patient over these many, many months. I do not regard his actions now or at any point heretofore as arbitrary. I envy him and the quality of his patience.

Having sat with him on the Committee on the Judiciary and having attempted to support his efforts on this proposal for many, many months and having followed its slow course since then, I think the Nation is blessed in having a man of his patience and yet intense commitment.

The action we now take is the only way we have a fighting chance of permitting this body to exercise its will on a matter which I agree with the Senator from Indiana is of critical importance.

The PRESIDING OFFICER. The Senator from North Carolina is recognized.

Mr. ERVIN. Mr. President, I would like to say that I think the Senator from North Carolina is a very patient man also. I think the Senator from North Carolina and those associated with him have exactly the same right as the Senator from Indiana or any other Senator to fight for those things that we think the interests of our country require we fight for.

I do not mean any criticism of my good friend from Indiana. I have been charged a number of times with objecting to his requests and I wanted to illustrate the fact that the Senator from Indiana is just as prone to object to things he dislikes.

I wish to commend the Senator from Indiana for his zeal. I have repeatedly stated he has not done a thing except what the rules of the Senate permit him to do; and we have not done a thing except what the rules of the Senate permit us to do.

I am going to respectfully suggest, without saying who is the goose and who is the gander, that what is sauce for the goose under the rules is sauce for the gander.

I do not criticize the Senator from Indiana except I do point out the difference between the efforts of those associated with me in this matter and the efforts of the Senator from Indiana. We only oppose one thing and my good friend from Indiana opposes everything except that one thing. He has a perfect right to do so. I commend him for his zeal, his earnestness, and fighting spirit. I hope to enlist his aid in some just cause in the future.

Mr. BAYH. Mr. President, I propose a unanimous-consent request that we proceed to the immediate consideration of S. 734, a bill by the Senator from Nevada (Mr. CANNON), to revise the Federal election laws, and for other purposes, and that it be voted on no later than 1 o'clock on tomorrow; and furthermore that we then proceed to a final vote on Senate Joint Resolution 1 on Tuesday at 1 o'clock.

Mr. ERVIN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. ERVIN. Can a Senator propound two matters in one unanimous-consent request? The rules restrict a Senator to just one request; do they not?

The PRESIDING OFFICER. The Parliamentarian advises the Chair that it can be done in a unanimous-consent request.

Mr. ERVIN. Is it possible, then, to interpose one objection to one part of the proposed unanimous-consent request and agree to the other part of it, because I do not object to the part of the unanimous-consent request that refers to the bill introduced by the distinguished Senator from Nevada, but I do object to the last part of the unanimous-consent request; and unless I can interpose a half objection, I shall have to interpose a whole objection?

Mr. BYRD of West Virginia. Mr. President, I object. I object only because rule

XII would have to be waived in either case, and such waiver was not included in the Senator's request.

The PRESIDING OFFICER. The Senator from West Virginia is correct.

Mr. BAYH. Mr. President, I appreciate the objection of the Senator from West Virginia. I think it is well taken. Of course, the same point would have to be made on a number of efforts made here this afternoon. I only pursued this course of action——

Mr. BYRD of West Virginia. No, if the Senator will yield; that same objection could not have been made to any request which I have distinctly heard since I returned to the Chamber a few minutes ago. Rule XII requires the establishment of a quorum before agreeing on a specific time or date for a final vote on a bill or joint resolution.

Mr. HANSEN. Mr. President——

Mr. BAYH. Mr. President, the Senator from Indiana has the floor; does he not?

The PRESIDING OFFICER. Yes.

Mr. BAYH. I must say the point of the Senator from West Virginia is accurately stated. Of course, the Senator from Indiana could rephrase his unanimous-consent request without specifying a time certain, but that would prove nothing.

We have gone through, if I may say this respectfully, an interesting exercise which has not proved anything except the fact that we have spent more time going through the semantics of delay than we have debating the issue before us.

With all due respect to my distinguished friend from Alabama and my distinguished friend from North Carolina—and I know they did not mean to direct any real criticism at their friend from Indiana; we have a fine camaraderie—the first half of the period this morning in which the Senator from Alabama eloquently presented his views was directed not at the issue before us, not at the need to debate the meat of the question, but at the Senator from Indiana. I am complimented by the fact that apparently I am significant enough to be the target of such eloquent discussion, but if we are going to get on with the business of the Senate, let us get on with it. Let us vote the matter up or down and let us stop playing around with it.

Mr. HANSEN. Mr. President, let me say, first of all, I very much appreciated what has been said over the days and the weeks, if indeed the discussion has continued on for that long a time, on this matter. I think it is worthwhile to take note of the fact that this is no ordinary appropriation bill. This is no ordinary authorization bill. This is no insignificant change in the law or the enacting of an ordinary law that we are talking about. We are talking about amending the Constitution of the United States, and I do not think that is something that ought to be taken lightly or ought to be resolved hurriedly or with less than full understanding.

While there may be those who contend that the efforts of some constitute a determination to filibuster, I would suggest that the public at large has indeed had occasion to study this proposal, as those of us in the Senate have. I know that a number of important columnists; I know that a number of important newspapers and news magazines, have taken positions and have spoken out with clarity and with firmness that was not exhibited earlier.

As a consequence, I do not think it has been a futile effort at all. I do not think it is an effort that ought to be concluded with less than a clear understanding by everybody in this body, because we are talking about changing an instrument that has served this country for a long, long time.

As I said earlier today, the RECORD will disclose that it has served us very well. As a matter of fact, I know of no comparable government in the world, or any nation anywhere near the size of ours, that can boast the success that is ours.

As a consequence, my belief is that a majority of the people of this country, because of this debate, are deciding whether they favor or whether they oppose Senate Joint Resolution 1. If my mail is any indication, I would say that the people of Wyoming are even more firmly convinced than they were several months ago that this proposed change in the Constitution is not in the public interest.

Rather than deplore what has been said, to make light of it, to criticize those who want to be certain that the people of this country understand, I would suggest that what we ought to do is express our gratitude to those Senators who have taken an important role in this debate, who have gone to the trouble to study the facts, to research the history, to see how our system works, and make comparisons between our system and other systems, in order that we might better understand what it is we are talking about and have a more solid basis of fact from which to make a determination as to the desirability of change.

I suspect that the cloture motion will be voted down. I suspect that if we took a vote on Senate Joint Resolution 1 itself, it would fail to get the votes required in order to submit the proposition to the people of the United States.

I have no doubt at all that, when we look back with the vantage point that time gives us, we will be pleased, indeed, that we did not hurriedly take an action which we might have regretted for a long time.

Earlier, I said one of the things I learned in the few years I have been a Member of this body I learned from the late, great Everett Dirksen. Without presuming to recall precisely what he said, he said essentially this: "I have never seen any idea whose time had arrived denied by this body because of the inability to invoke cloture. But," he said, "on the other hand, I have seen a great many issues more thoroughly debated, more clearly understood, and accommodations reached that resulted in better legislation, sounder legislation, than would have resulted had we proceeded hurriedly and without the sort of debate that characterizes the Senate as the greatest deliberative body on earth. We would have gone down the wrong path a number of times."

I think Senator Dirksen's words are just as applicable today as they were during the times when he expressed them.

With that, let me say that I am not one bit discouraged by what has happened here. I do regret that sometimes we have to go through this sort of exercise in order that everyone can understand more fully. But all I can say is that when we have something that has served the country as well as the Constitution of the United States, an instrument that historians throughout the entire world look upon with great admiration, and indeed great amazement and wonder at how those persons who framed it were able to draw it from their collective intelligence and collective wisdom and education—the variety of experiences that enabled them to hammer out something that would stand the test of time—that could be amended from time to time with these written-in safeguards, then I think we see something of the character of the instrument that we are dealing with, and we can better understand why it is important that we do not amend it hurriedly.

Mr. BAYH. Mr. President, I certainly hope that the remarks of the Senator from Indiana were not construed as in any way being critical of those who opposed his views on this particular subject, or demanded that it be discussed adequately and fully. In fact, the Senator from Indiana went through the very difficult process of objecting to those committee meetings just so that we could debate it.

What the Senator from Indiana did suggest, and what he suggests now, is that it is rather inconsistent for some Members—not including his friend from Wyoming—to have suggested, on the one hand, that the Senator from Indiana is imposing a hardship on the Senate by denying committees to meet, and, on the other hand, that he is derelict in his duty by not permitting full debate. That is exactly the nature of the remarks that were made earlier. I was said to be the one responsible for our not having full debate because I sat here 2 or 3 days, or 4 or 5 days, last week, and did not object to going on to other business; after stating that the proponents had consummated their case.

This is inconsistent, and I hope we do have a full debate. That is why we are here. I share the concern of my friend from Wyoming. Indeed, I cannot honestly say how many votes are present on final passage for this matter. But I feel we have an obligation to vote it up or down.

It seems to me, if there is wisdom in the words of our late friend and colleague, Senator Dirksen, that the filibuster rule itself is to give the country time to consider its actions on significant measures, that this test can be applied to one degree if we are debating a measure which requires 51 votes in this body, and in that case, perhaps, an argument can be made that we should have more time; but it seems a bit difficult to the Senator from Indiana to suggest that a matter that needs the votes of two-thirds of this body to support and pass it, the same

number required for cloture, is not getting adequate protection by the number of votes required.

Furthermore, as far as the time is concerned, the Senator from Indiana would like to suggest for the consideration of his friend from Wyoming that not only do we require a higher test of support on the floor of the Senate, namely, two-thirds, for a constitutional amendment, but we require sufficient time, and the ordeal, really, of getting three-fourths of our State legislatures to ratify it.

So I would think that double test, much more strenuous than that applied to normal legislation, would cause the Senate to consider seriously the wisdom, or lack thereof, of filibustering a bill which requires two-thirds of the Senate to support it in the first place, and then the time and struggle necessary to get three-fourths of the legislators to support it.

Although I have sat through several filibusters in my period of time in the Senate, I do not recall any other time when a constitutional amendment has been filibustered.

Mr. HANSEN. Mr. President, will the Senator yield?

Mr. BAYH. I am glad to yield.

Mr. HANSEN. I would suggest that this, then, would afford the Senator an opportunity to tell his grandchildren of such an experience.

Mr. President, it seems to me that there is a question of semantics involved in trying to determine what is difficult, serious consideration, on the one hand, or filibustering on the other.

Mr. BAYH. I was glad to see that the Senator really did not suggest that he was participating in a filibuster, then. If that is accurate, I do not want the RECORD to show that my friend from Wyoming really believe what is going on now is a filibuster.

Mr. HANSEN. Mr. President, I will leave that to the historians and the press to determine.

Mr. BAYH. I think they will speak eloquently of what has been said, so I shall not pursue the matter further.

Mr. ERVIN. Mr. President, so that Senators may understand, I would like, for the RECORD, to explain the difference between a filibuster and an educational debate.

If those who are delaying matters and those who are speaking at length have views which are similar to yours, it is an educational debate. If those who are delaying matters and speaking at length express views dissimilar to yours, it is a filibuster.

So, by that criterion, I would submit that the Senator from Indiana is correct; since we have expressed views contrary to his, it is a filibuster, but since he expresses views contrary to those of the Senator from Alabama and myself, the filibuster is on the other side and the educational debate is on our side; and that makes the whole problem just as simple and understandable as the noonday sun in a cloudless sky.

But the fact remains that I have asked for unanimous consent by the Senator from Indiana, and I have been sharply criticized for so doing. The fact remains that those who are associated with me are opposed to an immediate vote without adequate debate on one proposition only: Senate Joint Resolution 1. My good friend from Indiana, acting perfectly within his rights, has objected to everything else. That is a fact, and I am saying it in the best of humor. I am not exasperated. I am bound to say, though, that from the standpoint of onlookers, it may appear like the fellow up in Watauga County, who went down to county court, and they told him before he left to come back and make a report on court that night at the neighborhood store.

They asked him that night how it was, and he said, "There was the judge, sittin' up high, just like he was the presiding officer; and there was the jury; and there was the witnesses and the parties; and there was the lawyers. Some of the lawyers was objectin', and the others was exceptin', and the costs was pilin' up."

## REMOVAL OF INJUNCTION OF SECRECY FROM EXECUTIVE M, 91st CONGRESS, SECOND SESSION

Mr. BYRD of West Virginia. Mr. President, as in executive session, I ask unanimous consent that the injunction of secrecy be removed from Executive M, 91st Congress, second session, the Nice Agreement Concerning the International Classification of Goods and Services to Which Trademarks Are Applied, signed June 15, 1957, and a copy of that agreement as revised at Stockholm July 14, 1967, transmitted to the Senate today by the President of the United States, and that the agreement, together with the President's message, be referred to the Committee on Foreign Relations and ordered to be printed, and that the President's message be printed in the RECORD.

The PRESIDING OFFICER (Mr. MONDALE). Without objection it is so ordered.

The message from the President is as follows:

*To the Senate of the United States:*

With a view to receiving the advice and consent of the Senate to accession, I transmit herewith a certified copy of the Nice Agreement Concerning the International Classification of Goods and Services to which Trademarks are Applied, signed June 15, 1957, together with an English translation thereof, and a certified copy of that Agreement as revised at Stockholm July 14, 1967, together with an English translation thereof. I transmit also, for the information of the Senate, the report of the Secretary of State with respect to the Agreements.

The organization set up by the Agreement is responsible for establishing an international classification of trademarks used in over 60 countries. It is important from the standpoint of the interest of trademark owners and from the standpoint of effective government administration of its trademark functions that the United States accede to the Agreements so that it may participate as a member in the organization.

I recommend that the Senate give early and favorable consideration to the Agreements submitted herewith and give its advice and consent to accession.

RICHARD NIXON.

THE WHITE HOUSE, *September 24, 1970.*

## DIRECT POPULAR ELECTION OF THE PRESIDENT AND VICE PRESIDENT

Mr. BYRD of West Virginia. Mr. President, what is the pending business before the Senate?

The PRESIDING OFFICER. The pending business is Senate Joint Resolution 1, proposing an amendment to the Constitution of the United States relating to the election of the President and the Vice President.

## ADJOURNMENT

Mr. BYRD of West Virginia. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in adjournment until 12 noon tomorrow.

The motion was agreed to; and (at 5 o'clock and 48 minutes p.m.) the Senate adjourned until tomorrow, Friday, September 25, 1970, at 12 noon.

## NOMINATIONS

Executive nominations received by the Senate September 24, 1970:

ASIAN DEVELOPMENT BANK

Artemus E. Weatherbee, of Maine, who was confirmed by the Senate September 1, 1970, as U.S. Director of the Asian Development Bank, to serve on the Bank with the rank of Ambassador.

U.S. DISTRICT COURTS

Edward R. Becker, of Pennsylvania, to be a U.S. district judge for the eastern district of Pennsylvania, vice a new position created under Public Law 91-272 approved June 2, 1970.

U.S. COAST GUARD

The following named officers of the Coast Guard for promotion to the grade of lieutenant commander:

| | |
|---|---|
| Michael J. Schiro | Richard L. Devries |
| Richard V. Consigli | Thomas D. Fisher |
| Clifford E. Banner | George J. Buffleben, Jr. |
| Thomas F. McGrath III | Robert P. Dickenson |
| Phillip J. Bull | Billy W. Richardson |
| Michael H. Dennis | David J. Connolly |
| Alvin Cattalini | Robert L. Kuhnle |
| Carl D. Bossard | Virgil F. Keith, Jr. |
| Gary F. Van Nevel | Harry D. Nelson |
| Clinton H. Smoke, Jr. | Karl L. Reichelt |

# HOUSE OF REPRESENTATIVES—*Thursday, September 24, 1970*

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

*My meat is to do the will of Him who sent me and to finish His work.* John 4: 34.

O God of truth and love, who art worthy of a nobler praise than our lips can utter and of a greater love than our minds can understand and our hearts can give, in Thy presence we bow in all reverence and gratitude.

We thank Thee for people great and good, for homes where love and loyalty live, for friends tried and true, for everyone who has urged us to leave the valley of discontent and to climb the heights of devotion to the highest, and for every example of confidence and courage, given us by persons in high places and low. Our gratitude to Thee for the goodness of life and the greatness of love.

We commend our Nation to Thy providential care. Guide our people as they choose their leaders, increase our fellowship with one another, and make us one in spirit and one in purpose as we face the crucial days that lie ahead. Through all of life make us mindful of Thy presence and eager to do Thy will.

In the Master's name we pray. Amen.

## THE JOURNAL

The Journal of the proceedings of yesterday was read and approved.

## MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Arrington, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 18127) entitled "An act making appropriations for public works for water, pollution control, and power development, including the Corps of Engineers—Civil, the Panama Canal, the Federal Water Quality Administration, the Bureau of Reclamation, power agencies of the Department of the Interior, the Tennessee Valley Authority, the Atomic Energy Commission, and related independent agencies and commissions for the fiscal year ending June 30, 1971, and for other purposes."

The message also announced that the Senate agrees to the amendment of the House to the amendment of the Senate numbered 4 to the foregoing bill.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3637) entitled "An act to amend section 315 of the Communications Act of 1934 with respect to equal-time requirements for candidates for public office, and for other purposes."

The message also announced that the Senate had passed with amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 17255. An act to amend the Clean Air Act to provide for a more effective program to improve the quality of the Nation's air.

The message also announced that the Senate had passed bills and joint resolutions of the following titles, in which the concurrence of the House is requested:

S. 2984. An act to permit certain Federal employment to be counted toward retirement;

S. 3220. An act to protect a person's right of privacy by providing for the designation of sexually oriented advertisements and for the return of any such unrequested advertisements at the expense of the sender;

S. 3765. An act to amend the Flammable Fabrics Act to increase the protection afforded consumers against injurious flammable fabrics;

S. 3958. An act to adjust the pay of the police forces at Washington and Dulles Airports;

S.J. Res. 74. Joint resolution to provide for the designation of the first full calendar week in May of each year as "National Employ the Older Worker Week";

S.J. Res. 110. Joint Resolution to amend the joint resolution entitled "Joint resolution to establish the first week in October of each year as National Employ the Physically Handicapped Week", approved August 11, 1945 (59 Stat. 530), so as to broaden the applicability of such resolution to all handicapped workers;

S.J. Res. 187. Joint resolution to authorize the President to designate the third Sunday in June of each year as Father's Day;

S.J. Res. 223. Joint resolution to authorize and request the President to issue annually a proclamation designating the month of January of each year as "National Blood Donor Month"; and

S.J. Res. 226. Joint resolution to authorize the President to proclaim the period from May 9, 1971, Mother's Day, through June 20, 1971, Father's Day, as the "National Multiple Sclerosis Society Annual Hope Chest Appeal Weeks."

## KY SHOULD BE HEARD

(Mr. DORN asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. DORN. Mr. Speaker, Vice President Ky should be heard with respect and courtesy should he come to Washington. Particularly here in Washington at our great freedom shrines which stand as a reminder of American dedication to individual liberty. I refuse to believe that we have arrived at the time when we cannot guarantee freedom of speech in the Nation's Capital. America will no longer be the heart of freedom and the hope of mankind when we cease to guarantee freedom of speech, freedom of peaceful assembly, freedom of the press, and trial by jury. These freedoms as enunciated in the Bill of Rights are the very foundation stones of our Republic. Radicals and anarchists in America who oppose free speech should not be permitted to dictate to the American people who can speak and who cannot speak.

Even the late Lincoln Rockwell, self-styled Hitler of the American Nazi Party, was permitted to exercise frequently his right of free speech here in Washington. Washington extended every courtesy and protection of Nikita Khrushchev when the leader of Communist Russia visited here. Premier Kosygin of Communist Russia was kindly treated in New York and New Jersey. Washington welcomed Fidel Castro here on Capitol Hill and he addressed the National Press Club. It would be a national disgrace if we could not extend the same courtesy to a man who is Vice President of a friendly republic and one who served as President of this friendly nation. Whatever our views concerning world affairs, our tradition of free expression and courtesy demand that Vice President Ky be heard.

## DISTRICT OF COLUMBIA RIOT INSURANCE PLAN GETTING RESULTS

(Mr. PATTEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PATTEN. Mr. Speaker, I think that the Members of Congress should know that the riot insurance that we passed is really helping the local merchants here in the District of Columbia; and, of course, throughout many of our States. The quarterly report, ending June 30, 1970, reveals that in the District there have been 18,944 new applications received, over 22,321 inspections completed; and in 16,426 cases rates were quoted so that insurance could be obtained. This accounts for a total of over $212,436,994 worth of insurance. Losses incurred from the inception of the program amount to $1,194,420, and the premiums earned were $1,501,419.

Beginning on October 1, the District of Columbia insurance placement facility will write vandalism and malicious mischief in addition to the basic coverage.

I think we can learn from the experience, and the proper committee should take testimony from all parties concerned as to their reaction. I know that we could receive valuable suggestions.

I do not want to give the impression that everything is now fully covered because there is a tremendous problem for these men on robberies and this is not solved by anything that we have done so far.

## INFLATIONARY TRADE BILL

(Mr. VANIK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VANIK. Mr. Speaker, in view of the prospects of a 1971 deficit of $10 billion on a unified budget basis and $18 to $20 billion on the administrative budget, it is difficult for me to understand how Congress can countenance the inflationary provisions of the trade bill which will soon be considered by the House.

The provisions of the bill which "freeze" in the oil quota system prevent a tariff on imported oil based on the differential between the domestic producing price and the import price. The Treasury loses over a billion dollars of potential annual revenue from this source.

The domestic international sales provisions which provide a tax deferral to exporters will create a revenue loss of almost $1 billion per year according to estimates prepared by the staff of the Joint Committee on Internal Revenue Taxation.

These two provisions insure a tax loss of almost $2 billion annually.

It would be incredible folly to permit these provisions to become law.

I urge the Members of this body to insist on a rule on the trade bill which would permit a separate vote on these issues.

## MAIMONIDES GROUNDBREAKING

(Mr. ADDABBO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ADDABBO. Mr. Speaker, on September 20 I was privileged to attend groundbreaking ceremonies for the construction of an additional schoolbuilding at Maimonides Institute in Far Rockaway, N.Y. This is but another achievement in the success story of Maimonides Institute, established in 1959 to serve the needs of exceptional children. I was first introduced to this fine institution by our former colleague, Congressman Herbert Tenzer.

The institute represents a broad effort to reduce the effects of mental and emotional limitations on children through a system of day camps, schools, clinical facilities, and rehabilitative programs. The specific objective of the institute is to make exceptional children more self-reliant, able, and productive and accepted members of our society.

Maimonides is located on 20 scenic acres in Far Rockaway and its MIND programs—Maimonides Institute for New Development—is probing the depths of the mind of exceptional children in order to bridge the gap between potential and performance. Our community can be proud of this exciting and bold project sponsored under Jewish auspices but dedicated to children of all faiths.

The new schoolbuilding will include 15 classrooms, eight therapy and remedial rooms, a medical unit, children's library, music and art rooms, indoor gymnasium, and dining room. An additional 180 exceptional students will be accommodated by the institute once the building is completed, an increase of 100 percent.

The progress report just issued by the institute is quite impressive, and I am confident that the institute will continue its rapid pace and reach new plateaus of achievement in the years ahead. I am proud to represent the district in which this outstanding institution is located, and I commend the objectives and dedication of all those associated with Maimonides Institute.

## WITHHOLDING OF FUNDS FROM STUDENTS AND FACULTY MEMBERS ENGAGED IN CAMPUS DISORDERS

(Mrs. GREEN of Oregon asked and was given permission to address the House for 1 minute.)

Mrs. GREEN of Oregon. Mr. Speaker, I take this occasion to call attention to the Members of Congress a report that was issued by the Office of Education in regard to the numbers of colleges and universities across the country that have viewed with some concern the law which was passed by the Congress—a part of the HEW appropriation bill—that Federal funds for students or faculty members who participate in riots or in other disruptive activities should no longer be eligible for Federal assistance. I placed this report in yesterday's CONGRESSIONAL RECORD. It can be found on page 33331.

In this amazing report from the Office of Education we find that out of 2,600 colleges and universities across the country, only 86 have withheld any funds from any student or any faculty member during the preceding year which ended as of July 1, 1970.

Mr. Speaker, it seems to me that this has been a very cavalier disregard of the law of the land. On my committee we tried to get out a provision last year in regard to campus riots—and continued handing out of Federal tax dollars to those who incite or participate—or both. This amendment was defeated by one

vote in the committee. So the House never had a chance to act upon it. In fact, if you recall, a small group insisted the guaranteed student loan come out under suspension of rules, so no amendment on campus violence could be offered by any Member of the House.

In the absence of action by the Education Committee, I suggest that the members of the Appropriations Committee take a look at the way in which their congressional requirement is being followed by the colleges and universities and also the way it is being enforced by the Office of Education.

It seems to me there is a nationwide concern about campus violence, and those very campuses which have had major disturbances are conspicuous by their absence on the list of 86 universities that have had withheld any funds at all. There are a total of 440 individuals across the country who have come under any provision of the law.

## VICE PRESIDENT KY URGED TO RECONSIDER PLAN TO ADDRESS WAR RALLY

(Mr. BROOMFIELD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BROOMFIELD. Mr. Speaker, like many of us here I am greatly alarmed at the divisive effect and possible violence that is likely to result when Vice President Ky attempts to address the Vietnam war rally in Washington on October 3. His visit will come just at the time when cooler heads are beginning to prevail and our people are at least starting to have a more meaningful and peaceful dialog on the great domestic and international issues facing our country.

It seems to me that Vice President Ky would make a greater contribution to our mutual cause by concentrating his efforts on bringing about a negotiated settlement of the war at the Paris peace talks and by accelerating the Vietnamization program to speed the withdrawal of American troops.

I am well aware of the sadness of those who believe in free speech over this matter. But even free speech is a limited rather than an absolute right. In this case, Vice President Ky will be like the man who shouts "fire!" in a crowded theater where there is no fire. Only this time I fear there will be a fire—and it will come afterward.

It is my intention, Mr. Speaker, to circulate a letter on Monday addressed to Vice President Ky among the Members of this body making some of these observations and respectfully urging him to reconsider his plans to address the war rally. I urge each of my colleagues to endorse this letter.

## CALL OF THE HOUSE

Mr. MONTGOMERY. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. BOGGS. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 313]

| | | |
|---|---|---|
| Abbitt | Ford, Gerald R. | Patman |
| Adair | Gilbert | Powell |
| Ashbrook | Gray | Preyer, N.C. |
| Baring | Griffiths | Price, Tex. |
| Beall, Md. | Gubser | Rees |
| Biaggi | Hanley | Reid, N.Y. |
| Blackburn | Hansen, Wash. | Reifel |
| Blanton | Harsha | Roudebush |
| Brock | Hawkins | Scheuer |
| Brooks | Heckler, Mass. | Schneebeli |
| Brown, Mich. | Hull | Sikes |
| Burton, Utah | Johnson, Pa. | Smith, N.Y. |
| Bush | Karth | Staggers |
| Cabell | Kluczynski | Stephens |
| Celler | Landrum | Stokes |
| Clark | Leggett | Stuckey |
| Clay | Long, La. | Symington |
| Conte | Lowenstein | Taft |
| Cowger | McKneally | Talcott |
| Crane | McMillan | Teague, Calif. |
| Culver | Mailliard | Teague, Tex. |
| Daddario | Mathias | Thompson, N.J. |
| Dawson | Meskill | Tunney |
| Devine | Minshall | Waggonner |
| Diggs | Mize | Watson |
| Dowdy | Morton | Widnall |
| Fallon | Moss | Wold |
| Farbstein | Murphy, N.Y. | Yatron |
| Fisher | Olsen | |
| Flynt | Ottinger | |

The SPEAKER. On this rollcall 342 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

## PERSONAL STATEMENT

Mr. FULTON of Pennsylvania. With the Speaker's permission, I should like to break precedent and say it is such a nice day, and being in good spirits, I should like to wish the Speaker a pleasant good morning.

## APPOINTMENT OF LT. GEN. BENJAMIN O. DAVIS AS DIRECTOR OF CIVIL AVIATION SECURITY

(Mr. HUNT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUNT. Mr. Speaker, I would like to commend Secretary Volpe on his choice of Lt. Gen. Benjamin O. Davis to be the new Director of Civil Aviation Security.

There is no question but that the recently instituted measures to protect international air traffic will demand the unrelenting attention of well-trained personnel at all stages and a high degree of perfection if these steps are to be effective in averting air piracy, while at the same time assuring minimum risk to the safety of innocent persons.

General Davis distinguished himself many times while reaching the highest rank of any Negro in the armed services prior to his retirement from the Air Force in 1969. I am happy to see a man of his competence called up to to perform this critical assignment and I am fully confident that he will carry it out successfully with the full support of the administration and the Congress.

## SOVIET UNION CAUSE OF MIDDLE EAST TURMOIL

(Mr. PUCINSKI asked and was given permission to address the House for 1 minute.)

Mr. PUCINSKI. Mr. Speaker, I heard on the radio this morning a report that some people in the State Department would like to give the Soviet Union credit for the withdrawal of Syrian troops from Jordan. I hope there is no one that foolish in the State Department.

The Syrians withdrew because the Jordanian troops drove them back and because they knew full well if they had made a deeper penetration into Jordan, Israeli troops would have had to go in and mop them up.

I would be very much surprised, and very disappointed, if there are still people in the State Department who cannot understand that this turmoil in the Middle East is being masterminded by the Soviet Union.

There still are people, apparently, who cannot understand that the Soviet Union has launched a new major offensive in the Middle East. All this terrorism, all the subversion in the Middle East, is being inspired by the Soviet Union. If the Soviet Union had had anything to do with the pulling out of Syrian troops, it would have been part of a running conspiracy to keep the Middle East in turmoil, because the Soviet Union is determined to get a foothold in the Middle-East, trying to set up another cordon sanitaire of pro-Soviet captive nations in the Middle East, so Russia can get at the oil stocks and supplies which Europe needs so desperately to keep its industry going. Moscow wants to dominate the Middle East so it can control the flow of oil to Europe. Once Russia cut off the oil to Europe, she can bring all of Europe to her knees.

Only Israel is wise enough to see through the Soviet conspiracy.

Yesterday the Chicago Tribune properly suggested that stopping Soviet expansionism in the Middle East is a job for NATO. I would hope those people in the State Department would read the Tribune editorial and finally realize that this is a running conspiracy by the Soviet Union which Moscow started right after World War II when it started the civil war in Greece. The Soviet Union has kept this world in turmoil for 25 years. If there are any people in the State Department who do not at this late date understand that, then they ought to be out of there.

## APPOINTMENT OF CONFEREES ON H.R. 17255, AMENDING THE CLEAN AIR ACT

Mr. JARMAN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 17255) to amend the Clean Air Act to provide for a more effective program to improve the quality of the Nation's air, with a Senate amendment thereto, disagree to the Senate amendment, and request a conference with the Senate thereon.

The SPEAKER. Is there objection to

the request of the gentleman from Oklahoma?

The Chair hears none, and appoints the following conferees: Messrs. STAGGERS, JARMAN, ROGERS of Florida, SPRINGER, and NELSEN.

## CONFERENCE REPORT ON S. 1933, RAILROAD SAFETY AND HAZARDOUS MATERIALS CONTROL

Mr. JARMAN (on behalf of Mr. STAGGERS) filed the following conference report and statement on the bill (S. 1933) to provide for Federal railroad safety, hazardous materials control, and for other purposes:

CONFERENCE REPORT (H. REPT. NO. 91-1467)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1933) to provide for Federal railroad safety, hazardous materials control and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows: That the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the House amendment insert the following:

### TITLE I—PURPOSE

SEC. 101. DECLARATION OF PURPOSE.

The Congress declares that the purpose of this Act is to promote safety in all areas of railroad operations and to reduce railroad-related accidents, and to reduce deaths and injuries to persons and to reduce damage to property caused by accidents involving any carrier of hazardous materials.

### TITLE II—RAILROAD SAFETY

SEC. 201. SHORT TITLE.

This title may be cited as the "Federal Railroad Safety Act of 1970".

SEC. 202. RAIL SAFETY REGULATIONS.

(a) The Secretary of Transportation (hereafter in this title referred to as the "Secretary") shall (1) prescribe, as necessary, appropriate rules, regulations, orders, and standards for all areas of railroad safety supplementing provisions of law and regulations in effect on the date of enactment of this title, and (2) conduct, as necessary, research, development, testing, evaluation, and training for all areas of railroad safety. However, nothing in this title shall prohibit the bargaining representatives of common carriers and their employees from entering into collective bargaining agreements under the Railway Labor Act, including agreements relating to qualifications of employees, which are not inconsistent with rules, regulations, orders, or standards prescribed by the Secretary under this title. Nothing in this title shall be construed to give the Secretary authority to issue rules, regulations, orders, and standards relating to qualifications of employees, except such qualifications as are specifically related to safety.

(b) Hearings shall be conducted in accordance with the provisions of section 553 of title 5 of the United States Code for all rules, regulations, orders, or standards issued by the Secretary including those establishing, amending, revoking, or waiving compliance with a railroad safety rule, regulation, order, or standard under this title, and an opportunity shall be provided for oral presentations.

(c) The Secretary may, after hearing in accordance with subsection (b) of this section, waive in whole or in part compliance with any rule, regulation, order, or standard established under this title, if he determines that such waiver of compliance is in the public interest and is consistent with railroad safety. The Secretary shall make public his reasons for granting any such waiver.

(d) In prescribing rules, regulations, orders, and standards under this section the Secretary shall consider relevant existing safety data and standards.

(e) The Secretary shall issue initial railroad safety rules, regulations, orders, and standards under this title based upon existing safety data and standards, not later than one year after the date of enactment of this title. The Secretary shall review and, after hearing in accordance with subsection (b) of this section, revise such rules, regulations, orders, and standards as necessary.

(f) Any final agency action taken under this section is subject to judicial review as provided in chapter 7 of title 5 of the United States Code.

SEC. 203. EMERGENCY POWERS.

If through testing, inspection, investigation, or research carried out pursuant to this title, the Secretary determines that many facility or piece of equipment is in unsafe condition and thereby creates an emergency situation involving a hazard of death or injury to persons affected by it, the Secretary may immediately issue an order, without regard to the provisions of section 202(b) of this title, prohibiting the further use of such facility or equipment until the unsafe condition is corrected. Subsequent to the issuance of such order, opportunity for review shall be provided in accordance with section 554 of title 5 of the United States Code.

SEC. 204. GRADE CROSSINGS AND RAILROAD RIGHTS-OF-WAY.

(a) The Secretary shall submit to the President for transmittal to the Congress, within one year after the date of enactment of this title, a comprehensive study of the problem of eliminating and protecting railroad grade crossings, including a study of measures to protect pedestrians in densely populated areas along railroad rights-of-way, together with his recommendations for appropriate action including, if relevant, a recommendation for equitable allocation of the economic costs of any program proposed as a result of such study.

(b) In addition the Secretary shall, insofar as practicable, under the authority provided by this title and pursuant to his authority over highway, traffic, and motor vehicle safety, and highway construction, undertake a coordinated effort toward the objective of developing and implementing solutions to the grade crossing problem, as well as measures to protect pedestrians in densely populated areas along railroad rights-of-way.

SEC. 205. STATE REGULATION

The Congress declares that laws, rules, regulations, orders, and standards relating to railroad safety shall be nationally uniform to the extent practicable. A State may adopt or continue in force any law, rule, regulation, order, or standard relating to railroad safety until such time as the Secretary has adopted a rule, regulation, order, or standard covering the subject matter of such State requirement. A State may adopt or continue in force an additional or more stringent law, rule, regulation, order, or standard relating to railroad safety when necessary to eliminate or reduce an essentially local safety hazard, and when not incompatible with any Federal law, rule, regulation, order, or standard, and when not creating an undue burden on interstate commerce.

SEC. 206. STATE PARTICIPATION

(a) A State may participate in carrying out investigative and surveillance activities in connection with any rule, regulation, order, or standard prescribed by the Secretary under this title if the safety practices applicable to railroad facilities, equipment, rolling stock, and operations within such State are regulated by a State agency and such State agency submits to the Secretary an annual certification that such State agency—

(1) has regulatory jurisdiction over the safety practices applicable to railroad facilities, equipment, rolling stock, and operations within the State concerned;

(2) has been furnished a copy of each Federal safety rule, regulation, order, and standard, applicable to any such railroad facility, equipment, rolling stock, or operation, established under this title as of the date of the certification;

(3) is conducting the investigative and surveillance activities prescribed by the Secretary as necessary for the enforcement by him of each rule, regulation, order, and standard referred to in paragraph (2) of this subsection, as interpreted by the Secretary. The Secretary shall retain the exclusive authority to assess and compromise penalties and (except as otherwise provided by section 207 of this title) to request injunctive relief for the violation of rules, regulations, orders, and standards prescribed by the Secretary under section 202(a) of this title and to recommend appropriate action as provided by sections 209 and 210 of this title.

(b) Each annual certification shall include a report, in such form as the Secretary may by regulation provide, showing—

(1) the name and address of each railroad subject to the safety jurisdiction of the State agency;

(2) all accidents or incidents reported during the preceding twelve months by each such railroad involving personal injury requiring hospitalization, fatality, or property damage exceeding $750 or such other higher amount as the Secretary may prescribe, together with a summary of the State agency's investigation as to the cause and circumstances surrounding each such accident or incident;

(3) the record maintenance, reporting, and inspection practices conducted by the State agency to aid the Secretary in his enforcement of rules, regulations, orders, and standards prescribed by him under section 202(a) of this title, including a detail of the number of inspections made of rail facilities, equipment, rolling stock, and operations by the State agency during the preceding twelve months; and

(4) such other information as the Secretary may require.

The report included with the first annual certification need not show information unavailable at that time. If after receipt of annual certification the Secretary determines that the State agency is not satisfactorily complying with the investigative and surveillance activities prescribed by him with respect to such safety rules, regulations, orders, and standards, he may, on reasonable notice and after opportunity for hearing, reject the certification, in whole or in part, or take such other action as he deems appropriate to achieve adequate enforcement. When such notice is given by the Secretary, the burden of proof shall be upon the State agency to show that it is satisfactorily complying with the investigative and surveillance activities prescribed by the Secretary with respect to such safety rules, regulations, orders, and standards.

(c) With respect to any railroad facility, equipment, rolling stock, or operation for which the Secretary does not receive an annual certification under subsection (a) of this section, the Secretary may enter into an agreement with a State agency to authorize such agency to provide all or any part of the investigative and surveillance activities prescribed by the Secretary as necessary to obtain compliance with any Federal safety rule, regulation, order, or standard applicable to any such railroad facility, equipment, roll-

ing stock, or operation. An agreement entered into under this subsection, or any provision thereof, may be terminated by the Secretary if, after notice and opportunity for a hearing, he finds that the State agency has failed to provide all or any part of the investigative and surveillance activities to which the agreement relates. Such finding and termination shall be published in the Federal Register, and shall become effective no sooner than fifteen days after the date of publication.

(d) Upon application by any State agency which has submitted a certification under subsection (a) of this section, or entered into an agreement under subsection (c) of this section, the Secretary shall pay, out of funds appropriated pursuant to this title or otherwise made available, up to 50 per centum of the cost of the personnel equipment, and activities of such State agency reasonably required, during the ensuing fiscal year, to carry out a safety program under such certification or agreement. No such payment may be made unless the State agency making application under this subsection gives assurances satisfactory to the Secretary that the State agency will provide the remaining cost of such a safety program and that the aggregate expenditures of funds of the State, exclusive of Federal grants, for the safety program will be maintained at a level which does not fall below the average level of such expenditures for the last two fiscal years preceding the date of enactment of this title.

(e) The Secretary is authorized to conduct such monitoring of State investigative and surveillance practices and such other inspection and investigation as may be necessary to aid in the enforcement of the provisions of this title.

(f) The certification which is in effect under subsection (a) of this section shall not apply with respect to any new or amended Federal safety rule, regulation, order, or standard for railroads established under this title after the date of such certification until the State agency has submitted an appropriate certification in accordance with the provisions of subsection (a) of this section to provide the necessary inspection and surveillance activities in accordance with the provisions of such subsection.

SEC. 207. ENFORCING COMPLIANCE WITH FEDERAL RAILROAD SAFETY RULES, REGULATIONS, ORDERS, AND STANDARDS

In any case in which the Secretary has failed to assess the civil penalty applicable under section 209 of this title, or no civil action has been commenced to obtain injunctive relief under section 210 of this title, with respect to a violation of any railroad safety rule, regulation, order, or standard issued under this title, within 90 days after the date on which such violation occurred, a State agency participating in investigative and surveillance activities under the provisions of section 206 of this title within the State where the violation occurred, may apply to the district court of the United States within the jurisdiction of which the violation occurred for the enforcement of such rule, regulation, order, or standard. The court shall have jurisdiction to enforce compliance with such rule, regulation, order, or standard by injunction or other proper process to restrain further violation thereof, or to enjoin compliance therewith, or to assess and collect the civil penalty included in or made applicable to such rule, regulation, order, or standard. The provisions of this section shall not apply in any case in which the Secretary has affirmatively determined, in writing, that no violation has occurred.

SEC. 208. GENERAL POWERS

(a) In carrying out his functions under this title, the Secretary is authorized to perform such acts including, but not limited to, conducting investigations, making reports, issuing subpenas, requiring production of documents, taking depositions, prescribing recordkeeping and reporting requirements, carrying out and contracting for research, development, testing, evaluation, and training (particularly with respect to those aspects of railrad safety which he finds to be in need of prompt attention), and delegating to any public bodies or qualified persons, functions respecting examination, inspecting, and testing of railroad facilities, equipment, rolling stock, operations, or persons, as he deems necessary to carry out the provisions of this title.

(b) The National Transportation Safety Board shall have the authority to determine the cause or probable cause and report the facts, conditions and circumstances relating to accidents investigated under subsection (a) of this section, but may delegate such authority to any office or official of the Board or to any office or official of the Department of Transportation with the approval of the Secretary, as it may determine appropriate.

(c) To carry out the Secretary's and the Board's responsibilities under this title, officers, employees, or agents of the Secretary or the Board, as the case may be, are authorized to enter upon, inspect, and examine rail facilities, equipment, rolling stock, operations, and pertinent records at reasonable times and in a reasonable manner. Such officers, employees, or agents shall display proper credentials when requested.

(d) All orders, rules, regulations, standards, and requirements in force, or prescribed or issued by the Secretary under this title, or by any State agency which is participating in investigative and surveillance activities pursuant to section 206 of this title, shall have the same force and effect as a statute for purposes of the application of sections 3 and 4 of the Act of April 22, 1908 (45 U.S.C. 53 and 54), relating to the liability of common carriers by railroad for injuries to their employees.

SEC. 209. PENALTIES

(a) It shall be unlawful for any railroad to disobey, disregard, or fail to adhere to any rule, regulation, order, or standard prescribed by the Secretary under this title.

(b) The Secretary shall include in, or make applicable to, any railroad safety rule, regulation, order, or standard issued under this title a civil penalty for violation thereof in such amount, not less than $250 nor more than $2,500, as he deems reasonable.

(c) Any railroad violating any rule, regulation, order, or standard referred to in subsection (b) of this section shall be assessed by the Secretary the civil penalty applicable to the standard violated. Each day of such violation shall constitute a separate offense. Such civil penalty is to be recovered in a suit or suits to be brought by the Attorney General on behalf of the United States in the district court of the United States having jurisdiction in the locality where such violation occurred. Civil penalties may, however, be compromised by the Secretary for any amount, but in no event for an amount less than the minimum provided in subsection (b) of this section, prior to referral to the Attorney General. The amount of any such penalty, when finally determined, or the amount agreed upon in compromise, may be deducted from any sums owing by the United States to the person charged. All penalties collected under this title, including penalties collected pursuant to section 207 of this title, shall be covered into the Treasury as miscellaneous receipts.

(d) In any action brought under this title, subpenas for witnesses who are required to attend a United States district court may run into any other district.

SEC. 210. INJUNCTIVE RELIEF

(a) The United States district court shall, at the request of the Secretary and upon petition by the Attorney General on behalf of the United States, or upon application by a State agency pursuant to section 207 of this title, have jurisdiction, subject to the provisions of rules 65 (a) and (b) of the Federal Rules of Civil Procedure, to restrain violations of this title or to enforce rules, regulations, orders, or standards established under this title.

(b) In any proceeding for criminal contempt for violation of an injunction or restraining order issued under this section or under section 207 of this title, which violation also constitutes a violation of this title, trial shall be by the court, or, upon demand of the accused, by a jury, conducted in accordance with the provisions of rule 42(b) of the Federal Rules of Criminal Procedure.

SEC. 211. ANNUAL REPORT

(a) The Secretary shall prepare and submit to the President for transmittal to Congress on or before May 1 of each year a comprehensive report on the administration of this title for the preceding calendar year. Such report shall include, but not be restricted to—

(1) a thorough statistical compilation of the accidents and casualties by cause occurring in such year;

(2) a list of Federal railroad safety rules, regulations, orders, and standards issued under this title in effect or established in such year;

(3) a summary of the reasons for each waiver granted under section 202(c) of this title during such year;

(4) an evaluation of the degree of observance of applicable railroad safety rules, regulations, orders, and standards issued under this title;

(5) a summary of outstanding problems confronting the administration of Federal railroad safety rules, regulations, orders, and standards issued under this title in order of priority;

(6) an analysis and evaluation of research and related activities completed (including the policy implications thereof) and technological progress achieved during such year;

(7) a list, with a brief statement of the issues, of completed or pending judicial actions for the enforcement of any Federal railroad safety rule, regulation, order, or standard issued under this title;

(8) the extent to which technical information was disseminated to the scientific community and consumer-oriented information was made available to the public;

(9) a compilation of—

(A) certifications filed by State agencies under section 206(a) of this title which were in effect during the preceding calendar year, and

(B) certifications filed under section 206 (a) of this title which were rejected, in whole or in part, by the Secretary during the preceding calendar year, together with a summary of the reasons for each such rejection; and

(10) a compilation of—

(A) agreements entered into with State agencies under section 206(c) of this title which were in effect during the preceding calendar year, and

(B) agreements entered into under section 206(c) of this title which were terminated by the Secretary, in whole or in part, during the preceding calendar year, together with a summary of the reasons for each such termination.

(b) The report required by subsection (a) of this section shall contain such recommendations for additional legislation as the Secretary deems necessary to strengthen the national railroad safety program.

SEC. 212. AUTHORIZATION FOR APPROPRIATIONS

There is authorized to be appropriated to carry out the provisions of this title not to exceed $21,000,000 for each of the fiscal years ending June 30, 1971, June 30, 1972, and June 30, 1973.

TITLE III—HAZARDOUS MATERIALS CONTROL

SEC. 301. SHORT TITLE

This title may be cited as the "Hazardous Materials Transportation Control Act of 1970".

SEC. 302. GENERAL AUTHORITY

(a) The Secretary of Transportation (hereafter in this title referred to as the "Secretary") shall, within six months after the date of enactment of this title—

(1) establish facilities and technical staff to maintain within the Federal Government the capability to evaluate the hazards connected with and surrounding the various hazardous materials being shipped;

(2) establish a central reporting system for hazardous materials accidents to provide technical and other information and advice to the law-enforcement and fire-fighting personnel of communities and to carriers and shippers for meeting emergencies connected with the transportation of hazardous materials; and

(3) conduct a review of all aspects of hazardous materials transportation to determine and recommend appropriate steps which can be taken immediately to provide greater control over the safe movement of such materials.

(b) The authority granted the Secretary by this title shall be in addition to the authority granted by sections 831 to 835, inclusive, of title 18 of the United States Code.

(c) The Secretary shall prepare and submit to the President for transmittal to the Congress on or before May 1 of each year a comprehensive report on the transportation of hazardous materials during the preceding calendar year. Such report shall include, but not be restricted to—

(1) a thorough statistical compilation of the accidents and casualties occurring in such year which involved the transportation of hazardous materials;

(2) a list of relevant Federal standards in effect or established in such year;

(3) a summary of the reason for each waiver or exemption granted pursuant to sections 831 to 835, inclusive, of title 18 of the United States Code;

(4) an evaluation of the degree of observance of safety standards for the transportation of hazardous materials; and

(5) a summary of outstanding problems created by the transportation of hazardous materials.

(d) The report required by subsection (c) of this section shall contain such recommendations for additional legislation as the Secretary deems necessary.

SEC. 303. AUTHORIZATION FOR APPROPRIATIONS

There is authorized to be appropriated to carry out the provisions of this title not to exceed $1,000,000 for each of the fiscal years ending June 30, 1971, June 30, 1972, and June 30, 1973.

TITLE IV—MISCELLANEOUS

SEC. 401. SEPARABILITY

If any provision of this Act or the application thereof to any person or circumstance is held invalid, the remainder of this Act, and the application of such provision to other persons or circumstances shall not be affected thereby.

And the House agree to the same.

HARLEY O. STAGGERS,
SAMUEL N. FRIEDEL,
JOHN D. DINGELL,
WILLIAM L. SPRINGER,
SAMUEL L. DEVINE,
*Managers on the Part of the House.*

WARREN G. MAGNUSON,
VANCE HARTKE,
HOWARD W. CANNON,
HUGH SCOTT,
WINSTON PROUTY,
*Managers on the Part of the Senate.*

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1933) to provide for Federal railroad safety, hazardous materials control and for other purposes, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

The House amendment struck out all of the Senate bill after the enacting clause and inserted a substitute text.

In large part the provisions of the Senate bill and the House substitute amendment were the same or similar.

The committee of conference recommends that the Senate recede from its disagreement to the amendment of the House, with an amendment which is a substitute for both the text of the Senate bill and the House amendment thereto.

The major difference between the House amendment to the text of the Senate bill and the substitute agreed to in conference is noted below. There were some clerical corrections and minor drafting and clarifying changes.

ENFORCING COMPLIANCE WITH SAFETY STANDARDS

Section 207 of the House bill permitted a State to seek only injunctive relief in Federal district courts in any case where 180 days have elapsed after a violation and no penalty has been assessed nor injunctive relief sought or the Secretary has not made a finding in writing that no violation has occurred.

Under the Senate bill the States would enforce Federal safety standards in State courts.

The substitute agreed to in conference eliminates the State enforcement of rail safety standards in State courts. It also reduces the 180-day period in section 207 of the House amendment to 90 days and permits a State to petition the Federal district court to assess and collect the civil penalty included in, or made applicable to, the particular Federal railroad safety rule, regulation, order, or standard. All penalties collected would be covered into the Treasury as miscellaneous receipts.

## PERMISSION FOR COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE TO FILE REPORT ON H.R. 19318 UNTIL MIDNIGHT SATURDAY

Mr. JARMAN. Mr. Speaker, I ask unanimous consent that the Committee on Interstate and Foreign Commerce may have until midnight Saturday, September 26, to file a report on the bill H.R. 19318.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

## COMPREHENSIVE DRUG ABUSE PREVENTION AND CONTROL ACT OF 1970

Mr. JARMAN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 18583) to amend the Public Health Service Act and other laws to provide increased research into, and prevention of, drug abuse and drug dependence; to provide for treatment and rehabilitation of drug abusers and drug-dependent persons; and to strengthen existing law-enforcement authority in the field of drug abuse.

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H.R. 18583, with Mr. MOORHEAD in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the committee rose on yesterday it had agreed that the table of contents beginning on page 104 and ending on page 106 of the substitute committee amendment would be considered as read and open to amendment.

If there are no amendments to the table of contents, the Clerk will read.

The Clerk read as follows:

TITLE I—REHABILITATION PROGRAMS RELATING TO DRUG ABUSE

PROGRAMS UNDER COMMUNITY MENTAL HEALTH CENTERS ACT RELATING TO DRUG ABUSE

SECTION 1. (a) Part D of the Community Mental Health Center Act is amended as follows:

(1) Sections 251, 252, and 253 of such part (42 U.S.C. 2688k, 2688l, and 2688m) are each amended by inserting "and other persons with drug abuse and drug dependence problems" immediately after "narcotic addicts" each place those words appear in those sections.

(2) Clauses (A) and (C) of section 252 of such part are each amended by inserting ", drug abuse, and drug dependence" immediately after "narcotic addiction".

(3) The heading for such part is amended to read as follows:

"PART D—NARCOTIC ADDICTION, DRUG ABUSE, AND DRUG DEPENDENCE PREVENTION AND REHABILITATION".

(b) Part E of such Act is amended as follows:

(1) Section 261(a) of such part (42 U.S.C. 2688o) is amended by striking out "$30,000,000 for the fiscal year ending June 30, 1971, $35,000,000 for the fiscal year ending June 30, 1972, and $40,000,000 for the fiscal year ending June 30, 1973" and inserting in lieu thereof "$40,000,000 for the fiscal year ending June 30, 1971, $60,000,000 for the fiscal year ending June 30, 1972, and $80,000,000 for the fiscal year ending June 30, 1973."

(2) Section 261(a) of such part is further amended by inserting ", drug abuse, and drug dependence" immediately after "narcotic addiction."

(3) Sections 261(c) and 264 are each amended by inserting "and other persons with drug abuse and drug dependence problems" immediately after "narcotic addicts".

(4) The section headings for sections 261 and 263 are each amended by striking out "AND NARCOTIC ADDICTS" and inserting in lieu thereof ", NARCOTIC ADDICTS, AND OTHER PERSONS WITH DRUG ABUSE AND DRUG DEPENDENCE PROBLEMS".

(c) Part D of such Act is further amended by redesignating sections 253 and 254 as sections 254 and 255, respectively, and by adding after section 252 the following new section:

"DRUG ABUSE EDUCATION

"SEC. 253. (a) The Secretary is authorized to make grants to States and political subdivisions thereof and to public or nonprofit private agencies and organizations, and to

enter into contracts with other private agencies and organizations, for—

"(1) the collection, preparation, and dissemination of educational materials dealing with the use and abuse of drugs and the prevention of drug abuse, and

"(2) the development and evaluaton of programs of drug abuse education directed at the general public, school-age children, and special high-risk groups.

"(b) The Secretary, acting through the National Institute of Mental Health, shall (1) serve as a focal point for the collection and dissemination of information related to drug abuse; (2) collect, prepare, and disseminate materials (including films and other educational devices) dealing with the abuse of drugs and the prevention of drug abuse; (3) provide for the preparation, production, and conduct of programs of public education (including those using films and other educational devices); (4) train professional and other persons to organize and participate in programs of public education in relation to drug abuse; (5) coordinate activities carried on by such departments, agencies, and instrumentalities of the Federal Government as he shall designate with respect to health education aspects of drug abuse; (6) provide technical assistance to State and local health and educational agencies with respect to the establishment and implementation of programs and procedures for public education on drug abuse; and (7) undertake other activities essential to a national program for drug abuse education.

"(c) The Secretary, acting through the National Institute of Mental Health, is authorized to develop and conduct workshops, institutes, and other activities for the training of professional and other personnel to work in the area of drug abuse education.

"(d) To carry out the purposes of this section, there are authorized to be appropriated $7,000,000 for the fiscal year ending June 30, 1971, $10,000,000 for the fiscal year ending June 30, 1972, and $12,000,000 for the fiscal year ending June 30, 1973."

(d) Such part D is further amended by adding at the end thereof the following new section:

"SPECIAL PROJECTS FOR NARCOTIC ADDICTS AND DRUG DEPENDENT PERSONS

"SEC. 256. (a) The Secretary is authorized to make grants to public or nonprofit private agencies and organizations to cover a portion of the costs of programs for treatment and rehabilitation of narcotic addicts or drug dependent persons which include (1) detoxification services, (2) institutional services (including medical, psychological, educational, and counseling services), and (3) community-based aftercare services.

"(b) Grants under this section for the costs of any treatment and rehabilitation program—

"(1) may be made only for the period beginning with the first day of the first month for which such a grant is made and ending with the close of eight years after such first day; and

"(2)(A) except as provided in subparagraph (B), may not exceed 80 per centum of such costs for each of the first two years after such first day, 75 per centum of such costs for the third year after such first day, 60 per centum of such costs for the fourth year after such first day, 45 per centum of such costs for the fifth year after such first day, and 30 per centum of such costs for each of the next three years after such first day; and

"(B) in the case of any such program providing services for persons in an area designated by the Secretary as an urban or rural poverty area, such grants may not exceed 90 per centum of such costs for each of the first two years after such first day, 80 per centum of such costs for the third year after such first day, 75 per centum of such costs for the fourth and fifth years after such first day, and 70 per centum of such costs for each of the next three years after such first day.

"(c) No application for a grant authorized by this section shal be approved by the Secretary unless such application is forwarded through the State agency responsible for administering the plan submitted pursuant to section 204 of this Act or, if there be a separate State agency, designated by the Governor as responsible for planning, coordinating, and executing the State's efforts in the treatment and rehabilitation of narcotic addicts and drug dependent persons, through such latter agency, which shall submit to the Secretary such comments as it deems appropriate.

"(d) The Secretary shall make grants under this section for projects within the States in accordance with criteria determined by him designed to provide priority for grant applications in States, and in areas within the States, having the higher percentages of population who are narcotic addicts or drug dependent persons.

"(e) There are authorized to be appropriated to carry out this section not to exceed $20,000,000 for the fiscal year ending June 30, 1971; $20,000,000 for the fiscal year ending June 30, 1972; and $20,000,000 for the fiscal year ending June 30, 1973."

BROADER TREATMENT AUTHORITY IN PUBLIC HEALTH SERVICE HOSPITALS FOR PERSONS WITH DRUG ABUSE AND OTHER DRUG DEPENDENCE PROBLEMS

SEC. 2. (a) Part E of title III of the Public Health Service Act is amended as follows:

(1) Section 341(a) of such part is amended by adding immediately after "addicts" the second time it appears the following: "and other persons with drug abuse and drug dependence problems".

(2)(A) Sections 342, 343, 344, and 346 of such part are each amended by inserting "or other persons with drug abuse and drug dependence problems" immediately after "addicts" each place it appears in those sections.

(B) The section heading of section 342 of such part is amended by inserting "OR OTHER PERSONS WITH DRUG ABUSE AND DRUG DEPENDENCE PROBLEMS" after "ADDICTS".

(3) Sections 343 and 344 of such part are each amended by inserting "or other person with a drug abuse or other drug dependence problem" immediately after "addict" each place it appears in those sections.

(4) Sections 343, 344, and 347 of such part are each amended by inserting ", drug abuse, or drug dependence" immediately after "addiction" each place it appears in those sections.

(5) Section 346 of such part is amended by inserting "or substance controlled under the Controlled Substances Act" immediately after "habit-forming narcotic drug".

(6) The heading for such part is amended to read as follows:

"PART E—NARCOTIC ADDICTS AND OTHER DRUG ABUSERS".

(b) Section 2 of the Public Health Service Act (42 U.S.C. 201) is amended by adding after paragraph (p) the following new paragraph:

"(q) The term 'drug dependent person' means a person who is using a controlled substance (as defined in section 102 of the Controlled Substances Act) and who is in a state of psychic or physical dependence, or both, arising from the use of that substance on a continuous basis. Drug dependence is characterized by behavioral and other responses which include a strong compulsion to take the substance on a continuous basis in order to experience its psychic effects or to avoid the discomfort caused by its absence."

RESEARCH UNDER THE PUBLIC HEALTH SERVICE ACT IN DRUG USE, ABUSE, AND ADDICTION

SEC. 3. (a) Section 303(a) of the Public Health Service Act 42 U.S.C. 242(a)) is amended by adding after and below paragraph (2) the following:

"The Secretary may authorize persons engaged in research on the use and effect of drugs to protect the privacy of individuals who are the subject of such research by withholding from all persons not connected with the conduct of such research the names or other identifying characteristics of such individuals. Persons so authorized to protect the privacy of such individuals may not be compelled in any Federal, State, or local civil, criminal, administrative, legislative, or other proceedings to identify such individuals."

(b) Section 507 of the Public Health Service Act (42 U.S.C. 225a) is amended—

(1) by striking out "available for research, training, or demonstration project grants pursuant to this Act" and inserting in lieu thereof "available under this Act for research, training, or demonstration project grants or for grants to expand existing treatment and research programs and facilities for alcoholism, narcotic addiction, drug abuse, and drug dependence, and appropriations available under the Community Mental Health Centers Act for construction and staffing of community mental health centers and alcoholism and narcotic addiction, drug abuse, and drug dependence facilities", and

(2) by inserting immediately before the period at the end thereof the following: ", except that grants to such Federal institutions may be funded at 100 per centum of the costs".

MEDICAL TREATMENT OF NARCOTIC ADDICTION

SEC. 4. The Secretary of Health, Education, and Welfare, after consultation with the Attorney General and with national organizations representative of persons with knowledge and experience in the treatment of narcotic addicts, shall determine the appropriate methods of professional practice in the medical treatment of the narcotic addition of various classes of narcotics addicts, and shall report thereon from time to time to the Congress.

Mr. JARMAN (during the reading). Mr. Chairman, I ask unanimous consent that title I through line 18 on page 115 be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. ROBISON. Mr. Chairman, I move to strike the last word.

Mr. ROBISON. Mr. Chairman, I have taken this time to clarify, if I can, the impact enactment of this bill will have on persons thereafter charged with offenses involving the mere use or possession of controlled drugs, including marihuana.

In this regard, the bill before us attempts a complete revision of the existing Federal penalty structure, including making any first-time simple use or possession offense a misdemeanor, regardless of the drug involved, and easing penalties for second-time use or possession offenses. Going further, in the case of a first such offense I understand that the court may place the offender on probation for not more than a year and if, at the end of the probationary period, the offender has not violated the conditions thereof the proceedings against

him, or her, may be dismissed without a court adjudication of guilt. Besides which, on a one-time-only basis, if such an offender is under 21, he, or she, may obtain a court order expunging from all official records all recordation relating to his, or her, arrest, indictment, trial, and finding of guilt.

Now, I think all this is fine, recognizing as it does the opinion of most law-enforcement experts that the existing harsh and mandatory sentences in our narcotics control laws have been a hindrance, rather than an aid, to enforcement in mere use or possession cases, and recognizing, too, that the mere use of dangerous drugs or marihuana is more of a sickness than a crime, and deserves to be treated as such, and that the real criminals are the pushers and traffickers on whom this bill comes down hard.

However, I think it ought to be made more clear than it has been, so far during this debate, that this more humane and realistic approach to the question of penalties for mere use or possession of drugs, including marihuana, will have a very limited effect across the Nation. This is because we are revising and modernizing only the existing Federal laws in this regard and—if section 708 means what it seems to say—we have no intention of preempting existing State laws in this same regard. To this limited intent, then, has to be added the fact that, although there is an overlapping of jurisdiction, it is very rare that drug or marihuana use and possession cases come into Federal purview. This is because, on the Federal level of enforcement, such agents and investigators as we have are almost solely engaged in attempting to control the sources of supply and in apprehending the major traffickers, interstate and international, in both drugs and marihuana.

Now, then, let me ask the ranking member on the Interstate and Foreign Commerce Committee, the distinguished and able gentleman from Illinois (Mr. SPRINGER), if consideration was given in committee to this aspect of the bill's actual effect and, specifically, what problems would be involved if Congress were to seek to preempt State penal laws involving mere use or possession of controlled drugs.

Mr. SPRINGER. May I say to the distinguished gentleman from New York that we did not seek to preempt State laws and I think very wisely so.

It is not possible for the Federal Government to have an agent in every community. The law enforcement agencies at the local level ought to have laws either by virtue of county ordinances, city ordinances or State law with reference to this. It is my recollection that every single one of the 50 States has a law with reference to marihuana. Enforcement for the most part at the local level will take place through the local law-enforcement agencies, the county sheriff, the State police, and the city and local police in the local communities.

I think the gentleman very wisely can see, having Cornell University in his district, and the University of Illinois in my district, we cannot have enough Federal agencies to supervise marihuana on the campuses of the universities of this country where we know that this practice of using marihuana is very prevalent. Therefore, we have to leave it up to the local law-enforcement agencies for the most part to take over at the local law-enforcement level.

What we are seeking to do under this bill, and the main thrust of this bill, is to get better cooperation between the Federal Government and the local agencies, but principally we are after the people who sell this, who bring it in from the outside, who manufacture and put it in the form to sell to these students, and who happen to be on the university campuses, or in the high schools, or we will say in the junior high schools, and the lower grades.

Now, that is the thrust of what we are seeking to do.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. ROBISON was allowed to proceed for 2 additional minutes.)

Mr. ROBISON. Mr. Chairman, I thank the gentleman for his answer.

Now, let me then ask this additional question, if I might:

If there are then valid reasons why we should not preempt State laws in this regard, and are largely only putting forth this new approach to penalties for mere use and possession as a sort of example to the several States to encourage them to reform their own drug-abuse laws in similar fashion, if he knows of any other effort being made by the Federal Government, or some official thereof, perhaps to stimulate such State action beyond whatever value enactment of this bill may have by way of example?

Mr. SPRINGER. What we are saying in this bill is that we believe this is an example which could be followed by a great many States who have what I think are, without being critical, very reactionary statutes. For instance, in the State of Virginia, which is just across the river, a student last winter received a 20-year sentence in the State penitentiary for possession of marihuana. I think all of us realize the inequity of that kind of a penalty for mere possession. The further reason, may I say to the distinguished gentleman from New York, is that it is awfully hard to get convictions if you have that kind of a penalty for mere possession. All we are trying to do is to get at the pushers, the people who peddle, the people who manufacture it.

May I say that we believe what we are doing here is in the way of getting cooperation. For instance, in my own community recently we had a Bureau of Narcotics agent sit down at a table where we had the State police, the county sheriff, and the city police of Champaign and Urbana, Ill., to see if we could not coordinate this effort to prevent marihuana from being distributed in our local communities.

Mr. ROBISON. Could I ask specifically if the gentleman from Illinois knows if real effort is being made toward encouraging uniform or model codes in this respect.

Mr. SPRINGER. It is my understanding that the Attorney General at this time is trying to bring out what would be a uniform code for all the States. This of course would be very helpful if we had uniformity of application.

May I say further that my distinguished colleague from New York has talked with me about this several times, and I commend him for the dedication he has shown, and for the interest he has exhibited in this very important problem, because I know that he has been faced with it in his own community, and in his own district, as I have in mine.

Mr. ROBISON. Mr. Chairman, I thank the gentleman.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

TITLE II—CONTROL AND ENFORCEMENT

PART A—SHORT TITLE; FINDINGS AND DECLARATION; DEFINITIONS

SHORT TITLE

SEC. 100. This title may be cited as the "Controlled Substances Act".

FINDINGS AND DECLARATIONS

SEC. 101. The Congress makes the following findings and declarations:

(1) Many of the drugs included within this title have a useful and legitimate medical purpose and are necessary to maintain the health and general welfare of the American people.

(2) The illegal importation, manufacture, distribution, and possession and improper use of controlled substances have a substantial and detrimental effect on the health and general welfare of the American people.

(3) A major portion of the traffic in controlled substances flows through interstate and foreign commerce. Incidents of the traffic which are not an integral part of the interstate or foreign flow, such as manufacture, local distribution, and possession, nonetheless have a substantial and direct effect upon interstate commerce because—

(A) after manufacture, many controlled substances are transported in interstate commerce,

(B) controlled substances distributed locally usually have been transported in interstate commerce immediately before their distribution, and

(C) controlled substances possessed commonly flow through interstate commerce immediately prior to such possession.

(4) Local distribution and possession of controlled substances contribute to swelling the interstate traffic in such substances.

(5) Controlled substances manufactured and distributed intrastate cannot be differentiated from controlled substances manufactured and distributed interstate. Thus, it is not feasible to distinguish in terms of controls, between controlled substances manufactured and distributed interstate and controlled substances manufactured and distribute intrastate.

(6) Federal control of the intrastate incidents of the traffic in controlled substances is essential to the effective control of the interstate incidents of such traffic.

(7) The United States is a party to the Single Convention on Narcotic Drugs, 1961, and other international conventions designed to establish effective control over international and domestic traffic in controlled substances.

DEFINITIONS

SEC. 102. As used in this title:

(1) The term "addict" means any individual who habitually uses any narcotic drug so as to endanger the public morals, health, safety, or welfare, or who is so far addicted to the use of narcotic drugs as to have lost the power of self-control with reference to his addiction.

(2) The term "administer" refers to the

direct application of a controlled substance to the body of a patient or research subject by—

(A) a practitioner (or, in his presence, by his authorized agent), or

(B) the patient or research subject at the direction and in the presence of the practitioner,

whether such application be by injection, inhalation, ingestion, or any other means.

(3) The term "agent" means an authorized person who acts on behalf of or at the direction of a manufacturer, distributor, or dispenser; except that such term does not include a common carrier, public warehouseman, or employee of the carrier or warehouseman, when acting in the usual and lawful course of the carrier's or warehouseman's business.

(4) The term "Bureau of Narcotics and Dangerous Drugs" means the Bureau of Narcotics and Dangerous Drugs in the Department of Justice.

(5) The term "control" means to add a drug or other substance, or immediate precursor, to a schedule under part B of this title, whether by transfer from another schedule or otherwise.

(6) The term "controlled substance" means a drug or other substance, or immediate precursor, included in schedule, I, II, III, IV, or V of part B of this title. The term does not include distilled spirits, wine, malt beverages, or tobacco, as those terms are defined or used in subtitle E of the Internal Revenue Code of 1954.

(7) The term "counterfeit substance" means a controlled substance which, or the container or labeling of which, without authorization, bears the trademark, trade name, or other identifying mark, imprint, number, or device, or any likeness thereof, of a manufacturer, distributor, or dispenser other than the person or persons who in fact manufactured, distributed, or dispensed such substance and which thereby falsely purports or is represented to be the product of, or to have been distributed by, such other manufacturer, distributor, or dispenser.

(8) The terms "deliver" or "delivery" mean the actual, constructive, or attempted transfer of a controlled substance, whether or not there exists an agency relationship.

(9) The term "depressant or stimulant substance" means—

(A) a drug which contains any quantity of (i) barbituric acid or any of the salts of barbituric acid; or (ii) any derivative of barbituric acid which has been designated by the Secretary as habit forming under section 502(d) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 352(d)); or

(B) a drug which contains any quantity of (i) amphetamine or any of its optical isomers; (ii) any salt of amphetamine or any salt of an optical isomer of amphetamine; or (iii) any substance which the Attorney General, after investigation, has found to be, and by regulation designated as, habit forming because of its stimulant effect on the central nervous system; or

(C) lysergic acid diethylamide; or

(D) any drug which contains any quantity of a substance which the Attorney General, after investigation, has found to have, and by regulation designated as having, a potential for abuse because of its depressant or stimulant effect on the central nervous system or its hallucinogenic effect.

(10) The term "dispense" means to deliver a controlled substance to an ultimate user or research subject by, or pursuant to the lawful order of, a practitioner, including the prescribing and administering of a controlled substance and the packaging, labeling, or compounding necessary to prepare the substance for such delivery. The term "dispenser" means a practitioner who so delivers a controlled substance to an ultimate user or research subject.

(11) The term "distribute" means to deliver (other than by administering or dispensing) a controlled substance. The term "distributor" means a person who so delivers a controlled substance.

(12) The term "drug" has the meaning given that term by section 201(g)(1) of the Federal Food, Drug, and Cosmetic Act.

(13) The term "felony" means any Federal or State offense classified by applicable Federal or State law as a felony.

(14) The term "manufacture" means the production, preparation, propagation, compounding, or processing of a drug or other substance, either directly or indirectly or by extraction from substances of natural origin, or independently by means of chemical synthesis or by a combination of extraction and chemical synthesis, and includes any packaging or repackaging of such substance or labeling or relabeling of its container; except that such term does not include the preparation, compounding, packaging, or labeling of a drug or other substance in conformity with applicable State or local law by a practitioner as an incident to his administration or dispensing of such drug or substance in the course of his professional practice. The term "manufacturer" means a person who manufactures a drug or other substance.

(15) The term "marihuana" means all parts of the plant Cannabis sativa L., whether growing or not; the seeds thereof; the resin extracted from any part of such plant; and every compound, manufacture, salt, derivative, mixture, or preparation of such plant, its seeds or resin. Such term does not include the mature stalks of such plant, fiber produced from such stalks, oil or cake made from the seeds of such plant, any other compound, manufacture, salt, derivative, mixture, or preparation of such mature stalks (except the resin extracted therefrom), fiber, oil, or cake, or the sterilized seed of such plant which is incapable of germination.

(16) The term "narcotic drug" means any of the following, whether produced directly or indirectly by extraction from substances of vegetable origin, or independently by means of chemical synthesis, or by a combination of extraction and chemical synthesis:

(A) Opium, coca leaves, and opiates.

(B) A compound, manufacture, salt, derivative, or preparation of opium, coca leaves, or opiates.

(C) A substance (and any compound, manufacture, salt, derivative, or preparation thereof) which is chemically identical with any of the substances referred to in clause (A) or (B).

Such term does not include decocainized coca leaves or extracts of coca leaves, which extracts do not contain cocaine or ecgonine.

(17) The term "opiate" means any drug or other substance having an addiction-forming or addiction-sustaining liability similar to morphine or being capable of conversion into a drug having such addiction-forming or addiction sustaining liability.

(18) The term "opium poppy" means the plant of the species Papaver somniferum L., except the seed thereof.

(19) The term "poppy straw" means all parts, except the seeds, of the opium poppy, after mowing.

(20) The term "practitioner" means a physician, dentist, veterinarian, scientific investigator, pharmacy, hospital, or other person licensed, registered, or otherwise permitted, by the United States or the jurisdiction in which he practices or does research, to distribute, dispense, conduct research with respect to, administer, or use in teaching or chemical analysis, a controlled substance in the course of professional practice or research.

(21) The term "production" includes the manufacture, planting, cultivation, growing, or harvesting of a controlled substance.

(22) The term "immediate precursor" means a substance—

(A) which the Attorney General has found to be and by regulation designated as being the principal compound used, or produced primarily for use, in the manufacture of a controlled substance;

(B) which is an immediate chemical intermediary used or likely to be used in the manufacture of such controlled substance; and

(C) the control of which is necessary to prevent, curtail, or limit the manufacture of such controlled substance.

(23) The term "Secretary", unless the context otherwise indicates, means the Secretary of Health, Education, and Welfare.

(24) The term "State" means any State, territory, or possession of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Trust Territory of the Pacific Islands, and the Canal Zone.

(25) The term "ultimate user" means a person who has lawfully obtained, and who possesses, a controlled substance for his own use or for the use of a member of his household or for an animal owned by him or by a member of his household.

(26) The term "United States", when used in a geographic sense, means all places and waters, continental or insular, subject to the jurisdiction of the United States.

INCREASED NUMBERS OF ENFORCEMENT PERSONNEL

SEC. 103. (a) During the fiscal year 1971, the Bureau of Narcotics and Dangerous Drugs is authorized to add at least 300 agents, together with necessary supporting personnel, to the number of enforcement personnel currently available to it.

(b) There are authorized to be appropriated not to exceed $6,000,000 for the fiscal year 1971 and for each fiscal year thereafter to carry out the provisions of subsection (a).

Mr. JARMAN (during the reading). Mr. Chairman, I ask unanimous consent that part A of title II be considered as read down through line 5, page 125, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

The CHAIRMAN. If there are no amendments to part A, the Clerk will read.

The Clerk read as follows:

PART B—AUTHORITY TO CONTROL; STANDARDS AND SCHEDULES

AUTHORITY AND CRITERIA FOR CLASSIFICATION OF SUBSTANCES

SEC. 201. (a) The Attorney General shall apply the provisions of this title to the controlled substances listed in the schedules established by section 202 of this title and to any other drug or other substance added to such schedules under this title. Except as provided in subsections (d) and (e), the Attorney General may by rule—

(1) add to such a schedule or transfer between such schedules any drug or other substance if he—

(A) finds that such drug or other substance has a potential for abuse, and

(B) makes with respect to such drug or other substance the findings prescribed by subsection (b) of section 202 for the schedule in which such drug is to be placed; or

(2) remove any drug or other substance from the schedules if he finds that the drug or other substance does not meet the requirements for inclusion in any schedule.

Rules of the Attorney General under this subsection shall be made on the record after opportunity for a hearing pursuant to the

rulemaking procedures prescribed by subchapter II of chapter 5 of title 5 of the United States Code. Proceedings for the issuance, amendment, or repeal of such rules may be initiated by the Attorney General (1) on his own motion, (2) at the request of the Secretary, or (3) on the petition of any interested party.

(b) The Attorney General shall, before initiating proceedings under subsection (a) to control a drug or other substance or to remove a drug or other substance entirely from the schedules, and after gathering the necessary data, request from the Secretary a scientific and medical evaluation, and his recommendations, as to whether such drug or other substance should be so controlled or removed as a controlled substance. In making such evaluation and recommendations, the Secretary shall consider the factors listed in paragraphs (2), (3), (6), (7), and (8) of subsection (c) and any scientific or medical considerations involved in paragraphs (1), (4), and (5) of such subsection. The recommendations of the Secretary shall include recommendations with respect to the appropriate schedule, if any, under which such drug or other substance should be listed. The evaluation and the recommendations of the Secretary shall be made in writing and submitted to the Attorney General within a reasonable time. The recommendations of the Secretary to the Attorney General shall be binding on the Attorney General as to such scientific and medical matters, and if the Secretary recommends that a drug or other substance not be controlled, the Attorney General shall not control the drug or other substance. If the Attorney General determines that these facts and all other relevant data constitute substantial evidence of potential for abuse such as to warrant control or substantial evidence that the drug or other substance should be removed entirely from the schedules, he shall initiate proceedings for control or removal, as the case may be, under subsection (a).

(c) In making any finding under subsection (a) of this section or under subsection (b) of section 202, the Attorney General shall consider the following factors with respect to each drug or other substance proposed to be controlled or removed from the schedules:

(1) Its actual or relative potential for abuse.

(2) Scientific evidence of its pharmacological effect, if known.

(3) The state of current scientific knowledge regarding the drug or other substance.

(4) Its history and current pattern of abuse.

(5) The scope, duration, and significance of abuse.

(6) What, if any, risk there is to the public health.

(7) Its physic or physiological dependence liability.

(8) Whether the substance is an immediate precursor of a substance already controlled under this title.

(d) If control is required by United States obligations under international treaties, conventions, or protocols in effect on the effective date of this part, the Attorney General shall issue an order controlling such drug under the schedule he deems most appropriate to carry out such obligations, without regard to the findings required by subsection (a) of this section or section 202(b) and without regard to the procedures prescribed by subsections (a) and (b) of this section.

(e) The Attorney General may, without regard to the findings required by subsection (a) of this section or section 202(b) and without regard the procedures prescribed by subsections (a) and (b) of this section, place an immediate precursor in the same schedule in which the controlled substance of which it is an immediate precursor is placed or in any other schedule with a higher numerical designation. If the Attorney General designates a substance as an immediate precursor and places it in a schedule, other substances shall not be placed in a schedule solely because they are its precursors.

(f) If, at the time a new-drug application is submitted to the Secretary for any drug having a stimulant, depressant, or hallucinogenic effect on the central nervous system, it appears that such drug has an abuse potential, such information shall be forwarded by the Secretary to the Attorney General.

(g) (1) The Attorney General shall by regulation exclude any nonnarcotic substance from a schedule if such substance may, under the Federal Food, Drug, and Cosmetic Act, be lawfully sold over the counter without a prescription.

(2) Dextromethorphan shall not be deemed to be included in any schedule by reason of enactment of this title unless controlled after the date of such enactment pursuant to the foregoing provisions of this section.

Mr. SPRINGER (during the reading). Mr. Chairman, I ask unanimous consent that the further reading of section 201 of part B of title II be dispensed with, and that it be printed in the RECORD and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The CHAIRMAN. Are there any amendments to this section? If not, the Clerk will read.

The Clerk read as follows:

SCHEDULES OF CONTROLLED SUBSTANCES

SEC. 202. (a) There are established five schedules of controlled substances, to be known as schedules I, II, III, IV, and V. Such schedules shall initially consist of the substances listed in this section. The schedules established by this section shall be updated and republished on a semiannual basis during the two-year period beginning one year after the date of enactment of this title and shall be updated and republished on an annual basis thereafter.

(b) Except where control is required by United States obligations under an international treaty, convention, or protocol, in effect on the effective date of this part, and except in the case of an immediate precursor, a drug or other substance may not be placed in any schedule unless the findings required for such schedule are made with respect to such drug or other substance. The findings required for each of the schedules are as follows:

(1) SCHEDULE I.—

(A) The drug or other substance has a high potential for abuse.

(B) The drug or other substance has no currently accepted medical use in treatment in the United States.

(C) There is a lack of accepted safety for use of the drug or other substance under medical supervision.

(2) SCHEDULE II.—

(A) The drug or other substance has a high potential for abuse.

(B) The drug or other substance has a currently accepted medical use in treatment in the United States or a currently accepted medical use with severe restrictions.

(C) Abuse of the drug or other substances may lead to severe psychological or physical dependence.

(3) SCHEDULE III.—

(A) The drug or other substance has a potential for abuse less than the drugs or other substances in schedules I and II.

(B) The drug or other substance has a currently accepted medical use in treatment in the United States.

(C) Abuse of the drug or other substance may lead to moderate or low physical dependence or high psychological dependence.

(4) SCHEDULE IV.—

(A) The drug or other substance has a low potential for abuse relative to the drugs or other substances in schedule III.

(B) The drug or other substance has a currently accepted medical use in treatment in the United States.

(C) Abuse of the drug or other substance may lead to limited physical dependence or psychological dependence relative to the drugs or other substances in schedule III.

(5) SCHEDULE V.—

(A) The drug or other substance has a low potential for abuse relative to the drugs or other substances in schedule IV.

(B) The drug or other substance has a currently accepted medical use in treatment in the United States.

(C) Abuse of the drug or other substance may lead to limited physical dependence or psychological dependence relative to the drugs or other substances in schedule IV.

(c) Schedules I, II, III, IV, and V shall, unless and until amended pursuant to section 201, consist of the following drugs or other substances, by whatever official name, common or usual name, chemical name, or brand name designated:

SCHEDULE I

(a) Unless specifically excepted or unless listed in another schedule, any of the following opiates, including their isomers, esters, ethers, salts, and salts of isomers, esters, and ethers, whenever the existence of such isomers, esters, ethers, and salts is possible within the specific chemical designation:

(1) Acetylmethadol.
(2) Allylprodine.
(3) Alphacetylmathadol.
(4) Alphameprodine.
(5) Alphamethadol.
(6) Benzethidine.
(7) Betacetylmethadol.
(8) Betameprodine.
(9) Betamethadol.
(10) Betaprodine.
(11) Clonitazene.
(12) Dextromoramide.
(13) Dextrorphan.
(14) Diampromide.
(15) Diethylthiambutene.
(16) Dimenoxadol.
(17) Dimepheptanol.
(18) Dimethylthiambutene.
(19) Dioxaphetyl butyrate.
(20) Dipipanone.
(21) Ethylmethylthiambutene.
(22) Etonitazene.
(23) Etoxeridine.
(24) Furethidine.
(25) Hydroxypethidine.
(26) Ketobemidone.
(27) Levomoramide.
(28) Levophenacylmorphan.
(29) Morpheridine.
(30) Noracymethadol.
(31) Norlevorphanol.
(32) Normethadone.
(33) Norpipanone.
(34) Phenadoxone.
(35) Phenampromide.
(36) Phenomorphan.
(37) Phenoperidine.
(38) Piritramide.
(39) Proheptazine.
(40) Properidine.
(41) Racemoramide.
(42) Trimeperidine.

(b) Unless specifically excepted or unless listed in another schedule, any of the following opium derivatives, their salts, isomers, and salts of isomers whenever the existence of such salts, isomers, and salts of isomers is

possible within the specific chemical designation:
(1) Acetorphine.
(2) Acetyldihydrocodeine.
(3) Benzylmorphine.
(4) Codeine methylbromide.
(5) Codeine-N-Oxide.
(6) Cyrenorphine.
(7) Desomorphine.
(8) Dihydromorphine.
(9) Etorphine.
(10) Heroin.
(11) Hydromorphinol.
(12) Methylesorphine.
(13) Methhydromorphine.
(14) Morphine methylbromide.
(15) Morphine methylsulfonate.
(16) Morphine-N-Oxide.
(17) Myrophine.
(18) Nicocodeine.
(19) Nicomorphine.
(20) Normorphine.
(21) Pholcodine.
(22) Thebacon.

(c) Unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation, which contains any quantity of the following hallucinogenic substances, or which contains any of their salts, isomers, and salts of isomers whenever the existence of such salts, isomers, and salts of isomers is possible within the specific chemical designation:
(1) 3,4-methylenedioxy amphetamine.
(2) 5-methoxy-3,4-methylenedioxy amphetamine.
(3) 3,4,5-trimethoxy amphetamine.
(4) Bufotenine.
(5) Diethyltryptamine.
(6) Dimethyltryptamine.
(7) 4-methyl-2,5-dimethoxyamphetamine.
(8) Ibogaine.
(9) Lysergic acid diethylamide.
(10) Marihuana.
(11) Mescaline.
(12) Peyote.
(13) N-ethyl-3-piperidyl benzilate.
(14) N-methyl-3-piperidyl benzilate.
(15) Psilocybin.
(16) Psilocyn.
(17) Tetrahydrocannabinols.

SCHEDULE II

(a) Unless specifically excepted or unless listed in another schedule, any of the following substances whether produced directly or indirectly by extraction from substances of vegetable origin, or independently by means of chemical synthesis, or by a combination of extraction and chemical synthesis:

(1) Opium and opiate, and any salt, compound, derivative, or preparation of opium or opiate.

(2) Any salt, compound, derivative, or preparation thereof which is chemically equivalent or identical with any of the substances referred to in clause (1), except that these substances shall not include the isoquinoline alkaloids of opium.

(3) Opium poppy and poppy straw.

(4) Coca leaves and any salt, compound, derivative, or preparation of coca leaves, and any salt, compound, derivative, or preparation thereof which is chemically equivalent or identical with any of these substances, except that the substances shall not include decocainized coca leaves or extraction of coca leaves, which extractions do not contain cocaine or ecgonine.

(b) Unless specifically excepted or unless listed in another schedule, any of the following opiates, including their isomers, esters, ethers, salts, and salts of isomers, esters and ethers, whenever the existence of such isomers, esters, ethers, and salts is possible within the specific chemical designation:
(1) Alphaprodine.
(2) Anileridine.
(3) Bezitramide.
(4) Dihydrocodeine.
(5) Diphenoxylate.
(6) Fentanyl.
(7) Isomethadone.
(8) Levomethorphan.
(9) Levorphanol.
(10) Metazocine.
(11) Methadone.
(12) Methadone-Intermediate, 4-cyano-2-dimethyl-amino-4,4-diphenyl butane.
(13 Moramide-Intermediate, 2-methyl-3-morpholino-1, 1-diphenylpropane-carboxylic acid.
(14) Pethidine.
(15) Pethidine-Intermediate-A, 4-cyano-1-methyl-4-phenylpiperidine.
(16) Pethidine-Intermediate-B, ethyl-4-phenylpiperidine-4-carboxylate.
(17) Pethidine-Intermediate-C, 1-methyl-4-phenylpiperidine-4-carboxylic acid.
(18) Phenazocine.
(19) Piminodine.
(20) Racemethorphan.
(21) Racemorphan.

SCHEDULE III

(a) Unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances having a stimulant effect on the central nervous system:

(1) Amphetamine, its salts, optical isomers, and salts of its optical isomers.

(2) Phenmetrazine and its salts.

(3) Any substance which contains any quantity of methamphetamine, including its salts, isomers, and salts of isomers.

(4) Methylphenidate.

(b) Unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances having a depressant effect on the central nervous system:

(1) Any substance which contains any quantity of a derivative of barbituric acid, or any salt of a derivative of barbituric acid.
(2) Chlorhexadol.
(3) Glutethimide.
(4) Lysergic acid.
(5) Lysergic acid amide.
(6) Methyprylon.
(7) Phencyclidine.
(8) Sulfondiethylmethane.
(9) Sulfonethylmethane.
(10) Sulfonmethane.
(c) Nalorphine.

(d) Unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation containing limited quantities of any of the following narcotic drugs, or any salts thereof:

(1) Not more than 1.8 grams of codeine per 100 milliliters or not more than 90 milligrams per dosage unit, with an equal or greater quantity of an isoquinoline alkoloid of opium.

(2) Not more than 1.8 grams of codeine per 100 milliliters or not more than 90 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts.

(3) Not more than 300 milligrams of dihydrocodeinone per 100 milliliters or not more than 15 milligrams per dosage unit, with a fourfold or greater quantity of an isoquinoline alkaloid of opium.

(4) Not more than 300 milligrams of dihydrocodeinone per 100 milliliters or not more than 15 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts.

(5) Not more than 1.8 grams of dihydrocodeine per 100 milliliters or not more than 90 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts.

(6) Not more than 300 milligrams of ethylmorphine per 100 milliliters or not more than 15 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts.

(7) Not more than 500 milligrams of opium per 100 milliliters or per 100 grams, or not more than 25 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts.

(8) Not more than 50 milligrams of morphine per 100 milliliters or per 100 grams with one or more active, nonnarcotic ingredients in recognized therapeutic amounts.

SCHEDULE IV

(1) Barbital.
(2) Chloral betaine.
(3) Chloral hydrate.
(4) Ethchlorvynol.
(5) Ethinamate.
(6) Methohexital.
(7) Meprobamate.
(8) Methylphenobarbital.
(9) Paraldehyde.
(10) Petrichloral.
(11) Phenobarbital.

SCHEDULE V

Any compound, mixture, or preparation containing any of the following limited quantities of narcotic drugs, which shall include one or more nonnarcotic active medicinal ingredients in sufficient proportion to confer upon the compound, mixture, or preparation valuable medicinal qualities other than those possessed by the narcotic drug alone:

(1) Not more than 200 milligrams of codeine per 100 milliliters or per 100 grams.

(2) Not more than 100 milligrams of dihydrocodeine per 100 milliliters or per 100 grams.

(3) Not more than 100 milligrams of ethylmorphine per 100 milliliters or per 100 grams.

(4) Not more than 2.5 milligrams of diphenoxylate and not less than 25 micrograms of atropine sulfate per dosage unit.

(5) Not more than 100 milligrams of opium per 100 milliliters or per 100 grams.

(d) The Attorney General may by regulation except any compound, mixture, or preparation containing any depressant or stimulant substance in paragraph (a) or (b) of schedule III or in schedule IV or V from the application of all or any part of this title if (1) the compound, mixture, or preparation contains one or more active medicinal ingredients not having a depressant or stimulant effect on the central nervous system, and (2) such ingredients are included therein in such combinations, quantity, proportion, or concentration as to vitiate the potential for abuse of the substances which do have a depressant or stimulant effect on the central nervous system.

Mr. JARMAN (during the reading). Mr. Chairman, I ask unanimous consent that section 202 be considered as read, down through line 17 on page 143, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

AMENDMENT OFFERED BY MR. PEPPER

Mr. PEPPER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PEPPER: Page 138, insert between lines 18 and 19 the following:

"(c) Unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances having a stimulant effect on the central nervous system:

"(1) Amphetamine, its salts, optical isomers, and salts of its optical isomers.

"(2) Phenmetrazine and its salts.

"(3) Any substance which contains any quantity of methamphetamine, including its salts, isomers, and salts of isomers.

"(4) Methylphenidate."

Page 138, strike out line 20 and all that follows down through and including line 7 on page 139.

Page 139, line 8, strike out "(b)" and insert in lieu thereof "(a)".

Page 139, line 25, strike out "(c)" and insert in lieu thereof "(b)".

Page 140, line 1, strike out "(d)" and insert in lieu thereof "(c)".

Page 143, line 8, strike out "or (b)".

The CHAIRMAN. The gentleman from Florida is recognized in support of his amendment.

Mr. PEPPER. Mr. Chairman, this amendment is offered by me, but it is also authorized and supported unanimously by all the members of the House Select Committee on Crime, because, as a result of our hearings in nine cities of the country outside Washington, in Washington, and in the suburban areas thereabout, we have become very painfully aware of the menace to this country of the dangerous drugs which are referred to in the amendment, a category of drugs which, in terms of street parlance, are generally called "speed" drugs, amphetamines, and kindred drugs.

What the amendment proposes to do is merely to move these drugs which are listed in the amendment—the "speed" drugs, amphetamines, and kindred drugs with them—from schedule 3 in section 201 up to schedule 2 in section 201.

The effect of that is to subject these dangerous drugs to a quota system of control enforced and directed by the Attorney General of the United States upon the advice and counsel of the Secretary of Health, Education, and Welfare.

What the amendment provides is that we should not wait in dealing with these dangerous drugs, popularly known as "speed" drugs, which have had such a tragic effect upon so many youths—that we should not delay putting the manufacture and distribution of these drugs under a quota system, subject to the Attorney General, upon the advice of the Secretary of Health, Education, and Welfare, until the elaborate procedures, administrative and judicial, which are provided for in the bill can be carried out.

Why do we say that, Mr. Chairman and members of the committee? Because it is undisputed that today the manufacturers of these drugs are turning 8 billion of them a year out on the people of this country, many of them into the hands, and the bodies, and the brains of the young people of this country. Eight billion. That is the equivalent, assuming our population to be 200 million, of 40 of these "speed" pills a year for every man, woman, and child in the United States.

That is 8 billion. Mr. Chairman, according to the committee's own report, on page 7, we are told and we have evidence from Dr. Cohen of the narcotic and drug abuse section of NIMH that 50 percent of those 8 billion pills, the dangerous speed pills which are being produced by the manufacturers of this country, go into illicit channels of trade. They are not subject to any regulation. They are on the black market.

Mr. Chairman, perhaps I could not better illustrate the seriousness of the problem this amendment proposes to attack than to read a letter dated September 15 from a lady in San Diego, Calif., which came to me as our intention to prepare this amendment has had currency in the press, which reads as follows:

SAN DIEGO, CALIF.,
*September 15, 1970.*

Representative CLAUDE PEPPER,
*House Select Committee on Crime,*
*Washington, D.C.*

DEAR REPRESENTATIVE PEPPER: My husband and I are so much in favor of your current drive to limit manufacture of "pep pills". If you would care to use our own son's drug abuse case to point out the drastic effects of it, then please do so.

In 1968, Sept. 6 to be exact, our son tried to kill my husband, our younger son and me under the influence of amphetamines. He fortunately was overpowered and placed with juvenile authorities. After being released in 1969, everything went well until 1970, when early this year he started "shooting up" into his veins with amphetamines. His mind has been affected we feel, but "where to turn"—we do not know! We were advised to put him out of the house because I live in fear—fear that he may become violent again on "speed".

God only knows what will become of him or us. Why are amphetamines used at all or necessary? Sweden, has outlawed them. Can't we? Certainly the heavy person for whom they are prescribed can use a little more will power or lighter foods without a dependency on drugs. Certain women I know have taken "speed" for weight problems and told me "they climbed the walls" with them.

Please do *something* to end this abuse before all American children are lost in the jungle of the drug world.

Sincerely,

PAMELA I. MILLER,
(Mrs. Charles W.)

The CHAIRMAN. The time of the gentleman from Florida has expired.

(By unanimous consent, Mr. PEPPER was allowed to proceed for 5 additional minutes.)

In this morning's Washington Post is a news article the heading of which is "Speed Freaks Turning to Heroin As Antidote." That is from Los Angeles and it says:

75 PERCENT FROM UPPER ECONOMIC LEVELS—"SPEED FREAKS" TURNING TO HEROIN AS ANTIDOTE

(By Harry Nelson)

LOS ANGELES.—Youngsters across the nation are turning to heroin as an antidote to the "strung out" aftermath of amphetamine abuse, a San Francisco physician told a physicians' meeting here.

The number of heroin addicts asking for help at San Francisco's Haight-Ashbury medical Clinic has jumped 500 per cent since the clinic was founded in 1967, said Dr. David E. Smith, the clinic's medical director.

While 9 out of 10 heroin users used to be poor and members of minority races, 75 per cent are now white and come from the middle and upper economic levels, he said.

Physicians attending the meeting also heard a University of California at Los Angeles psychiatrist predict that within five years society will be faced with the problem of dealing with dozens of new drugs with new mind-altering capabilities.

The meeting, entitled "Changing Patterns in Drug Abuse," was co-sponsored by Pfizer Laboratories and the department of psychiatry at UCLA.

Dr. Smith said the clinic now sees 50 heroin patients a day—a dramatic change from only two years ago when heroin users were relatively scarce and the bulk of patients were victims of LSD bad trips or psychotic reactions from amphetamines or "speed."

He said the Los Angeles' Free Clinic also has experienced a sharp rise in heroin addicts and predicted that youngsters in suburban communities across the nation will soon be following suit just as they did several years ago with LSD, marijuana and speed.

Dr. Smith, a faculty member of the University of California at San Francisco Medical Center, said he believes the switch to heroin is directly related to the abuse of amphetamines, a class of stimulant drugs also known as "uppers" that can be taken either in pill form or injected. When injected it is called "speed" because of its fast action.

So-called "speed freaks" go on binges that last for as long as a week during which their nervous system is kept at a highly excited level by the drug's constant stimulation.

Dr. Smith said these drug abusers have learned that heroin, which is a depressant, will calm them down and ease the feverish excitement that keeps them from either eating or sleeping.

Besides this pharmacological action, there is also a psychological explanation for the increasing popularity of heroin, he said.

"Heroin is a drug of despair. It fits in well with the growing pessimism of the radical youth culture. The optimism of the flower children is gone. The youngsters are moving from drugs that expand the consciousness to ones that constrict it," he said.

Mr. Chairman, these speed drugs not only do grievous injury to the brain and to the nervous system of the individual who takes them, but now we also have medical evidence in today's paper that the use of these speed drugs is also leading to a greater use of heroin, which comes as near to condemning one to a miserable death as almost anything we can imagine.

Mr. WALDIE. I commend my chairman, and I wish to join with him in support of this amendment.

It has struck me that those who have argued against the amendment, at least in terms of its presentation thus far, have agreed there is no question that there does not exist a need for billions of these pills, when the legitimate need does not exceed several hundred thousand, and that such a figure is excessive. But they have suggested that to take the proposed action at this time would represent a hardship for the legitimate drug manufacturer. It would apparently represent a hardship for the legitimate drug manufacturer in terms of the necessity of keeping records and in terms of perhaps having his production curtailed if the Attorney General so determines, after competent medical advice, that it should be curtailed.

It does seem to me, Mr. Chairman, that totally overlooks, as you have so properly pointed out, the grievous fact that the delay in taking this step will have untold consequences to the youngsters afflicted by the use of "speed" and amphetamine derivatives.

When we balance the equities, as to any inconvenience which might occur to the drug manufacturers as against the definitive tragedies no one argues about,

occurring every day, it demands the action here proposed.

I believe it would also be proper to mention, Mr. Chairman, that due to the activities of your committee, and primarily as a result of your activities in the capacity as chairman, several legitimate drug manufacturers already have voluntary given up the production of these substances, in view of the information that came to their attention as the result of hearings held by your committee. If responsible drug manufacturers can voluntarily do this, recognizing the problem which exists, it does seem to me we have a right to suggest that those other responsible drug manufacturers do so, and, if necessary, under compulsion of law.

The CHAIRMAN. The time of the gentleman from Florida has expired.

(By unanimous consent, Mr. PEPPER was allowed to proceed for 2 additional minutes.)

Mr. PEPPER. Mr. Chairman, I thank the able gentleman, who has worked so hard on our endeavor to solve this important problem.

As my distinguished colleague has suggested, there are only three known medical needs for these "speed" drugs. One is in treatment of a type of child injury called hyperkinetics. Another is in the treatment of narcolepsy, which has to do with certain children. Another is to reduce weight.

The doctors, including Dr. Cohen and other distinguished medical authorities, have said at the outside only a few thousand—not 8 billion, but only a few thousand—would be necessary for medical needs.

I have here an endorsement of our amendment by the American Public Health Association.

I add only this, Mr. Chairman: When we are dealing with so dangersous a matter, of such menacing import to so many, why wait? Let us put it under the Attorney General, whom we can trust. He will let them produce as many as they need, upon the advice of HEW.

Why should we have to wait to go through a long labyrinth of administrative and judicial procedure, which may take years, during which many other sons, like the one this lady writes about, may take their own lives or the lives of others?

Mr. ANDREWS of Alabama. Mr. Chairman, will the gentleman yield?

Mr. PEPPER. I yield to the distinguished gentleman from Alabama.

Mr. ANDREWS of Alabama. I want to commend the gentleman for the great fight he has made against crime in this country. The gentleman has traveled all over the country and conducted hearings.

I should like to ask the gentleman whether there is any evidence of a connection between the drug problem and the Vietnam war or the Southeast Asia war? Does that have anything to do with the excessive use of drugs in this country in the past few years?

Mr. PEPPER. Undoubtedly it has had a profound influence, from the men coming back here.

Mr. ANDREWS of Alabama. One of the sad byproducts of this war in Southeast Asia—there are many sad byproducts, but one of the saddest is the fact that we may be producing a generation of drug addicts there.

I know that in my district there is a great military installation, and they have had a marihuana problem there. Some people who are knowledgeable tell me it is directly connected with these young men coming back from Vietnam. A battalion surgeon recently testified that 49 percent of the men in that battalion were addicted to drugs. I have been told that one can buy drugs there as cheap as Coca-Cola.

Mr. PEPPER. The evidence shows that the drug manufacturers are not going to stop their manufacture until they are subjected to quota requirements or prohibition by law.

Mr. KYL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to address a few questions to the gentleman from Florida who has done so much work in this area. I think a number of us have some reservations, not objections, about his amendment. The gentleman from Florida has quoted Dr. Cohen. Now, on page 603 of the hearings Dr. Cohen said this:

> Clandestine laboratories which manufacture methamphetamine capsules and tablets have been detected during the past 3 years. If the entire licit production were curtailed, then more of these laboratories will spring up. Many foreign countries continue to be an easy source of supply for smugglers. Unless international regulation of the amphetamines can be initiated, this substance will remain in good supply even if medical uses of amphetamines were limited by law.
>
> Most amphetamines now have a sustained release. These pills are of very little interest to the abuser.
>
> I want to be assured by the gentleman from Florida that, if we follow his advice, we will not be establishing a black market or a bootleg business where there will be an impure product and a more dangerous product than we have at the present time.

Mr. PEPPER. Will the gentleman yield?

Mr. KYL. I am glad to yield to the gentleman from Florida.

Mr. PEPPER. I thank the gentleman for his very significant inquiry. We only ask for this amendment the same amount of effective enforcement by the Attorney General which the committee presupposes in respect to the narcotics that are referred to in statutes 1 and 2. The committee put narcotics in schedules 1 and 2 under a quota system administered by the Attorney General. The Attorney General will administer under the Department of HEW. I am sure that more money will be made available for that. We only ask that the same principle be applied to these dangerous speed drugs. They, too, ought to be put under the Attorney General, and, when he finds a reduction from 8 billion of these pills is in the public interest on the advice of the Department of Health, Education, and Welfare, he shall impose a quota on those that can be produced in America and allocated among those who are responsible representatives of the drug industry to produce.

I think this is the best way to get control, because if we do not have anything but registration and do not limit production by a quota system, you cannot effectively control production.

Mr. KYL. If I can beg the indulgence of the able gentleman from Florida, carrying the matter one step further, there is, of course, a difference in price between the so-called hard drugs and the amphetamines which, in a way, becomes an important factor here. Aside from simply having a supply and worrying about the bootleg business, I am now thinking of the situation which we had in Iowa where some of these homemade amphetamines included strychnine, as an illustration, and in which the drugs were not refined as they are when they come from a reputable drug company. The change of one isomer in an amphetamine makes a tremendous difference in the effectiveness of the drug. We do not regulate this illegitimate manufacturing enterprise in any way of course.

Mr. PEPPER. If we had a quota system, the manufacturers who were authorized to manufacture would be known, and all the Attorney General's representatives would proceed to do would be to go to that factory and see whether they are producing more than they are authorized to produce.

Let me give the able gentleman and the committee something that we discovered when we held a hearing in San Francisco last year. The president of a drug firm in Chicago appeared as a witness. He stated that for years his company had been shipping a large quantity of these pep pills, speed pills, to a firm in Tijuana, Mexico. The Bureau of Narcotics, and the Customs people had gotten wind of that, after some years of surveillance, and they found that this so-called consignee was the 11th hole of the Tijuana golf course and that there was not any such consignee. We had in a room at the place of the hearing in the courthouse 13 bins containing 1.3 million of these pills that a so-called reputable drug company for years had been shipping to an imaginary consignee down in Tijuana, Mexico.

Mr. KYL. I thank the gentleman for his response.

Because of the nature of the drug problem, I believe we can hold a rather simply stated criteria: A drug control program should make it harder to start and easier to quit.

Certainly, there is more to this problem than law enforcement and failure to recognize the fact continually throws more of a burden on law enforcement agencies without effecting genuine cures.

Our consideration should begin here: The problem of narcotics and drug abuse is a serious one. However, in many individual cases—some authorities say "in most cases"—there is a deep personal psychological problem which is not removed by punishment alone. The need for medical and/or psychiatric treatment is also essential.

This particular element becomes apparent when we realize that a drug user can be cleaned chemically much more easily than he can be cured psychologically.

We must not oversimplify this proposition—or, on the other hand, to over-

promise results. Perhaps we can place this particular point in focus by relating the firm opinion of our Federal agency in charge of drug control. Statistics show that in terms of social cost the abuse of alcohol constitutes by far the greatest total. I need not elucidate the frustrations met in trying to solve this problem. Further, I think it is obvious that we should not expect simpler answers in reference to other drugs.

What are those other drugs? A drug company has prepared an exhibit for my use with the statement that the collection is very incomplete.

There are about 150 different pills and capsules, all developed to fill a legitimate medical need. Each is recognized as a factor in illegitimate drug abuse. The collection does not include such hard drugs as heroin, nor does it include glue, naphtha, carbon tetrachloride, or the hallucinogens symbolized by LSD.

This suggests other essential ingredients in any meaningful program. Continuing education is a must. Most Americans are not even really alerted to the dangers involved in daily use. For instance, we have a rather long list of well-known people who have died because they had consumed a normal quantity of alcohol; and shortly thereafter, a normal quantity of sleeping pills or similar depressants.

Another example is found in the frightening story of a new "kick" called "fruit bowl." Those involved, usually the young, take two different pills from the home medicine chest, mix them in a common bowl with other persons, then select two at random for consumption. In such cases, even hormone concoctions become dangerous drugs.

What I am trying to emphasize is the idea that no law, in and of itself, is going to change the attitudes and solve the psychological problems involved. We are discussing a good bill. But let no Member think our task is completed with passage of that bill.

I have visited personally with experimenters, with people who have a psychological dependence as well as those with a physical dependence. I have reviewed very many case histories, have noted the criminal connections and the tragedies resulting from abuse of drugs. I cannot overemphasize the seriousness of what has become a national sickness. But the treatment still deals with individuals.

I recommend passage of this bill as a new "starting point" in a comprehensive continuing battle. This is a beginning, and only a beginning.

Mr. PEPPER. Mr. Chairman, if the gentleman will yield further, I will add this, if we only require the registration, as this does, this drug would not be subject to any registration if our amendment does not prevail and then you would have to trace every shipment to see whether it went to the proper place. But if the factory knows it has a quota, all you have to decide is whether it has exceeded its quota or not.

Mr. CARTER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I regretfully oppose the amendment which has been offered by the distinguished gentleman, from Florida. Legislating on the floor of the House concerning very technical and scientific matters can cause a great deal of trouble. It can open a Pandora's box.

In this case the distinguished gentleman from Florida talks about speed, and I am against speed also. Our most prominent drug companies have stopped the manufacture of speed today. However, the gentleman's amendment, if adopted, would cover 6,100 drugs of all sorts, not just the three mentioned, not just speed, but all of the amphetamines and other drugs which are called phenmetrazine.

Mr. Chairman, I read from the book which is available on every physician's desk information which includes a résumé approved by the Food and Drug Administration which says that methylphenidate is used as a stimulant to hasten recovery——

Mr. PEPPER. Mr. Chairman, will the gentleman yield?

Mr. CARTER. Not at this time, not until I have finished my statement and then I shall be glad to yield to the distinguished gentleman from Florida.

To continue my statement—to hasten recovery from anesthesia, increasing response to psychotherapy and depression, and so forth.

Now, to the best of my knowledge, and based upon what I have read in the manual which all physicians usually have on their desk, preludin is not subject to very much abuse.

And, Mr. Chairman, unthinkingly, the distinguished gentleman has included this substance and spoke of it I think mistakenly as an amphetamine. This, Mr. Chairman, shows the illogic approach of getting too technical on a bill on which this committee has worked for at least 51 different sessions, asking the advice time after time from the Department of Health, Education, and Welfare and the Department of Justice.

Mr. Chairman, I believe another inclusion that the distinguished gentleman made was phenmetrazine which is an appetite suppressant and is contained in the coverage of the Food and Drug Administration or at least it is approved by them and is in the physician's desk reference. It is effective and it lacks unpleasant side effects.

Now, Mr. Chairman, I think it is illogical for us today to include 6,100 drugs which are certainly not all amphetamines in this amendment.

I think it would be disastrous to many companies throughout the land, and I think it is almost impossible to impose a quota which would be necessary. Rather, let us let the Justice Department handle it as they want to do—and they are very eager to do this. They will have hearings, they will determine the necessity of these drugs being placed in their proper classification. I think that is the way that we should proceed in this matter.

As I say, I think it is absolutely vital that we oppose this amendment at this time.

Mr. PEPPER. Mr. Chairman, will the gentleman yield?

Mr. CARTER. I yield to the distinguished gentleman from Florida.

Mr. PEPPER. Mr. Chairman, there are two points I would like to suggest. This amendment does not impose any quotas. We do not deal with figures, we give the Attorney General of the United States, upon the advice of the Secretary of Health, Education, and Welfare, the power to impose quotas if they find it in the public interest, so that we are dealing with responsible officials.

Second, concerning the prescriptions that might be affected: The only effect of our amendment, if adopted, would be that if a physician issues a prescription for one of these very dangerous drugs, then that prescription cannot be refilled. If our amendment is not adopted, the physician can issue a prescription, and the person who gets the prescription can have it refilled five times, and he does not have to go back to the doctor.

Mr. CARTER. May I say in reference to that, that we prefer today to limit the number of prescriptions which will be written. Further, to class Ritalin, which is a rather innocuous drug, and preludin phenmetrazine, which has no unpleasant side effects, I think is beyond the realm of reason to place this in the category of morphine and other serious barbiturates.

The CHAIRMAN. The time of the gentleman has expired.

Mr. QUIE. Mr. Chairman, I rise in opposition to the amendment, and I move to strike the requisite number of words.

Mr. Chairman, I am pleased the gentleman from Kentucky (Mr. CARTER) has taken the floor in opposition to the amendment. There is just one part of the amendment I am concerned about, and that is the part that he was referring to in his comments on Ritalin. The only interest I have in this, and the only information I have, is from the work we do in our committee with the handicapped children, and in talking to people from the Council of Exceptional Children. They tell me that Ritalin is used for brain-injured children with hyperactive behaviors.

The trouble will be that since they have to get their prescriptions refilled probably once a week many of these parents will have to go to see the doctor in order to get it refilled once a week. The average brain-injured child may take as many as 20 to 30 pills a week. The prescription could not be refilled; it would require, each time, a new prescription from the doctor.

Under the bill as written by the committee, the present regulations would still prevail, permitting as many as five refills or a maximum of 6 months between prescriptions. Unless evidence proved that a change needed to be made, these regulations would continue to prevail. If the Pepper amendment is adopted, a great hardship would be placed on many individuals. For instance, parents with a brain-injured child in a remote rural area would find it impossible to go to a doctor as often as the Pepper amendment would make it necesary for them to do. There are also other people residing in the cities who might find this difficult, and for everyone it would mean an increased cost in the medication for their child.

I do not know enough about the other drugs that the gentleman from Florida

is concerned about, and has included in his amendment, but I do think it would be completely unwise to move Ritalin from schedule 3 to schedule 2.

Also, the doctors have this under control, it is not an addictive drug, and it is not dangerous in that sense.

So, I hope my colleagues will listen to the gentleman from Kentucky, and follow his lead in this matter.

Mr. WIGGINS. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I am here to speak to the Members in support of this amendment. I solicit your earnest consideration of what I am about to say.

I would like to call your attention to certain things that are indisputably true. These are the facts upon which you must judge the worth of this amendment.

One of the facts that is clearly true is this: all drugs covered by the Pepper amendment are dangerous drugs. They are. These are not innocuous little things. Ritalin, for example, is a dangerous drug if improperly used.

A second fact. The drugs covered by the Pepper amendment—speed, amphetamines, methamphetamines—are grossly abused in this country—grossly abused.

I regret to say that one of the States that has a serious drug problem is my own State. Speed is one of the principal drugs of choice. It is creating incalculable problems—crime problems, and social problems.

The third point, a fact, a simple fact, these drugs are being overproduced. There is no legitimate reason to turn out 8 billion—8 billion of these drugs.

The figure has been challenged. Some have said it is only 4 billion. Well, when the medical testimony before our committee indicates that legitimate, medicinal use of these drugs would justify their production on the order of 100,000 or 200,000—then even 4 billion is a gross overproduction.

Fourth, and this also is a fact—these dangerous drugs which are being abused and which are being overproduced are being diverted into illicit channels. Everyone admits the fact of diversion. Fifty percent is the accepted figure.

Finally, Mr. Chairman, the industry, having knowledge of the facts that I have just mentioned, has not practiced any self-restraint. They have not limited production, although the fact of overproduction is thoroughly documented.

Given these realities, and I have told you the truth—what do you think we should do about it? Is this the kind of situation that requires a legislative response? Of course it does.

Other countries have been confronted with this problem.

The use of amphetamines spread throughout Japan after the war. They had to impose a quota system and limit production and importation of amphetamines and methamphetamines in order to bring this plague under control.

Sweden has had to cope with the problem of amphetamine abuse. They were forced to limit production because of the spread of the stain of amphetamines through their society.

Is it not time that we do something as well? Of course, it is.

This amendment permits the Department of Justice to establish proper quotas. Without the amendment, they lack this power.

The only argument against giving Justice this power now is that, under the bill, the Department of Justice may, if it wishes, reschedule at some time in the future. We have a responsibility independent of the Department of Justice and it is time we exercise it. We have a responsibility to look at the indisputable facts that I have mentioned and to respond to them in an intelligent way—and the intelligent response is to reschedule these dangerous substances in Schedule II.

Why delay? Why should we wait for the Justice Department, some time down the road, to reschedule the drug? One of the reasons might be that to reschedule amphetamines would be to impose an economic burden on the drug industry.

Another reason might be that doctors would require extra bookkeeping perhaps, and in the writing of prescriptions.

Balance those reasons against the very real problem of the impact of speed in San Francisco, Los Angeles, Boston, and New York. These are the real human problems.

Balance the industry's argument against this stain on our society—and which is more important?

Mr. Chairman, I urge Members most earnestly and most sincerely to support this very important amendment.

I wish to compliment the distinguished gentleman from Florida (Mr. PEPPER), my chairman on the crime committee. We have spent hours looking into the single subject of amphetamine abuse in the country. I assure you it is a serious problem—a serious problem. I hope that we respond to it by doing something constructive, by supporting the Pepper amendment.

Mr. STEIGER of Arizona. Mr. Chairman, I move to strike out the requisite number of words.

Mr. Chairman, I wish I could impart to the Members of this Committee the urgency I feel in this matter. This is not and should not be a political matter. This is not and should not be an economic matter. I believe every Member here will agree that "speed" is a problem, not a problem to be spoken about from the stump, but a problem to be lived with in communities that know its impact.

Let me explain to those of you who may not be aware that, regardless of what the people in the Food and Drug Administration tell you about this or that drug not having a harmful side effect, when you dissolve these drugs and shoot them into your veins, as these young people do, they have a decided harmful effect.

The distinguished gentleman from Kentucky, whom I hold in the highest regard—and that is not a ritual regard that we must always recite here when we oppose someone, but is a genuine regard—cited the case of preludin, which he said was a drug with no harmful or side effects. Preludin was the very drug which caused Sweden to outlaw all amphetamines, because the young people in Sweden broke up the tablets, dissolved them, and shot the fluid into their veins, causing irreparable harm.

Really we are faced here, not with a matter of inconvenience for the constituents of the gentleman from Minnesota, the brain-damaged children—nobody wants to cause them any harm—but I submit to you that we will damage the brains and nervous systems of a great many young people who are not now damaged if we do not control the production and distribution of "speed," and this bill as it is now written does not control "speed." It permits the overproduction of "speed" to continue unabated. If we wait for the administrative remedy that is built into this bill, we will wait as long as 5 years, and 5 years at the present rate of consumption of "speed" is enough to destroy hundreds of thousands of young people.

If there should be any inconvenience or inequity to the drug companies or any inconvenience to the medical profession I say it would be as nothing compared to the harm, damage and destruction that "speed" is now doing to the fabric of our society.

I urge you to consider carefully that this is a legitimate opportunity to make a very real contribution to the control of a problem the scope of which I suspect many of you are not aware.

Mr. CARTER. Mr. Chairman, will the gentleman yield?

Mr. STEIGER of Arizona. I yield to the gentleman from Kentucky.

Mr. CARTER. Of course, I agree, as I stated before, that "speed" is a harmful drug. But one of the things that we are doing here today is including 6,099 other drugs. The vast majority of those drugs cannot be injected and are not used in injectable form. It is impossible for them to be used as——

Mr. STEIGER of Arizona. I will agree that the gentleman is absolutely correct. But I also point out that under the amendment offered by the gentleman from Florida (Mr. PEPPER) those drugs that are not harmful would not be placed under a quota. No quota will be placed on them. No imposition will be placed on them. The amendment would merely give the Attorney General, not only the authority, but also the mandate to look at those that must be controlled. If this legislative body does not say, "Mr. Attorney General, you look at those drugs and you control the ones which must be controlled," then we are not doing our duty.

Mr. ROGERS of Florida. Mr. Chairman, will the gentleman yield?

Mr. STEIGER of Arizona. I yield to the gentleman from Florida.

Mr. ROGERS of Florida. That is exactly what the bill provides. If the able gentleman will permit me to explain this, we have directed that the Attorney General control these drugs. This is a controlled drug. It is not in schedule 2. It is in schedule 3. The reason it is in schedule 3 and was put there by the committee is that the medical and the scientific people, as well as the law-enforcement people, said that that is where it should be. That is the testimony, and this committee spent almost 50 sessions

going into it. We have medical and scientific decisions as to where it should be. There is no department of the Government that is rougher on the abuser and that is more for law and order than the Department of Justice. Do you know what they say? They say it should not be done in this legislative way—just dump everything in a schedule, even though the scientists and the departments have determined amphetamines should be in schedule 3.

The bill provides a procedure to reschedule very simply. Also the gentleman is completely overlooking another fact.

The CHAIRMAN. The time of the gentleman from Arizona has expired.

(On request of Mr. ROGERS of Florida, and by unanimous consent, Mr. STEIGER of Arizona was allowed to proceed for 3 additional minutes.)

Mr. ROGERS of Florida. Mr. Chairman, if the gentleman will yield further, furthermore what no one is discussing here is the fact that the committee has tightened up this whole process of manufacture and distribution, so that we can close the gap. This strengthens law enforcement.

I am sure the gentleman knows that second-year college chemistry students can go make all the amphetamines they want from commonly available chemicals. This is testimony before the committee from the doctors, and also from Dr. Cohen, who was quoted previously.

So we are licensing, in effect, the manufacturers; their security is inspected by the Justice Department. The agents can follow where these drugs go.

Also we give the Department the authority, which they will use, to select those amphetamines which should be in category II, and in that way obtain quota authority.

The committee went into this very carefully. I know the good intentions of the gentleman. Everybody wants to control drugs, and that is what this bill does. The amendment is not needed.

Mr. STEIGER of Arizona. Mr. Chairman, I thank the gentleman. I wonder if the gentleman would mind responding. There is no conflict in our desire, that is obvious.

Mr. ROGERS of Florida. Certainly not.

Mr. STEIGER of Arizona. The gentleman from Florida points out the bill as now written says the Justice Department shall select those drugs which should be moved up to category II. I submit that the administrative action described by the bill can be appealed, which can take at best years to accomplish.

What the Pepper amendment does is literally reverse the administrative process. It says everything shall be in category II and shall be rigidly controlled except for those which are not deemed necessary to be controlled.

Mr. ROGERS of Florida. May I tell the gentleman from Arizona that in the process the committee has provided that as soon as the Attorney General goes through the process, which will not take long, they will have a hearing. When they make a decision to control it, and that drug is controlled, and will remain under control unless a court suspends the action by the Department. Any court now would take great caution after an affirmative decision based on scientific and medical evidence that such a drug should be put under a quota, and I do not believe any court would set that aside.

Mr. STEIGER of Arizona. Not questioning the efficacy of any court, but I submit the drug companies would have a right of appeal, and the court would have to take judicial notice.

Mr. ROGERS of Florida. But they do not have to set aside the control decision.

Mr. STEIGER of Arizona. Under the Pepper amendment this right of appeal would not affect the distribution and control of the drug.

Mr. ROGERS of Florida. To quote the argument of the gentleman from Florida where he said, "We are going to let the Justice Department decide whether to control them and put then under quotas"—that is his exact wording. He said they do not have to do them all. That is exactly what the bill does. It lets the Justice Department control them.

The CHAIRMAN. The time of the gentleman from Arizona has expired.

(On request of Mr. SPRINGER, and by unanimous consent, Mr. STEIGER of Arizona was allowed to proceed for 2 additional minutes.)

Mr. CARTER. Mr. Chairman, will the gentleman yield?

Mr. STEIGER of Arizona. I yield to the gentleman from Kentucky.

Mr. CARTER. Mr. Chairman, I want to say to the distinguished gentleman in the well that no one is more interested in controlling drugs than we. If the gentleman will look at schedule III, he will find that "amphetamine, its salts, optical isomers, and salts of its optical isomers" and "methylphenidate," and all the drugs which the gentleman has mentioned are there.

Under the bill which we have drawn, from the time this drug is manufactured and is sold and is transported and goes to the drugstore, it must be completely controlled and accounted for. There is very little chance of diversion under this bill. We are taking care of the legislation which the gentleman wants, right here in the bill.

Mr. STEIGER of Arizona. Mr. Chairman, I only point out to the gentleman that we do not control production, and it seems to me we must control production in as arbitrary a manner as is necessary.

Mr. CARTER. Every manufacturer in the country must be inspected regularly and controlled, and they have to account for everything they manufacture.

Mr. STEIGER of Arizona. I do not want to belabor the point, but this is the greatest problem. Only four manufacturers are involved. They in turn supply some 400 distributors. They will be able to account for every one of those distributors. The manufacturer will be able to point out where those drugs went, to the distributors. From those 400 distributors on is where we get to the illegal consumption. That is the area we are most concerned about.

Mr. SANDMAN. Mr. Chairman, will the gentleman yield?

Mr. STEIGER of Arizona. I yield to the gentleman from New Jersey.

Mr. SANDMAN. I thank the gentleman for yielding.

At the outset I should like to join in the remarks the gentleman has made on the floor, and I wish to support the amendment offered by the gentleman from Florida.

Let me tell a little story which I believe parallels what the gentleman is trying to do today.

New Jersey probably has more drug manufacturers than all the rest of the United States put together. It was in this area where we had the first big producer of LSD, a large corporation in New Jersey. For this reason there was a great demand on the State legislature at that time to pass this kind of law.

The CHAIRMAN. The time of the gentleman from Arizona has again expired.

(On request of Mr. SANDMAN, and by unanimous consent, Mr. STEIGER of Arizona was allowed to proceed for 3 additional minutes.)

Mr. SANDMAN. We held hearings at the State house for approximately a full year or a little more. We received exactly the same objections that we are hearing today. We received them not only from the medical societies but also from a well-organized and highly financed pharmaceutical association. They told us about all of the things we are hearing about today, about the hardships that this particular kind of measure would cause.

Well, the measure was enacted into law in 1964. That was 6 years ago. The trouble they have had with the statute in New Jersey has been practically nil. The procedure is almost in the same terms we are considering here, with almost the same list of dangerous drugs as we have here.

If we match this against the benefits received, the benefits outnumber all the hardships many times over.

At the outset, only 3 weeks after the bill became law, the Sandoz Corp. stopped the manufacture of LSD in New Jersey. Countless other organizations, all responsible, stopped the manufacture and distribution of various kinds of dangerous drugs.

In this particular State we are a corridor State between two of the largest cities in the country, New York and Philadelphia, and as a result we had a tremendous number of people who were illegally involved in the distribution of drugs. Believe it or not, within 6 months after the enactment of that statute the trouble from those kinds of people almost stopped.

So, as one of the States in the Union which has adopted as a matter of State law what we are talking about today, I can tell the Members that we profited very much from this kind of State law.

I urge adoption of the amendment.

Mr. STEIGER of Arizona. I sincerely thank the gentleman for his excellent observations.

Mr. McCLORY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, let me state initially that this committee has performed a

great service for the people of the Nation, including the industries involved, in the providing for comprehensive regulations and controls in this bill. Insofar as I know, the legitimate pharmaceutical manufacturers, and others similarly affected by this measure, are in general support of its broad provisions. In my own case, I want to state quite frankly that there are large pharmaceutical manufacturing interests centered in my congressional district. Indeed, I am proud to say that the well-known firms of Abbott Laboratories and Baxter Laboratories have large plants in my congressional district. It is my expectation that G. D. Searle & Co. may soon establish a large part of its organization in my congressional district. Last Saturday, the American Hospital Supply Co. dedicated its new building complex in Lake County, west of Waukegan—known as McGaw Park—where its principal research and related operations will be conducted. The location of these great organizations in Lake County, Ill., indicates that this area may become known as the health center of the world.

Abbott Laboratories has named its campus-like complex of modern structures and open-space land "Abbott Park." Abbott's slogan is "health care worldwide."

May I say further that with regard to American Hospital Supply Co. that this industry, as well as Abbott's, is emphasizing not only the manufacture and distribution of life-preserving products, but is also indicating a deep concern for the human environment, including an enlightened regard for the ecology or balance of nature upon which mankind's survival depends.

Mr. Chairman, with respect to the proposed amendment, let me pinpoint these facts: Abbott Laboratories manufactures and distributes a line of ethical pharmaceutical products which would be classified under section III of this bill. These products contain methamphetamines. Each tablet contains the prescribed quantity of this substance in the amount of from 5 to 15 milligrams. Abbott has been manufacturing these products for approximately 15 years. During all this period, they have maintained stringent controls and have operated in accordance with ethical practices in distributing the products through drugstores, wholesalers, physicians, and hospitals. May I say that a careful check is maintained with regard to the size of orders which are placed particularly by drugstores to the end that any suspicion of diversion of this valuable therapeutic product is investigated.

I have not been able to ascertain that any of Abbott Laboratories' products have found their way into the wrong hands.

All of the Abbott methamphetamine products are sold through physicians, drugstores, and hospitals—and scrupulous records are kept. In addition, Abbott is able to establish with a high degree of certainty through marketing research that all but a fraction of 1 percent is dispensed on physicians' prescriptions or hospital orders for the legitimate ailments for which the product is intended.

Mr. Chairman, insofar as I am able to determine, the methamphetamine products at Abbott Laboratories are appropriately designated in schedule 3. They do not have the potential for abuse that is indicated for drugs which are included in schedule 2. Their medical use in treatment of three diseases—obesity, hyperkinesis, and narcolepsy—should not be impaired by any restrictive designation in this bill which would restrict or limit such legitimate uses.

The transfer of methamphetamine products to schedule 2 would impose the requirement that the company operate under a quota which might be imposed. This would place an added and unwarranted burden upon physicians who are engaged in legitimately prescribing and upon druggists who are filling these prescriptions for methamphetamines in connection with the ailments I have mentioned.

Mr. Chairman, there are extensive clinical studies which are currently underway with respect to the use of appetite depressants—which is one of the characteristics of Abbott's methamphetamine products. When these clinical studies are completed in 1971, there will be further evidence relative to the precise scheduling of methamphetamines. Insofar as I am informed, these products should remain in schedule 3. However, that is always subject to change through a mechanism which is included in the bill.

In our zeal to reduce drug abuse, including abuse of the use of legitimate drugs, it is my hope that we will not impose undue burdens or take punitive and economically unfair steps adversely affecting the highly successful and extremely valuable pharmaceutical industries which contribute so much to the health and welfare of mankind in a great variety of ways.

I have personal knowledge of Abbott Laboratories, and I am acquainted with most if its officers and many of its other employees. I have a fairly intimate knowledge of the high principles which characterize its business activities. In the absence of convincing proof to the contrary, it does not seem to me that we should punish Abbott and similar concerns for a condition of widespread drug abuse and addiction upon which this Congress must level a comprehensive attack.

Mr. Chairman, I am pleased to see in this bill that additional weapons are provided for getting at those who traffic in illegal drugs, as well as those who attempt—for unlawful purposes—to invade the legitimate channels through which ethical drugs move. I am also pleased that additional funds and personnel are authorized in this bill for handling this critical problem.

Again, let me compliment the chairman, the ranking minority member, and all of those on the committee who have worked to produce this legislation. Let me also indicate my respect for the pharmaceutical industry, itself, which has cooperated with the committee and with Members of this body, in helping to produce this measure which can reduce the incidence of drug abuse and addiction and can also assist the Food and Drug Administration of the Department of Health, Education, and Welfare, and the Bureau of Narcotics and Dangerous Drugs of the Department of Justice, and other governmental agencies, in helping to achieve these important goals.

Mr. SPRINGER. Mr. Chairman, I move to strike the necessary number of words.

Mr. Chairman, if I can reduce this to what the real argument is and who is involved on one side and who is on the other, it may be helpful. I think all of us in this House have due respect for each committee. The committee essentially which is for this amendment is the Select Committee on Crime. I certainly would suppose that they have had hearings all over the country with reference to this particular matter, and for that I respect them. Now let us see what the Subcommittee on Health and Safety of the House committee has done. The committee, which is headed by the distinguished gentleman from Florida, is on crime. It has to do with crime. It does not have to do with medicine or any part of medicine. The hearings which have been had here are those delegated to the Subcommittee on Health. Gentlemen, they have held some 51 separate meetings of more than 1-hour duration at each hearing.

Mr. Chairman, the number of hours of hearings that have gone into executive sessions I cannot estimate. The bill then came to the full committee and we went into this in great detail.

Now, what you are attempting to do here is to indicate today whether or not you want to believe the testimony—I am talking about everyone who honestly gave it sincerely and in good faith—believe the testimony which they have heard on crime as against the medical testimony which has been heard here by a committee which has as its prerogative selectively to determine whether or not a health measure coming before this body, whether or not they are to be believed. That is the issue. There is no problem here of economics having to do with any drug industry. If this amendment prevails, it would not have any effect of any consequence upon the drug industry.

Mr. Chairman, the question is whether or not you ought to move amphetamines and a total of 6,000 drugs into another category.

The gentleman from Florida is talking about one. We are talking about 6,000, not one. We are talking about 6,000. Yet through one amendment the gentleman from Florida is saying, in essence, "Let us move 6,000 drugs from schedule 3 over into schedule 2 upon which there is not any evidence of any kind which has been introduced by anyone on the floor of this House which would substantiate the moving of those."

Mr. Chairman, the gentleman's amendment is broad enough and would require that that be done, without any hearings of any kind as to whether or not those remaining drugs ought to be put in schedule 2.

The gentleman has been saying that you need quotas. However, through his amendment the gentleman does not establish quotas. In his amendment, I repeat, he does not establish any quotas.

He does not say it should be 400,000, 1 million, 4 million, or 100,000. He does not even mention any figures like this. What he does say is this, and this is all he does say in his amendment—and he is right and truthfully so—"I am giving the Attorney General the power to set quotas."

Now, let me read a letter which was written by Mr. John E. Ingersoll, the Director of the Bureau of Narcotics, addressed to the distinguished gentleman from Florida on September 15 of this year. I shall not read it all, but I want to read the part which I think is pertinent:

> You may be assured that the Bureau does anticipate utilizing the new provisions of H.R. 18583 to insure that the proper regulatory controls are imposed over those amphetamines found to require the imposition of quotas.

The gentleman's amendment does not do a single thing that is not already required in this situation except that he would move it from schedule 3 over to schedule 2 where it is mandatory. The gentleman has already said in this amendment that based upon the evidence which has been produced he will move them there anyway. That is exactly what the Director of the Bureau of Narcotics has already said.

Mr. PEPPER. Mr. Chairman, will the gentleman yield?

Mr. SPRINGER. I mentioned the gentleman's name and I shall yield to him in just a minute, as soon as I get through.

Mr. Chairman, what I do want to say to the Committee is this: In this matter, you have either got to believe this subcommittee which was headed up by the distinguished gentleman from Oklahoma, and to a large extent, the distinguished gentleman from Florida and the distinguished gentleman from Minnesota, the ranking minority member when they went into this extensively and they heard from every single part of the scientific community there was in this country.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. SPRINGER was allowed to proceed for 5 additional minutes.)

Mr. SPRINGER. All I am trying to say here is that the subcommittee did the best job that they could in trying to arrive at what ought to be done, but they did not nail this down tightly so that these could be moved from one category to another. It will be left up to the Bureau of Narcotics and HEW to determine that when these ought to be moved from one schedule to another they would be moved. What we are saying is that there is no evidence today and that they are going to take the 6,000 that the gentleman from Kentucky referred to, and say without hearing, automatically, by action of this committee, based upon all of the evidence which the gentleman from Florida's committee has, we are going to move these 6,000 over into schedule 2 with no scientific hearings on that subject.

Mr. PEPPER. Mr. Chairman, will the gentleman yield?

Mr. SPRINGER. I yield to the gentleman from Florida.

Mr. PEPPER. Mr. Chairman, the able gentleman from Illinois, I am afraid, is not right when he says we did not have any scientific evidence before our committee. We held hearings in the city of Washington, and we had Dr. Cohen from the National Institute of Mental Health, and we also had medical authorities from all over the country who testified that in the opinion of most of them there was no medical need for more than a few hundred of these drugs, or at the outside a few thousand.

I am sure the able gentleman from Illinois is not suggesting that we have any lack of respect or lack of appreciation for the work of this committee. This bill is on the whole a good product. But we can have a difference of opinion about the provisions of the bill without impugning lack of competency or dedication to the authors of the bill. We are simply proposing that in our effort, sincere as I hope it will be regarded, that this matter should be considered by the House. And if, as the gentleman says, and as Mr. Ingersoll said, there should be a quota for these dangerous drugs, why can we not say so now?

Mr. SPRINGER. Mr. Chairman, I refuse to yield further. I did not say that at all. I said this, and I will read it again. Mr. Ingersoll said:

> You can be assured that the Bureau does anticipate utilizing the new provisions of H.R. 18583 to insure that the proper regulatory controls are imposed over those amphetamines found to require the imposition of quotas.

And the Director of this Bureau, at times upon scientific evidence, after hearings, can determine which ones are to be moved out of those 6,000 over into schedule 2.

Mr. PEPPER. Mr. Chairman, if the gentleman will yield further, in the same letter from Mr. Ingersoll, the first part of the paragraph referred to, it says:

> It is the Bureau's position that the rampant abuse of amphetamines, particularly methamphetamines, is creating a serious public health and law enforcement problem in the United States.

And then he says that you can be assured that they will do something about it.

I have a letter here from the executive director of the American Medical Association, and while they presented objections to the more rigid requirements in the amendment, we propose, he said:

> Manufacturing restrictions on the quantity of such substances produced undoubtedly would achieve a strong measure of control over the abuse of these drugs, and our Council on Mental Health and Council on Drugs favor such a measure to reduce the improper diversion of legally manufactured drugs.

Mr. SPRINGER. There has never been any doubt about that. The gentleman has not said a single thing new. It is the same thing that all these gentlemen have said.

What we have said is that on the question of them being transferred from schedule 3 to schedule 2, that they ought not be until there have been scientific hearings to determine how many of these 6,000 ought to be transferred into schedule 2. And that is exactly what the Director of the Bureau says.

Mr. PEPPER. Under our amendment would the Attorney General be required to impose any quota unless he upon the advice of the Secretary of HEW found it to be in the public interest to do so?

Mr. SPRINGER. He would have to impose quotas under this. What he has resisted is that you cannot have those unless you have hearings on this, because at the present time the evidence indicates that it does not belong in schedule 2, but belongs in schedule 3. And that is where they put it, and upon all the medical evidence and upon all the scientific information that we could find we put it in schedule 3.

May I say to my distinguished colleagues that this was gone into exhaustively. We went into this from almost every angle, as to whether or not this matter, on which the distinguished gentleman has made an able presentation of his case today—a very able presentation of his case. But we did this solely upon the scientific evidence and the recommendations of HEW that we ought not to put this over into schedule 2 until you had had hearings on all of them.

It is based upon this kind of approach that I think we ought to act and not upon the question necessarily, even though we admit with the distinguished gentleman from Florida, that there is a serious question in this amphetamine field and all of us realize this. This is the reason we passed a special bill in 1966 when the distinguished chairman of the committee, the gentleman from Arkansas (Mr. HARRIS) headed that up to control amphetamines and barbiturates, and we have a separate statute on them.

Mr. WALDIE. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I have indicated previously that I support the amendment. But on listening to the opposition's remarks, I gather from one of the speaker's that there might be a possibility of 60 some additional drugs being moved from schedule 3 to schedule 2, and the last person who addressed us remarked that there might be 6,000 or 7,000 drugs moved from schedule 3 to schedule 2.

As a matter of fact, the only opposition to this amendment that has come across my desk has come from the manufacturers of amphetamines. No other drug manufacturers have expressed opposition to this particular proposal to move those drugs from schedule 3 to schedule 2.

The committee report describes those drugs that should be included in schedule 2 and on page 4 it says:

> In the case of drugs providing serious addiction or abuse problems (those listed in schedules I and II) tighter controls are provided.

Surely there is not a soul on this floor who does not believe that the amphetamine drugs that the chairman is seeking to move into schedule 2 present serious abuse problems.

There is not a person in this Chamber, I am confident, that doubts that conviction. There is not a person in this room, I am equally certain, who believes that the medical need of this 9 billion pill production can be justified.

Of the medical need that is being serviced by the 9 billion pill production, 99.99

percent is for control of obesity and not for the control of the narcoleptic and not for the hyperkinetic child.

For controlling those legitimate needs the medical need is less than 100,000 pills annually.

It is very clear, as numerous medical authorities testified before our Committee, that less than 100,000 pills annually would meet the medical need of the hyperkinetic child and the narcoleptic patient.

So the other 8,900,000,000 being produced are for doctors treating people who are prone to overweight. Is that such a severe medical problem not susceptible to treatment by any other means than the use of these amphetamine drugs, that we should not prevent these drugs from being used for that purpose?

The consequences of this are evident in all of your neighborhoods. In all of your schools and all of your children's schools throughout this Nation. We are not dealing with just a localized and slight phenomenon that might inconvenience the drug industry or that might inconvenience some doctors—and there would be very, very few doctors—only those doctors in the trade who are known as "fat doctors" who will be inconvenienced if quotas are put on this production.

If the production of these pills for the treatment of obesity is not permitted any longer, they will be inconvenienced and three or four drug manufacturers in the entire country will be the other ones who are inconvenienced.

We are talking literally of a tragedy to the youngsters of this Nation—the youngsters in the junior high schools; in the elementary schools, in the high schools, and in the colleges.

Why do we hesitate making the decision that these are dangerous drugs that today are being abused and that they ought to be put upon that control list? There are all sorts of desirable consequences that will flow from moving them from schedule 3 to schedule 2.

The first and most desirable consequence is, and I am utterly convinced of this, that the Attorney General will demand that a quota should be imposed upon the production of this drug so that this country is not plagued with it.

The second desirable consequence that follows from moving the drug from schedule 3 to schedule 2 is that the penalties are materially increased for those selling or producing this drug illicitly.

Last year in this country 80 percent of the seizures made throughout this whole country of these pills, in the illicit traffic in the pills, by the Bureau of Narcotics, were pills produced by legitimate manufacturers. We are not talking about the basement laboratory or the clandestine laboratory. We are talking about reputable corporations that are dealing in what is becoming a tragedy in this country, and for them to suggest that they need more time to produce substitutes to control the side effects, which is essentially what they are arguing, it seems to me presents an indignity to this House.

The matter is critical. In my view, as many of you readily know, the House has responded in some instances to the problem of crime by overreacting. But where the House has acted and acted strongly, it has always been in relation to crime on the streets. Now that we are talking about crime that involves a corporation and its profits, that seems to me to be just as difficult a problem for America and ought to receive just as sincere and immediate concern in this House as does the rest of crime in America.

I was depressed, Mr. Chairman, to learn that the administration opposes this amendment. They have made a choice between protecting profits of the drug industry or protecting the children of this Nation. Their decision to favor the profits over the children is a cruel decision the consequences of which will be suffered by thousands of our young people.

The CHAIRMAN. The time of the gentleman from California has expired.

(By unanimous consent, Mr. WALDIE was allowed to proceed for 1 additional minute.)

Mr. WALDIE. This is not merely a health problem, as has been proposed. This is a crime problem also. If you think it is just a health problem, you should have attended the hearings of the Select Committee on Crime. A child who is born with brain damage is materially damaged for the rest of his life. Abuse of these drugs obviously involves a health problem. But really what is involved in this particular issue is crime and the control of crime. What is happening to the youth of this country in drug abuse, through this drug, particularly, is a crime, and it will be a greater crime if this House accedes to the arguments of the drug industry and its ardent champion, the present administration, and does not take the steps that are clearly indicated.

The CHAIRMAN. The time of the gentleman from California has again expired.

(On request of Mr. PEPPER, and by unanimous consent, Mr. WALDIE was allowed to proceed for 1 additional minute.)

Mr. PEPPER. Mr. Chairman, will the gentleman yield?

Mr. WALDIE. I yield to the distinguished chairman.

Mr. PEPPER. Did we not have many eminent authorities in this country—and these facts pertain to the District of Columbia—state that about one-half of the violent crimes in this country are committed by people under 25 years of age, and about half of those crimes are due to the influence of drugs?

Mr. WALDIE. That is correct.

Mr. GIAIMO. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Florida (Mr. PEPPER).

Let me say at the outset, Mr. Chairman, that I strongly support this legislation. The Committees on Ways and Means and Interstate and Foreign Commerce are to be commended for producing a bill which so expertly combines the weapons of law enforcement, rehabilitation, and research for a massive attack on the drug-abuse problem in the United States. They are to be commended for drafting a more realistic and equitable penalty structure for drug offenses. They have come forth with a strong bill, a humane bill, a good bill.

By supporting this legislation, Mr. Chairman, we will give our law-enforcement officials the tools they need to crack down hard on the organized criminals and pushers who profit from agony and death. Yet, at the same time, we will recognize the fact that those who are addicted to drugs are innocent victims who must be helped, not punished.

By supporting this legislation, we will be instituting a more realistic classification of drugs based on harmfulness and potential for abuse. We will be providing more funds for research and placing more emphasis on programs of drug-abuse education. We will be restricting the importation of dangerous substances and providing for better control of drugs in interstate commerce.

In short, Mr. Chairman, we will be supporting a bill which is more than a mere vehicle for moral indignation. It is instead an offer of help—help in eliminating the tragically profitable drug trade, help in providing the needed rehabilitation for the innocent victims of drugs, help in allowing our scientific and health experts to determine the true dangers of drugs.

There is one area, however, in which I think this bill can be strengthened. In addition to stopping the organized criminals and pushers, in addition to cracking down on the importation of drugs, we must do more to cut off the supply of illicit drugs at the source.

Many of our colleagues and I have cosponsored legislation introduced by the gentleman from New Jersey (Mr. RODINO) to stem the flow of drugs from abroad. This measure would cut off economic and military assistance to any nation that does not cooperate in stopping the export of dangerous drugs to the United States. I strongly urge prompt action on this measure.

What many Americans do not realize, however, is the fact that a tremendous volume of drugs legally manufactured in the United States are used illegally in this country. Testimony here and in the other body provides shocking evidence that production of such huge quantities of drugs is not necessary and cannot be justified. Some estimates suggest that manufacturers are producing up to seven times the quantity of drugs needed for legitimate medical purposes.

These statistics are particularly striking when we discuss the manufacture of amphetamines, or pep pills or "speed" if you prefer. The Select Committee on Crime reports that—

First, 8 billion amphetamines are produced each year—enough for 40 doses for every man, woman, and child in the United States;

Second, according to the National Institute of Mental Health, the legitimate medical need for them in this country is only in the thousands;

Third, over 4 billion legally manufactured amphetamines are diverted into illegal channels. Eighty percent of the FBI amphetamine seizures in 1968 were originally legally manufactured;

Fourth, drug companies have not voluntarily curtailed production; and

Fifth, the use of amphetamines is on the increase. Some of the abusers are now found on the grade school level.

These facts speak for themselves, Mr. Chairman. They convey a sense of urgency. They demand action. The distinguished gentleman from Florida (Mr. PEPPER) and his committee have given us the opportunity to act by proposing that manufacturing quotas be placed on amphetamines.

I submit that this amendment will retain the spirit of the overall legislation which already imposes manufacturing quotas on opium, methadone, and certain other drugs. I submit that this amendment will help us curb the mass production of a drug which has been taken out of legal medical channels and placed in the hands of those who would abuse it.

Why is this gross overproduction necessary, Mr. Chairman? Why are these excesses justified? Why should we allow the legitimate drug manufacturers to indirectly supply the organized criminals and pushers by producing more drugs than are necessary? When profits are made while people suffer, what difference does it make where the profits go?

I urge my colleagues to support the PEPPER amendment, Mr. Chairman, and make a good bill even better.

Mr. KYL. Mr. Chairman, will the gentleman yield?

Mr. GIAIMO. I yield to the gentleman from Iowa.

Mr. KYL. Mr. Chairman, perhaps the most important point brought out in all the discussion on this amendment is this: The debate brings to mind all of the efforts, including quotas and outright prohibition, in regard to another dangerous drug, which is alcohol. Solving this problem is a most difficult thing. We cannot expect any more simple or quick solution to this problem than we have had in the case of alcohol. This bill is a good bill, but it is only a starting point. If it serves to interest millions more Americans in a comprehensive, continuing program of education and all the rest, then it will have served its purpose.

Mr. GUDE. Mr. Chairman, I move to strike the last word.

The CHAIRMAN. The gentleman from Maryland is recognized.

Mr. GUDE. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Florida, and I want to commend him for his work in this area. The serious health and crime problem arising from drug abuse is compounded by the flood of these pills which are on the market.

I also want to commend all members of the committee for their work on this important legislation dealing with one of the Nation's most serious and complicated health and law-enforcement problems. It is a vast improvement over the existing law, and a far better bill than when it began.

I am particularly pleased by the section establishing a Commission on Marijuana and Drug Abuse. I sponsored legislation to establish a Marijuana Commission which was approved by the Judiciary Committee. This section owes much to the thought and effort of the gentleman from New York (Mr. KOCH). I hope the Commission can clear up some of the confusion and conflicting reports that have made it so difficult to formulate a sound policy on marihuana.

Mr. EDMONDSON. Mr. Chairman, will the gentleman yield?

Mr. GUDE. I yield to the gentleman from Oklahoma.

Mr. EDMONDSON. Mr. Chairman, I join the gentleman from Maryland in expressing support for this bill. I think the committee has done a fine job in dealing with one of the most pressing problems in the country today. I am particularly proud of the fact that the gentleman who has led this effort is the able gentleman from Oklahoma (Mr. JARMAN) who has provided fine leadership on this legislation.

Mr. JARMAN. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment. My remarks will be very brief, because I think the subject has been well covered in the debate.

Mr. Chairman, I think in fairness to the RECORD, I should refer again to the letter from Mr. Ingersoll to the gentleman from Florida, because the letter has been referred to in part. I think the RECORD should reflect that in the first paragraph of his letter, Mr. Ingersoll, Director of the BWDD, says to the gentleman from Florida:

> As you are aware, this matter has been under considerable review by the Bureau of Narcotics and Dangerous Drugs and the Food and Drug Administration for the past year.

Mr. Chairman, at the end of the second paragraph—and I think this should be included in the RECORD—this is said:

> However, it should be noted that it is not the intention of the Bureau, at this time, to move all the amphetamines under the quota requirements of schedule II since we are still in the process of gathering all the information on these myriad drugs and their combinations.

Mr. Chairman, I think the gentleman from Florida is certainly to be commended for his concern and his activity in this field on a subject that is of such crucial importance to all of the country. All of us are concerned about "speed" and other drugs and about the necessary controls to protect the youth and the adults of our Nation. Our own subcommittee and the full Committee on Interstate and Foreign Commerce have been vitally concerned about this subject, as reflected by the many days of hearings and the many hours of executive sessions we held in consideration of the bill which we bring to the floor of the House today.

I think, with reference to the gentleman's amendment, that it should be emphasized again that the Attorney General and HEW favor the schedules as we present them to the House in the bill today and are opposed to the gentleman's amendment. The Attorney General has the right under the present terms of the bill, if he so decides, based on all the evidence, to move these drugs from the present classification under schedule III to schedule II. He has that right if the decision is finally made that it is necessary.

Mr. Chairman, I would certainly not for a minute indicate to anyone that all of us do not change our positions and our thinking on a given subject, but I would say to the House that as recently as March 2 of this year, when the gentleman from Florida testified very ably before the subcommittee on this general subject, he concluded his testimony to the Subcommittee by saying:

> I would certainly recommend to my committee that we vary our recommendations in our two bills that I have mentioned to that effect, that we remove the section prohibiting the manufacture and sale of methamphetamines and put methamphetamines in the same category with amphetamines, to be subject to a quota system—

This certainly is the imporant part—

> if such is recommended by the Secretary of HEW, to be enforced by the Attorney General.

That, I would say to the ladies and gentleman of the House, is exactly the form in which we bring the bill to the Members today.

Mr. Chairman, I urge the defeat of the amendment.

Mr. PEPPER. Mr. Chairman, will the gentleman yield?

Mr. JARMAN. I yield to the gentleman from Florida.

Mr. PEPPER. Mr. Chairman, I commend very strongly the excellent job the gentleman and his committee have done in producing this bill.

Of course, the gentleman realizes there is room for an honest difference of opinion as to how best the House should proceed to wrestle with this particular problem.

As to the particular quotation from me to which the able gentleman referred, originally our committee introduced bills to prohibit the manufacture of methamphetamines and have quotas on amphetamines.

Representatives of the drug industry, outstanding manufacturers of drugs, credible people, came to us and proposed a sort of practical compromise and said, "If you will not introduce legislation and push for legislation to prohibit the manufacture of methamphetamines we will undertake to get the drug industry to agree to a quota system for all methamphetamines and amphetamines and kindred drugs."

After all, we live in a practical world, and we wanted to make some progress on this matter, so I took the responsibility of saying, as I said to the able gentleman's committee, "Very, well, in order to get the drug industry behind this effort to impose a quota system to protect the public against 8 billion of these pills being spewed out against the public we will not insist on our prohibitory bill and push for a quota system."

That is exactly what the able gentleman has quoted me as saying, in behalf of a quota system enforced by the Attorney General on representation of the Secretary of Health, Education, and Welfare. That is all we are asking for today.

The difference between the able gentleman's committee and ours is that we

want to make as much progress as we can today in this House. Young people or other people are losing their lives every day on account of these dangerous drugs.

Under our amendment the Attorney General would have the authority, whenever it was recommended by HEW, to impose a quota system without having to go through the long labyrinth and finally the judicial process contemplated by the gentleman.

That is the difference.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

(By unanimous consent, Mr. JARMAN was allowed to proceed for 1 additional minute.)

Mr. JARMAN. Mr. Chairman, I would only add to what has been said and to what I have said this afternoon that again I commend the distinguished gentleman from Florida on his very effective activities in this important field. But I do urge, as reflected in the decision of our subcommittee, and of the full committee, that the House defeat the pending amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Florida (Mr. PEPPER).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. PEPPER. Mr. Chairman, I demand tellers.

Tellers were refused.

So the amendment was rejected.

Mr. PEPPER. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count.

PARLIAMENTARY INQUIRIES

Mr. SPRINGER. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. SPRINGER. Is my understanding correct that the amendment was defeated?

The CHAIRMAN. The gentleman's understanding is correct.

Mr. HOSMER. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. HOSMER. Mr. Chairman, I was on my feet to demand a division before the gentleman made a point of order that a quorum was not present.

The CHAIRMAN. The Chair will state to the gentleman that the Chair had announced the noes appeared to have it on the amendment. Tellers were requested, and an insufficient number supported the demand for tellers, so tellers were refused.

The Chair is presently in the process of counting to determine whether a quorum is present.

Mr. HOSMER. My inquiry is, Mr. Chairman: In either event, will I still be recognized to demand a division?

The CHAIRMAN. The Chair will state to the gentleman that the amendment has been rejected. Therefore, a request for a division comes too late.

Mr. HOSMER. I thank the Chair.

Mr. PEPPER. Mr. Chairman, I ask unanimous consent to withdraw my point of order.

The CHAIRMAN. The gentleman from Florida will withdraw his point of order.

The CHAIRMAN. Are there any further amendments to this section of the bill? If not, the Clerk will read.

The Clerk read as follows:

PART C—REGISTRATION OF MANUFACTURERS, DISTRIBUTORS, AND DISPENSERS OF CONTROLLED SUBSTANCES

RULES AND REGULATIONS

SEC. 301. The Attorney General is authorized to promulgate rules and regulations and to charge reasonable fees relating to the registration and control of the manufacture, distribution, and dispensing of controlled substances.

PERSONS REQUIRED TO REGISTER

SEC. 302. (a) Every person who manufactures, distributes, or dispenses any controlled substance or who proposes to engage in the manufacture, distribution, or dispensing of any controlled substance, shall obtain annually a registration issued by the Attorney General in accordance with the rules and regulations promulgated by him.

(b) Persons registered by the Attorney General under this title to manufacture, distribute, or dispense controlled substances are authorized to possess, manufacture, distribute, or dispense such substances (including any such activity in the conduct of research) to the extent authorized by their registration and in conformity with the other provisions of this title.

(c) The following persons shall not be required to register and may lawfully possess any controlled substance under this title:

(1) An agent or employee of any registered manufacturer, distributor, or dispenser of any controlled substance if such agent or employee is acting in the usual course of his business or employment.

(2) A common or contract carrier or warehouseman, or an employee thereof, whose possession of the controlled substance is in the usual course of his business or employment.

(3) An ultimate user who possesses such substance for a purpose specified in section 102(25).

(d) The Attorney General may, by regulation, waive the requirement for registration of certain manufacturers, distributors, or dispensers if he finds it consistent with the public health and safety.

(e) A separate registration shall be required at each principal place of business or professional practice where the applicant manufactures, distributes, or dispenses controlled substances.

(f) The Attorney General is authorized to inspect the establishment of a registrant or applicant for registration in accordance with the rules and regulations promulgated by him.

REGISTRATION REQUIREMENTS

SEC. 303. (a) The Attorney General shall register an applicant to manufacture controlled substances in schedule I or II if he determines that such registration is consistent with the public interest and with United States obligations under international treaties, conventions, or protocols in effect on the effective date of this part. In determining the public interest, the following factors shall be considered:

(1) maintenance of effective controls against diversion of particular controlled substances and any controlled substance in schedule I or II compounded therefrom into other than legitimate medical, scientific, research, or industrial channels, by limiting the importation and bulk manufacture of such controlled substances to a number of establishments which can produce an adequate and uninterrupted supply of these substances under adequately competitive conditions for legitimate medical, scientific, research, and industrial purposes;

(2) compliance with applicable State and local law;

(3) promotion of technical advances in the art of manufacturing these substances and the development of new substances;

(4) prior conviction record of applicant under Federal and State laws relating to the manufacture, distribution, or dispensing of such substances;

(5) past experience in the manufacture of controlled substances, and the existence in the establishment of effective control against diversion; and

(6) such other factors as may be relevant to and consistent with the public health and safety.

(b) The Attorney General shall register an applicant to distribute a controlled substance in schedule I or II unless he determines that the issuance of such registration is inconsistent with the public interest. In determining the public interest, the following factors shall be considered:

(1) maintenance of effective control against diversion of particular controlled substances into other than legitimate medical, scientific, and industrial channels;

(2) compliance with applicable State and local law;

(3) prior conviction record of applicant under Federal or State laws relating to the manufacture, distribution, or dispensing of such substances;

(4) past experience in the distribution of controlled substances; and

(5) such other factors as may be relevant to and consistent with the public health and safety.

(c) Registration granted under subsections (a) and (b) of this section shall not entitle a registrant to (1) manufacture or distribute controlled substances in schedule I or II other than those specified in the registration, or (2) manufacture any quantity of those controlled substances in excess of the quota assigned pursuant to section 306.

(d) The Attorney General shall register an applicant to manufacture controlled substances in schedule III, IV, or V, unless he determines that the issuance of such registration is inconsistent with the public interest. In determining the public interest, the following factors shall be considered:

(1) maintenance of effective controls against diversion of particular controlled substances and any controlled substance in schedule III, IV, or V compounded therefrom into other than legitimate medical, scientific, or industrial channels;

(2) compliance with applicable State and local law;

(3) promotion of technical advances in the art of manufacturing these substances and the development of new substances;

(4) prior conviction record of applicant under Federal or State laws relating to the manufacture, distribution, or dispensing of such substances;

(5) past experience in the manufacture, distribution, and dispensing of controlled substances, and the existence in the establishment of effective controls against diversion; and

(6) such other factors as may be relevant to and consistent with the public health and safety.

(e) The Attorney General shall register an applicant to distribute controlled substances in schedule III, IV, or V, unless he determines that the issuance of such registration is inconsistent with the public interest. In determining the public interest, the following factors shall be considered:

(1) maintenance of effective controls against diversion of particular controlled substances into other than legitimate medical, scientific, and industrial channels;

(2) compliance with applicable State and local law;

(3) prior conviction record of applicant under Federal or State laws relating to the

manufacture, distribution, or dispensing of such substances;

(4) past experience in the distribution of controlled substances; and

(5) such other factors as may be relevant to and consistent with the public health and safety.

(f) Practitioners shall be registered to dispense or conduct research with controlled substances in schedule II, III, IV, or V if they are authorized to dispense or conduct research under the law of the State in which they practice. Separate registration under this part for practitioners engaging in research with nonnarcotic controlled substances in schedule II, III, IV, or V, who are already registered under this part in another capacity, shall not be required. Pharmacies (as distinguished from pharmacists) when engaged in commercial activities, shall be registered to dispense controlled substances in schedule II, III, IV, or V if they are authorized to dispense under the law of the State in which they regularly conduct business. Registration applications by practitioners wishing to conduct research with controlled substances in schedule I shall be referred to the Secretary, who shall determine qualifications and competency of each practitioner requesting registration, as well as the merits of the research protocol. The Secretary, in determining the merits of each research protocol, shall consult with the Attorney General as to effective procedures to adequately safeguard against diversion of such controlled substances from legitimate medical or scientific use. Registration for the purpose of bona fide research with controlled substances in schedule I by a practitioner deemed qualified by the Secretary may be denied by the Attorney General only on a ground specified in section 304(a).

DENIAL, REVOCATION, OR SUSPENSION OF REGISTRATION

SEC. 304. (a) A registration pursuant to section 303 to manufacture, distribute, or dispense a controlled substance may be suspended or revoked by the Attorney General upon a finding that the registrant—

(1) has materially falsified any application filed pursuant to or required by this title or title III;

(2) has been convicted of a felony under this title or title III or any other law of the United States, or of any State, relating to any substance defined in this title as a controlled substance; or

(3) has had his State license or registration suspended, revoked, or denied by competent State authority and is no longer authorized by State law to engage in the manufacturing, distribution, or dispensing of controlled substances.

(b) The Attorney General may limit revocation or suspension of a registration to the particular controlled substance with respect to which grounds for revocation or suspension exist.

(c) Before taking action pursuant to this section, or pursuant to a denial of registration under section 303, the Attorney General shall serve upon the applicant or registrant an order to show cause why registration should not be denied, revoked, or suspended. The order to show cause shall contain a statement of the basis thereof and shall call upon the applicant or registrant to appear before the Attorney General at a time and place stated in the order, but in no event less than thirty days after the date of receipt of the order. Proceedings to deny, revoke, or suspend shall be conducted pursuant to this section in accordance with subchapter II of chapter 5 of title 5 of the United States Code. Such proceedings shall be independent of, and not in lieu of, criminal prosecutions or other proceedings under this title or any other law of the United States.

(d) The Attorney General may, in his discretion, suspend any registration simultaneously with the institution of proceedings under this section, in cases where he finds that there is an imminent danger to the public health or safety. Such suspension shall continue in effect until the conclusion of such proceedings, including judicial review thereof, unless sooner withdrawn by the Attorney General or dissolved by a court of competent jurisdiction.

(e) The suspension or revocation of a registration under this section shall operate to suspend or revoke any quota applicable under section 306.

(f) In the event the Attorney General suspends or revokes a registration granted under section 303, all controlled substances owned or possessed by the registrant pursuant to such registration at the time of suspenion or the effective date of the revocation order, as the case may be, may, in the discretion of the Attorney General, be placed under seal. No disposition may be made of any controlled substances under seal until the time for taking an appeal has elapsed or until all appeals have been concluded except that a court, upon application therefor, may at any time order the sale of perishable controlled substances. Any such order shall require the deposit of the proceeds of the sale with the court. Upon a revocation order becoming final, all such controlled substances (or proceeds of sale deposited in court) shall be forfeited to the United States; and the Attorney General shall dispose of such controlled substances in accordance with section 511(e).

LABELING AND PACKAGING REQUIREMENTS

SEC. 305. (a) It shall be unlawful to distribute a controlled substance in a commercial container unless such container, when and as required by regulations of the Attorney General, bears a label (as defined in section 201(k) of the Federal Food, Drug, and Cosmetic Act) containing an identifying symbol for such substance in accordance with such regulations. A different symbol shall be required for each schedule of controlled substances.

(b) It shall be unlawful for the manufacturer of any controlled substance to distribute such substance unless the labeling (as defined in section 201(m) of the Federal Food, Drug, and Cosmetic Act) of such substance contains, when and as required by regulations of the Attorney General, the identifying symbol required under subsection (a).

(c) The Secretary shall prescribe regulations under section 503(b) of the Federal Food, Drug, and Cosmetic Act which shall provide that the label of a drug listed in schedule II, III, or IV shall, when dispensed to or for a patient, contain a clear, concise warning that it is a crime to transfer the drug to any person other than the patient.

(d) It shall be unlawful to distribute controlled substances in schedule I or II, and narcotic drugs in schedule III or IV, unless the bottle or other container, stopper, covering, or wrapper thereof is securely sealed as required by regulations of the Attorney General.

QUOTAS APPLICABLE TO CERTAIN SUBSTANCES

SEC. 306. (a) The Attorney General shall determine the total quantity and establish production quotas for each basic class of controlled substance in schedules I and II to be manufactured each calendar year to provide for the estimated medical, scientific, research, and industrial needs of the United States, for lawful export requirements, and for the establishment and maintenance of reserve stocks. Production quotas shall be established in terms of quantities of each basic class of controlled substance and not in terms of individual pharmaceutical dosage forms prepared from or containing such a controlled substance.

(b) The Attorney General shall limit or reduce individual production quotas to the extent necessary to prevent the aggregate of individual quotas from exceeding the amount determined necessary each year by the Attorney General under subsection (a). The quota of each registered manufacturer for each basic class of controlled substance in schedule I or II shall be revised in the same proportion as the limitation or reduction of the aggregate of the quotas. However, if any registrant, before the issuance of a limitation or reduction in quota, has manufactured in excess of his revised quota, the amount of the excess shall be subtracted from his quota for the following year.

(c) On or before July 1 of each year, upon application therefor by a registered manufacturer, the Attorney General shall fix a manufacturing quota for the basic classes of controlled substances in schedules I and II that the manufacturer seeks to produce. The quota shall be subject to the provisions of subsections (a) and (b) of this section. In fixing such quotas, the Attorney General shall determine the manufacturer's estimated disposal, inventory, and other requirements for the calendar year; and, in making his determination, the Attorney General shall consider the manufacturer's current rate of disposal, the trend of the national disposal rate during the preceding calendar year, the manufacturer's production cycle and inventory position, the economic availability of raw materials, yield and stability problems, emergencies such as strikes and fires, and other factors.

(d) The Attorney General shall, upon application and subject to the provisions of subsections (a) and (b) of this section, fix a quota for a basic class of controlled substance in schedule I or II for any registrant who has not manufactured that basic class of controlled substance during one or more preceding calendar years. In fixing such quota, the Attorney General shall take into account the registrant's reasonably anticipated requirements for the current year; and, in making his determination of such requirements, he shall consider such factors specified in subsection (c) of this section as may be relevant.

(e) At any time during the year any registrant who has applied for or received a manufacturing quota for a basic class of controlled substance in schedule I or II may apply for an increase in that quota to meet his estimated disposal, inventory, and other requirements during the remainder of that year. In passing upon the application the Attorney General shall take into consideration any occurrences since the filing of the registrant's initial quota application that may require an increased manufacturing rate by the registrant during the balance of the year. In passing upon the application the Attorney General may also take into account the amount, if any, by which the determination of the Attorney General under subsection (a) of this section exceeds the aggregate of the quotas of all registrants under this section.

(f) Notwithstanding any other provisions of this title, no registration or quota may be required for the manufacture of such quantities of controlled substances in schedules I and II as incidentally and necessarily result from the manufacturing process used for the manufacture of a controlled substance with respect to which its manufacturer is duly registered under this title. The Attorney General may, by regulation, prescribe restrictions on the retention and disposal of such incidentally produced substances.

RECORDS AND REPORTS OF REGISTRANTS

SEC. 307. (a) Except as provided in subsection (c)—

(1) every registrant under this title shall on the effective date of this section, or as

soon thereafter as such registrant first engages in the manufacture, distribution, or dispensing of controlled substances, and every second year thereafter, make a complete and accurate record of all stocks thereof on hand, except that the regulations prescribed under this section shall permit each such biennial inventory (following the initial inventory required by this paragraph) to be prepared on such registrant's regular general physical inventory date (if any) which is nearest to and does not vary by more than six months from the biennial date that would otherwise apply;

(2) on the effective date of each regulation of the Attorney General controlling a substance that immediately prior to such date was not a controlled substance, each registrant under this title manufacturing, distributing, or dispensing such substance shall make a complete and accurate record of all stocks thereof on hand; and

(3) on and after the effective date of this section, every registrant under this title manufacturing, distributing, or dispensing a controlled substance or substances shall maintain, on a current basis, a complete and accurate record of each such substance manufactured, received, sold, delivered, or otherwise disposed of by him, except that this paragraph shall not require the maintenance of a perpetual inventory.

(b) Every inventory or other record required under this section (1) shall be in accordance with, and contain such relevant information as may be required by, regulations of the Attorney General, (2) shall (A) be maintained separately from all other records of the registrant, or (B) alternatively, in the case of nonnarcotic controlled substances, be in such form that information required by the Attorney General is readily retrievable from the ordinary business records of the registrant, and (3) shall be kept and be available, for at least two years, for inspection and copying by officers or employees of the United States authorized by the Attorney General.

(c) The foregoing provisions of this section shall not apply—

(1) (A) with respect to narcotic controlled substances in schedule II, III, IV, or V, to the prescribing or administering of such substances by a practitioner in the lawful course of his professional practice; or

(B) with respect to nonnarcotic controlled substances in schedule II, III, IV, or V, to any practitioner who dispenses such substances to his patients, unless the practitioner is regularly engaged in charging his patients, either separately or together with charges for other professional services, for substances so dispensed;

(2) (A) to the use of controlled substances, at establishments registered under this title which keep records with respect to such substances, in research conducted in conformity with an exemption granted under section 505 (i) or 512(j) of the Federal Food, Drug, and Cosmetic Act;

(B) to the use of controlled substances, at establishments registered under this title which keep records with respect to such substances, in preclinical research or in teaching; or

(3) to the extent of any exemption granted to any person, with respect to all or part of such provisions, by the Attorney General by or pursuant to regulation on the basis of finding that the application of such provisions (or part thereof) to such person is not necessary for carrying out the purposes of this title.

(d) Every manufacturer registered under section 303 shall, at such time or times and in such form as the Attorney General may require, make periodic reports to the Attorney General of every sale, delivery, or other disposal by him of any controlled substance, and each distributor shall make such reports with respect to narcotic controlled substances, identifying by the registration number assigned under this title the person or establishment (unless exempt from registration under section 302(d)) to whom such sale, delivery, or other disposal was made.

(e) Regulations under sections 505(i) and 512(j) of the Federal Food, Drug, and Cosmetic Act, relating to investigational use of drugs, shall include such procedures as the Secretary, after consultation with the Attorney General, determines are necessary to insure the security and accountability of controlled substances used in research to which such regulations apply.

ORDER FORMS

SEC. 308. (a) It shall be unlawful for any person to distribute a controlled substance in schedule I or II to another except in pursuance of a written order of the person to whom such substance is distributed, made on a form to be issued by the Attorney General in blank in accordance with subsection (d) and regulations prescribed by him pursuant to this section.

(b) Nothing in subsection (a) shall apply to—

(1) the exportation of such substances from the United States in conformity with title III;

(2) the delivery of such a substance to or by a common or contract carrier for carriage in the lawful and usual course of its business, or to or by a warehouseman for storage in the lawful and usual course of its business; but where such carriage or storage is in connection with the distribution by the owner of the substance to a third person, this paragraph shall not relieve the distributor from compliance with subsection (a).

(c) (1) Every person who in pursuance of an order required under subsection (a) distributes a controlled substance shall perserve such order for a period of two years, and shall make such order available for inspection and copying by officers and employees of the United States duly authorized for that purpose by the Attorney General, and by officers or employees of States or their political subdivisions who are charged with the enforcement of State or local laws regulating the production, or regulating the distribution or dispensing, of controlled substances and who are authorized under such laws to inspect such orders.

(2) Every person who gives an order required under subsection (a) shall, at or before the time of giving such order, make or cause to be made a duplicate thereof on a form to be issued by the Attorney General in blank in accordance with subsection (d) and regulations prescribed by him pursuant to this section, and shall, if such order is accepted, preserve such duplicate for a period of two years and make it available for inspection and copying by the officers and employees mentioned in paragraph (1) of this subsection.

(d) (1) The Attorney General shall issue forms pursuant to subsections (a) and (c) (2) only to persons validly registered under section 303 (or exempted from registration under section 302(d)). Whenever any such form is issued to a person, the Attorney General shall, before delivery thereof, insert therein the name of such person, and it shall be unlawful for any other person (A) to use such form for the purpose of obtaining controlled substances or (B) to furnish such form to any person with intent thereby to procure the distribution of such substances.

(2) The Attorney General may charge reasonable fees for the issuance of such forms in such amounts as he may prescribe for the purpose of covering the cost to the United States of issuing such forms, and other necessary activities in connection therewith.

(e) It shall be unlawful for any person to obtain by means of order forms issued under this section controlled substances for any purpose other than their use, distribution, dispensing, or administration in the conduct of a lawful business in such substances or in the course of his professional practice or research.

PRESCRIPTIONS

SEC. 309. (a) Except when dispensed directly by a practitioner, other than a pharmacist, to an ultimate user, no controlled substance in schedule II, which is a prescription drug as determined under the Federal Food, Drug, and Cosmetic Act, may be dispensed without the written prescription of a practitioner, except that in emergency situations, as prescribed by the Secretary by regulation after consultation with the Attorney General, such drug may be dispensed upon oral prescription in accordance with section 503(b) of that Act. Prescriptions shall be retained in conformity with the requirements of section 307 of this title. No prescription for a controlled substance in schedule II may be refilled.

(b) Except when dispensed directly by a practitioner, other than a pharmacist, to an ultimate user, no controlled substance in schedule III or IV, which is a prescription drug as determined under the Federal Food, Drug, and Cosmetic Act, may be dispensed without a written or oral prescription in conformity with section 503(b) of that Act. Such prescriptions may not be filled or refilled more than six months after the date thereof or be refilled more than five times after the date of the prescription unless renewed by the practitioner.

(c) No controlled substance in schedule V which is a drug may be distributed or dispensed other than for a medical purpose.

(d) Whenever it appears to the Attorney General that a drug not considered to be a prescription drug under the Federal Food, Drug, and Cosmetic Act should be so considered because of its abuse potential, he shall so advise the Secretary and furnish to him all available data relevant thereto.

Mr. JARMAN (during the reading). Mr. Chairman, I ask unanimous consent that further reading of part C be dispensed with, and that it be considered as read down through line 2 on page 164, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

AMENDMENT OFFERED BY MR. VAN DEERLIN

Mr. VAN DEERLIN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. VAN DEERLIN: On page 153, after line 21, insert the following:

"(e) (1) Chapter V of the Federal Food, Drug, and Cosmetic Act is amended by adding at the end thereof the following new section:

" 'IDENTIFICATION OF CONTROLLED DRUGS

" 'SEC. 513. (a) The Secretary may, by regulation, establish a uniform code or system of coding applicable to controlled drugs consisting of symbols representing—

" '(1) the identity of the manufacturer of each drug,

" '(2) the identity of the drug,

" '(3) the identity of the final packager (if different from the manufacturer) of the drug,

" '(4) the dosage form and strength of the drug, and

" '(5) the number of drug units in the immediate container of the drug. The Secretary shall transmit copies of such code or code system to hospitals, poison control centers, and such other persons as he deems necessary in order to carry out the purposes of this section.

"'(b) For purposes of this section, and section 502(b) and 502(p), the term "manufacturer" includes any person who manufactures, processes, or compounds a controlled drug in tablet, capsule, or other final dosage form, except that such term does not include—

"'(1) a licensed practitioner (other than a pharmacist) who in accordance with applicable local law does so in the course of his professional practice solely for the purpose of dispensing or administering such drug to a patient, or

"'(2) a pharmacist who in accordance with applicable local law manufacturers, processes, or compounds such a drug in the course of his professional practice for direct dispensing by him upon prescription of a licensed practitioner; the term "final packager" does not apply to a dispenser solely by reason of repacking a drug into the dispensed package in filling a prescription; and the term "controlled drug" means a prescription drug which is a controlled susbtance under section 102 of the Controlled Substances Act'."

"'(2) Section 502 of such Act is amended by adding at the end thereof the following:

"'(p) If it is a controlled drug, unless—

"'(1) the immediate and outside containers (if any) thereof each bear a label which has prominently placed thereon the symbol or symbols contained in the code or system of coding established pursuant to section 513 which represents—

"'(A) the identity of the manufacturer of the drug,

"'(B) the identity of the drug,

"'(C) the identity of the final packager (if different from the manufacturer) of the drug,

"'(D) the dosage form and strength of the drug, and

"'(E) the number of drug units in the immediate container of the drug; and

"'(2) in the case of such a drug manufactured, processed, or compounded in tablet or capsule form, each tablet or capsule is clearly marked with the symbol or symbols contained in such code or system of coding which represents the identity of the manufacturer and the identity and strength of the drug of which the tablet or capsule is composed: *Provided*, That the Secretary may exempt from the operation of clause (1) of this paragraph any immediate container of any controlled drug if he determines that it is impracticable for such container to bear a label which has prominently placed thereon an identifying symbol because of the size or any other relevant aspect of such container, and that such exemption will not be inconsistent with the protection of the public health: *And provided further*, That the Secretary may exempt from the operation of clause (2) of this paragraph any tablet or capsule if he determines that it is impracticable for such tablet or capsule to bear an identifying symbol because of the size, composition, or any other relevant aspect of such tablet or capsule, and that such exemption will not be inconsistent with the protection of the public health.'

"(3) Effective only with respect to drugs manufactured or finally packaged, as the case may be, after the effective date of this section, section 502(b) of such Act is amended by inserting before the period at the end thereof the following: *'And provided further*, That in the case of a controlled drug, the requirements of clause (1) shall be deemed satisfied only if the label contains the name and place of business of the manufacturer or, if different, the final package of the drug'.

"(4) Notwithstanding section 704(c), the amendments made by paragraph (2) shall apply only to drugs manufactured on or after the first day of the twenty-fifth calendar month that begins after the month in which the initial regulations pursuant to section 513 of the Federal Food, Drug, and Cosmetic Act, establishing a uniform code or system of coding applicable to controlled drugs, are promulgated."

Mr. VAN DEERLIN (during the reading). Mr. Chairman, I ask unanimous consent that further reading of the amendment be dispensed with and that it be printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. VAN DEERLIN. Mr. Chairman, the amendment I am offering incorporates labeling recommendations made by the Department of Health, Education, and Welfare under both the Johnson and the Nixon administrations. In the compendium of the Senate hearings on prescription drug legislation, which were held last April, Dr. Roger Egeberg, Under Secretary of Health, Education, and Welfare, the top doctor in Government, quotes from President Nixon's messages to Congress on October 30 of last year. The President called for measures to assure greater protection of the public health and welfare. He asked for congressional action, and I am now quoting from President Nixon's address to this body:

> Action which would make possible for the first time the rapid identification of drugs and drug containers in a time of personal emergency.

Mr. Chairman, there have been bills offered which would require this labeling of pills or capsules for all prescription drugs. My amendment addresses itself only to those dangerous drugs which will be controlled under the act. It will authorize the Secretary of Health, Education, and Welfare to establish a uniform coding system—a system which, by the way, is already devised and ready to be used.

Mr. Chairman, this code would consist of symbols telling the following things about these dangerous drugs: First, the identity of the manufacturer of the tablet or capsule; second, the identity of the drug; third, the identity of the packager if different from the manufacturer; fourth, the dosage form and strength of the drug; and fifth, the number of drug units in the immediate container of the drug.

Mr. Chairman, this amendment is needed from two standpoints—medical and legal. It is a reasonable approach in that it gives the Department of Health, Education, and Welfare discretion as to whether the code should be established. It also would give the Department leeway in exempting controlled drugs from the requirement when labeling might prove impractical—as when a pill is too small to carry full code symbols.

Five or six leading manufacturers already have adopted this system. I would cite the longtime appearance of the "B" on common aspirin tablets with which we are all familiar.

My amendment would exempt specifically physicians or pharmacists filling individual prescriptions.

Lack of effective labeling requirements has caused great inconvenience of the Bureau of Narcotics and Dangerous Drugs. In the Bureau's testing and research laboratories, drugs of unknown origin are subjected to basically the same kind of ballistics tests as rifle bullets. This method of identification reportedly works about 80 percent of the time, because the presses that stamp out tablets leave unique "signatures," microscopic imprints that can come from only one press.

But, this method of detection takes time. Moreover, to be 100 percent effective, the Bureau would have to accumulate samples from every pill press—legitimate and clandestine, in the country—a practical impossibility. And capsules pose an even stiffer challenge to the Bureau's investigators, since they lack the minute markings left by punches and dies on all tablets. My amendment would require, if the drug is contained in capsule form, that the capsule be marked in lieu of a pill marking.

The CHAIRMAN. The time of the gentleman from California has expired.

(By unanimous consent, Mr. VAN DEERLIN was allowed to proceed for 1 additional minute.)

Mr. VAN DEERLIN. In addition to simplifying the identification of a drug, the coded labels would also discourage counterfeiters seeking to capitalize on the reputation of legitimate drug manufacturers, a point that should impress the Pharmaceutical Manufacturers Association.

Now, Mr. Chairman, there is a lifesaving aspect to this amendment, having nothing to do with criminal drug abuse. That aspect was brought to our attention in a letter to the Speaker of this body from a Mayo Clinic doctor out in the district of our colleague, the gentleman from Minnesota, Mr. ALBERT QUIE, and I believe Mr. QUIE is going to touch upon this briefly in independent remarks.

Mr. Chairman, I do hope that this Committee will give full and considerate attention to this proposal—another important step in making these dangerous drugs less easily available to Americans, especially young Americans.

Mr. JARMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I do so on the basis that we have not had hearings on this matter. We can certainly take the position today of assuring the gentleman from California that the subcommittee will hold hearings on this subject. It is a measure that has been introduced by the gentleman and on this general subject there is a bill which has been introduced by the chairman of the full committee and which is now pending before the Committee.

We do feel that on this subject more detailed testimony is necessary as to the effect that it would have, and that hearings should be held before we make a final judgment on it.

Mr. VAN DEERLIN. Mr. Chairman, will the gentleman yield?

Mr. JARMAN. I yield to the gentleman from California.

Mr. VAN DEERLIN. I realize that my words do not always fall as pearls within this body, nor within the subcommit-

tees of this body. I recall testifying on this subject before the subcommittee during these hearings, and I was under the assumption that mine was among the bills which were being considered in those 40 or 50 sessions of the subcommittee.

Surely on the Senate side one can see that a very fat compendium of testimony that has been taken on this and other aspects of the drug-abuse problem. On this matter of drug labeling, Senator DOMINICK questioned witnesses in some detail, including the president of the Pharmaceutical Manfacturers Association. A requirement for stamping and labeling is a simple thing, enabling doctors or investigators to know immediately what is in pills, and where they come from. And I can assure the gentleman that as the Representative of a district along the international border, I feel a special urgency for closing all these loopholes in the fight against free-flowing drugs.

Mr. JARMAN. I certainly recognize, I will say to the gentleman from California, that he did make reference to his bill in his testimony before our subcommittee. We did not hear testimony on the subject from the departments and from other witnesses during the hearings, and it just seems to me that the position we do take today is that it should be gone into more thoroughly and that it is only for that reason that I oppose the gentleman's amendment.

Mr. SPRINGER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, may I say to my distinquished colleague, the gentleman from California (Mr. VAN DEERLIN), who has spent a lot of time on this subject, that the chairman of the full committee, the gentleman from West Virginia (Mr. STAGGERS), and I introduced a bill which is not exactly this bill, but quite similar. However, I will say that my investigation of this, after I had gone into it, left me with some hesitation until we had hearings on this as to exactly what kind of a labeling process we ought to go through.

This is something that ought to be heard, I think, in considerable detail.

I have tried to figure if I could amend the amendment offered by the gentleman from California (Mr. VAN DEERLIN) to bring it within the scope of what I have in mind, but I am still convinced that even if I could it would be wrong at this time to try to amend the gentleman's bill with no more information than I have presently on it. The gentleman has a good idea, I will assure the House, but I do think it would be wrong here today to take this amendment, and I have read it and reread it, and it is a complicated amendment, without any question, as to just what the extent of this would be if we put this into effect in this bill, with no more information than we presently have.

I want to commend the gentleman for this thought, because the chairman of the committee and I have been thinking along the same lines, and the bill is not exactly as this amendment, it is quite simple.

But I do oppose the amendment today because I do believe it would be precipitous to go ahead with the amendment until we had clear evidence as to exactly what should be done.

Mr. VAN DEERLIN. Mr. Chairman, would the gentleman yield?

Mr. SPRINGER. I yield to the gentleman from California.

Mr. VAN DEERLIN. Mr. Chairman, without throwing in the towel, may I say to the gentleman from Illinois (Mr. SPRINGER) that in the event my amendment should lose, as it well may, I feel I do have the assurances of both the gentleman from Illinois and the chairman of the subcommittee that the earliest hearings will be given to this subject in the new Congress.

Mr. SPRINGER. I can assure the gentleman from California that that will be insofar as I am concerned on my side.

Mr. QUIE. Mr. Chairman, I move to strike out the last word and rise in support of the amendment.

Mr. Chairman, I expected to give strong support to the amendment offered by the gentleman from California (Mr. VAN DEERLIN). I, too, have listened to the assurances of the chairman of the subcommittee and the ranking member of the commmittee that they will be going into this matter and expect to bring out legislation on the labeling of drugs.

I know that the amendment proposed does not go so far as the gentleman from California wanted it to go, but I want to take this time to indicate my strong support for this amendment and the desirability of labeling the drugs.

I have talked on two occasions with Dr. Charles Moertel of the Mayo Clinic who has laid out to me the picture of the danger of unlabeled drugs and the problem that that causes doctors, pharmacists, and hospitals in trying to identify a drug.

He mentions in an article which I will ask permission to have included in my remarks when we go back into the House again, the case of a child who had swallowed some pill and he ended up in the hospital. There was no way for the hospital personnel to determine what the drug was and when they finally found the parents, it was too late. The child died. There is another instance of a young man who was on his way to his wedding rehearsal who was hurt in an auto accident and because of the inability to identify the drugs he lost his life.

I was surprised to learn about the frequency of mixups on drugs in hospitals. Many times, of course, it does not result in a death, but occasionally it does. As he mentioned, we find on little candies like lifesavers that they are able to print on "lifesavers." Likewise a number or code can easily be placed on pills to identify the drug content. It is not a hardship because of the fact that some drug companies already do put labels on all of their drugs and they can be identified. Some of them are responsible and some drug companies are doing it. There is no reason why everybody else cannot do it as well.

For these reasons, I think that since the American people spend about $3 billion a year on drugs, it is of the utmost importance to their safety that these drugs all be labeled so that it might be known what the actual drug is that a person has taken. A tremendous number of lives could be saved by following this procedure.

The above-mentioned article follows:

DEATH BY PRESCRIPTION—THE UNMARKED PILL[1]

(By Charles G. Moertel, M.D., Mayo Clinic and Mayo Foundation: Section of Internal Medicine, Rochester, Minn.)

"I do remember an apothecary,—
And hereabouts he dwells . . . .
And if a man did need a poison now . . .
Here lives a catiff wretch would sell it him."

—Romeo and Juliet V. 1.

Think about Mary Anderson, 3 years old. Mary's an only child and she came very late, so perhaps understandably her parents are reluctant to leave her with a baby sitter. But tonight's a very special night, and they have left her in the care of a well-recommended neighbor girl just home from college. Shortly after the Andersons left, a phone call came for them and the sitter politely took the message. While she was doing this, little Mary went on a treasure hunt in her parents' bedroom. She came upon a marvelous find—a gold box with jewels on the cover and filled with pink candies. When the sitter found her, Mary had eaten almost all of them. In a panic, the sitter tried to get Mary to spit out the drugs, then tried to make her throw up. In their hurry Mary's parents had not said where they could be reached; the frightened sitter called her own father who rushed Mary to the hospital. When they arrived Mary was pale and sweating. A stomach tube was put down but it was of no help and little Mary Anderson became comatose. The sitter had brought the remaining pills, and the hospital staff made frantic efforts to identify the drug so that Mary could have specific treatment; they failed—the pills had no identifying marks or characteristics. Finally Mary's parents were located—her mother knew the name of the drug—yes, there was a specific treatment which could. . . . Too late—Mary was dead. Poor Mary Anderson!

Manufactured histrionics? Things like that don't really happen?

In this country our children are poisoning themselves at a rate of roughly 1,500 a day and hundreds of these poisoned children die each year. The most common agents involved in this accidental childhood poisonings are not household cleaners or pesticides or the like—they are drugs. Half of all the poisonings in children less than 5 years of age are due to drugs, and this proportion is steadily increasing year by year. If these drugs cannot be promptly identified, children will die.

Perhaps the death of a child is too maudlin. Look at this problem then from another perspective. Consider Bill Johnson—nice young fellow—you'd like him—graduated at the top of his law class a few years ago—a bachelor but not for long—Bill's already been staked out and he's getting married this Saturday. He had to try a case out of town today and he's rushing home to get to the wedding rehearsal—maybe driving a little too fast—look out! a tire's blown—hang onto that wheel—car's rolling over—quiet green countryside jarred by the crash of metal—motorists stop—people running—police cars' flashing red lights—ambulance-sirens whooping—emergency room—rushing litters—he's unconscious—head injuries—got a bottle of pills in his pocket—rush them to the pharmacy for identification—pupils look all right—head X-rays OK—chest X-ray shows some rib fractures—

[1] Presented at the 73rd Annual Conference of the Association of Food and Drug Officials of the United States, Miami Beach, Florida, June 1969.

pharmacist says he can't identify the pills—damn! Should be all right to observe him overnight—send him to intensive care—seems to be coming around this morning—beginning to regain consciousness—said a few words—wait!—pulse more rapid—he's pale—blood pressure down—abdomen rigid—must be a ruptured spleen—get the OR ready—crossmatch five units of blood—litters rushing—IV running—bright lights—green gowns—green masks—abdomen open—lot of blood—suction—instruments clatter and slap—got the spleen—there's the rupture—hemostats—suture—got it—blood pressure's falling—pump the blood—no pressure at all—can't get a pulse—external massage—still no pulse—open the chest—defibrillators—no response—stop the blood—gloves snap off—things were going so well I thought he was going to make it—a young fellow, too bad.

Bill Johnson is now tabulated as another traffic fatality but this wasn't why Bill died. He had a mild concussion and a ruptured spleen that was treated promptly. He should have lived. The real cause of Bill's death? The unmarked pill. Young Bill had asthma that flared with the nervous tension of his impending wedding. His doctor was treating him with a synthetic cortisone. This had suppressed Bill's adrenal glands and they were unable to respond to the consecutive stresses of the accident and major surgery. Bill died of acute adrenal failure. Had his surgeon been able to recognize the anonymous pill, cortisone would have been given before and during the operation. The plans would have been delayed a bit, but Bill would have gone to his wedding. Now he's going to his funeral.

Well, the chance of somebody taking a potent drug being involved in an accident must be—what? One in a million?

In the single year of 1967, a total of 930,000,000 out-of-hospital drug prescriptions were filled, at a total cost of well over three billion dollars. Seven out of every 10 Americans used one or more prescription drugs. There was an average of 4.75 drug prescriptions for every man, woman, and child in the United States. The toll of morbidity and mortality exacted in each year on our highways need not be reiterated, and these represent only a fraction of the whole of emergency problems presented at our hospitals. In any of these, proper recognition of drug intake may play a vital role in patient survival.

These are not artificial problems fabricated or exaggerated for dramatic effect. They are disturbingly real. They occur in staggering numbers.

Let me take you into our hospitals and show you what may happen there. Mr. Jones and Mr. Smith are sharing a double room. Mr. Jones is recovering from surgery to repair a hernia—since he has varicose veins, his doctor wisely put him on a blood-thinning anticoagulant medicine after surgery to prevent the formation of blood clots. The laboratory tests, however, have shown that Mr. Jones is quite sensitive to these drugs and his blood is getting a little too thin. Besides, he's up and around now and should be going home in a day or two, so he really doesn't need this treatment any longer. Today his doctor has ordered vitamin K to counteract the effect of the blood thinner.

Mr. Smith on the other hand has had a mild heart attack, but he was hospitalized promptly and no real damage has been done. Today his doctor has ordered a large starting dose of an anticoagulant to quickly thin his blood and protect Mr. Smith against a more major coronary attack. So here are two routine medical problems being treated properly, and both patients should do very well.

Now today Suzie Michaels is the medication nurse. She's preparing the drugs ordered for Mr. Jones and Mr. Smith—carefully dispensing them in paper cups that contain the medication cards identifying patients and drug. As Suzie is walking briskly down the corridor with her medication tray she collides with an intern coming out of an examining room. The medication tray is jostled, cups spill. Suzie's flustered as the intern grins. She quickly puts the tray back in order, and regains her composure. Mr. Jones and Mr. Smith receive their medications, bask in Suzie's bright young smile, and the hospital settles down to its daily routine. When Suzie checks in for work the next morning she hears about all the excitement that had occurred on the night shift. Mr. Jones died suddenly of a cerebral hemorrhage, and just an hour later Mr. Smith, right there in the same room, died of a major heart attack. Suzie clucks her concern about these two nice men and says it's too bad the doctors couldn't have done more for them. Suzie never knew that she had killed them both—Suzie and the unidentified pill. You see, in that little mishap in the corridor yesterday that Suzie has since forgotten she'd switched the pills of Mr. Jones and Mr. Smith. She never knew, the pills looked so much alike, and now Mr. Jones and Mr. Smith share the same obituary page.

Too extreme? Things like that just don't happen in our modern hospitals?

Let's look at facts again. In Table 1 you see documented the rate of occurrence of drug administration errors as observed by careful monitoring in two of our fine university teaching hospitals. Some type of error was committed in 15% of all drug administrations, and in 6% this was a major and very hazardous error that involved giving the wrong drug or the wrong dose. The average hospitalized patient received six to eight doses each day; this means that each day the average hospital patient was subjected to a drug administration error and every third day he was subjected to a major drug error. These figures in no way reflect on the competence or devotion of those handling drugs in our hospital; rather they put in bold relief the striking opportunity for human error presented by the multitude of drugs that are competely unidentifiable in the form in which they are dispensed to the patient. It should be emphasized that this is reported in blue ribbon, showcase hospitals—the university teaching hospital, well staffed with highly trained personnel. Think a bit about small community hospitals struggling to maintain any kind of house staff at all.

TABLE 1.—OCCURRENCE OF DRUG ADMINISTRATION ERRORS

| University teaching hospitals | Percent of administrations | |
|---|---|---|
| | Drug errors (all types) | Wrong drug or wrong dose |
| University of Arkansas | 13.9 | 6.9 |
| University of Florida | 15.4 | 5.8 |

Source: Barker, K., Kimbrough, W., and Heller, W.: The Medication Error Problem in Hospitals. Part I. Hosp Formulary Manage 1:29-35 (Feb.) 1966.

Still not involved? Then let's put this problem on a very personal level. As you're flying home from a meeting in Washington you begin to feel a little dizzy when the plane changes altitude for landing. When you get home your head is spinning, and you can barely stagger through the door. You're nauseated; you vomit several times. Your wife gets frightened and calls your doctor—he says you'd better get to the hospital so he can find out what's going on. But everything's all right—your doctor says you've got Menier's disease—a minor swelling of the inner ear—he's started medication and will keep you in the hospital for a couple of days until you are feeling better—you'll be back to work in no time. That pill on the left of the illustration is what you're getting—it's called Merazine—an antihistamine commonly used for nausea and vertigo—so safe you can buy it over the counter without a prescription. That pill on the right is for one of your neighbors who is also in the hospital a couple of doors down from you. He's had a minor heart irregularity and he's being treated with that pill—it's called Lanoxin, the most common form of digitalis prescribed in this country. The pill in the middle there is for the patient in the room between you. Poor fellow has advanced cancer. These are common illnesses and commonly used drugs. You could find this constellation in most any hospital in the country just about any day of the week.

Oh, about that pill in the middle. Its phenylalanine mustard, a deadly poison, an anologue of mustard gas that can be used only in patients with advanced malignancy. How would you like to be playing this game of Russian roulette? What do you want to bet that there won't be a drug administration error—would you care to bet your life?

That outstanding opportunity for a fatal drug error has been presented to the American public by the Burroughs Wellcome & Company, though it's really unfair to pick on them. Actually there are more than 2,000 marketed prescription drugs that are completely indistinguishable by physical characteristics except for minor variations in size that would have to be determined with a micrometer. The blame must be placed on those persons charged with the public safety who have allowed this deplorable situation to continue.

To here, the dramatic and life-threatening aspect of the drug identification problem has been purposefully highlighted. There are many other, less flamboyant but equally important factors that should also be weighed in your judgment.

Consider this. During the year 1968, approximately 100,000 patients were seen at the Mayo Clinic for general medical examinations. The drug consumption of a large random sampling of these patients was surveyed as well as our accuracy in properly identifying these drugs. These figures were then projected to our yearly patient registration. Of the total 100,000 patients, 77,000 were taking one or more oral drugs immediately prior to their clinic examination. Thirty-five thousand patients were unable to identify the drugs they were taking. Since many patients were taking more than one drug, there was a total of 51,000 individual drugs which their examining physicians had to attempt to identify. After using all the time and assistance we were able to devote to this task, there still remained 22,000 drugs which we could not identify.

In the time that might be spent identifying five drugs, a complete history could be taken and a detailed physical examination could be performed on one more patient. Consider the fact that we have 51,000 such drugs to identify each year. The cost of time spent trying to identify drugs must of necessity be reflected in the medical charges assessed to our patients. But even more important than the economic factors is the influence of 22,000 drugs we could not identify on the quality of medical care we delivered to these patients. For such patients, it is possible that the drug effects may have obscured our diagnostic studies and we may fail to recognize a disease disguised by treatment, or perhaps an illness induced by the drug itself. If we withdrew the unknown drug from the patient we may be taking away vital therapy; if we prescribe therapy in addition to the unknown drug, we may produce a hazardous compounding of drug effect. Obviously this situation is intolerable detrimental to good medical practice, and this is not a problem peculiar to us alone. It exists in every hospital, clinic, and doctors

office the country over. This situation is both tragic and absurd. It cannot be allowed to continue.

Well, if the problem is that big and that bad, surely someone must have tried to do something about it.

The pharmaceutical companies have made an effort. The *Physicians Desk Reference,* distributed free to all physicians, contains a center section with color reproductions of a number of pills, tablets, and capsules. This is occasionally useful—but of the more than 6,000 marketed hard drug items it covers only 800, largely promotional items, and many of these still cannot be accurately identified because they are either closely similar to, or identical to, other drugs so that the picture doesn't really do any good.

Organized medicine recognized the problem and tried to do something about it in 1962. The December 22 issue of the *Journal of the American Medical Association* was devoted to the cataloging of all marketed solid drugs. They were grouped according to physical characteristics. By closely examining the drug the physician would observe and record in a code form 10 separate physical characteristics of the drug. When this was done he could refer to this code number in the catalogue and hopefully identify the drug. This approach was a failure. It was time consuming and cumbersome, and even after going through all this work, too frequently the physician ran into the situation of dozens of drugs all having the same code number. For whatever this might have been worth in 1962, which wasn't very much, it is now hopelessly out of date.

The pharmaceutical industry and organized medicine have both recognized the problem—they've tried to handle it. They've failed. There is only one feasible solution to this problem and that is a universal system of drug identification under federal guidance and direction.

Well, now, that would never work—think of the organization—too many technical problems—think of the cost!

Such a system not only *can* be practical and effective—it *is* practical and effective; and here proper credit should be paid to those representatives of the pharmaceutical industry, although only a very few, which not only have recognized the importance of this problem but have acted in a truly ethical fashion by responding to this need in a practical and effective manner. Eli Lilly and Company, Parke, Davis & Company, Armour Pharmaceutical Company, Merck Sharp & Dohme, Eaton Laboratories, and now, thankfully beginning, Burroughs Wellcome & Co.—all are now clearly imprinting each of their marketed drugs with a code number that unmistakably identifies the drug. These companies market more than 700 different drug products including all varieties of capsules, tablets, and pills, in the full gamut of sizes. They have accomplished this task without necessity of a price increase for their products or a reduction in dividends for their stockholders. The total cost of this identification is actually measured in only pennies per thousand units of drug. No pharmaceutical company may now claim that the technical factors are insurmountable or that the cost is prohibitive. These contentions have been proven false by members of their own ranks.

You can buy a bag of sugar-coated candy with each piece clearly printed with the letter M or a roll with each wafer clearly impressed with the words Life Saver for only five pennies, and manufacturer, wholesaler, and retailer all make a profit. Drug prescriptions do not sell for pennies. Of course there are technical problems, but for $3,000,000,000 a year the American public is certainly entitled to the same protection accorded the purchaser of penny candies.

Well, do these systems really work? After all, getting a code number on a little pill—maybe nobody can read it without a microscope.

In Table 2 are the results of a study conducted a short time ago in which physicians were first asked to identify a random selection of uncoded drugs using their own recollection plus all available identification guides. Only 56% of the drugs could be accurately named and for this very poor batting average it took a mean time of more than 11 minutes for each identification. In sharp contrast is the performance with drugs branded with Lilly's "Identi-Code"; 96% of the drugs were properly identified and the average time required for each identification was only 14 seconds.

With this article from the pages of the *Journal of the American Medical Association* came a clarion call for a universal system of drug identification. This was 2½ years ago, and what has been done since then in answer to this plea? These overtures for cooperative progressive social action come far too infrequently from American medicine. When they do come they must be fostered and encouraged—not ignored.

TABLE 2.—ACCURACY AND EFFICIENCY OF DRUG IDENTIFICATION BY CHANCE AND BY PLAN

| | Accuracy of identification, percent correct | Mean time to identify |
|---|---|---|
| Random drug assortment. | 56 | 11 minutes, 6 seconds. |
| Drugs with "Identi-Code." | 96 | 14 seconds. |

Source: Symonds, J. U., and Robertson, W. D.: Drug Identification: Use of Coded Imprint. JAMA 199:664-665 (Feb. 27) 1967

In summary, these are the problems created by unidentifiable drug forms. First, for these patients there is a risk of serious morbidity or death: in cases of accidental drug intoxication, especially in children, a needless morbidity and mortality resulting from inability or delay in identification of the toxic agent; in patients requiring emergency surgery, the risk of needless anesthetic death or needless operative morbidity or mortality; in the comatose patient, hazardous delay and confusion in diagnosis; in any hospitalized patient, an increased risk of potentially fatal hospital drug errors. And second, for all patients the problems that the physician encounters in drug identification result in increased cost and decreased quality of medical care. We must also realize that all of these problems will be compounded in years to come, as pharmacologic research puts in our hands increasingly more active therapeutic agents.

The solution to this problem is clear. Every marketed drug and every dosage form must be clearly imprinted or impressed with a legible identifying code number. A drug identification guide with these code numbers should be supplied to all practitioners licensed to prescribe drugs, to all pharmacists, and to all hospitals. This program should be carried out under federal guidance and direction.

This last point would seem to be absolutely essential. It is completely naive to suggest that all of the many drug manufacturers, large and small, could ever get together in such an undertaking. This problem has been recognized for years and yet of the hundreds of pharmaceutical companies only six have seen fit to do anything about it. For such a program to succeed, federal involvement is mandatory.

Let us go back now to the scenes with which we began, but let's make just one small change in the script.

The tablets that the baby sitter brought to the hospital when little Mary Anderson was poisoned are now imprinted with a code number. They are promptly identified—Mary is treated quickly and specifically—she is well and back home with her family the next day.

The pills which were found in Bill Johnson's pocket now have a clearly impressed identification code, they are immediately recognized as a synthetic adrenal steroid, and Bill receives his urgently needed cortisone preparation before and during surgery. Bill is going to his wedding even though it has had to be delayed a month.

The capsules which Suzie Michaels gave to Mr. Jones and Mr. Smith are now clearly marked with code numbers which have also been written on each of their medication cards. Following the directions given to all medication nurses, Suzie checks the code number on the capsule with the code number on the card and the patient's name before administering the drug. She quickly sees her error and both Mr. Jones and Mr. Smith receive the proper medication. They will both be able to return to work, supporting their families.

And so all of our stories have happy endings! Tragic endings because of problems of drug identification must be absolutely intolerable—to the physician, to the pharmaceutical industry, and most important to the Food and Drug Administration and the Congress who hold in their hands the primary responsibility for regulating the safety of the drugs we give to our patients. To these hands the torch is passed—it must not fall.

Mr. LOWENSTEIN. Mr. Chairman, I move to strike out the last word, and rise in support of the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. VAN DEERLIN).

The amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

PART D—OFFENSES AND PENALTIES

PROHIBITED ACTS A—PENALITIES

SEC. 401. (a) Except as authorized by this title, it shall be unlawful for any person knowingly or intentionally—

(1) to manufacture, distribute, or dispense, or possess with intent to manufacture, distribute, or dispense, a controlled substance; or

(2) to create, distribute, or dispense, or possess with intent to distribute or dispense, a counterfeit substance.

(b) Except as otherwise provided in section 405, any person who violates subsection (a) of this section shall be sentenced as follows:

(1)(A) In the case of a controlled substance in schedule I or II which is a narcotic drug, such person shall be sentenced to a term of imprisonment of not more than 15 years, a fine of not more than $25,000, or both. If any person commits such a violation after one or more prior convictions of him for an offense punishable under this paragraph, or for a felony under any other provision of this title or title III or other law of the United States relating to narcotic drugs, marihuana, or depressant or stimulant substances, have become final, such person shall be sentenced to a term of imprisonment of not more than 30 years, a fine of not more than $50,000, or both. Any sentence imposing a term of imprisonment under this paragraph shall, in the absence of such a prior conviction, impose a special parole term of at least 3 years in addition to such term of imprisonment and shall, if there was such a prior conviction, impose a special parole term of at least 6 years in addition to such term of imprisonment.

(B) In the case of a controlled substance in schedule I or II which is not a narcotic

drug or in the case of any controlled substance in schedule III, such person shall be sentenced to a term of imprisonment of not more than 5 years, a fine of not more than $15,000, or both. If any person commits such a violation after one or more prior convictions of him for an offense punishable under this paragraph, or for a felony under any other provision of this title or title III or other law of the United States relating to narcotic drugs, marihuana, or depressant or stimulant substances, have become final, such person shall be sentenced to a term of imprisonment of not more than 10 years, a fine of not more than $30,000, or both. Any sentence imposing a term of imprisonment under this paragraph shall, in the absence of such a prior conviction, impose a special parole term of at least 2 years in addition to such term of imprisonment and shall, if there was such a prior conviction, impose a special parole term of at least 4 years in addition to such term of imprisonment.

(2) In the case of a controlled substance in schedule IV, such person shall be sentenced to a term of imprisonment of not more than 3 years, a fine of not more than $10,000, or both. If any person commits such a violation after one or more prior convictions of him for an offense punishable under this paragraph, or for a felony under any other provision of this title or title III, or other law of the United States relating to narcotic drugs, marihuana, or depressant or stimulant substances, have become final, such person shall be sentenced to a term of imprisonment of not more than 6 years, a fine of not more than $20,000, or both. Any sentence imposing a term of imprisonment under this paragraph shall, in the absence of such a prior conviction, impose a special parole term of at least one year in addition to such term if imprisonment and shall, if there was such a prior conviction, impose a special parole term of at least 2 years in addition to such term of imprisonment.

(3) In the case of a controlled substance in schedule V, such person shall be sentenced to a term of imprisonment of not more than one year, a fine of not more than $5,000, or both. If any person commits such a violation after one or more convictions of him for an offense punishable under this paragraph, or for a crime under any other provision of this title or title III or other law of the United States relating to narcotic drugs, marihuana, or depressant or stimulant substances, have become final, such person shall be sentenced to a term of imprisonment of not more than 2 years, a fine of not more than $10,000, or both.

(c) A special parole term imposed under this section or section 405 may be revoked if its terms and conditions are violated. In such circumstances the original term of imprisonment shall be increased by the period of the special parole term and the resulting new term of imprisonment shall not be diminished by the time which was spent on special parole. A person whose special parole term has been revoked may be required to serve all or part of the remainder of the new term of imprisonment. A special parole term provided for in this section or section 405 shall be in addition to, and not in lieu of, any other parole provided for by law.

PROHIBITED ACTS B—PENALTIES

SEC. 402. (a) It shall be unlawful for any person—

(1) who is subject to the requirements of part C to distribute or dispense a controlled substance in violation of section 309;

(2) who is a registrant to distribute or dispense a controlled substance not authorized by his registration to another registrant or other authorized person or to manufacture a controlled substance not authorized by his registration;

(3) who is a registrant to distribute a controlled substance in violation of section 305 of this title;

(4) to remove, alter, or obliterate a symbol or label required by section 305 of this title;

(5) to refuse or fail to make, keep, or furnish any record, report, notification, declaration, order or order form, statement, invoice, or information required under this title or title III;

(6) to refuse any entry into any premises or inspection authorized by this title or title III;

(7) to remove, break, injure, or deface a seal placed upon controlled substances pursuant to section 304(f) or 511 or to remove or dispose of substances so placed under seal; or

(8) to use, to his own advantage, or to reveal, other than to duly authorized officers or employees of the United States, or to the courts when relevant in any judicial proceeding under this title or title III, any information acquired in the course of an inspection authorized by this title concerning any method or process which as a trade secret is entitled to protection.

(b) It shall be unlawful for any person who is a registrant to manufacture a controlled substance in schedule I or II which is—

(1) not expressly authorized by his registration and by a quota assigned to him pursuant to section 306; or

(2) in excess of a quota assigned to him pursuant to section 306.

(c)(1) Except as provided in paragraph (2), any person who violates this section shall, with respect to any such violation, be subject to a civil penalty of not more than $25,000. The district courts of the United States (or, where there is no such court in the case of any territory or possession of the United States, then the court in such territory or possession having the jurisdiction of a district court of the United States in cases arising under the Constitution and laws of the United States) shall have jurisdiction in accordance with section 1355 of title 28 of the United States Code to enforce this paragraph.

(2)(A) If a violation of this section is prosecuted by an information or indictment which alleges that the violation was committed knowingly and the trier of fact specifically finds that the violation was so committed, such person shall, except as otherwise provided in subparargaph (B) of this paragraph, be sentenced to imprisonment of not more than one year or a fine of not more than $25,000, or both.

(B) If a violation referred to in subparagraph (A) was committed after one or more prior convictions of the offender for an offense punishable under this paragraph (2), or for a crime under any other provision of this title or title III or other law of the United States relating to narcotic drugs, marihuana, or depressant or stimulant substances, have become final, such person shall be sentenced to a term of imprisonment of not more than 2 years, a fine of $50,000, or both.

(3) Except under the conditions specified in paragraph (2) of this subsection, a violation of this section does not constitute a crime, and a judgement for the United States and imposition of a civil penalty pursuant to paragraph (1) shall not give rise to any disability or legal disadvantage based on conviction for a criminal offense.

PROHIBITED ACTS C—PENALTIES

SEC. 403. (a) It shall be unlawful for any person knowingly or intentionally—

(1) who is a registrant to distribute a controlled substance classified in schedule I or II, in the course of his legitimate business, except pursuant to an order or an order form as required by section 308 of this title;

(2) to use in the course of the manufacture or distribution of a controlled substance a registration number which is fictitious, revoked, suspended, or issued to another person;

(3) to acquire or obtain possession of a controlled substance by misrepresentation, fraud, forgery, deception, or subterfuge;

(4) to furnish false or fraudulent material information in, or omit any material information from, any application, report, record, or other document required to be made, kept, or filed under this title or title III; or

(5) to make, distribute, or possess any punch, die, plate, stone, or other thing designed to print, imprint, or reproduce the trademark, trade name, or other identifying mark, imprint, or device of another or any likeness of any of the foregoing upon any drug or container or labeling thereof so as to render such drug a counterfeit substance.

(b) It shall be unlawful for any person knowingly or intentionally to use any communication facility in committing or in causing or facilitating the commission of any act or acts constituting a felony under any provision of this title or title III. Each separate use of a communication facility shall be a separate offense under this subsection. For purposes of this subsection, the term "communication facility" means any and all public and private instrumentalities used or useful in the transmission of writing, signs, signals, pictures, or sounds of all kinds and includes mail, telephone, wire, radio, and all other means of communication.

(c) Any person who violates this section shall be sentenced to a term of imprisonment of not more than 4 years, a fine of not more than $30,000, or both; except that if any person commits such a violation after one or more prior convictions of him for violation of this section, or for a felony under any other provision of this title or title III or other law of the United States relating to narcotic drugs, marihuana, or depressant or stimulant substances, have become final, such person shall be sentenced to a term of imprisonment of not more than 8 years, a fine of not more than $60,000, or both.

PENALTY FOR SIMPLE POSSESSION; CONDITIONAL DISCHARGE AND EXPUNGING OF RECORDS FOR FIRST OFFENSE

SEC. 404. (a) It shall be unlawful for any person knowingly or intentionally to possess a controlled substance unless such substance was obtained directly, or pursuant to a valid prescription or order, from a practitioner, while acting in the course of his professional practice, or except as otherwise authorized by this title or title III. Any person who violates this subsection shall be sentenced to a term of imprisonment of not more than one year, a fine of not more than $5,000, or both, except that if he commits such offense after a prior conviction or convictions under this subsection have become final, he shall be sentenced to a term of imprisonment of not more than 2 years, a fine of not more than $10,000, or both.

(b)(1) If any person who has not previously been convicted of violating subsection (a) of this section, any other provision of this title or title III, or any other law of the United States relating to narcotic drugs, marihuana, or depressant or stimulant substances, is found guilty of a violation of subsection (a) of this section after trial or upon a plea of guilty, the court may, without entering a judgment of guilty and with the consent of such person, defer further proceedings and place him on probation upon such reasonable conditions as it may require and for such period, not to exceed one year, as the court may prescribe. Upon violation of a condition of the probation, the court may enter an adjudication of guilt and proceed as otherwise provided. The court may, in its discretion, dismiss the proceedings against such person and discharge him from probation before the expiration of the maximum period prescribed for such person's probation. If during the period of this probation such person does not violate any of the conditions of the probation, then upon expiration of such period the court shall dis-

charge such person and dismiss the proceedings against him. Discharge and dismissal under this subsection shall be without court adjudication of guilt, but a nonpublic record thereof shall be retained by the Department of Justice solely for the purpose of use by the courts in determining whether or not, in subsequent proceedings, such person qualifies under this subsection. Such discharge or dismissal shall not be deemed a conviction for purposes of disqualifications or disabilities imposed by law upon conviction of a crime (including the penalties prescribed under this part for second or subsequent convictions) or for any other purpose. Discharge and dismissal under this section may occur only once with respect to any person.

(2) Upon the dismissal of such person and discharge of the proceedings against him under paragraph (1) of this subsection, such person, if he was not over twenty-one years of age at the time of the offense, may apply to the court for an order to expunge from all official records (other than the nonpublic records to be retained by the Department of Justice under paragraph (1)) all recordation relating to his arrest, indictment or information, trial, finding of guilty, and dismissal and discharge pursuant to this section. If the court determines, after hearing, that such person was dismissed and the proceedings against him discharged and that he was not over twenty-one years of age at the time of the offense, it shall enter such order. The effect of such order shall be to restore such person, in the contemplation of the law, to the status he occupied before such arrest or indictment or information. No person as to whom such order has been entered shall be held thereafter under any provision of any law to be guilty of perjury or otherwise giving a false statement by reason of his failures to recite or acknowledge such arrest, or indictment of information, or trial in response to any inquiry made of him for any purpose.

DISTRIBUTION TO PERSONS UNDER AGE TWENTY-ONE

SEC. 405. (a) Any person at least eighteen years of age who violates section 401(a)(1) by distributing a controlled substance to a person under twenty-one years of age is (except as provided in subsection (b)) punishable by (1) a term of imprisonment, or a fine, or both, up to twice that authorized by section 401(b), and (2) at least twice any special parole term authorized by section 401(b), for a first offense involving the same controlled substance and schedule.

(b) Any person at least eighteen years of age who violates section 401(a)(1) by distributing a controlled substance to a person under twenty-one years of age after a prior conviction or convictions under subsection (a) of this section (or under section 303(b)(2) of the Federal Food, Drug, and Cosmetic Act as in effect prior to the effective date of section 701(b) of his Act) have become final, is punishable by (1) a term of imprisonment, or a fine, or both, up to three times that authorized by section 401(b) and (2) at least three times any special parole term authorized by section 401(b), for a second or subsequent offense involving the same controlled substance and schedule.

ATTEMPT AND CONSPIRACY

SEC. 406. Any person who attempts or conspires to commit any offense defined in this title is punishable by imprisonment or fine or both which may not exceed the maximum punishment prescribed for the offense, the commission of which was the object of the attempt or conspiracy.

ADDITIONAL PENALTIES

SEC. 407. Any penalty imposed for violation of this title shall be in addition to, and not in lieu of, any civil or administrative penalty or sanction authorized by law.

CONTINUING CRIMINAL ENTERPRISE

SEC. 408. (a)(1) Any person who engages in a continuing criminal enterprise shall be sentenced to a term of imprisonment which may not be less than 10 years and which may be up to life imprisonment, to a fine of not more than $100,000, and to the forfeiture prescribed in paragraph (2); except that if any person engages in such activity after one or more prior convictions of him under this section have become final, he shall be sentenced to a term of imprisonment which may not be less than 20 years and which may be up to life imprisonment, to a fine of not more than $200,000, and to the forfeiture prescribed in paragraph (2).

(2) Any person who is convicted under paragraph (1) of engaging in a continuing criminal enterprise shall forfeit to the United States—

(A) the profits obtained by him in such enterprise, and

(B) any of his interest in, claim against, or property or contractual rights of any kind affording a source of influence over, such enterprise.

(b) For purposes of subsection (a), a person is engaged in a continuing criminal enterprise if—

(1) he violates any provision of this title or title III the punishment for which is a felony, and

(2) such violation is a part of a continuing series of violations of this title or title III—

(A) which are undertaken by such person in concert with five or more other persons with respect to whom such person occupies a position of organizer, a supervisory position, or any other position of management, and

(B) from which such person obtains substantial income or resources.

(c) In the case of any sentence imposed under this section, imposition or execution of such sentence shall not be suspended, probation shall not be granted, and section 4202 of title 18 of the United States Code and the Act of July 15, 1932 (D.C. Code, secs. 24–203–24–207), shall not apply.

(d) The district courts of the United States (including courts in the territories or possessions of the United States having jurisdiction under subsection (a)) shall have jurisdiction to enter such restraining orders or prohibitions, or to take such other actions, including the acceptance of satisfactory performance bonds, in connection with any property or other interest subject to forfeiture under this section, as they shall deem proper.

PROCEEDINGS TO ESTABLISH PRIOR CONVICTIONS

SEC. 409. (a)(1) No person who stands convicted of an offense under this part shall be sentenced to increased punishment by reason of one or more prior convictions, unless before trial, or before entry of a plea of guilty, the United States attorney files an information with the court (and serves a copy of such information on the person or counsel for the person) stating in writing the previous convictions to be relied upon. Upon a showing by the United States attorney that facts regarding prior convictions could not with due diligence be obtained prior to trial or before entry of a plea of guilty, the court may postpone the trial or the taking of the plea of guilty for a reasonable period for the purpose of obtaining such facts. Clerical mistakes in the information may be amended at any time prior to the pronouncement of sentence.

(2) An information may not be filed under this section if the increased punishment which may be imposed is imprisonment for a term in excess of three years unless the person either waived or was afforded prosecution by indictment for the offense for which such increased punishment may be imposed.

(b) If the United States attorney files an information under this section, the court shall after conviction but before pronouncement of sentence inquire of the person with respect to whom the information was filed whether he affirms or denies that he has been previously convicted as alleged in the information, and shall inform him that any challenge to a prior conviction which is not made before sentence is imposed may not thereafter be raised to attack the sentence.

(c)(1) If the person denies any allegation of the information of prior conviction, or claims that any conviction alleged is invalid, he shall file a written response to the information. A copy of the response shall be served upon the United States attorney. The court shall hold a hearing to determine any issues raised by the response which would except the person from increased punishment. The failure of the United States attorney to include in the information the complete criminal record of the person or any facts in addition to the convictions to be relied upon shall not constitute grounds for invalidating the notice given in the information required by subsection (a)(1). The hearing shall be before the court without a jury and either party may introduce evidence. Except as otherwise provided in paragraph (2) of this subsection, the United States attorney shall have the burden of proof beyond a reasonable doubt on any issue of fact. At the request of either party, the court shall enter findings of fact and conclusions of law.

(2) A person claiming that a conviction alleged in the information was obtained in violation of the Constitution of the United States shall set forth his claim, and the factual basis therefor, with particularity in his response to the information. The person shall have the burden of proof by a preponderance of the evidence on any issue of fact raised by the response. Any challenge to a prior conviction, not raised by response to the information before an increased sentence is imposed in reliance thereon, shall be waived unless good cause be shown for failure to make a timely challenge.

(d)(1) If the person files no response to the information, or if the court determines, after hearing, that the person is subject to increased punishment by reason of prior convictions, the court shall proceed to impose sentence upon him as provided by this part.

(2) If the court determines that the person that has not been convicted as alleged in the information, that a conviction alleged in the information is invalid, or that the person is otherwise not subject to an increased sentence as a matter of law, the court shall, at the request of the United States attorney, postpone sentence to allow an appeal from that determination. If no such request is made, the court shall impose sentence as provided by this part. The person may appeal from an order postponing sentence as if sentence had been pronounced and a final judgment of conviction entered.

Mr. JARMAN (during the reading). Mr. Chairman, I ask unanimous consent that part D, title II of the bill be considered as read, down through line 9, on page 181, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

AMENDMENT OFFERED BY MR. ECKHARDT

Mr. ECKHARDT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ECKHARDT: Amend section 408 by adding on page 176 on line 16 after the word "enterprise" the words "which enterprise" includes any activity re-

specting a narcotic drug"; and on page 176 strike lines 17 and 18 and substitute in lieu thereof the following: "imprisonment not in excess of 25 years, to a fine of not more"; and on page 176 strike lines 23 and 24 and substitute in lieu thereof the following: "which may not be in excess of 30 years, to a fine of not more than $200,000."

Mr. ECKHARDT. Mr. Chairman, this is an extremely important section of the bill. It is a section that deals with what is called "continuing criminal enterprise"; and similar language in the crime bill deals with an enhanced sentencing procedure.

Now, as I pointed out yesterday, in this bill which addresses itself specifically to the drug problem, we are entering into two fields which are experimental with respect to the general criminal law.

I am wholeheartedly for the bill in its general approach to the drug problem, but I think it is a serious mistake to utilize the drug problem vehicle to innovate new processes which tread at least on the outskirts of constitutionality. Originally the committee had before it a provision for special sentencing in cases involving continuing criminal enterprise, very similar to the provisions in S. 30 with respect to enhanced sentencing in certain types of offenses. There were serious constitutional defects in that section, the most serious of which, it seems to me, was authority to bring before the judge a report which contained some of the information upon which the sentence would be enhanced, which was really not subject to cross-examination.

The only person whom you could cross-examine was the person who appeared at the hearing. In order to avoid that constitutional question, the Dingell amendment was offered. The Dingell amendment, instead of constituting a post conviction presentencing procedure with all of its difficulties with respect to cross-examination, proposed a new section, the section on continuing criminal enterprises which appears in the bill as it comes to us here.

In a committee devoted to the problem of drug abuse, we were entering into a very basic area of criminal law. But the Dingell amendment did improve the original language in that, since there was an original crime described, that crime's elements would have to be proved in the court, and every bit of evidence that may be used to establish that a continuing criminal enterprise existed would be, of course, subject to cross-examination and to consideration by a jury if one were demanded.

Thus, the Dingell amendment afforded much better protection of constitutional rights than did the language of the original bill.

I prefer the treatment of this matter as an individual, separate, provable crime in court than treatment of it in a sort of quasi-criminal process for enhanced sentencing. Nevertheless, there are these faults in the Dingell amendment which I think it borrowed from its precursor, and they are contained in the language of the bill as it came from the committee.

In the first place, the Dingell amendment provides for a minimum mandatory penalty of 10 years. One of the great virtues of this bill is the removal of all minimum mandatory penalties except at this one place.

It is extremely important that minimum mandatory penalties be taken out. This is one of the recommendations of the American Bar Association's committee studying the questions of criminal process. The argument, of course, is quite simple, and that is this: when the jury is confronted with a case in which if it finds the defendant guilty, the penalty must automatically be 10 years or more it may hold the accused not guilty because, under the circumstances, it feels that the mandatory penalty is too high.

The CHAIRMAN pro tempore (Mr. McFALL). The time of the gentleman from Texas has expired.

(By unanimous consent, Mr. ECKHARDT was allowed to proceed for 5 additional minutes.)

Mr. ECKHARDT. The jury senses the fact that the case involves, say, one young man in a group of six in a co-op boarding house who have done nothing more than hand marihuana cigarettes to each other and on one occasion this man bought a $50 stash of marihuana and distributed to his fellows for a reimbursement and a small cost for his trouble. The court ought to have some choice, and the penalty should not have to be 10 years for that offense. Therefore, the jury is likely to hold the young man innocent, because it has no choice between innocence and a 10-year mandatory sentence.

The other difficulty is that the maximum penalty involved here is life. Given a situation in which someone is considered anathema in the community for reasons other than those involved in the offense and in which he can be got out of the way for life on the basis of passing marihuana cigarettes and maybe buying a $50 stash and distributing it, that man, because he is thought to have engaged in other activities that cannot be proven and perhaps are not true, can be removed from society for life by the judge issuing the sentence.

The amendment addresses itself to these flaws. First, the amendment simply requires that for the continuing criminal enterprise to exist, there must be some element, some act, some single act if you please, that involves something like heroin or morphine, that it involve a substance in schedule I or schedule II, other than those that artificially fall into schedule I because they are not for medical use. This does not mean that the whole enterprise need to deal only with morphine, heroin, or cocaine. It means that these narcotics must be in the picture—and I submit to you there is no real Mafia-type operation in the country that is dealing merely in amphetamines or marihuana. They are bound to have heroin some place in the picture, so this does not severely restrict the attack on the type of offenses that the gentleman from Illinois (Mr. SPRINGER) said the provision is directed against.

Another thing the amendment does is to remove the minimum mandatory sentence of 10 years, and to provide a maximum sentence of 25 years in the first instance, and 30 years in the second instance, instead of life imprisonment which is the maximum in both instances. It does not severely injure nor change the direction of the Dingell amendment, but it simply takes out the flaws of that amendment, both of which have been condemned by the American Bar Association.

Mr. CONYERS. Mr. Chairman, will the gentleman yield?

Mr. ECKHARDT. I yield to the gentleman from Michigan.

Mr. CONYERS. Mr. Chairman, the gentleman has time remaining, and I would like to ask him is it not true that the Attorney General has spoken out against mandatory minimum penalties in connection with this legislation?

Mr. ECKHARDT. The Attorney General has spoken in this respect and for the reasons that I have stated.

Mr. CONYERS. Mr. Chairman, I have been reading through the hearings on the drug abuse control amendments, and I think this matter of mandatory penalties ought to be very carefully considered. It is in these instances where we may, in our zeal to curb the use of drugs and control drug abuse, go overboard and indeed may make ourselves liable to civil rights and civil liberties incursions that I think many of the Members would not intend.

Mr. ECKHARDT. I thank the gentleman and certainly agree with his remarks.

Mr. SPRINGER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the gentleman from Texas is one of the more distinguished lawyers of this body, and I have great respect for him, not only as a lawyer, but also as a person.

Mr. Chairman, I think it ought to be pointed out what the effect of this amendment would be. In effect, what the gentleman does here is include any activity respecting narcotic drugs. A narcotic drug does not include LSD or marihuana. Without knowing what the gentleman's situation is in his own hometown of Houston, I would say in my own community we have hard drugs, heroin, but that is not our real problem.

Our real problem in our own particular area is with LSD and especially marihuana, and the gentleman does not cover those in his amendment at all, but leaves them out.

That is what we would be doing, taking out marihuana and LSD.

I am talking about the problem involved in almost every community in the country, which is with one of these two. I will admit that in New York City, San Francisco, and the big cities, yes, hard narcotics probably represent the main problem. That may be so in Detroit, for all I know, but it is not true nationwide.

The problem we have, really, is mostly with the young people. I am talking about the junior high school, high school, college and just above those ages. And marihuana and LSD are the problems.

The gentleman, by this amendment, would eliminate those from the bill insofar as this continuing enterprise is concerned.

Let me give an example. I do not remember the fellow who used to be on the Harvard faculty, who traveled all over the country. He came out to the University of Illinois and had a crowd of some 12,000 in the assembly hall. As I understand it, he went all over the country, and he had LSD with him. I do not know whether he was selling it or not.

Suppose we knew of someone who was doing this, who in a continuing enterprise went from town to town and sold it all the way from New York out to San Francisco, and engaged in this for 2 or 3 years. Under this continuing enterprise, which would give a judge a chance to look at the man's record, he could determine whether or not this was the first sale. We find that in some of the communities perhaps they may sell this only once, and that is all. If that man is convicted, the judge is not going to give him a life sentence in a penitentiary, or 20 or 25 years, as provided in this bill. He will give him whatever he thinks he needs, in view of the circumstances of the case. We can all understand that.

But suppose that the man is engaged in a 2 or 3 year process of going all across the country.

Did any of the Members see "Easy Rider"? If they did they saw the man merely put his stuff in a little can, I believe down where the gasoline is. He put it in there, and then he went all the way across the country selling it and dispensing it.

If a man were engaged in that process for a long period of time, under this continuing enterprise, the judge could take into consideration the fact that he was a professional in this regard, making a living at it. For that reason he would be entitled to give him a more severe sentence than he would give to a fellow who engaged in it for the first time.

What the distinguished gentleman from Texas has done is that he has left this with only narcotics, which would be the hard narcotics. Goodness knows we would certainly want to cover those, but the gentleman has left out marihuana and LSD and these others, which are not considered to be and defined as narcotics in this bill.

I believe it would be a terrific mistake, gentlemen, if we were to leave marihuana and LSD out of this and not give the judge an opportunity on the record to determine what kind of a sentence that man ought to have.

The gentleman lives down near the border, and I know he has all kinds of problems down there with respect to marihuana, because it is grown in Mexico. There are people down there trying to keep it out.

I believe it would be extremely dangerous even for a fellow in Houston, able to get it across the border to sell it in Houston over a long period of time, yet when he was brought before the judge, under the application of this continuing enterprise, it would not apply.

Mr. ECKHARDT. Mr. Chairman, will the gentleman yield?

Mr. SPRINGER. I yield to the gentleman from Texas.

Mr. ECKHARDT. Of course, the gentleman is familiar with the fact that in case of a second offense for the sale of marihuana the penalty could be up to 10 years. The judge would get some discretion on the grading of the penalty, of any figure up to 10 years.

The problem that seems to me to be involved in the present language is that the judge has got to give 10 years if these facts exist. Now, if it is a hard narcotics ring, or a ring that uses heroin in any of its operations, the fact that it is selling marihuana can build up the criminal enterprise nature of the business, but there must at least be one incident of hard narcotics, under my amendment.

Mr. SPRINGER. The gentleman is right on that. That is what I object to.

The gentleman insists that a person has to sell hard narcotics to bring it in under this.

Let me give an example of what might occur. Suppose that a man is engaged in the sale of marihuana and LSD, and he goes all the way across the country selling it. Suppose the police in Cleveland saw him doing this, but did not catch him. In Chicago the police saw him but did not catch him. In St. Louis the police saw him but did not catch him. Finally out in Las Vegas they caught him. Now, under this continuing enterprise it would be possible to bring in the officers in New York and in St. Louis and in Cleveland and in Chicago and they could testify before the judge that they saw him in this continuing enterprise last February or March selling marihuana on the streets in these respective cities.

So I believe it is dangerous for us to take marihuana and LSD out of it. I think that the gentleman has very firm convictions on it. I know the gentleman's integrity. I am not trying to impugn the gentleman's motives, certainly. But I believe it is extremely dangerous to take the gentleman's amendment and leave out this continuing enterprise of marihuana and LSD.

Mr. ROGERS of Florida. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I share the concern of my colleague from Illinois about this amendment, although I also share his great respect for the gentleman from Texas and his always kindly manner in approaching any question with the committee. We appreciate his courtesy.

However, I would oppose this amendment. I think to restrict this to hard narcotics defeats a major portion of this bill because it does not deal just with narcotics but with the whole drug abuse problem. When you think this goes to a continuing enterprise and not just a man who is a pusher by himself but he must be in a management position with five other people, thus we see that this is a real operation we are trying to stop.

Some of these people—and I am sure that some will feel the effects of this law—who are going around to all of these rock festivals pushing drugs of all types. I think we can begin to get at that problem if we will pass the bill as the committee presented it to the House.

Mr. HUNT. Mr. Chairman, will the gentleman yield?

Mr. ROGERS of Florida. I am glad to yield to the gentleman.

Mr. HUNT. I want to commend the gentleman on his statement and also commmend the gentleman from Illinois (Mr. SPRINGER).

I would like to bring to your attention the case that most recently came to my mind of a pusher in the city of Miami, Fla., who was arrested not only for possession but for sale, and so forth, and then was released under $11,000 bail. Six months thereafter, while his case was still pending, he was picked up in Laredo, Tex., where he swam the Rio Grande and brought back 10½ pounds of marihuana, and with his accomplices he was in a car headed for the eastern seaboard where they had an acknowledged place for sale.

They were incarcerated there and made $10,000 bail in that city after 3½ days. Then they started off to New Jersey and were picked up en route in the State of Kansas in another marihuana deal. This is most certainly the portion of the law that this would apply to.

I respectfully submit that it will not apply too often, but in those cases where it does apply and where the pusher is continuous and the dealer is continuous this section is a fine section and should not be tampered with. This amendment ought to be defeated. There is nothing wrong with imposing a mandatory sentence on a hardheaded pusher. Mitigating circumstances should not apply to a person of this nature. The only way you can handle narcotics and get rid of the situation is to incarcerate those main pushers and help those who have unfortunately become addicted.

Mr. ECKHARDT. Mr. Chairman, will the gentleman yield?

Mr. ROGERS of Florida. I will be glad to yield to the gentleman.

Mr. ECKHARDT. I would like to pose a hypothetical question to the gentleman. I would like to ask him if under the present language it would not be covered. Suppose there are six young men who are living together in a boardinghouse. They all smoke marijuana and exchange it freely among each other and have done so over a period of several years. One is the manager of the boardinghouse. They all smoke marihuana and on occasion he has purchased $50 worth of marihuana and distributed it to his fellows with perhaps a slight margin of profit over what he paid for it. Would that not be a case in which he could not be given a sentence, if these facts were proved, below 10 years, and would that not be a case in which he could be given life imprisonment?

Mr. ROGERS of Florida. Well, perhaps, that might be, but whether that would really represent substantial income—and I do not think it would—therefore I do not think any sentence in that fact situation would fall under the jurisdiction of this section.

Therefore, Mr. Chairman, I would urge the defeat of the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. ECKHARDT).

The amendment was rejected.

AMENDMENT OFFERED BY MR. POFF

Mr. POFF. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. POFF: On page 178, after line 11, insert the following:

"DANGEROUS SPECIAL DRUG OFFENDER SENTENCING

"SEC. 409. (a) Whenever a United States attorney charged with the prosecution of a defendant in a court of the United States for an alleged felonious violation of any provision of this title or title III committed when the defendant was over the age of twenty-one years has reasons to believe that the defendant is a dangerous special drug offender such United States attorney, a reasonable time before trial or acceptance by the court of a plea of guilty or nolo contendere, may sign and file with the court, and may amend, a notice (1) specifying that the defendant is a dangerous special drug offender who upon conviction for such felonious violation is subject to the imposition of a sentence under subsection (b) of this section, and (2) setting out with particularity the reasons why such attorney believes the defendant to be a dangerous special drug offender. In no case shall the fact that the defendant is alleged to be a dangerous special drug offender be an issue upon the trial of such felonious violation, be disclosed to the jury, or be disclosed before any plea of guilty or nolo contendere or verdict or finding of guilty to the presiding judge without the consent of the parties. If the court finds that the filing of the notice as a public record may prejudice fair consideration of a pending criminal matter, it may order the notice sealed and the notice shall not be subject to subpena or public inspection during the pendency of such criminal matter, except on order of the court, but shall be subject to inspection by the defendant alleged to be a dangerous special drug offender and his counsel.

"(b) Upon any plea of guilty or nolo contender or verdict or finding of guilty of the defendant of such felonious violation, a hearing shall be held, before sentence is imposed, by the court sitting without a jury. The court shall fix a time for the hearing, and notice thereof shall be given to the defendant and the United States at least ten days prior thereto. The court shall permit the United States and counsel for the defendant, or the defendant if he is not represented by counsel, to inspect the presentence report sufficiently prior to the hearing as to afford a reasonable opportunity for verification. In extraordinary cases, the court may withhold material not relevant to a proper sentence, diagnostic opinion which might seriously disrupt a program of rehabilitation, any source of information obtained on a promise of confidentiality, and material previously disclosed in open court. A court withholding all or part of a presentence report shall inform the parties of its action and place in the record the reasons therefor. The court may require parties inspecting all or part of a presentence report to give notice of any part thereof intended to be controverted. In connection with the hearing, the defendant and the United States shall be entitled to assistance of counsel, compulsory process, and cross-examination of such witnesses as appear at the hearing. A duly authenticated copy of a former judgment or commitment shall be prima facie evidence of such former judgment or commitment. If it appears by a preponderance of the information, including information submitted during the trial of such felonious violation and the sentencing hearing and so much of the presentence report as the court relies upon, that the defendant is a dangerous special drug offender, the court shall sentence the defendant to imprisonment for an appropriate term not to exceed twenty-five years and not disproportionate in severity to the maximum term otherwise authorized by law for such felonious violation. Otherwise it shall sentence the defendant in accordance with the law prescribing penalties for such felonious violation. The court shall place in the record its findings, including an identification of the information relied upon in making such findings, and its reasons for the sentence imposed.

"(c) This section shall not prevent the imposition and execution of a sentence of imprisonment for life or for a term exceeding twenty-five years upon any person convicted of an offense so punishable.

"(d) Notwithstanding any other provision of this section, the court shall not sentence a dangerous special drug offender to less than any mandatory minimum penalty prescribed by law for such felonious violation. This section shall not be construed as creating any mandatory minimum penalty.

"(e) A defendant is a special drug offender for purposes of this section if—

"(1) the defendant has previously been convicted in courts of the United States or a State or any political subdivision thereof for two or more offenses involving dealing in controlled substances, committed on occasions different from one another and different from such felonious violation, and punishable in such courts by death or imprisonment in excess of one year, for one or more of such convictions the defendant has been imprisoned prior to the commission of such felonious violation, and less than five years have elapsed between the commission of such felonious violation and either the defendant's release, or parole or otherwise, from imprisonment for one such conviction or his commission of the last such previous offense or another offense involving dealing in controlled substances and punishable by death or imprisonment in excess of one year under applicable laws of the United States or a State or any political subdivision thereof; or

"(2) the defendant committed such felonious violation as part of a pattern of dealing in controlled substances which was criminal under applicable laws of any jurisdiction, which constituted a substantial source of his income, and in which he manifested special skill or expertise; or

"(3) such felonious violation was, or the defendant committed such felonious violation in furtherance of, a conspiracy with three or more other persons to engage in a pattern of dealing in controlled substances which was criminal under applicable laws of any jurisdiction, and the defendant did, or agreed that he would, initiate, organize, plan, finance, direct, manage, or supervise all or part of such conspiracy or dealing, or give or receive a bribe or use force in connection with such dealing.

A conviction shown on direct or collateral review or at the hearing to be invalid or for which the defendant has been pardoned on the ground of innocence shall be disregarded for purposes of paragraph (1) of this subsection. In support of findings under paragraph (2) of this subsection, it may be shown that the defendant has had in his own name or under his control income or property not explained as derived from a source other than such dealing. For purposes of paragraph (2) of this subsection, a substantial source of income means a source of income which for any period of one year or more exceeds the minimum wage, determined on the basis of a forty-hour week and fifty-week year, without reference to exceptions, under section 6(a)(1) of the Fair Labor Standards Act of 1938 for an employee engaged in commerce or in the production of goods for commerce, and which for the same period exceeds fifty percent of the defendant's declared adjusted gross income under section 62 of the Internal Revenue Code of 1954. For purposes of paragraph (2) of this subsection, special skill or expertise in such dealing includes unusual knowledge, judgment or ability, including manual dexterity, facilitating the initiation, organizing, planning, financing, direction, management, supervision, execution or concealment of such dealing, the enlistment of accomplices in such dealing, the escape from detection or apprehension for such dealing, or the disposition of the fruits or proceeds of such dealing. For purposes of paragraphs (2) and (3) of this subsection, such dealing forms a pattern if it embraces criminal acts that have the same or similar purposes, results, participants, victims, or methods of commission, or otherwise are interrelated by distinguishing characteristics and are not isolated events.

"(f) A defendant is dangerous for purposes of this section if a period of confinement longer than that provided for such felonious violation is required for the protection of the public from further criminal conduct by the defendant.

"(g) The time for taking an appeal from a conviction for which sentence is imposed after proceedings under this section shall be measured from imposition of the original sentence.

"(h) With respect to the imposition, correction, or reduction of a sentence after proceedings under this section, a review of the sentence on the record of the sentencing court may be taken by the defendant or the United States to a court of appeals. Any review of the sentence taken by the United States shall be taken at least five days before expiration of the time for taking a review of the sentence or appeal of the conviction by the defendant and shall be diligently prosecuted. The sentencing court may, with or without motion and notice, extend the time for taking a review of the sentence for a period not to exceed thirty days from the expiration of the time otherwise prescribed by law. The court shall not extend the time for taking a review of the sentence by the United States after the time has expired. A court extending the time for taking a review of the sentence by the United States shall extend the time for taking a review of the sentence or appeal of the conviction by the defendant for the same period. The taking of a review of the sentence by the United States shall be deemed the taking of a review of the sentence and an appeal of the conviction by the defendant. Review of the sentence shall include review of whether the procedure employed was lawful, the findings made were clearly erroneous, or the sentencing court's discretion was abused. The court of appeals on review of the sentence may, after considering the record, including the entire presentence report, information submitted during the trial of such felonious violation and the sentencing hearing, and the findings and reasons of the sentencing court, affirm the sentence, impose or direct the imposition of any sentence which the sentencing court could originally have imposed, or remand for further sentencing proceedings and imposition of sentence, except that a sentence may be made more severe only on review of the sentence taken by the United States and after hearing. Failure of the United States to take a review of the imposition of the sentence shall, upon review taken by the United States of the correction or reduction of the sentence, foreclose imposition of a sentence more severe than that previously imposed. Any withdrawal or dismissal of review of the sentence taken by the United States shall foreclose imposition of a sentence more severe than that reviewed but shall not otherwise foreclose the review of the sentence or the appeal of the conviction. The court of appeals shall state in writing the reasons for its disposition of the review of the sentence. Any review of the sentence taken by the United States may be dismissed on a showing of the abuse of the right of the United States to take such review.

"INFORMATION FOR SENTENCING

"SEC. 410. Except as otherwise provided in this title or section 303(a) of the Public Health Service Act, no limitation shall be placed on the information concerning the background, character, and conduct of a person convicted of an offense which a court of the United States may receive and consider for the purpose of imposing an appropriate sentence under this title or title III."

Redesignate the succeeding section accordingly.

Page 105, in the table of contents strike out "Sec. 409" and insert in lieu thereof "Sec. 411" and add the following new items after the item relating to section 408:

"Sec. 409. Dangerous special drug offender sentencing.

"Sec. 410. Information for sentencing."

Mr. POFF (during the reading). Mr. Chairman, having consulted with the chairman of the subcommittee, I ask unanimous consent that further reading of the amendment be dispensed with and that it be printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. POFF. Mr. Chairman, the most dangerous criminal in the criminal drug field is the organized crime offender, the habitual offender, the professional criminal.

Mr. Chairman, we need special penalties in my opinion for these special criminals. Constitutional scholars have suggested two approaches to deal with such offenders. The first is the creation of a separate crime with separate penalties. The second approach is the imposition of longer sentences upon those convicted first of the basic crime and then shown to be dangerous offenders.

Mr. Chairman, the first approach, the separate crime approach, is the approach taken by section 408 of the committee bill. The second is found in the amendment which I have just offered which adds two new sections to the bill, sections 409 and 410. The bill, I think, should pursue both approaches: first, to give the prosecution the option of approaches and, second, to strengthen the statute against possible constitutional attack.

My amendment, I believe, strengthens the bill against constitutional attack because it strengthens the protection afforded the innocent accused. My amendment insulates the jury from all possible predicate for prejudice. The jury hears only evidence concerning the basic crime which has been charged. If the jury convicts on that basic charge, then the judge, in the absence of the jury, determines whether the accused is a special dangerous offender and, if so, fixes a special penalty commensurate with the offense as aggravated by the special dangerous offense.

With respect to the sentencing process my amendment gives the defendant broad safeguards. He is entitled, first, to notice; and, second, to a hearing, to counsel, to compulsory process, to cross-examination of witnesses and the right of access to pertinent and relevant portions of the presentencing report.

In addition, my amendment gives to the defendant the right of appellate review in the circuit court of appeals in the event the trial judge imposes upon him an extended sentence under this mechanism.

That, I might add parenthetically, is a right which the defendant does not enjoy today under the sentencing procedure provided in Federal law.

My amendment is essentially the same as title X of the Organized Crime Control Act favorably reported by the Committee on the Judiciary on yesterday. It is not, however, I repeat, it is not the same as title X in S. 30 as it passed the other body. Rather, it incorporates the substantive and procedural changes recommended by the board of governors of the American Bar Association, and those changes I think better protect the rights of the accused and better structure the penalty package.

The concept of extended sentence which my amendment embraces has been endorsed by President Johnson's Crime Commission, by the American Law Institute, by the National Council on Crime and Delinquency, by the Department of Justice, and by scores of constitutional scholars in the academic community.

In summary, Mr. Chairman, I shall conclude by saying that my amendment is a supplement to the bill, and not a substitute for any part of the bill. My amendment will strengthen the bill against constitutional attack, strengthen the prospect of punishment of the guilty and strengthen the guarantee of a fair trial for the innocent.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. SPRINGER, and by unanimous consent, Mr. POFF was allowed to proceed for 3 additional minutes.)

Mr. SPRINGER. Mr. Chairman, will the gentleman yield?

Mr. POFF. I yield to the gentleman from Illinois.

Mr. SPRINGER. May I ask the distinguished gentleman from Virginia, Mr. Chairman, two questions:

There was an amendment adopted in the committee before we reported the bill, commonly known as the Dingell amendment. This amendment offered by the gentleman from Virginia does not interfere in any way with the Dingell amendment?

Mr. POFF. The gentleman is correct.

Mr. SPRINGER. Secondly, it is my understanding that the amendment offered by the gentleman is consistent with the same provisions or similar provisions of the crime bill which was reported by the Committee on the Judiciary.

Mr. POFF. It is, but it is not the same as the equivalent paragraph in the bill reported and passed in the other body.

Mr. SPRINGER. But it is consistent with that; is that correct?

Mr. POFF. It is.

Mr. SPRINGER. I thank the gentleman.

Mr. FASCELL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment proposed by the gentleman from Virginia. I firmly believe it is as important to achieve the goals of community education and rehabilitation with regard to drug abuse as it is to withdraw from free society those who live and profit from dealings in drugs.

The dangerous special drug offender sentencing provision I support is quite similar to that contained in the Organized Crime Control Act which the House Judiciary Committee reported out yesterday. With a maximum additional sentence of 25 years for offenders falling within the purview of this amendment, we can accomplish much today in assuring that society is rid of devastingly evil forces who reap the fruits of drug traffic.

I see no reason to treat a drug trafficker any less harshly than an organized crime racketeer. Their acts are equally heinous, the consequences equally severe, and their punishment equally justified.

I urge my colleagues to support the amendment.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. FASCELL. I yield to the gentleman.

Mr. McCLORY. Mr. Chairman, I join in support of the amendment offered by the gentleman from Virginia (Mr. POFF), and to state that the gentleman has contributed tremendously in behalf of the organized crime bill (S. 30). His contributions to this legislation as evidenced by the pending amendment are consistent with the constructive work he has performed in the Judiciary Committee on the comprehensive bill directed against the organized crime syndicate.

(Mr. WEICKER (at the request of Mr. SPRINGER) was granted permission to extend his remarks at this point in the RECORD.)

Mr. WEICKER. Mr. Chairman, the necessity for revised and modernized Federal legislation in the area of narcotics and dangerous drugs has been obvious for sometime, especially in view of the fact that existing laws have been, for the most part, ineffective in halting the increased upsurge of drug abuse throughout our United States.

I am pleased to see that all of those who were directly involved in the preparation of this legislation recognized the fact that the drug problem of the forties and fifties is not the drug problem confronting us today. The decade of the sixties has brought with it new and varied types of drugs and persons abusing them, and no longer are our laws competent to adequately handle them. My own State of Connecticut is characteristic of many States which in years past had virtually little or no drug problem. My State, located in the highly drug-saturated region of the northeast, has been literally inundated with every form of abusable drug and, unfortunately, my State represents the general rule rather than the exception to the rule. However, I am confident that the legislation we are now considering will do much to turn off the tap and halt the flow of illicit drugs, not just in my State, but in every State.

I am pleased to see that this legislation utilizes a coalition of approaches.

First. It provides for drug abuse education and training.

Second. It sets enforceable penalties.

Third. It provides the tools for control and enforcement of narcotics laws under the Department of Justice.

Fourth. While the bill cracks down hard on the pusher, it recognizes the addict as a sick person in need of help.

Fifth. It will combat the problem of illegal drugs entering the country by imposing controls on the imports and exports of dangerous drugs.

The great advance of this bill is that it provides for care and rehabilitation. H.R. 18583 provides increased funds for community mental health centers which are desperately needed. We desperately need treatment centers to treat the problem close to home.

I am also particularly pleased with this bill's sophisticated and innovative approach toward the law enforcement aspects of drug abuse. I am not pretending that law enforcement is any magic panacea, but I do see it as a most vital and essential element in any total drug abuse control effort. H.R. 18583 contains a sound framework within which a firm but sensible Federal drug policy may be carried out. Adequate flexibility has been incorporated to accommodate changes brought about by increased knowledge gained through research and development of new drugs. Effective controls are imposed over the legitimate pharmaceutical industry which will deter the diversion of such drugs as the amphetamines and barbiturates from legitimate channels and will keep them out of the hands of persons willing and capable of abusing them.

To me, however, the areas of this bill which deserve primary emphasis are the penalty and enforcement provisions, since these are the areas which have been in most need of reform. The penalty structure has been designed to accommodate all types of drug offenders, from the casual drug user and experimenter to the organized criminal syndicates engaged in unlawful importation and distribution of illicit drugs. But what is most important about this penalty structure is that it is credible in that the penalties fit the crimes and the persons who commit the crimes. By being credible, this law will be enforceable, which is not the case today with existing law.

Mr. Chairman, I firmly believe that with this penalty provision, Congress is making its exit from the paleolithic age by recognizing the fact that there is a need to distinguish between the varied types of drug offenders and to administer sentences accordingly.

This bill goes further in providing those persons charged with enforcing it a wide variety of enforcement tools which will enable them to more effectively combat the illicit drug trafficker and meet the increased demands we have imposed on them. New forfeiture provisions which will allow for the seizure of vehicles used in the trafficking of controlled drugs; broader immunity authority; expanded arrest authority for special agents of the Bureau of Narcotics and Dangerous Drugs; authority under specially defined circumstances to execute search warrants without notice of authority and purpose and administer inspection authority are but just a few of the new law enforcement tools this bill will provide.

Mr. Chairman, I firmly believe this bill is a significant step toward eliminating the cancerous problem of drug abuse, which will soon overtake us if it is not held in check. It should have our resounding support and be quickly enacted into law.

Mr. TAFT. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I rise in support of the amendment offered by the gentleman from Virginia. I want to commend him for the fine work that he has done in the organized crime field, not just in this session of the Congress but in prior sessions of the Congress when we have worked together with him on a task force on this project.

Mr. Chairman, I think this amendment will do much at least to help a coordinated attack on the organized crime problem within the purview of this legislation. Evidence mounts daily that organized crime and the increased use and distribution of drugs are intimately related. Hopefully, we will see other legislation coming along broadening the attack on the crime syndicates even further, but we have a chance today with the Poff amendment to get off to a good start and we should not overlook it.

Mr. ECKHARDT. Mr. Chairman, I move to strike out the last word and rise in opposition to the amendment.

Mr. Chairman, it would be far more difficult to oppose this amendment if it were not for the fact that the committee had already adopted an amendment respecting continuing criminal enterprises.

The committee considered the Dingell amendment as against the postsentencing procedure and chose the Dingell amendment in preference to the other procedure.

It would be remarkable if anyone for the committee should accept an amendment now to restore the same process which was rejected in competition to the Dingell amendment. I hope that this will not be done.

I want to point out what is wrong with this amendment. I recognize that every decent man, when he sees a case of a terrible criminal offense like selling dope, everyone wants to put the offender in jail. So do I. I support this bill and I probably will support it if it is not changed from the form in which it came out of the committee.

But we would be making a terrible mistake if, because of its emotional impact, we should throw away due process of law.

Let me show you what is the matter with the amendment. On page 2 of the amendment it says:

> In extraordinary cases, the court may withhold material not relevant to a proper sentence, diagnostic opinion which might seriously disrupt a program of rehabilitation, any source of information obtained on a promise of confidentiality, and material previously disclosed in open court.

Now this is postconviction, presentencing procedure. This means that a man's sentence may be enhanced from 5 to 25 years without his knowing what the evidence against him was and what the matter is all about except that the court said, "Look, I did not really pay any attention to this section" or that "I do not think that that section, as a matter of policy, ought to get into the hands of the attorney for the accused because he might abuse it and tell who gave us the information, who the informer is."

That is not traditional American criminal process. The process provided in the Dingell amendment does not do this. Under the Dingell amendment, if you are going to prove a man guilty, you have to come into court and prove every element of the continuing criminal offense. You have to prove it under the probing conditions of cross-examination. That is the way the American jurisprudence system has effectively worked since the founding of this country.

Mr. POFF. Mr. Chairman, will the gentleman yield?

Mr. ECKHARDT. I yield to the gentleman from Virginia.

Mr. POFF. The gentleman, of course, is correct. But the gentleman neglected to mention the distinction between the two approaches which I undertook briefly to describe in my remarks.

Clearly, all that the gentleman has said is relevant and accurate with respect to the approach of section 408 of the committee bill which embodies a new separate criminal offense with a separate criminal penalty.

It is not, however, relevant to the approach which my amendment pursues.

My amendment does not define a separate criminal offense. Rather it authorizes the judge to impose the extended sentence upon the defendant in the dock who has already been found guilty by the jury of the basic charge.

Mr. ECKHARDT. I understand. Let me respond that when the difference between the first offense that is charged is the difference between a penalty of 5 years and the penalty for the offense to which it is enhanced in the guise of enhanced sentencing is 25 years, and the evidence for the continuing offense upon which the enhancement occurs is produced by an administrative-type process, I see no difference between the situation of two offenses, a minor offense and a major one, and situation that is described in this amendment. I think this is a fiction that there are not two offenses.

The one offense has been that of a continuing criminal enterprise. The other offense is one of a single offense. So you bring out evidence to convict the person who has committed the single offense of a 5-year crime, and then you enhance his offense and his penalty to 25 years. I think it is intellectually fraudulent to draw a distinction between postsentencing procedure and the conviction of a separate crime.

The CHAIRMAN. The time of the gentleman from Texas has expired.

(On request of Mr. POFF, and by unanimous consent, Mr. ECKHARDT was allowed to proceed for 3 additional minutes.)

Mr. POFF. Mr. Chairman, will the gentleman yield?

Mr. ECKHARDT. I yield to the gentleman from Virginia.

Mr. POFF. I should say to the gentleman that if this is a fiction and if it is a fraud, then the courts are guilty of it, because the courts have already ruled on the question in the case of Williams against New York. That case holds that the rights of confrontation and cross-examination and counsel and the rules of evidence need not extend to the presentencing process.

Mr. ECKHARDT. I do not believe the courts have ever decided the question contained in this provision. I would like to point out that on page 3 of the amendment it is explicitly provided, "Cross-examination of such witnesses as appear at the hearings." What does that mean? That means that at a presentencing hearing, where a witness is brought in with a report, in that report is contained what the maker of the report gathered from a great number of witnesses. So what do you get? You get the right to cross-examine the investigator, or perhaps the thirdhand compiler of testimony gotten from the original witnesses, as to whether they told him these elements of the crime were committed.

Cross-examination is of a person who has information that is once or twice removed from the original witness. You cannot do that under the Dingell amendment, because it would be immediately objectionable as hearsay testimony to bring in evidence through somebody who had investigated this man's record and tried to introduce his report as evidence of the additional elements necessary to establish a continuing offense.

In addition to this, on page 5 it is provided that one of the elements is that if the defendant committed such a violation as a part of a pattern of dealing in controlled substances which was criminal in the applicable laws of any jurisdiction which constituted a substantial source of his income, and in which he manifested substantial skills and expertise, he is subject to this special sentencing. So evidence can be garnered from all over the United States, from hundreds of witnesses, and put into a single report. The defendant can be accused of having violated the laws of California, Texas, and any other State. He has no process by which he can effectively question the witnesses that gave the initial information.

Although he was only convicted of a crime that carries a 5-year penalty, the judge can then give him 25 years for an entirely different offense that has different elements which elements have not been proved before a jury to have existed.

Mr. CONYERS. Mr. Chairman, will the gentleman yield for a question?

Mr. ECKHARDT. I yield to the able gentleman from Michigan.

Mr. CONYERS. Mr. Chairman, my distinguished colleague on the Judiciary Committee, the gentleman from Virginia, cited a case in support of his position in this matter. I think he said the case was Williams versus New York. Will the gentleman please give us the legal citation for that case?

Mr. POFF. Mr. Chairman, will the gentleman yield?

Mr. ECKHARDT. I yield to the gentleman from Virginia.

Mr. POFF. Mr. Chairman, I will say to my friend on the Judiciary Committee the case is Williams against New York, 337 U.S. at page 241. If the gentleman would care, I will be glad to give him a statement of the facts in the case.

Mr. CONYERS. Mr. Chairman, will the gentleman state what position he argued in support of his case?

Mr. POFF. Williams against New York, is cited for the proposition that the confrontation and cross-examination and rules of evidence need not be extended to the sentencing proceedings.

Mr. SPRINGER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I can see from what is being said here that we are getting into some rather technical matters of legal procedure, but I think I can simplify it a little bit if we will go back just to the ordinary county or city court which most of us know in our hometowns. Supposing a man, we will say, is brought into the city or county court in our local area for, we will say, robbery or rape. We have a conviction. The man applies for probation. What happens?

I happen to have been a curbstone judge once upon a time. The probation officer is sent out to make an investigation of the man's background. If the officer comes back and says the man has been clean and there is nothing in his background to indicate he has criminal tendencies, the judge may be willing to grant him probation or at least maybe only impose a minor sentence. But suppose the probation officer comes back with a five- or six-page report saying this boy has broken into somebody's home and gotten caught, but there was no prosecution, and then at the school he was causing all kinds of disturbances from morning to night and was kicked out of school for this, and since that time he has been engaged in distributing drugs throughout the neighborhood, and the office has the names of five or six to whom the drugs were distributed, and the officer comes in with this report, so probation is denied.

Not only that, but if the sentence for which he can be sentenced under the law is 5 years, if his record is clean, the judge will probably sentence the man only to a few years on the penal farm, or a year at the most if it is a felony, but if this man has been enaged in a whole series of acts in violation of law, the judge will give him the maximum—and I am talking about 5 or 10 years in the penitentiary.

How does this apply to what we have been talking about? It is simply because if we have someone engaged in LSD or marihuana or hard narcotics enterprises extending over a long period of time, we are back to the same situation I was talking about in the small courts in our hometown, where the judge may take into consideration the record of this man in the past in determining the kind of sentence that will be given him.

Is that unjust? Is there anything wrong with that? Certainly when we come in on a probation investigation, we do not come in with a whole lot of evidence. That is all over. He has already been found guilty. The question is what is going to be the sentence. The sentence is going to be based upon what the judge believes this man's past record has been based on all the evidence presented to him or the information presented to him as to whether or not this man is really guilty of past serious offenses or whether he is a relatively clean individual.

I am trying to put it in as simple terms as I can. All the gentleman from Texas is doing is saying we have to introduce this as evidence, but the evidence stage is all over. The man has already been found guilty. He is guilty. That has been determined.

The only question the judge is now faced with is whether or not the information which is placed before him describes the man's past, either criminal record or record in the community, upon which he then bases his sentence.

Mr. ECKHARDT. Mr. Chairman, will the gentleman yield?

Mr. SPRINGER. I yield to the gentleman from Texas.

Mr. ECKHARDT. The evidence which has been adduced to find the man guilty may be the passing of a marihuana cigarette from one man to another, and that is all, may it not?

Mr. SPRINGER. Yes.

Mr. ECKHARDT. Then the evidence adduced in this presentencing procedure is to show that he not only passed that cigarette on that one occasion, of which offense the jury found him guilty, but that he has been, as the gentleman described awhile ago, to Cincinnati, Detroit, and finally Chicago and San Francisco, and has done the same thing in these places.

Mr. SPRINGER. Yes.

Mr. ECKHARDT. But the proof there is made by nameless accusers without cross-examination.

Mr. SPRINGER. It is not nameless accusers. This is presented in writing. Every judge requires that it be presented in writing.

Mr. ECKHARDT. In a report.

Mr. SPRINGER. Either in a report, or presented in open court, one of the two. As a judge I always had both of them. I always had first the report of the probation officer, which I submitted to the defendant's lawyer, and the second thing I did was to ask, "Is there any testimony that anyone wants to introduce?"

I have had people come in from all over town saying, "Yes, this guy was caught in my backyard last year stealing chickens. I caught him but I did not prosecute him."

But there was not any question of cross-examination on it.

Mr. ECKHARDT. Is it not true the testimony as to offenses in the other cities would be introduced only by the statement of the probation officer, without necessarily a statement by a witness?

Mr. SPRINGER. That has been true forever. The question is not whether he shall receive the minimum sentence, but whether he has been guilty of other things which come before the judge.

I do not assume that the judge is going to take hearsay from anybody. He will consider it on pretty good evidence. I cannot ever remember a case which came

to me, on a probation matter, where I did not go into that thoroughly.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

(By unanimous consent, Mr. SPRINGER was allowed to proceed for 1 additional minute.)

Mr. SPRINGER. I cannot remember a single case of that.

I have also been a defense attorney, when I was defending a criminal or a violator of the law. I cannot remember ever going before a judge for probation when any defendant did not go into that matter or when the judge himself did not ask a lot of questions to determine whether or not the information was accurate.

I certainly wanted more information than just the question of guilt. If the sentence were from 2 to 5 years, the man certainly would not be given 5 years if this were his first offense, and he had done nothing else. But I certainly would not let him off with 2 years if he were guilty of a lot of other things.

I believe that is exactly what we are deciding here at this time.

AMENDMENT OFFERED BY MR. ECKHARDT TO THE AMENDMENT OFFERED BY MR. POFF

Mr. ECKHARDT. Mr. Chairman, I offer an amendment to the amendment offered by the gentleman from Virginia (Mr. POFF).

The Clerk read as follows:

Amendment offered by Mr. ECKHARDT to the amendment offered by Mr. POFF: amend the amendment on page 9 thereof by adding a new section to be designated 411, as follows:

"SEC. 411. Notwithstanding any other provision of this section, no evidence shall be admissible for the purpose of enhancing or extending penalties or sentences because the defendant is alleged to have engaged in felonious violation as part of a pattern of dealing in controlled substances unless such acts as are alleged to make up such pattern are proved by evidence produced in such a way as (A) to be admissible to prove a continuing criminal enterprise under this section and (B) to afford the right of cross examination of any witness who has given information concerning any act which is to be used in evidence or in any report upon which the allegation of engaging in felonious violation as part of a pattern of dealing in controlled substances is based."

Mr. ECKHARDT. Mr. Chairman, I have before me the case of Williams against New York. The Supreme Court said in that case what has of course been the law since man's memory runneth not to the contrary. When a man is accused of a given crime, the extent of the sentence for which is defined in connection with that crime, and he is convicted by a jury of that crime, the court, in rendering the sentence, may consider information, some of which may not have been subject to cross-examination. Now, that is not disputed. The difference here is that the crime of a continuing criminal enterprise rests on different elements that must be proved on the basis of additional facts. It is a crime for which he has not been convicted before a jury. It is a crime that no jury has had a chance to decide on. That is the difference. The case does not touch the matter before us here top, side, or bottom.

Mr. Chairman, I have offered an amendment to the amendment offered by the gentleman from Virginia (Mr. POFF) that would cure this. It would simply require that when the basis of this offense is a continuing engagement in felonious violations as a part of a pattern in dealing in controlled substances, when that is a part of the offense, then evidence has to be produced, just as if the case were a new crime tried under the Dingell amendment, and it must be subject to cross-examination just like any other testimony on the original offense. Then the man's lawyer is able to cross-examine witnesses who come before the judge. And they are not faceless people. He is not limited to questioning someone who brings in a report. Only in that case where the new crime of continuing engagement in felonious violations is brought in, are these requirements made. I do not require under my amendment that these safeguards be applied when there are continuing offenses asserted as the basis upon which the man has been convicted.

Now, Mr. Chairman, it shocks me to hear some conservative Members of this House, men who support the conservative processes of the courts—it surprises me and shocks me to have them come in here and say the conviction of a man for a new crime should be done on the basis of an administrative report and the only people who can be cross-examined are administrators and not persons who testified before the administrators. I do not believe anyone here who believes in due process of law can sanction that sort of proceeding. At the very least you should clip the wings of this amendment to require the opportunity of the defendant to know what he is accused of and to know who his accusers are and question them and subject them to cross-examination.

Mr. POFF. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I will not deal further with the Williams case except to quote two pertinent parts from two paragraphs:

And modern concepts individualizing punishment have made it all the more necessary that a sentencing judge not be denied an opportunity to obtain pertinent information by a requirement of rigid adherence to restrictive rules of evidence properly applicable to the trial.

We must recognize that most of the information now relied upon by judges to guide them in the intelligent imposition of sentences would be unavailable if information were restricted to that given in open court by witnesses subject to cross-examination.

Now, notwithstanding the holding of the court that the rights of due process normally available during the course of the trial do not extend to the sentencing process, I have included in my amendment these elements of due process with respect to the sentencing proceeding:

The right to notice, the right of hearing, the right of compulsory process, the right of cross examination, the right of access to the pertinent portions of the presentencing report.

My distinguished friend from Texas—and I have nothing but the highest respect for his scholarship and his motivation—seems unduly preoccupied with the concept of cross-examination.

I am surprised that he would undertake to amend my amendment by adding the parenthetical clause concerning cross-examination since my amendment clearly and explicitly grants that right in the first instance.

I think, rather, what the gentleman is really concerned about is the right of confrontation. With respect to that right I would remind the gentleman that one of the elements of due process which has been gratuitously included in my amendment is the right of compulsory process and that right enables the defendant to bring before him at the hearing as witnesses those who have given information for the presentencing report. That, I will repeat, is one of a coterie of rights which the constitution as interpreted by the courts does not require. Further, the amendment which I have offered will give the defendant the right to go to an appellate court for review of the propriety of his sentence, a right which the present law does not grant to the defendant.

The amendment which the gentleman has offered will, if adopted, unhinge the amendment which I have offered. It will essentially convert into a parallel the approach already contained in the bill in section 408.

If the gentleman's amendment were to be adopted, there would be no point in having my amendment in the bill.

Mr. SATTERFIELD. Mr. Chairman, will the gentleman yield?

Mr. POFF. I yield to my colleague from Virginia.

Mr. SATTERFIELD. Mr. Chairman, I rise to ask a question to clarify in my own mind precisely what the gentleman's amendment proposes to do.

Does the conduct which triggers the additional penalty rely upon acts by the defendant for which he has not been brought to trial?

Mr. POFF. I will say in response to my colleague the first paragraph of subsection (e) defines the habitual offender. The court looks at the conviction record which is supplied by the U.S. attorney to determine whether the convictions fall within the time frame fixed in my definition; namely, 5 years.

In paragraph 2, the court decides whether the accused in the dock is a professional as defined in my amendment; that is, whether the felony of which he has been convicted is a part of a pattern of dealing in controlled substances which was criminal under applicable laws of any jurisdiction.

Mr. SATTERFIELD. Mr. Chairman, if the gentleman will yield further, is that tied to prior convictions which add up to make this conduct an offense?

Mr. POFF. The pattern of dealing in that context is tied to convictions as a practical matter. If the court undertakes to consider the status of a professional criminal, he would refer first to the conviction record.

Mr. SATTERFIELD. Then, it is possible he would consider some act by the person on trial about which no evidence has ever been adduced before a jury?

Mr. POFF. It is possible.

Mr. SATTERFIELD. In your amendment is there any guarantee that where these acts are to be considered the defendant is afforded the presumption of innocence until proved guilty beyond a reasonable doubt?

Mr. POFF. The defendant enjoys that presumption without benefit of specific statutory grants, and he would enjoy the presumption of innocence throughout the process.

Mr. SATTERFIELD. How about in the sentencing process?

Mr. POFF. He would in the sentencing process as well.

Mr. SATTERFIELD. I thank the gentleman.

Mr. POFF. The question of guilt has already been dispositively determined by the jury, and the court is sitting in the absence of the jury.

Mr. CONYERS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, to my colleagues who may not be lawyers, I am sure that the extended discussion of legal cases and criminal sentencing procedures may be getting a bit boring, but I think the gentleman from Virginia (Mr. SATTERFIELD), who is himself a former prosecutor, has asked the kind of questions that I think everyone ought to be asking themselves regarding the amendment, and the amendment to the amendment.

I was not personally familiar with it myself, and so I asked my good friend on the Committee on the Judiciary for the citation a bit earlier. Of course, he graciously gave it to me, and I have read a few pages of it. I do not pretend that I have made a proper legal study of this case in the last 15 minutes, but I want the record to show that as one Member of the House I fail to see how *Williams* v. *New York*, 337 U.S. Reports, page 241, in any way substantiates or indicates approval of the dangerous special drug offender sentencing amendment. The cited case deals with a crime of murder, and it discusses the prerogatives of a judge in sentencing to consider a variety of reports and information brought to him after the conviction and prior to the sentencing.

I think there is a very fundamental distinction that can be easily made by every Member of the House who chooses to read this case; but it does not have anything to do with additional sentencing that is the basis of this amendment offered by the gentleman from Virginia (Mr. POFF). The case cited is in no way reflective upon the merits or demerits of a dangerous special drug offender's sentence. It has simply never taken the matter under consideration.

The fact of the matter is that the Poff amendment will allow the judge, without having a trial, to impose an additional sentence upon a person already found guilty of what might be a relatively minor crime.

This amendment properly offends the sensibilities of a number of Members here who may not be lawyers, and who may not, like the gentleman from Virginia, have had the advantage of reading and digesting Williams versus New York, and who do not know of the intricacies that are involved in an amendment some 10 pages long.

The committee has studied this matter for some months and felt no necessity to include this provision. I have been persuaded by the gentleman from Texas (Mr. ECKHARDT), who argued cogently on the proposition that we need not add additional conviction and penalty provisions in this measure which is already in my judgment overly laden with the concerns of sentencing rather than the problems of education, rather than the problems of cure, rather than the problems of prevention. I think it is proper at this time to suggest that with the Poff amendment this bill has now become top-heavy in its grim determination to cut as deeply into the Constitution as it can.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. ECKHARDT) to the amendment offered by the gentleman from Virginia (Mr. POFF).

The amendment to the amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia (Mr. POFF).

The question was taken; and on a division (demanded by Mr. ECKHARDT), there were—ayes 35, noes 22.

Mr. CORMAN. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count.

Seventy-one Members are present, not a quorum. The Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 314]

| | | |
|---|---|---|
| Adair | Fallon | Mize |
| Adams | Farbstein | Moss |
| Addabbo | Fisher | Murphy, N.Y. |
| Alexander | Flynt | Olsen |
| Ashbrook | Foreman | Ottinger |
| Beall, Md. | Fulton, Tenn. | Patman |
| Blackburn | Gallagher | Pike |
| Brock | Gilbert | Podell |
| Brooks | Griffiths | Powell |
| Brown, Calif. | Gubser | Price, Ill. |
| Brown, Mich. | Halpern | Price, Tex. |
| Burton, Utah | Hansen, Wash. | Reifel |
| Bush | Hawkins | Rivers |
| Button | Hébert | Rooney, Pa. |
| Cabell | Henderson | Roudebush |
| Camp | Hull | Schneebeli |
| Celler | Johnson, Pa. | Sikes |
| Clark | Karth | Stokes |
| Clay | Kleppe | Stuckey |
| Conte | Kluczynski | Symington |
| Corbett | Landrum | Talcott |
| Cowger | Leggett | Teague, Tex. |
| Crane | Long, La. | Tunney |
| Culver | Lukens | Waggonner |
| Daddario | McKneally | Watts |
| Davis, Ga. | McMillan | Whitehurst |
| Dawson | Mailliard | Widnall |
| Devine | Mathias | Wilson, Charles H. |
| Diggs | Meskill | Wold |
| Dorn | Mikva | Yatron |
| Dowdy | Mills | |
| Edmondson | Minshall | |

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. MOORHEAD, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill (H.R. 18583) and finding itself without a quorum, he had directed the roll to be called, when 335 Members responded to their names, a quorum, and he submitted herewith the names of the absentees to be spread upon the Journal.

The Committee resumed its sitting.

The CHAIRMAN. When the point of order was made on the absence of a quorum, the Chair had just announced the vote by division on the amendment offered by the gentleman from Virginia (Mr. POFF)—35 ayes, 22 noes.

Mr. ECKHARDT. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chairman appointed as tellers Mr. POFF and Mr. ECKHARDT.

The Committee again divided, and the tellers reported that there were—ayes 147, noes 61.

So the amendment was agreed to.

AMENDMENT OFFERED BY MR. WIGGINS

Mr. WIGGINS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WIGGINS: On page 181, after line 9, add a new subsection as follows:

"(e) No person who stands convicted of an offense under this part may challenge the validity of any prior conviction alleged under this section which occurred more than five years before the date of the information alleging such prior conviction."

Mr. WIGGINS. Mr. Chairman, the purpose of this amendment is to place a reasonable limitation upon the right of a defendant to attack collaterally a prior conviction which is alleged and which may affect the term of his sentence. Under the bill this right of collateral attack is unlimited, and it should be modified.

It should be pointed out and emphasized, Mr. Chairman, that this amendment affects challenges only to the validity of prior convictions and not challenges as to their existence.

To refresh the memory of the Members, the present bill fixes a double penalty in case the defendant has suffered a prior conviction which is alleged and which is proven. The bill establishes a procedure for alleging the prior conviction. It permits the defendant to deny it. It establishes a procedure for determining the validity of the prior conviction.

Under section 409, the defendant is permitted to attack collaterally this prior conviction without limitation as to when the prior conviction occurred, without limitation as to whether any defect alleged in the prior conviction has been previously resolved by appeal or rejected in a separate collateral attack.

The present bill establishes no limitation as to the right of a defendant to assert factual matters involved in his prior conviction which are stale as a result of the passage of a long period of time, or are uniquely within his knowledge.

Under the amendment, if the prior conviction alleged in the information occurred more than 5 years before the date of the information, its validity—but not the fact of its existence—is conclusively presumed and the defendant may not question it.

Mr. SPRINGER. Mr. Chairman, will the gentleman yield?

Mr. WIGGINS. I yield to the gentleman from Illinois.

Mr. SPRINGER. Mr. Chairman, I have gone into this in some detail. I am authorized to say the Department of Justice has one objection. Personally, I think it is a good amendment. I accept it.

Mr. JARMAN. Mr. Chairman, will the gentleman yield?

Mr. WIGGINS. I yield to the gentleman from Oklahoma.

Mr. JARMAN. Mr. Chairman, I see no objection to the amendment.

Mr. WIGGINS. Mr. Chairman, I thank both gentlemen for their comments.

In conclusion, Mr. Chairman, I wish to say this amendment addresses itself to one of the principal problems presently existing in the Federal Judiciary. Federal courts are clogged with proceedings to attach collaterally prior convictions in State courts. I hope this amendment will in some small way limit that burden.

Mr. CONYERS. Mr. Chairman, will the gentleman yield?

Mr. WIGGINS. I yield to the gentleman from Michigan.

Mr. CONYERS. Mr. Chairman, did the Justice Department know about this amendment?

Mr. WIGGINS. Prior to my offering it?

Mr. CONYERS. Yes.

Mr. WIGGINS. I did not consult with the Justice Department.

Mr. CONYERS. Has there been any prior discussion in the committee on it?

Mr. WIGGINS. I cannot speak for the committee. I do not know.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. WIGGINS).

The amendment was agreed to.

The CHAIRMAN. If there are no further amendments to be proposed, the Clerk will read.

The Clerk read as follows:

PART E—ADMINISTRATIVE AND ENFORCEMENT PROVISIONS

PROCEDURES

SEC. 501. (a) The Attorney General may delegate any of his functions under this title to any officer or employee of the Department of Justice.

(b) The Attorney General may promulgate and enforce any rules, regulations, and procedures which he may deem necessary and appropriate for the efficient execution of his functions under this title.

(c) The Attorney General may accept in the name of the Department of Justice any form of devise, bequest, gift, or donation where the donor intends to donate property for the purpose of preventing or controlling the abuse of controlled substances. He may take all appropriate steps to secure possession of such property and may sell, assign, transfer, or convey any such property other than moneys.

EDUCATION AND RESEACH PROGRAMS OF THE ATTORNEY GENERAL

SEC. 502. (a) The Attorney General is authorized to carry out educational and research programs directly related to enforcement of the laws under his jurisdiction concerning drugs or other substances which are or may be subject to control under this title. Such programs may include—

(1) educational and training programs on drug abuse and controlled substances law enforcement for local, State, and Federal personnel;

(2) studies or special projects designed to compare the deterrent effects of various enforcement strategies on drug use and abuse;

(3) studies or special projects designed to assess and detect accurately the presence in the human body of drugs or other substances which are or may be subject to control under this title, including the development of rapid field identification methods which would enable agents to detect microquantities of such drugs or other substances;

(4) studies or special projects designed to evaluate the nature and sources of the supply of illegal drugs throughout the country;

(5) studies or special projects to develop more effective methods to prevent diversion of controlled substances into illegal channels; and

(6) studies or special projects to develop information necessary to carry out his functions under section 201 of this title.

(b) The Attorney General may enter into contracts for such educational and research activities without performance bonds and without regard to section 3709 of the Revised Statutes (41 U.S.C. 5).

(c) The Attorney General may authorize persons engaged in research to withhold the names and other identifying characteristics of persons who are the subjects of such research. Persons who obtain this authorization may not be compelled in any Federal, State, or local civil, criminal, administrative, legislative, or other proceeding to identify the subjects of research for which such authorization was obtained.

(d) The Attorney General, on his own motion or at the request of the Secretary, may authorize the possession, distribution, and dispensing of controlled substances by persons engaged in research. Persons who obtain this authorization shall be exempt from State or Federal prosecution for possession, distribution, and dispensing of controlled substances to the extent authorized by the Attorney General.

COOPERATIVE ARRANGEMENTS

SEC. 503. (a) The Attorney General shall cooperate with local, State, and Federal agencies concerning traffic in controlled substances and in suppressing the abuse of controlled substances. To this end, he is authorized to—

(1) arrange for the exchange of information between governmental officials concerning the use and abuse of controlled substances;

(2) cooperate in the institution and prosecution of cases in the courts of the United States and before the licensing boards and courts of the several States;

(3) conduct training programs on controlled substance law enforcement for local, State, and Federal personnel;

(4) maintain in the Department of Justice a unit which will accept, catalog, file, and otherwise utilize all information and statistics, including records of controlled substance abusers and other controlled substance law offenders, which may be received from Federal, State, and local agencies, and make such information available for Federal, State, and local law enforcement purposes; and

(5) conduct programs of eradication aimed at destroying wild or illicit growth of plant species from which controlled substances may be extracted.

(b) When requested by the Attorney General, it shall be the duty of any agency or instrumentality of the Federal Government to furnish assistance, including technical advice, to him for carrying out his functions under this title; except that no such agency or instrumentality shall be required to furnish the name of, or other identifying information about, a patient or research subject whose identity it has undertaken to keep confidential.

ADVISORY COMMITTEES

SEC. 504. The Attorney General may from time to time appoint committees to advise him with respect to preventing and controlling the abuse of controlled substances. Members of the committees may be entitled to receive compensation at the rate of $100 for each day (including traveltime) during which they are engaged in the actual performance of duties. While traveling on official business in the performance of duties for the committees, members of the committees shall be allowed expenses of travel, including per diem instead of subsistence in accordance with subchapter I of chapter 57 of title 5, United States Code.

ADMINISTRATIVE HEARINGS

SEC. 505. (a) In carrying out his functions under this title, the Attorney General may hold hearings, sign and issue subpenas, administer oaths, examine witnesses, and receive evidence at any place in the United States.

(b) Except as otherwise provided in this title, notice shall be given and hearings shall be conducted under appropriate procedures of subchapter II of chapter 5, title 5, United States Code.

SUBPENAS

SEC. 506. (a) In any investigation relating to his functions under this title with respect to controlled substances, the Attorney General may subpena witnesses, compel the attendance and testimony of witnesses, and require the production of any records (including books, papers, documents, and other tangible things which constitute or contain evidence) which the Attorney General finds relevant or material to the investigation. The attendance of witnesses and the production of records may be required from any place in any State or in any territory or other place subject to the jurisdiction of the United States at any designated place of hearing; except that a witness shall not be required to appear at any hearing more than 500 miles distant from the place where he was served with a subpena. Witnesses summoned under this section shall be paid the same fees and mileage that are paid witnesses in the courts of the United States.

(b) A subpena issued under this section may be served by any person designated in the subpena to serve it. Service upon a natural person may be made by personal delivery of the subpena to him. Service may be made upon a domestic or foreign corporation or upon a partnership or other unincorporated association which is subject to suit under a common name, by delivering the subpena to an officer, to a managing or general agent, or to any other agent authorized by appointment or by law to receive service of process. The affidavit of the person serving the subpena entered on a true copy thereof by the person serving it shall be proof of service.

(c) In the case of contumacy by or refusal to obey a subpena issued to any person, the Attorney General may invoke the aid of any court of the United States within the jurisdiction of which the investigation is carried on or of which the subpenaed person is an inhabitant, or in which he carries on business or may be found, to compel compliance with the subpena. The court may issue an order requiring the subpenaed person to appear before the Attorney General to produce records, if so ordered, or to give testimony touching the matter under investigation. Any failure to obey the order of the court may be punished by the court as a contempt thereof. All process in any such case may be served in any judicial district in which such person may be found.

JUDICIAL REVIEW

SEC. 507. All final determinations, findings, and conclusions of the Attorney General under this title shall be final and conclusive decisions of the matters involved, except that any person aggrieved by a final decision of the Attorney General may obtain review of the decision in the United States Court of Appeals for the District of Columbia or for the circuit in which his principal place of business is located upon petition filed with

the court and delivered to the Attorney General within thirty days after notice of the decision. Findings of fact by the Attorney General, if supported by substantial evidence, shall be conclusive.

POWERS OF ENFORCEMENT PERSONNEL

SEC. 508. Any officer or employee of the Bureau of Narcotics and Dangerous Drugs designated by the Attorney General may—

(1) carry firearms;

(2) execute and serve search warrants, arrest warrants, administrative inspection warrants, subpenas, and summonses issued under the authority of the United States;

(3) make arrests without warrant (A) for any offense against the United States committed in his presence, or (B) for any felony, cognizable under the laws of the United States, if he has probable cause to believe that the person to be arrested has committed or is committing a felony;

(4) make seizures of property pursuant to the provisions of this title; and

(5) perform such other law enforcement duties as the Attorney General may designate.

SEARCH WARRANTS

SEC. 509. (a) A search warrant relating to offenses involving controlled substances may be served at any time of the day or night if the judge or United States magistrate issuing the warrant is satisfied that there is probable cause to believe that grounds exist for the warrant and for its service at such time.

(b) Any officer authorized to execute a search warrant relating to offenses involving controlled substances the penalty for which is imprisonment for more than one year may, without notice of his authority and purpose, break open an outer or inner door or window of a building, or any part of the building, or anything therein, if the judge or United States magistrate issuing the warrant (1) is satisfied that there is probable cause to believe that (A) the property sought may and, if such notice is given, will be easily and quickly destroyed or disposed of, or (B) the giving of such notice will immediately endanger the life or safety of the executing officer or another person, and (2) has included in the warrant a direction that the officer executing it shall not be required to give such notice. Any officer acting under such warrant, shall, as soon as practicable after entering the premises, identify himself and give the reasons and authority for his entrance upon the premises.

ADMINISTRATIVE INSPECTIONS AND WARRANTS

SEC. 510. (a) As used in this section, the term "controlled premises" means—

(1) places where original or other records or documents required under this title are kept or required to be kept, and

(2) places, including factories, warehouses, or other establishments, and conveyances, where persons registered under section 303 (or exempted from registration under section 302(d)) may lawfully hold, manufacture, or distribute, dispense, administer, or otherwise dispose of controlled substances.

(b)(1) For the purpose of inspecting, copying, and verifying the correctness of records, reports, or other documents required to be kept or made under this title and otherwise facilitating the carrying out of his functions under this title, the Attorney General is authorized, in accordance with this section, to enter controlled premises and to conduct administrative inspections thereof, and of the things specified in this section, relevant to those functions.

(2) Such entries and inspections shall be carried out through officers or employees (hereinafter referred to as "inspectors") designated by the Attorney General. Any such inspector, upon stating his purpose and presenting to the owner, operator, or agent in charge of such premises (A) appropriate credentials and (B) a written notice of his inspection authority (which notice in the case of an inspection requiring, or in fact supported by, an administrative inspection warrant shall consist of such warrant), shall have the right to enter such premises and conduct such inspection at reasonable times.

(3) Except as may otherwise be indicated in an applicable inspection warrant, the inspector shall have the right—

(A) to inspect and copy records, reports, and other documents required to be kept or made under this title;

(B) to inspect, within reasonable limits and in a reasonable manner, controlled premises and all pertinent equipment, finished and unfinished drugs and other substances or materials, containers, and labeling found therein, and, except as provided in paragraph (5) of this subsection, all other things therein (including records, files, papers, processes, controls, and facilities) appropriate for verification of the records, reports, and documents referred to in clause (A) or otherwise bearing on the provisions of this title; and

(C) to inventory any stock of any controlled substance therein and obtain samples of any such substance.

(4) Except when the owner, operator, or agent in charge of the controlled premises so consents in writing, no inspection authorized by this section shall extend to—

(A) financial data;

(B) sales data other than shipment data; or

(C) pricing data.

(c) A warrant under this section shall not be required for the inspection of books and records pursuant to an administrative subpena issued in accordance with section 506, nor for entries and administrative inspections (including seizures of property)—

(1) with the consent of the owner, operator, or agent in charge of the controlled premises;

(2) in situations presenting imminent danger to health or safety;

(3) in situations involving inspection of conveyances where there is reasonable cause to believe that the mobility of the conveyance makes it impracticable to obtain a warrant;

(4) in any other exceptional or emergency circumstance where time or opportunity to apply for a warrant is lacking; or

(5) in any other situations where a warrant is not constitutionally required.

(d) Issuance and execution of administrative inspection warrants shall be as follows:

(1) Any judge of the United States or of a State court of record, or any United States magistrate, may, within his territorial jurisdiction, and upon proper oath or affirmation showing probable cause, issue warrants for the purpose of conducting administrative inspections authorized by this title or regulations thereunder, and seizures of property appropriate to such inspections. For the purposes of this section, the term "probable cause" means a valid public interest in the effective enforcement of this title or regulations thereunder sufficient to justify administrative inspections of the area, premises, building, or conveyance, or contents thereof, in the circumstances specified in the application for the warrant.

(2) A warrant shall issue only upon an affidavit of an officer or employee having knowledge of the facts alleged, sworn to before the judge or magistrate and establishing the grounds for issuing the warrant. If the judge or magistrate is satisfied that grounds for the application exist or that there is probable cause to believe they exist, he shall issue a warrant identifying the area, premises, building, or conveyance to be inspected, the purpose of such inspection, and, where appropriate, the type of property to be inspected, if any. The warrant shall identify the items or types of property to be seized, if any. The warrant shall be directed to a person authorized under subsection (b)(2) to execute it. The warrant shall state the grounds for its issuance and the name of the person or persons whose affidavit has been taken in support thereof. It shall command the person to whom it is directed to inspect the area, premises, building, or conveyance identified for the purpose specified, and, where appropriate, shall direct the seizure of the property specified. The warrant shall direct that it be served during normal business hours. It shall designate the judge or magistrate to whom it shall be returned.

(3) A warrant issued pursuant to this section must be executed and returned within ten days of its date unless, upon a showing by the United States of a need therefor, the judge or magistrate allows additional time in the warrant. If property is seized pursuant to a warrant, the person executing the warrant shall give to the person from whom or from whose premises the property was taken a copy of the warrant and a receipt for the property taken or shall leave the copy and receipt at the place from which the property was taken. The return of the warrant shall be made promptly and shall be accompanied by a written inventory of any property taken. The inventory shall be made in the presence of the person executing the warrant and of the person from whose possession or premises the property was taken, if they are present, or in the presence of at least one credible person other than the person making such inventory, and shall be verified by the person executing the warrant. The judge or magistrate, upon request, shall deliver a copy of the inventory to the person from whom or from whose premises the property was taken and to the applicant for the warrant.

(4) The judge or magistrate who has issued a warrant under this section shall attach to the warrant a copy of the return and all papers filed in conection therewith and shall file them with the clerk of the district court of the United States for the judicial district in which the inspection was made.

FORFEITURES

SEC. 511. (a) The following shall be subject to forfeiture to the United States and no property right shall exist in them:

(1) All controlled substances which have been manufactured, distributed, dispensed, or acquired in violation of this title.

(2) All raw materials, products, and equipment of any kind which are used, or intended for use, in manufacturing, compounding, processing, delivering, importing, or exporting any controlled substance in violation of this title.

(3) All property which is used, or intended for use, as a container for property described in paragraph (1) or (2).

(4) All conveyances, including aircraft, vehicles, or vessels, which are used, or are intended for use, to transport, or in any manner to facilitate the transportation, sale, receipt, possession, or concealment of property described in paragraph (1) or (2), except that—

(A) no conveyance used by any person as a common carrier in the transaction of business as a common carrier shall be forfeited under the provisions of this section unless it shall appear that the owner or other person in charge of such conveyance was a consenting party or privy to a violation of this title or title III; and

(B) no conveyance shall be forfeited under the provisions of this section by reason of any act or omission established by the owner thereof to have been committed or omitted by any person other than such owner while such conveyance was unlawfully in the possession of a person other than the owner in violation of the criminal laws of the United States, or of any State.

(5) All books, records, and research, including formulas, microfilm, tapes, and data

which are used, or intended for use, in violation of this title.

(b) Any property subject to forfeiture to the United States under this title may be seized by the Attorney General upon process issued pursuant to the Supplemental Rules for Certain Admiralty and Maritime Claims by any district court of the United States having jurisdiction over the property, except that seizure without such process may be made when—

(1) the seizure is incident to an arrest or a search under a search warrant or an inspection under an administrative inspection warrant;

(2) the property subject to seizure has been the subject of a prior judgment in favor of the United States in a criminal injunction or forfeiture proceeding under this title;

(3) the Attorney General has probable cause to believe that the property is directly or indirectly dangerous to health or safety; or

(4) the Attorney General has probable cause to believe that the property has been used or is intended to be used in violation of this title.

In the event of seizure pursuant to paragraph (3) or (4) of this subsection, proceedings under subsection (d) of this section shall be instituted promptly.

(c) Property taken or detained under this section shall not be repleviable, but shall be deemed to be in the custody of the Attorney General, subject only to the orders and decrees of the court or the official having jurisdiction thereof. Whenever property is seized under the provisions of this title, the Attorney General may—

(1) place the property under seal;

(2) remove the property to a place designated by him; or

(3) require that the General Services Administration take custody of the property and remove it to an appropriate location for disposition in accordance with law.

(d) All provisions of law relating to the seizure, summary and judicial forfeiture, and condemnation of property for violation of the customs laws; the disposition of such property or the proceeds from the sale thereof; the remission or mitigation of such forfeitures; and the compromise of claims and the award of compensation to informers in respect of such forfeitures shall apply to seizures and forfeitures incurred, or alleged to have incurred, under the provisions of this title, insofar as applicable and not inconsistent with the provisions hereof; except that such duties as are imposed upon the customs officer or any other person with respect to the seizure and forfeiture of property under the customs laws shall be performed with respect to seizures and forfeitures of property under this title by such officers, agents, or other persons as may be authorized or designated for that purpose by the Attorney General, except to the extent that such duties arise from seizures and forfeitures effected by any customs officer.

(e) Whenever property is forfeited under this title the Attorney General may—

(1) retain the property for official use;

(2) sell any forfeited property which is not required to be destroyed by law and which is not harmful to the public, but the proceeds from any such sale shall be used to pay all proper expenses of the proceedings for forfeiture and sale including expenses of seizure, maintenance of custody, advertising and court costs;

(3) require that the General Services Administration take custody of the property and remove it for disposition in accordance with law; or

(4) forward it to the Bureau of Narcotics and Dangerous Drugs for disposition (including delivery for medical or scientific use to any Federal or State agency under regulations of the Attorney General).

(f) All controlled substances in schedule I that are possessed, transferred, sold, or offered for sale in violation of the provisions of this title shall be deemed contraband and seized and summarily forfeited to the United States. Similarly, all substances in schedule I, which are seized or come into the possession of the United States, the owners of which are unknown, shall be deemed contraband and summarily forfeited to the United States.

(g)(1) All species of plants from which controlled substances in schedules I and II may be derived which have been planted or cultivated in violation of this title, or of which the owners or cultivators are unknown, or which are wild growths, may be seized and summarily forfeited to the United States.

(2) The failure, upon demand by the Attorney General or his duly authorized agent, of the person in occupancy or in control of land or premises upon which such species of plants are growing or being stored, to produce an appropriate registration, or proof that he is the holder thereof, shall constitute authority for the seizure and forfeiture.

(3) The Attorney General, or his duly authorized agent, shall have authority to enter upon any lands, or into any dwelling pursuant to a search warrant, to cut, harvest, carry off, or destroy such plants.

INJUNCTIONS

SEC. 512. (a) The district courts of the United States and all courts exercising general jurisdiction in the territories and possessions of the United States shall have jurisdiction in proceedings in accordance with the Federal Rules of Civil Procedure to enjoin violations of this title.

(b) In case of an alleged violation of an injunction or restraining order issued under this section, trial shall, upon demand of the accused, be by a jury in accordance with the Federal Rules of Civil Procedure.

ENFORCEMENT PROCEEDINGS

SEC. 513. Before any violation of this title is reported by the Director of the Bureau of Narcotics and Dangerous Drugs to any United States attorney for institution of a criminal proceeding, the Director may require that the person against whom such proceeding is contemplated be given appropriate notice and an opportunity to present his views, either orally or in writing, with regard to such contemplated proceeding.

IMMUNITY AND PRIVILEGE

SEC. 514. (a) Whenever a witness refuses, on the basis of his privilege against self-incrimination, to testify or provide other information in a proceeding before a court or grand jury of the United States, involving a violation of this title, and the person presiding over the proceeding communicates to the witness an order issued under this section, the witness may not refuse to comply with the order on the basis of his privilege against self-incrimination. But no testimony or other information compelled under the order issued under subsection (b) of this section or any information obtained by the exploitation of such testimony or other information, may be used against the witness in any criminal case, including any criminal case brought in a court of a State, except a prosecution for perjury, giving a false statement, or otherwise failing to comply with the order.

(b) In the case of any individual who has been or may be called to testify or provide other information at any proceeding before a court or grand jury of the United States, the United States district court for the judicial district in which the proceeding is or may be held shall issue, upon the request of the United States attorney for such district, an order requiring such individual to give any testimony or provide any other information which he refuses to give or provide on the basis of his privilege against self-incrimination.

(c) A United States attorney may, with the approval of the Attorney General or the Deputy Attorney General, or any Assistant Attorney General designated by the Attorney General, request an order under subsection (b) when in his judgment—

(1) the testimony or other information from such individual may be necessary to the public interest; and

(2) such individual has refused or is likely to refuse to testify or provide other information on the basis of his privilege against self-incrimination.

BURDEN OF PROOF; LIABILITIES

SEC. 515. (a)(1) It shall not be necessary for the United States to negative any exemption or exception set forth in this title in any complaint, information, indictment, or other pleading or in any trial, hearing, or other proceeding under this title, and the burden of going forward with the evidence with respect to any such exemption or exception shall be upon the person claiming its benefit.

(2) In the case of a person charged under section 404(a) with the possession of a controlled substance, any label identifying such substance for purposes of section 503(b)(2) of the Federal Food, Drug, and Cosmetic Act shall be admissible in evidence and shall be prima facie evidence that such substance was obtained pursuant to a valid prescription from a practitioner while acting in the course of his professional practice.

(b) In the absence of proof that a person is the duly authorized holder of an appropriate registration or order form issued under this title, he shall be presumed not to be the holder of such registration or form, and the burden of going forward with the evidence with respect to such registration or form shall be upon him.

(c) The burden of going forward with the evidence to establish that a vehicle, vessel, or aircraft used in connection with controlled substances in schedule I was used in accordance with the provisions of this title shall be on the persons engaged in such use.

(d) Except as provided in sections 2234 and 2235 of title 18, United States Code, no civil or criminal liability shall be imposed by virtue of this title upon any duly authorized Federal officer lawfully engaged in the enforcement of this title, or upon any duly authorized officer of any State, territory, political subdivision thereof, the District of Columbia, or any possession of the United States, who shall be lawfully engaged in the enforcement of any law or municipal ordinance relating to controlled substances.

PAYMENTS AND ADVANCES

SEC. 516. (a) The Attorney General is authorized to pay any person, from funds appropriated for the Bureau of Narcotics and Dangerous Drugs, for information concerning a violation of this title, such sum or sums of money as he may deem appropriate, without reference to any moieties or rewards to which such person may otherwise be entitled by law.

(b) Moneys expended from appropriations of the Bureau of Narcotics and Dangerous Drugs for purchase of controlled substances and subsequently recovered shall be reimbursed to the current appropriation for the Bureau.

(c) The Attorney General is authorized to direct the advance of funds by the Treasury Department in connection with the enforcement of this title.

PART F—ADVISORY COMMISSION

ESTABLISHMENT OF COMMISSION ON MARIHUANA AND DRUG ABUSE

SEC. 601. (a) There is established a commission to be known as the Commission on Marihuana and Drug Abuse (hereafter in this section referred to as the "Commission"). The Commission shall be composed of—

(1) two Members of the Senate appointed by the President of the Senate;

(2) two Members of the House of Representatives appointed by the Speaker of the House of Representatives; and

(3) nine members appointed by the President of the United States.

At no time shall more than one of the members appointed under paragraph (1), or more than one of the members appointed under paragraph (2), or more than five of the members appointed under paragraph (3) be members of the same political party.

(b)(1) The President shall designate one of the members of the Commission as Chairman, and one as Vice Chairman. Seven members of the Commission shall constitute a quorum, but a lesser number may conduct hearings.

(2) Members of the Commission who are Members of Congress or full-time officers or employees of the United States shall serve without additional compensation but shall be reimbursed for travel, subsistence, and other necessary expenses incurred in the performance of the duties vested in the Commission. Members of the Commission from private life shall receive $100 per diem while engaged in the actual performance of the duties vested in the Commission, plus reimbursement for travel, subsistence, and other necessary expenses incurred in the performance of such duties.

(3) The Commission shall meet at the call of the Chairman or at the call of a majority of the members thereof.

(c)(1) The Commission shall have the power to appoint and fix the compensation of such personnel as it deems advisable without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and the provisions of chapter 51 and subchapter III of chapter 53 of such title, relating to classification and General Schedule pay rates.

(2) The Commission may procure, in accordance with the provisions of section 3109 of title 5, United States Code, the temporary or intermittent services of experts or consultants. Persons so employed shall receive compensation at a rate to be fixed by the Commission, but not in excess of $75 per diem, including traveltime. While away from his home or regular place of business in the performance of services for the Commission, any such person may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703(b) of title 5, United States Code, for persons in the Government service employed intermittently.

(3) The Commission may secure directly from any department or agency of the United States information necessary to enable it to carry out its duties under this section. Upon request of the Chairman of the Commission, such department or agency shall furnish such information to the Commission.

(d)(1) The Commission shall conduct a study of marihuana including, but not limited to, the following areas:

(A) the extent of use of marihuana in the United States to include its various sources, the number of users, number of arrests, number of convictions, amount of marihuana seized, type of user, nature of use;

(B) an evaluation of the efficacy of existing marihuana laws;

(C) a study of the pharmacology of marihuana and its immediate and long-term effects, both physiological and psychological;

(D) the relationship of marihuana use to aggressive behavior and crime;

(E) the relationship between marihuana and the use of other drugs; and

(F) the international control of marihuana.

(2) Within one year after the date on which funds first become available to carry out this section, the Commission shall submit to the President and the Congress a comprehensive report on its study and investigation under this subsection which shall include its recommendations and such proposals for legislation and administrative action as may be necessary to carry out its recommendations.

(e) The Commission shall conduct a comprehensive study and investigation of the causes of drug abuse and their relative significance. The Commission shall submit to the President and the Congress such interim reports as it deems advisable and shall within two years after the date on which funds first become available to carry out this section submit to the President and the Congress a final report which shall contain a detailed statement of its findings and conclusions and also such recommendations for legislation and administrative actions as it deems appropriate. The Commission shall cease to exist sixty days after the final report is submitted under this section.

(f) Total expenditures of the Commission shall not exceed $1,000,000.

PART G—CONFORMING, TRANSITIONAL AND EFFECTIVE DATE, AND GENERAL PROVISIONS

REPEALS AND CONFORMING AMENDMENTS

SEC. 701. (a) Sections 201(v), 301(q), and 511 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(v), 331(q), 360a) are repealed.

(b) Subsections (a) and (b) of section 303 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 333) are amended to read as follows:

"SEC. 303. (a) Any person who violates a provision of section 301 shall be imprisoned for not more than one year or fined not more than $1,000, or both.

"(b) Notwithstanding the provisions of subsection (a) of this section, if any person commits such a violation after a conviction of him under this section has become final, or commits such a violation with the intent to defraud or mislead, such person shall be imprisoned for not more than three years or fined not more than $10,000, or both."

(c) Section 304(a)(2) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 334(a)(2)) is amended (1) by striking out clauses (A) and (D), (2) by striking out "of such depressant or stimulant drug or" in clause (C), (3) by adding "and" after the comma at the end of clause (C), and (4) by redesignating clauses (B), (C), and (E) as clauses (A), (B), and (C), respectively.

(d) Section 304(d)(3)(iii) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 334(d)(3)(iii)) is amended by striking out "depressant or stimulant drugs or".

(e) Section 510 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360) is amended (1) in subsection (a) by striking out paragraph (2), by inserting "and" at the end of paragraph (1), and by redesignating paragraph (3) as paragraph (2); (2) by striking out "or in the wholesaling, jobbing, or distributing of any depressant or stimulant drug" in the first sentence of subsection (b); (3) by striking out the last sentence of subsection (b); (4) by striking out "or in the wholesaling, jobbing, or distributing of any depressant or stimulant drug" in the first sentence of subsection (c); (5) by striking out the last sentence of subsection (c); (6) by striking out "(1)" in subsection (d) and by inserting a period after "drug or drugs" in that subsection and deleting the remainder of that subsection; and (7) by striking out "AND CERTAIN WHOLESALERS" in the section heading.

(f) Section 702 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 372) is amended by striking out "to depressant or stimulant drugs or" in subsection (e).

(f) Section 702 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(a)(2)) is amended by inserting a period after "Canal Zone" the first time these words appear and deleting all thereafter in such section 201(a)(2).

(h) The last sentence of section 801(a) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 381(a)) is amended (1) by striking out "This paragraph" and inserting in lieu thereof "Clause (2) of the third sentence of this paragraph,", and (2) by striking out "section 2 of the Act of May 26, 1922, as amended (U.S.C. 1934, edition, title 21, sec. 173)" and inserting in lieu thereof "the Controlled Substances Import and Export Act".

(i)(1) Section 1114 of title 18, United States Code, is amended by striking out "the Bureau of Narcotics" and inserting in lieu thereof "the Bureau of Narcotics and Dangerous Drugs".

(2) Section 1952 of such title is amended—

(A) by inserting in subsection (b)(1) "or controlled substances (as defined in section 102(6) of the Controlled Substances Act)" immediately following "narcotics"; and

(B) by striking out "or narcotics" in subsection (c).

(j) Subsection (a) of section 302 of the Public Health Service Act (42 U.S.C. 242(a)) is amended to read as follows:

"SEC. 302. (a) In carrying out the purposes of section 301 with respect to drugs the use or misuse of which might result in drug abuse or dependency, the studies and investigations authorized therein shall include the use and misuse of narcotic drugs and other drugs. Such studies and investigations shall further include the quantities of crude opium, coca leaves, and their salts, derivatives, and preparations, and other drugs subject to control under the Controlled Substances Act and Controlled Substances Import and Export Act, together with reserves thereof, necessary to supply the normal and emergency medicinal and scientific requirements of the United States. The results of studies and investigations of the quantities of narcotic drugs or other drugs subject to control under such Acts, together with reserves of such drugs, that are necessary to supply the normal and emergency medicinal and scientific requirements of the United States, shall be reported not later than the first day of April of each year to the Attorney General, to be used at his discretion in determining manufacturing quotas or importation requirements under such Acts."

PENDING PROCEEDINGS

SEC. 702. (a) Prosecutions for any violation of law occurring prior to the effective date of section 701 shall not be affected by the repeals or amendments made by such section, or abated by reason thereof.

(b) Civil seizures or forfeitures and injunctive proceedings commenced prior to the effective date of section 701 shall not be affected by the repeals or amendments made by such section, or abated by reason thereof.

(c) All administrative proceedings pending before the Bureau of Narcotics and Dangerous Drugs on the date of enactment of this Act shall be continued and brought to final determination in accord with laws and regulations in effect prior to such date of enactment. Where a drug is finally determined under such proceedings to be a depressant or stimulant drug, as defined in section 201(v) of the Federal Food, Drug, and Cosmetic Act, such drug shall automatically be controlled under this title by the Attorney General without further proceedings and listed in the appropriate schedule after he has obtained the recommendation of the Secretary. Any drug with respect to which such a final determination has been made prior to the date of enactment of this Act which is not listed in section 202 within schedules I through V shall automatically be controlled under this title by the Attorney General without further proceedings, and be listed in the appropriate schedule,

after he has obtained the recommendations of the Secretary.

PROVISIONAL REGISTRATION

SEC. 703. (a)(1) Any person who—

(A) is engaged in manufacturing, distributing, or dispensing any controlled substance on the day before the effective date of section 302, and

(B) is registered on such day under section 510 of the Federal Food, Drug, and Cosmetic Act or under section 4722 of the Internal Revenue Code of 1954,

shall, with respect to each establishment for which such registration is in effect under any such section, be deemed to have a provisional registration under section 303 for the manufacture, distribution, or dispensing (as the case may be) of controlled substances.

(2) During the period his provisional registration is in effect under this section, the registration number assigned such person under such section 510 or under such section 4722 (as the case may be) shall be his registration number for purposes of section 303 of this title.

(b) The provisions of section 304, relating to suspension and revocation of registration, shall apply to a provisional registration under this section.

(c) Unless sooner suspended or revoked under subsection (b), a provisional registration of a person under subsection (a)(1) of this section shall be in effect until—

(1) the date on which such person has registered with the Attorney General under section 303 or has had his registration denied under such section, or

(2) such date as may be prescribed by the Attorney General for registration of manufacturers, distributors, or dispensers, as the case may be,

whichever occurs first.

EFFECTIVE DATES AND OTHER TRANSITIONAL PROVISIONS

SEC. 704. (a) Except as otherwise provided in this section, this title shall become effective on the first day of the seventh calendar month that begins after the day immediately preceding the date of enactment.

(b) Parts A, B, E, and F of this title, section 702, this section, and sections 705 through 709, shall become effective upon enactment.

(c) Sections 305 (relating to labels and labeling) and 306 (relating to manufacturing quotas) shall become effective on the date specified in subsection (a) of this section, except that the Attorney General may by order published in the Federal Register postpone the effective date of either or both of these sections for such period as he may determine to be necessary for the efficient administration of this title.

CONTINUATION OF REGULATIONS

SEC. 705. Any orders, rules, and regulations which have been promulgated under any law affected by this title and which are in effect on the day preceding enactment of this title shall continue in effect until modified, superseded, or repealed.

SEVERABILITY

SEC. 706. If a provision of this Act is held invalid, all valid provisions that are severable shall remain in effect. If a provision of this Act is held invalid in one or more of its applications, the provision shall remain in effect in all its valid applications that are severable.

SAVING PROVISION

SEC. 707. Nothing in this Act, except this part and, to the extent of any inconsistency, section 307(e) and 309 of this title, shall be construed as in any way affecting, modifying, repealing, or superseding the provisions of the Federal Food, Drug, and Cosmetic Act.

APPLICATION OF STATE LAW

SEC. 708. No provision of this title shall be construed as indicating an intent on the part of the Congress to occupy the field in which that provision operates, including criminal penalties, to the exclusion of any State law on the same subject matter which would otherwise be within the authority of the State, unless there is a positive conflict between that provision of this title and that State law so that the two cannot consistently stand together.

APPROPRIATIONS AUTHORIZATIONS

SEC. 709. There are authorized to be appropriated for expenses of the Department of Justice in carrying out its functions under this title (except section 103) not to exceed $60,000,000 for the fiscal year ending June 30, 1972, $70,000,000 for the fiscal year ending June 30, 1973, and $90,000,000 for the fiscal year ending June 30, 1974.

Mr. JARMAN (during the reading). Mr. Chairman, I ask unanimous consent that the remainder of title II be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

AMENDMENT OFFERED BY MR. SATTERFIELD

Mr. SATTERFIELD. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SATTERFIELD: On page 189, line 4, strike out "(a)" and strike out line 10 and all that follows down through line 26.

Mr. SATTERFIELD. Mr. Chairman, the purpose of my amendment is to remove from this bill the provision which will permit the issuance of no-knock search warrants.

I do not intend to belabor this issue because every Member of this body has given it consideration already. I do wish to discuss, however, some aspects of it in terms of its practical application without confusing that consideration by arguments dealing with court decisions.

I am primarily concerned by an argument which has been used by proponents of this provision that it does no more than codify common law. I do not agree with that position.

In common law a police officer may not enter a dwelling without first announcing his presence. At best there are three exceptions to this rule. The first, where the person or persons within already know of the officers' authority and purpose; the second, where the officers are justified in the belief that persons within are in imminent peril of bodily harm; and third, where those within, made aware of the presence of someone outside—because, for example, there has been a knock at the door—are then engaged in activity which justify the officers in the belief that an escape or the destruction of evidence is being attempted.

I wish to emphasize that these three exceptions depend upon circumstances existing at the precise moment the officer must make his decision whether to announce his presence or break down the door and enter without doing so. I know of no ruling by the Supreme Court that would provide otherwise.

The issuance of a no-knock warrant under the provision contained in this bill is not predicated upon circumstances existing at the time of entry. Instead the warrant would be issued upon an affidavit given by the officer who seeks the warrant which would state that circumstances at a later time will be such that an announcement of his presence at the moment of entry would result in destruction of the evidence he seeks or would place him in danger of harm. Under this provision, therefore, the officer's affidavit can do no more than prophesy the circumstances which he believes will exist at a later time.

The greatest distinction between this provision and the common law is that the officer armed with a no-knock warrant, the issuance of which is not based upon circumstances existing at the time of entry, issued at a place removed from the place to be searched possesses what in effect is a license to enter the premises where he is to conduct his search regardless of what the circumstances may be when he arrives at those premises and regardless of what the circumstances may be at the moment he would otherwise be required to announce his presence.

Clearly this provision enlarges the common law. Clearly, this provision compromises the fundamental right of a citizen to security within his home free from unreasonable governmental interference.

This drug abuse bill, in my view, is a well-rounded measure vitally needed to combat a serious problem in this country. I can appreciate the feeling of urgency to act which we all share. I understand how one might feel that there may be greater reason here to relax the strictest construction of a basic individual right. No one is more interested in apprehending and convicting the criminal element in this country. However, I would remind you that once we begin to compromise a fundamental principle such as this because we feel that compromise is necessary to achieve a desired result, we establish the precedent for further compromises to meet other necessities. Once begun that process might well continue until there no longer remains a principle to be compromised.

I believe this is a highly desirable bill and I intend to support it regardless of the outcome of this amendment. Let me point out, however, that it is not this provision which makes this a good bill, and that its absence will not make it a bad bill. In my view its absence will make this a better bill. I urge you to support this amendment.

Mr. CARTER. Mr. Chairman, I move to strike the last word.

(By unanimous consent, Mr. CARTER was allowed to proceed for 3 additional minutes.)

Mr. CARTER. Mr. Chairman, today we are considering H.R. 18583, the Comprehensive Drug Abuse Prevention and Control Act of 1970. I believe it should be passed, but with certain alterations. The most serious fault of this bill is that it authorizes law enforcement officers to conduct a search without knock-

ing or giving notice to the occupants of the home subject to the search.

My opposition is founded on two considerations. First, as a practical matter, we are not giving our enforcement agents added protection but rather endangering their lives. Second, such a provision is unconstitutional.

If a no-knock search warrant is obtained and carried out in my home State, the pursuers of this course of action are running the grave risk of being greeted by a shotgun blast from the occupant who wants nothing more than to protect his family from unannounced intruders.

As we all know, we are living in a period of increased crime that affects the rural communities as much as the urban ones. We constantly read about increased firearms sales to homeowners who think they need this protection at home. People are conscious of crime and of the need to be prepared when it strikes. These are innocent, law-abiding citizens, not drug pushers, who are prepared to meet potential danger with deadly force.

Recently, in a large southern city where no-notice search warrants can be obtained, a family was awakened in the early hours of the morning by police officers standing in their home. Some of them were in uniform and others were in plain clothes. They were advised by an informant that this particular home was constantly visited by young people and that there was reason to believe that drugs were being sold. This was sufficient cause to obtain a no-knock, or no-notice, search warrant. But, as it turned out, it was a family of seven children and no evidence to support a crime was discovered. The police officers should have felt relieved that they were not attacked by this unaware citizen, who never imagined that such a move would be made against his home and family. If this had happened in almost any home in my district, the first response of the head of the house would have been to shoot now and ask later. Suppose it happened in your home, or a friend's home, what would be the result?

My second reason for opposition is that it is unconstitutional. This has been said so often that it is almost a cliché, but the evidence bears it out. Not only can it be shown to be unconstitutional, but contrary to our heritage in Western civilization.

The fourth amendment states, in part:

> The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated. . . .

The key, therefore, is how to define, "unreasonable." It should be defined objectively and not subjectively; that is to say, that we should not look to our immediate situation and decide upon a definition in view of our need for more law enforcement. We should look to the history behind the amendment and attempt to decide the reasons for its inclusion into the Constitution.

The Romans placed great value on the privacy and sanctity of the home, for it was a shelter for their gods as well as their families. The procedure for obtaining and carrying out a search warrant was detailed, and the penalty for disobedience was severe. Cicero summed it up when he stated:

> What is more inviolable, what better defended by religion than the house of a citizen . . . this place of refuge is so sacred to all men, that to be dragged from thence is unlawful.

The home should require such respect today, but shall it be open to all invasions by men of zeal who operate on mere suspicions? It is not the duty of this Government to protect it from invasion rather than encourage intrusions?

The Romans recognized the value in protecting the home from the government as well as from thieves, as the British would soon learn. English history is full of oppressive excise taxes that were enforced by general no-knock search warrants. During the development of common law, many attempts were made to restrict the Crown's authority to enter one's home and search without just cause, but the practice continued until the time of the American Revolution.

The roots of the fourth amendment were laid, however, and we should draw on this history as an explanatory source for the adoption of this amendment, subjects of the Crown were tired of general search warrants that did not require the listing of objects to be seized, the obtaining of a warrant without a showing of justifiable reason, and the entrance into a home without notice.

In 1766, William Pitt said, in urging Parliament to restrict the King:

> The poorest man may, in his cottage, bid defiance to all the forces of the Crown. It may be frail; its roof may shake; the wind may blow through it; the storm may enter; the rain may enter; but the King of England may not enter; all his forces dare not cross the threshold of the ruined tenement.

Mr. Pitt was only partially correct, for he should have said the King of England should not enter, for he did. Although his entrance was known to be illegal, there seemed to be no power that could stop him. The only power to stop him in America was found in a revolution. England knew it was illegal, but the high officials elected to turn their backs and rationalize that the taxes were needed and these searches were the only means to guarantee their collection. The small gains made through these illegal tactics were far outweighed by domestic upheaval and revolutions, so let us learn from our history.

Those who say that the King's keys open all doors are correct only in that the doors are opened illegally, for while it was the custom for the King to enter at will, it was understood by those who authorized the act, and dissented against it, to be illegal. The leading case in this area and the one most relied upon by constitutional authorities is *Semayne's case*, S. Coke's Report 91a 77 Eng. Report 194 (K. B. 1603).

In this short opinion, it is stated approximately 10 times that notice must be given before legal entrance can be obtained for a search of the premises:

> In all cases when the King (F) is party, the sheriff (if the doors be not open) may break the party's house, either to arrest him, or to do other execution of the King's process, if otherwise he cannot enter. But before he breaks it, he ought to signify the cause of his coming, and to make request to open doors (C); and that appears well by the state. Of westm 1. C. 17. (which is but an affirmance of the common law) . . .

It also states that one who enters without notice is guilty of trespass; thus, the custodian of the law becomes the offender, due to his zeal and the suspected offender becomes the victim of governmentally sanctioned illegal action. Later, 1756, the Curtis case, 168 Eng. Report 67 (1756).

While reiterating the notice requirement, held that the killing of a King's officer who attempted to enter a house without notice was justifiable homicide, neither murder nor manslaughter, but justifiable.

A study of the common law teaches us two things. One that illegal searches were conducted by those who boasted the King's keys opened all doors; and, two, that the best authorities wanted to protect the home from unreasonable searches, and a cornerstone of this protection was a requirement of notice.

The reasons why we should follow the fourth amendment are clear from its history, and its intent is clear both by reference to common law and court decisions. The only question remaining is whether we will yield to expediency or respect the rights guaranteed by the Constitution.

Mr. LONG of Maryland. Mr. Chairman, will the gentleman yield?

Mr. CARTER. I yield to the distinguished gentleman from Maryland.

Mr. LONG of Maryland. Mr. Chairman, I want to compliment the gentleman from Kentucky for the thoughtful and scholarly summary of the position of many of the Members against this no-knock provision.

I would ask the gentleman from Kentucky is it not true that what we are trying to do in this bill is protect the innocent citizen against the criminal? And do we really accomplish that purpose by making it possible for the police officer to burst without warning into his home, as recently happened in Maryland when plainclothes officers broke into a home without knocking, frightening a family and its children only to learn that a mistake had been made in the address? Let it not be forgotten that those of us who are opposed to no-knock are trying to protect the innocent citizen.

Mr. CARTER. That is exactly right.

Mr. GRAY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in support of H.R. 18583, the drug abuse prevention and control act. This legislation is badly needed. To coin a phrase, "the hour is late, the need is great."

Mr. Chairman, the purpose of H.R. 18583 is to deal comprehensively with the menace of drug abuse in the United States through providing authority for increased efforts in drug abuse prevention and rehabilitation of users, through providing more effective means for law enforcement aspects of drug abuse prevention and control, and by providing for an overall balanced scheme of criminal penalties for offenses involving drugs.

Mr. Chairman, the Democratic-controlled Congress has taken the lead in

providing tools with which the medical field and law enforcement officials can deal with this national menace. I believe the universities and colleges, elementary and secondary schoolteachers, professors and boards could be more helpful to students who are known drug users. First offenders should be shown compassion and a helping hand to medical attention and absolute cure. Mr. Chairman, politics has no place in this important plague now facing our country; however, the President, Vice President, and other high officials have been blaming the Democratic-controlled Congress for "alleged inaction," instead of getting to the real roots of the problem. As an example, just 2 years ago after we had passed a drug control bill on the floor of Congress, the distinguished minority leader, Mr. FORD, wrote a letter to my then-opponent, Harrisburg, Ill., Mayor Val Oshel in which among other things Mr. FORD said:

> Congressman Gray has aided and abetted dope pushers and users because he did not sponsor one of the Republican amendments offered and defeated on the Floor during Committee consideration.

I supported the bill as reported out of the Judiciary Committee and voted the same way an overwhelming majority of the House Members voted. I also voted the same way Mr. FORD did on final passage. I raise this question today in order to alert my colleagues to the fact that they may be faced with their opponents calling press conferences and television appearances waving a "Jerry Ford" letter to the effect that you are "soft on drug users and pushers." You say it cannot happen? It did to me in the last campaign. Unless we shed some light on the subject it could happen again. I think the practice is reprehensible especially from one of the leaders of this House. I resented it then—and I resent it now. I support the bill before us with the hope that we can stamp out this dreaded menace to society. The menace of retarding the minds and bodies of our youth. I hope we can all show compassion for those who are "hooked" and need help and no compassion for persons who are in the business of selling drugs. This bill will go a long way in achieving that goal.

Mr. STAGGERS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in favor of the amendment offered by the gentleman from Virginia. I strongly oppose the no-knock provision in the bill.

I think that one of the greatest threats to liberty is the well-intentioned zeal of honorable men. Having been a law enforcement officer, a sheriff for 4 years during the depression when there was a great deal of bootlegging and other crimes, never once were we compelled to break any man's door down to get evidence, even when they could destroy it. We can do as well today, even though the search may be for drugs rather than liquor.

Mr. Chairman, I believe this provision of the bill is a violation of one of the very fundamental rights of every American family in this land. We should not permit Federal officers to break a person's door down, and I oppose this expansion of these officers.

There are those who will say that by common law we can do this today. That may be so, but if you put this provision in this bill, the next time you are going to make it just a little bit stronger, and then just a little bit stronger, and still a little bit stronger all down the line.

Mr. Chairman, I say we should not allow this to be done today in the House of Representatives. If we pass this, then I say that there will come the day when every Member of this House will rue this day for having this placed in the law.

I say that law enforcement officers can get their evidence in other ways if they have the ingenuity to do it. From personal experience I know it can be done, and it can be done through means other than trying to break into someone's house.

Mr. Chairman, if this bill passes with this no-knock provision in it, I predict that there will not be just a few people killed, but I predict that there will be hundreds, and even thousands, of people killed trying to break into somebody's home.

I believe that there are a lot of Americans who would shoot first and ask questions later if someone tried to break their door down.

I do not believe this belongs in this bill. I believe it should be taken out, and I support the amendment offered by my friend, the gentleman from Virginia (Mr. SATTERFIELD).

The CHAIRMAN. The Chair recognizes the gentleman from Michigan (Mr. DINGELL).

Mr. DINGELL. Mr. Chairman, I would ask my colleagues to go back with me in memory 150 years—back to the year 1830—or 160 or 170 or 180 years, to the days following when this Nation had just won its freedom.

I am satisfied that if a person had offered language during those days of the kind that we find in the committee bill on page 189, dealing with no-knock, he would have been tarred and feathered and ridden out of the Chamber on a rail.

The language we read on page 189 of the bill dealing with no-knock searches and seizures is, I am satisfied, the precise kind of ruling utilized by the King's officers in the days immediately preceding 1776.

I am equally satisfied that the free men in that day felt the same outrage that free men in this day are going to feel when the successors to the King's officers come barging through their doors carrying the so-called no-knock warrants.

I am well satisfied that the debate the Members are going to hear in this body shortly from my colleagues, justifying the search warrant language, the no-knock warrant, will be precisely the same language utilized by the King's officers or the King's prosecutors and by his friends in Parliament in the days prior to the great revolution that founded this Republic.

I am satisfied there is a fundamental injustice in the approach which is set out in section 509 (a) and (b), as to the right of a person to enter the dwelling of another without good cause and without appropriate protections to the sanctity of the home; and that it is precisely the same language that was heard ringing in the halls of Parliament and in the King's courts during the last days of the Colonies to justify the high-handed actions of the king's officers, which led to the Colonies breaking off from the King's power and setting themselves up as a free nation.

I am well satisfied that those arguments were well answered in the Bill of Rights and in the protections engraved in the Constitution against unreasonable searches and seizures.

Mr. LONG of Maryland. Mr. Chairman, will the gentleman yield?

Mr. DINGELL. I yield to the gentleman.

Mr. LONG of Maryland. Does not this no-knock provision really put the innocent citizen in double jeopardy—jeopardy not only at the hands of the criminal but now also at the hands of the law?

Mr. DINGELL. Absolutely. I would just point out the recent very excellent example of how this no-knock procedure works in respect to an innocent occupant of a home in Maryland, when all of a sudden the King's officers—not the King's officers but the officers of the law—broke into her door and proceeded to ransack the house.

The fact, of course, that the officers made a mistake and broke into a home some distance away—as a matter of fact, a block or so away from the point where the search should have taken place—was, of course, small comfort to the occupants of the house.

I would point out here again that the occupants of the house were given very little consideration or redress for that grievance.

I am sure every Member of this body is aware of the law of search and seizure. It says that when the flight of a felon is expected, the officers may break in. When it is anticipated that evidence is going to be dissipated or destroyed, the officers can break in. When access is refused, the officers may break in. This is the existing law—and it is not any novelty.

I would point out that the search warrant which would be issued under this section would afford little additional protection against the kind of fascistic approach that could be taken pursuant to the search warrants that would be issued hereunder.

I would say that if we were to go back to the times following the great Revolution, which gave us our freedom and our liberties, and if we were to offer an amendment of this kind to the fundamental law of the United States, I am well satisfied that the citizenry of this Nation in those days would have risen in complete and total and holy outrage and voted them out of office, to the last man, as indeed they well should have.

I would point out to my friends and colleagues that this offers very little in the way of a weapon to combat crime. It offers very little in new means or new

methods to control the traffic in drugs. But indeed it does jeopardize a sacred and fundamental liberty that belongs to the people of this Nation, and it is engraved in the fundamental law, the Constitution of the United States, which each and every Member here present takes oath at the beginning of each session of the Congress to support and defend.

Mr. JARMAN. Mr. Chairman, I hope we can arrive at a time for concluding the debate on this amendment and all amendments thereto. I ask unanimous consent that debate on this amendment and all amendments thereto conclude at 5:45 p.m.

The CHAIRMAN. Is there objection to the request of the gentleman from Oklahoma?

Mr. SPRINGER. Mr. Chairman, I object.

Mr. Chairman, I move to strike the requisite number of words.

The CHAIRMAN. The gentleman from Illinois is recognized for 5 minutes.

Mr. HAYS. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count.

One hundred thirty-two Members are present, a quorum.

The gentleman from Illinois will proceed.

Mr. SPRINGER. Mr. Chairman, let me, if I may, see if I can simplify this question a little bit. New York State is one of the two or three liberal States in the Union. I do not believe any of us would question that fact. For some 7 or 8 years in New York State the officer seeking a search warrant has had to go before a judge and make an affidavit that evidence will be destroyed or that there will be danger to the officer seeking to break down a door or to make the search. He must get an order from the judge himself before he can have a search warrant that provides entry without knocking.

I am advised by my colleague on the committee who has served in the New York State Legislature that that law has been used about a dozen times a year. Why is it used only a dozen times a year? Because anyone who goes to get that kind of search warrant knows he has to go with rather complete evidence that there will be danger to the officer seeking to make the entrance, or that the evidence will be destroyed. That is the purpose of it.

Whom do we expect to pick up in the network of this kind of amendment? The people that the Department of Justice would expect to get under this provision are the people who are the professionals, and organized rings.

It is my understanding we can have a package of heroin no bigger than a small square, which is worth a half-million dollars.

I remember when I was a boy in a small town in Indiana I was hanging around the sheriff's office. It might have been very similar to the office of my chairman, but it was a little town. One afternoon the sheriff was going out to make a raid, because it was during the dry days. He said, "Bill, would you like to go along?" I was about 12 or 13 years old. So he took me in the car with him, with two or three deputies, and we went out to Blondie Dudley's—the town bootlegger. The sheriff went up to the door and knocked on it and said, "Blondie Dudley, open up. This is Charlie Wiley, the sheriff."

I can remember this man said, "Dorothy, it's the sheriff. Throw it down the sump." I will admit he kept the door closed for quite a while. The sheriff kept knocking on it. The only thing I can remember in addition to that is that just before the door opened, and just after we got inside, the commode flushed twice.

I give this as an example of how much easier it would be to take just a little bit of marihuana, which we will say came out of Champaign County, Ill., and which winds up on the campus of Illinois University, where we have 35,000 students, and a pusher on the campus is selling it to everybody, and we want to get some kind of search warrant to keep him from destroying the evidence. We have pretty well cased the joint, and we know where the drug is coming from, and we have the evidence of sale, and if we go out there and knock two or three times, he has it on the shelf and he is prepared to dump it down the sump.

The Members know about this provision. We had it in the District of Columbia crime bill. We voted for it then. This provision is tighter. This gives us much less leeway, because we use the words, on page 189, "will be easily and quickly destroyed or disposed of." In the District of Columbia crime bill we had the words "is likely to."

On lines 19 and 20 and 21 of this bill, under (B) we have the words:

> The giving of such notice will immediately endanger the life or safety of the executing officer or another person . . .

Mr. Chairman, the officer has to make an affidavit that it will. In the District of Columbia crime bill we said "is likely to" endanger the life, or endanger the loss of the evidence. So we have made this provision more strict. We have protected the rights of the defendant more in this bill than we did in the District of Columbia bill.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

(By unanimous consent, Mr. SPRINGER was allowed to proceed for 3 additional minutes.)

Mr. SPRINGER. Mr. Chairman, what I am trying to say in this is that we are not changing the law any from what it was under the District of Columbia crime bill where we voted by an overwhelming majority, as I recall it on a rollcall vote, for this no-knock provision. It carried by a very sizable figure.

Let me say this. On the question of whether this is constitutional, because my friend, the distinguished gentleman from Kentucky raised the point a moment ago, that it was unconstitutional, I will say to my distinguished colleague who served in the New York State Legislature, that not only did they pass the bill, but it went through the highest court of appeal in the State of New York, and the law was affirmed. It went to the U.S. Supreme Court and certiorari was denied. So it is constitutional. Already it has been declared constitutional. There is no question about the constitutionality of no-knock. It has been decided.

I raise that point for the benefit of anyone who would think this would be unconstitutional. The Members will not be disillusioned because this has already been decided by the highest court in the land.

Further, may I say we are in a very serious problem with narcotics and drugs of all kinds. Do Members think we would come in here asking for this kind of search warrant if we did not think it was needed? I have been a prosecuting attorney and a judge, and now I come here as a legislator. The last thing in the world I would come before a body as distinguished as this, the greatest legislative body on the face of the earth, and ask for is this kind of legislation if I did not believe that the Department of Justice needed this in order to attack this very serious problem.

I respect all of the Members who sincerely believe this is not wise.

The only thing I am attacking is the question of the judgment on it, because I believe in the light of the experience we are having throughout the world, as to the importation of narcotics of all kinds from outside, one of our only hopes of landing these "big fish" in the net is this kind of search warrant, in order that we may accomplish the purposes of this act.

Mr. JARMAN. Mr. Chairman, will the gentleman yield?

Mr. SPRINGER. I yield to my distinguished chairman.

Mr. JARMAN. I thank the gentleman for yielding.

Mr. Chairman, I ask unanimous consent that debate on this amendment and all amendments thereto close at 6 o'clock.

The CHAIRMAN. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

The CHAIRMAN. Members standing at the time the unanimous consent agreement to limit debate was entered will be recognized for approximately 1 minute each.

(By unanimous consent, Messrs. SPRINGER and NELSEN yielded their time to Mr. HASTINGS.)

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. HASTINGS).

Mr. HASTINGS. Mr. Chairman, I appreciate the gentlemen yielding their time to me.

I should like primarily to verify what the gentleman from Illinois (Mr. SPRINGER) said about the New York statute. I was a member of the State legislature when in 1964 we passed the no-knock statute in the State of New York. Not surprisingly, I heard the same arguments on the floor of the house of the State legislature then that we are hearing today.

I might say, in fact, the New York statute went into effect in 1965. It has since been taken to the Supreme Court of the State of New York and taken to the

Court of Appeals of the State of New York, and has been upheld as to its constitutionality in relation to the fourth amendment. A petition for certiorari was denied by the U.S. Supreme Court. I am not bothered by the constitutional question.

I believe it is important to understand, in passing this most effective and comprehensive Drug Abuse Act, that we are in fact primarily talking about law enforcement. When we talk about the utilization of the no-knock provision we are not talking about having innocent citizens in a house having their doors broken down, but we are talking about people who are trafficking in hard narcotics.

If Members will read the statute, they will see it says clearly that it must be on the commitment of a felony, and a judge has to issue to a Federal enforcement agency a warrant, based on the probable cause that the property may, and if such notice is given, will be easily and quickly disposed of, prior to their going in to exercise the no-knock warrant.

If every Member in this room believes we can have no confidence at all in our law enforcement officers at the Federal level, or in the Federal system of judges, then I could say there might be some concern. I know we can have confidence in them, therefore I can see no cause for that concern.

I can understand the concern of those expressing concern over the loss of individual civil liberties.

But bear in mind that what we are primarily doing is trying to get at those people who are trafficking in the serious drugs, the narcotic drugs and other hallucinogenic drugs, that we all express concern about. Yet when we offer a law enforcement tool that can be utilized to try to bring to trial those who traffic in these drugs, we find this opposition.

Mr. Chairman, I strongly oppose this amendment and feel, although the bill will not be destroyed if it is not included in the bill, it is a most effective tool for the law enforcement agencies of this country.

I strongly urge Members to defeat this amendment that would delete the no-knock provision from the bill.

The CHAIRMAN. The Chair recognizes the gentleman from Michigan (Mr. CONYERS).

Mr. CONYERS. Mr. Chairman, I think the arguments have already been cogently made in support of the amendment. I think the Members who have originally worried about it from the first time it came to the floor, about its spreading into other legislation, have now seen their worst fears realized. This very serious constitutional violation is now before the Members for their consideration again. Will we reject this abominable provision? I doubt it.

The CHAIRMAN. The Chair recognizes the gentleman from California (Mr. WALDIE).

Mr. WALDIE. Mr. Chairman, the Constitution throws a shield around the profits of drug corporations as well as the homes of individuals. Today this House protected the profits of the drug corporations from excessive interference of governmental authority. I hope they find equal zeal in protecting the sanctity of homes of Americans from excessive governmental authority, although I doubt that that will be the case.

The CHAIRMAN. The Chair recognizes the gentleman from Illinois (Mr. PUCINSKI).

Mr. PUCINSKI. Mr. Chairman, I respect the debate going on in this no-knock provision, but I think it is important to point out that on page 189, line 21, it is specifically provided that a policeman may not serve a warrant without knocking unless the court has specifically included in the warrant a direction that the officer executing the warrant shall not be required to give notice.

All over this country warrants are being issued today by kicking in doors. A number of our colleagues have related abuses that presently exist in serving warrants. This is occurring today without a no-knock provision. What the provision before us today says is before anyone can knock in a door to serve a warrant, they have to first get permission from the court issuing the warrant. They have to convince a court that there is a need for such a procedure. My judgment is that courts would be most reluctant to give such permission mindful of our Nation's historic concern for the sanctity of one's home.

It occurs to me that those of you who are interested in protecting the rights of the American citizen and preserving constitutional safeguards would support this language, because this language does strengthen the prohibition against knocking down doors and illegally serving warrants. It clearly says before such a procedure can be used the court must first give such direction. There is no such law any place today. I say to you this provision strengthens constitutional safeguards by having a judge decide when a warrant can be served without notice rather than having the policeman make the decision on the spot. But this provision will help policemen, with prior permission from the court, more effectively carry out their mission of apprehending dope peddlers.

I believe the committee language should be retained.

The CHAIRMAN. The Chair recognizes the gentleman from Florida (Mr. BENNETT).

Mr. BENNETT. Mr. Chairman, I am pleased to support the legislation before the House of Representatives today, H.R. 18583, the Comprehensive Drug Abuse Prevention and Control Act of 1970. I congratulate the chairman and the Committee on Interstate and Foreign Commerce for reporting the bill to the House. I hope it passes and is speedily enacted into law.

Drug abuse in the United States is perhaps our most important crime problem, particularly because it reaches our children and teenage youth—destroying many lives before youngsters have had the real opportunity to mature and become contributing members of our society.

I have long been interested in the drug problem in America. We know from studies that a leading cause of death among teenagers in the United States today in many major metropolitan areas is overdosage of heroin. This is a countrywide threat to our youth. It is not just a ghetto problem. It is not just a suburban problem. It is a nationwide problem threatening every American home, school and church. It crosses the social and cultural life of our Nation and threatens to destroy what is best in the country.

In recent years I have done extensive research and study in the drug problem, and have tried to give assistance to my hometown of Jacksonville, Fla. in its efforts to establish a strong and continuing drug control, prevention and cure center. In May 1969, the city of Jacksonville passed a resolution calling for a drug center office in Jacksonville to cover northeast Florida. The resolution said:

> Unlawful narcotic and drug traffic and use is a serious problem in the City of Jacksonville, Florida, causing severe problems of law enforcement and juvenile delinquency and deterioration in the health and moral standards of the community.

A police officer in Jacksonville said recently that 5 years ago the police made only five or six narcotics arrest all year long and those arrested were all adults. Now, there are daily arrests, mostly involving young people.

As the committee's report states:

> Drug abuse in the United States is a problem of ever-increasing concern, and appears to be approaching epidemic proportions. One indication of the upsurge in drug abuse in the last few years can be found in arrest statistics, although for every individual apprehended, countless others go undetected.

For 1969, uniform crime reports indicate that 182,909 persons were arrested by State and local authorities for drug violations, constituting a 492-percent increase over the number of drug arrests made in 1970. Of the total number arrested in 1969, those under the age of 18 were 57,475; and 8,109 were under the age of 15. The legislation we consider today will help turn this tide, nationwide, and in cities like Jacksonville.

The bill will allow the Department of Health, Education, and Welfare to increase its efforts in the rehabilitation, treatment, and prevention of drug abuse, through community mental health centers and through public health service hospitals and facilities. Enforcement will be improved through the registration of manufacturers, wholesalers, retailers, and all others in the legitimate distribution chain, and there will also be stronger enforcement measures by the Justice Department for illegal transactions outside the legitimate distribution chain. The bill also establishes a presidential commission on marihuana and drug abuse, which will study and report to Congress within 1 year on problems in this area, and within 2 years on the causes of drug abuse and significance.

I believe cities like Jacksonville will benefit from the increased authorization in the bill for rehabilitation centers, such as the officials of Jacksonville, like Mayor Hans G. Tanzler, Jr. and Councilman Lynwood Roberts have worked for, cooperating with their Congressman.

While this is a sound and needed bill, there are other avenues of drug control

we can pursue. I received a letter recently from the Federal Bureau of Narcotics and Dangerous Drugs which stated:

It has been our experience, and indeed this experience has been corroborated by research, that in families and communities where strong moral and spiritual values exist, little abuse of narcotics and dangerous drugs is to be found.

Mr. Chairman, all of us, in the Congress, and all parents in America can learn from this message.

The CHAIRMAN. The Chair recognizes the gentleman from Georgia (Mr. THOMPSON).

Mr. THOMPSON of Georgia. Mr. Chairman, it disturbs me to hear arguments used by Members stating that they would not want their door broken down and the question being asked, "Would you?"

Well, of course, I would not and no Member in this body would. I do not think any Member in this body, even those making these arguments, believe for 1 minute that a Federal judge is going to indiscriminately issue a warrant allowing an officer to enter without knocking, unless there is ample reason for him to issue that warrant. In other words, the authorities are going to have to prove the case, in effect, twice. It will have to be proven before the judge before the warrant is issued for it will take convincing evidence to get a judge to issue a "no knock" warrant and if, of course, they find the evidence, they will have to prove the case at the trial.

However, Mr. Chairman, we are dealing with emotional reactions. Some have been talking about hundreds of doors being broken down and thousands of persons being hurt or injured. This just is not going to happen to innocent citizens.

What we are doing is simply providing a mechanism whereby those who want to put an end to drug pushing and who want to do something constructive about it, will be able to do so for with this provision they can catch the pusher with the evidence before he has time to dispose of it, or in the alternative, those who want to protect a police officer in the furtherance of his duties can so do if it appears he would be in danger of bodily injury were such a warrant not to be issued.

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. KOCH).

Mr. KOCH. Mr. Chairman, this is an issue that should unite liberals and conservatives. We should be joining together here on the floor of the House today, in defense of the Constitution; I am opposed to "no knock" and support the amendment which would delete it from the bill.

Mr. Chairman, we have already had one riot in the District of Columbia as a result of the use of a "no knock" warrant and I believe there will be more harm flowing from the further use of such warrants than any possible good that could come of them.

The CHAIRMAN. The Chair recognizes the gentleman from Florida (Mr. PEPPER).

Mr. PEPPER. Mr. Chairman, I must say that I cannot understand how this administration can consistently take a hard line on crime and consistently support this "no knock" provision which raises grave constitutional questions and in my opinion will cost the lives of many policemen acting under it when the administration is unwilling in this bill to give its own Attorney General power to curb the production of the very drugs they are trying to discover under this provision.

The CHAIRMAN. The Chair recognizes the gentleman from New York (McCARTHY).

Mr. SCHEUER. Mr. Chairman, will the gentleman yield?

Mr. McCARTHY. I yield to the gentleman from New York.

Mr. SCHEUER. Mr. Chairman, I rise in opposition to the amendment.

Mr. McCARTHY. Mr. Chairman, I rise in support of the amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Texas (Mr. ECKHARDT).

Mr. ECKHARDT. Mr. Chairman, I am not quite sure what the names of that charming couple were who were mentioned by the gentleman from Illinois as being so handy with the draw chain of the john. I think it was Willie and Ruth. I cannot for the life of me understand how a judge could tell in advance whether Willie and Ruth would flush the commode. And the requirement is that the officers testify definitely that the evidence "will" be destroyed as by flushing the commode, not just that they "believe" it may be flushed, but that it "will" be.

Now, that is the fault of this provision. A judge cannot be called on to determine whether the search and seizure is reasonable before it occurs, because you cannot tell in advance whether Willie and Ruth are going to try to destroy the evidence. You can only guess what they are going to do. And if the judge is only guessing what they are going to do, then he does not protect their rights against unreasonable search and seizure.

The CHAIRMAN. The Chair recognizes the gentleman from Texas (Mr. PICKLE).

(By unanimous consent, Mr. DINGELL yielded his time to Mr. PICKLE.)

Mr. PICKLE. Mr. Chairman, I thank the gentleman for yielding me his time.

Mr. Chairman, I rise in support of the amendment offered by the gentleman from Virginia (Mr. SATTERFIELD).

Mr. PICKLE. Mr. Chairman, a few weeks ago we had the District crime bill before us, and we put in it the no-knock search provision. The contention was that crime conditions were so bad in the District of Columbia that we just had to do something about it. So we agreed to do it, whether we agreed with the principle or not, that is what we did, because we felt there was such a bad situation existing in the District of Columbia.

However, we had the assurances over and over again that this was a local situation and that it would not be extended, and that we would not violate the valid right of a search warrant.

Now we find that this has been extended in this drug bill. I will tell you that if we allow the application of this principle, then we are establishing a platform from which all kinds of offenses could grow. Let me give you a few examples of what could happen next if we continue this dangerous trend of whittling away the constitutional protections from unwarranted searches. I submit to you that, although we are talking in terms of crime relative to the drug problem, that very easily this could grow into a no-knock search matter with relation to ammunition. Supposing the court was led to believe that they had ammunition in the house, then they could go in and search the house without any kind of notice being given, they could just go into the house and look for the ammunition; and, indeed, any officer could just make the observation that they wanted to see if there were guns in the house, and he could just go to the court and say that a crime might be committed.

You say that that would not happen, but I say to you that it could be extended to include even searches for financial records, and you could go right on down the line, if it was thought that a crime might be committed in a financial institution such as a bank.

Further, it could even go into such areas as income tax violations, if it was thought there might be some crime connected with it.

You might think that what I am saying is rather farfetched, but I say to you that it could happen. It could even happen under the language of this bill if you gave a legally prescribed barbiturate to your child, then you could be suspected of a crime, and therefore they could get a search warrant against you and your home, and they could break into your premises. When they make mistakes—and mistakes already have been made—innocent lives are endangered.

You say that could not happen, but I say to you that it could happen. There is a clear danger that we are on our way to a no-knock search warrant without limitations.

All we are trying to do is to tighten up in every way we possibly can to get the narcotics under control, but I submit to you that we have not solved that problem in New York, and I do not think that this provision in the bill will do it, either.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. STAGGERS yielded his time to Mr. PICKLE.)

Mr. PICKLE. Mr. Chairman, I appreciate the gentleman for yielding his time to me.

I would like to say to the gentleman that I thought the gentleman made a very impassioned plea concerning this matter earlier.

Mr. STAGGERS. Mr. Chairman, will the gentleman yield?

Mr. PICKLE. I yield to the distinguished gentleman from West Virginia.

Mr. STAGGERS. Mr. Chairman, I would just like to say again that on what information I have that has come out

of my district, that they are all dead set against this provision. I have found no person who was for it, and I may say to the Member that if every other Member of this Congress were to canvass their districts they would find the same situation to be true there, and that if their chances of coming back to the Congress next year were to be based upon voting for this provision that three-fourths of the Members of the Congress would not come back. I believe most people do not want to have a little bit of freedom taken away time after time, have their freedoms whittled away until all is lost.

As I said before, the law enforcement officers can do this in other ways if they are doing their job.

Mr. PICKLE. I thank the gentleman. What we are really doing in the language of the bill before us is just giving the courts and/or police officials a passkey into every citizen's home—and that is going to make for more violence or to give us more difficulty than we hope to cure by the language of the bill.

Therefore, I think the very fundamental right under a search warrant should not be violated.

Mr. DINGELL. Mr. Chairman, will the gentleman yield?

Mr. PICKLE. I yield to the gentleman.

Mr. DINGELL. Would the gentleman not agree that in Nazi Germany and in Communist Russia that they began just about the same way?

Mr. PICKLE. The gentleman is correct.

The CHAIRMAN. The Chair recognizes the gentleman from Florida (Mr. ROGERS).

(By unanimous consent, the time allotted to Mr. JARMAN was granted to Mr. ROGERS of Florida.)

Mr. ROGERS of Florida. Mr. Chairman, the subcommittee considered this provision. It came over in the bill which passed the Senate. This provision has already passed the other body.

May I say that this subcommittee did have concern about this provision. We had great concern about putting it in the bill. We discussed it fully in the full committee and we felt that the language here actually is a protection rather than leading to a breaking in, based on the judgment of a police officer himself rather than allowing perhaps a newly trained officer, one who has just gone on the force, making this type of judgment as to whether his life is going to be placed in danger. There should be a basis of study by a court and a determination made that the evidence presented to that court led to the conclusion that that officer's life, under this wordage, would be in danger or will be in danger.

Further, in the other instance, that the evidence will be or would be destroyed.

Now a court is going to look at that and it is going to be a court judgment and not a police officer's judgment. That is what this bill will help to bring about.

Most of the Members are already on record on this. We have debated this fully before. All of us have concerns about extending too much authority in this area. I agree and I share that concern, but I do think we have made restrictive language. The other body has already passed it and Members here are already on record on this. This is no time to weaken our position in fighting crime in a drug abuse bill. All Americans want to see this stopped in this Nation.

The CHAIRMAN. The Chair recognizes the gentleman from Kentucky (Mr. CARTER).

Mr. CARTER. Mr. Chairman, it is my feeling that this section of this bill is directed toward the traffic in heroin. If we realize that the source of heroin is Turkey and that it is transported to Italy and southern France and manufactured into heroin and then comes in through our great airports. You know we have a great transportation explosion. As many as 15,000 people come through Kennedy Airport each day.

This is the source of our heroin. Then it filters down into the other places. When we use the no-knock procedure and break down a man's door or his window or break anything to get into that home, we are only cutting off a leaf of that tree—we are not getting at the root of this thing or at the source of the trouble.

So I would ask you to think of this and to support the security and integrity of our American homes.

Mr. STAGGERS. Mr. Chairman, will the gentleman yield?

Mr. CARTER. I yield to the gentleman.

Mr. STAGGERS. Mr. Chairman, I would like to compliment the able gentleman from Kentucky. I know of no man who has worked harder on the drug bill and to stop the flow of drugs into America than has the distinguished gentleman from Kentucky (Mr. CARTER). The gentleman said at that time he was against this provision but that he was for a strong bill. I am for that, too, and I think every member of the committee is for a strong drug bill. But we do not want to break down the fundamental democratic right of all Americans.

Mr. Chairman, I congratulate the gentleman from Kentucky.

Mr. CARTER. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia (Mr. SATTERFIELD).

The question was taken; and on a division (demanded by Mr. SATTERFIELD) there were—ayes 44, noes 84.

Mr. SATTERFIELD. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chairman appointed as tellers Mr. SATTERFIELD and Mr. SPRINGER.

The Committee again divided, and the tellers reported that there were—ayes 60, noes 119.

So the amendment was rejected.

(Mr. PEPPER asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. PEPPER. Mr. Chairman, for many years, and in all parts of the country, I have been continually impressed with the remarkable success of the Bureau of Customs in its antismuggling activities, especially those activities which are concerned with the introduction of narcotics, marihuana and dangerous drugs into the United States.

As you know, the House Select Committee on Crime, of which I have the honor of being chairman, held extensive hearings on the question of heroin trafficking, importation, packaging and paraphernalia in New York City on June 25, 26, 27, 29, and 30, 1970. The dedication of the Bureau of Customs was dramatically demonstrated by the testimony which we heard during those 5 days of hearings into the frightening question of heroin importation and addiction in New York, which tragically has the justifiable reputation of the heroin capital of the world.

As we are all well aware, the problem of drug abuse in the United States has now reached epidemic proportions. The Bureau of Customs is one of our key weapons in the fight against this illicit drug traffic.

There has been much concern in recent years that executive or legislative limitations might be placed on the jurisdiction of the Bureau of Customs over the smuggling of narcotics and other dangerous drugs into the United States. But as my colleagues and I read the Comprehensive Drug Abuse Prevention and Control Act of 1970, it is reassuring to note that the new bill would not in any way change the role, or modify the authority, of the Treasury Department or the Bureau of Customs with respect to the importation of narcotics and dangerous drugs. It would not reduce in any way the possibility for strong enforcement of the law. This, I therefore believe, is the first step toward a solution to our drug problem.

As I previously testified before the House Ways and Means Committee on July 28, 1970, the enormous task of fighting the war against heroin and dangerous drugs cannot be won if we do not give our Federal agencies sufficient authority to do the job. It is critical that the United States Treasury Department be recognized as having sufficient authority to effect those critical tasks which they have so steadfastly devoted time, effort and indefatigable energies to performing. There is obviously a recognized need for more men and facilities in the Bureau of Customs to carry out this vital task.

As you know, Mr. Chairman, Congress cooperated fully with the executive branch of the Government by passing in December of last year an appropriation of $8.75 million which provided for 915 additional men and improved equipment to the Bureau of Customs. Secretary Kennedy assured the Committee on Ways and Means that the Treasury Department would continue to exercise the crucial functions of enforcement and investigative responsibilities in the area of narcotics and dangerous drugs.

Although there have been some limited conflicts in the past arising out of jurisdictional disputes between the Bureau of Customs and the Federal Bureau of Narcotics and Dangerous Drugs, it is reassuring to me and to my colleagues on the House Select Committee on Crime to note that there is a renewed spirit of cooperation between these two vital Government agencies. Mr. Chairman, these agencies undoubtedly deserve all of our

continued support, assistance and thanks for a job well done in view of the difficult circumstances which these agencies must labor under in performing their critical tasks.

Mr. KASTENMEIER. Mr. Chairman, I am pleased to note that the bill under consideration today, H.R. 18583, the Comprehensive Drug Abuse Prevention and Control Act of 1970, contains as section 601 a Presidential Commission on Marihuana and Drug Abuse. The Commission thus provided for parallels very closely to the Koch bill which passed subcommittee No. 3, of the House Judiciary Committee unanimously, and the full committee overwhelmingly. This bill presently rests in the Rules Committee pending disposition of the legislation before us today.

Mr. Chairman, as chairman of Judiciary Subcommittee No. 3, I would like to congratulate the gentleman from New York (Mr. KOCH) for the initiative and for his tireless efforts to establish this valuable Presidential Commission on Marihuana. Without the gentleman's efforts, I am convinced this Commission would never have been established. I hope and trust this Commission will live up to its promise and that the recommendations it subsequently makes to the President, the Congress, and the American people will shed light on the murky and perplexing problem of marihuana. If it does we will have further cause to be grateful to the gentleman from New York (Mr. KOCH).

Mr. BOGGS. Mr. Chairman, I rise in support of H.R. 18583, the Comprehensive Drug Abuse Prevention and Control Act of 1970.

The subject of drug abuse has been of continuing concern to me throughout the years I have been privileged to serve in this body.

In the 83d Congress, I served as chairman of a special subcommitte on narcotics which conducted the first exhaustive congressional investigations into the problem of narcotics addiction in this country. We held extensive hearings, traveled widely, and recommended a basic revision of the narcotics control laws. Our recommendations resulted in the Narcotics Control Act of 1956, which provided stiffer penalties for the illegal sale of heroin, cocaine, and other "heavy narcotics," and which committed this Nation on a course of treatment and rehabilitation of narcotics addicts. That law became the model for the narcotics control laws of many of our States, and has been amended to include the modern, chemically-derived drugs—amphetamines, depressants, hallucinogens.

The experience of chairing that special subcommittee made a lasting impression upon me. In the Federal hospital in Louisville, Ky., I saw a degree of human misery I wish never to witness again. The memory of those days is always with me and, in large measure, shapes what I am saying here today.

In the Narcotics Control Act of 1956, the Congress sought to reduce the growing traffic in illegal drugs by making the sale—and to a lesser extent the use—of illegal drugs an unacceptable risk to the seller or the user. In simple language, the law sought to curtail the supply of illegal narcotics and to a greater extent I think it succeeded. Between 1956 and 1967, the number of narcotics addicts in this country dropped significantly, and the price per kilo of heroin rose from $8,000 to $30,000.

Congress soon realized, however, that penalties alone were not enough. Accordingly, we passed legislation establishing programs of education, treatment, and rehabilitation for narcotics addicts. In this type of legislation, we sought to reduce the demand for illegal narcotics, and I think we are succeeding here, also.

But, still, the general problem of drug abuse in this country continues unabated. In New York City alone, it is conservatively estimated that there are presently more than 100,000 narcotic addicts. Other informed sources say that the real number is considerably higher. But, even using the conservative estimate, the fact remains that at least 100,000 New Yorkers are daily devoting their lives to their addiction. For, to an addict, heroin is the only reality. His entire life is spent attempting to satisfy his addiction. His first thought in the morning is getting a fix and his second thought probably is getting enough cash together to buy it.

The average addict needs at least $75 a day to finance his habit. A "fence" will pay only about 20 percent of the value of stolen merchandise. So, an addict with a $75-a-day habit has to steal $375 in merchandise a day in order to survive. Multiply that figure by the number of addicts in a city like New York, and you can begin to appreciate the insidious connection between narcotics addiction and street crime. There are definite links between organized crime, which largely supplies illegal narcotics, and drug addiction, and the armed robbery of the corner grocery store.

The example I have just given you deals with only one type of drug abuse—narcotics addiction. Today, we are faced with another type of drug abuse, which in many ways is more virulent and more dangerous: the abuse of chemical derivatives such as amphetamines, depressants, and hallucinogens. Narcotics addiction is the largest single killer of adolescents and young adults in New York—this we know. What we do not know is the number of our young people who daily experiment with mind shattering drugs like "speed" and LSD.

Most amphetamines and depressants are legally manufactured, and their first sale—from manufacturer to wholesaler—is within the law. It is further down the road—after several resales—that we lose track of them and they come into the hands of the criminal.

It is estimated that 8 billion amphetamine tablets are produced annually in this country. Yet, it is estimated that the legitimate medical need for such pills can be numbered in the thousands. The truth is, about 50 percent of the "legally" manufactured amphetamines are diverted into illegal channels.

The abuse of these chemical derivatives is the latest chapter in the long and unhappy story of drug abuse in this country. I have mentioned it because I think it illustrates a fundamental prerequisite for understanding and dealing with drug abuse, and that is this: Drug abuse is, by nature, a problem which changes daily. It is influenced by developments in technology and altered dramatically by changes in our society, our culture, and within each individual.

In this morning's Washington Post, there is a story which states that youngsters who have been "strung out" by amphetamine abuse are turning to heroin as an antidote. This, I think, illustrates the ever changing character of the drug problem in this country.

In the bill before use, Congress commits the country to the ultimate eradication of drug abuse. It authorizes $403 million to carry out programs of medical research, rehabilitation, and law enforcement to prevent, control, and cure drug abuse. In that sum is included an authorization of $75 million to be spent in the treatment and rehabilitation of drug abusers in community mental health centers and public health service hospitals around the country. It authorizes another $29 million to finance drug abuse education programs. It provides funds for much needed medical research. It provides a revision of the present system of classifying dangerous drugs. It provides for the revision of the present penalty system to make them fairer, more effective, and more adaptable to the merits of each criminal case.

Finally, and I think most importantly, this bill would provide our law enforcement agencies with the tools necessary to attack the roots of illegal drug traffic. It authorizes a mandatory minimum 10-year to life imprisonment sentence for the worst offenders and contributors to our drug abuse problem—those individuals involved in a continuing series of violations taken in concert with five or more persons from which he derives a substantial income—the so-called pushers.

In summary, this bill offers our first opportunity to deal with the changing drug abuse problem in a flexible and comprehensive manner.

For these reasons, I support H.R. 18583, and I urge my colleagues to do so also.

The article follows:

"SPEED FREAKS" TURNING TO HEROIN AS ANTIDOTE

(By Harry Nelson)

LOS ANGELES.—Youngsters across the nation are turning to heroin as an antidote to the "strung out" aftermath of amphetamine abuse, a San Francisco physician told a physician's meeting here.

The number of heroin addicts asking for help at San Francisco's Haight-Asbury Medical Clinic has jumped 500 per cent since the clinic was founded in 1967, said Dr. David E. Smith, the clinic's medical director.

While 9 out of 10 heroin users used to be poor and members of minority races, 75 per cent are now white and come from the middle and upper economic levels, he said.

Physicians attending the meeting also heard a University of California at Los Angeles psychiatrist predict that within five years society will be faced with the problem of dealing with dozens of new drugs with new mind-altering capabilities.

The meeting, entitled "Changing Patterns in Drug Abuse," was co-sponsored by Pfizer Laboratories and the department of psychiatry at UCLA.

Dr. Smith said the clinic now sees 50 heroin patients a day—a dramatic change from only two years ago when heroin users were relatively scarce and the bulk of patients were victims of LSD bad trips or psychotic reactions from amphetamines or "speed."

He said the Los Angeles' Free Clinic also has experienced a sharp rise in heroin addicts and predicted that youngsters in suburban communities across the nation will soon be following suit just as they did several years ago with LSD, marijuana and speed.

Dr. Smith, a faculty member of the University of California at San Francisco Medical Center, said he believes the switch to heroin is directly related to the abuse of amphetamines, a class of stimulant drugs also known as "uppers" that can be taken either in pill form or injected. When injected it is called "speed" because of its fast action.

So-called "speed freaks" go on binges that last for as long as a week during which their nervous system is kept at a highly excited level by the drug's constant stimulation.

Dr. Smith said these drug abusers have learned that heroin, which is a depressant, will calm them down and ease the feverish excitement that keeps them from either eating or sleeping.

Besides this pharmacological action, there is also a psychological explanation for the increasing popularity of heroin, he said.

"Heroin is a drug of despair. It fits in well with the growing pessimism of the radical youth culture. The optimism of the flower children is gone. The youngsters are moving from drugs that expand the consciousness to ones that constrict it," he said.

Mr. SISK. Mr. Chairman, I rise in support of H.R. 18583, the Comprehensive Drug Abuse Prevention and Control Act of 1970. The insidious menace of drug abuse is growing at an alarming rate across our Nation. It knows no particular geographic boundary nor does it prey on any one particular socio-economic group. While the uniformed may equate drug abuse with the ghetto and minorities, studies show that it is a problem that has touched the sons and daughters of some Members of Congress as well as other leading members of the business, industrial, and political community of these United States. It is truly, Mr. Chairman, a problem faced by all Americans.

While there is a great divergence of opinion over the long range use of marihuana there can be little doubt as to the detrimental—yes, even fatal—effects of the unauthorized and unlawful use of narcotics and other dangerous drugs. One only has to look as far as the closest state or Federal mental institution to see the effects of such mind-bending synthetics as LSD. Or check the admission records of any hospital to learn of the spiraling increase in those persons who are taken on an emergency basis for overdoses of stimulants as well as depressants. And one has only to look at the records of the appropriate coroner or medical examiner to see the tragic increase in fatalities. In my own district there have been 40 deaths in the last 12 months directly attributable to overdoses and abuse of these materals.

Mr. Chairman, I am also pleased to support H.R. 18583 because it makes a distinction between the unfortunate user or addict of narcotics and dangerous drugs and the person perhaps most responsible for the problem in the first place: The dealer or pusher who reaps hugh financial benefits from the misery of the user. I note with interest and applaud the criminal penalties for the person who traffics in these materials. The threat of a possible sentence of life imprisonment goes a long way in removing the attraction of financial gain. On the other hand, the provisions of this bill which make possession of controlled drugs by an individual for his personal use a misdemeanor with a substantially reduced prison term, reflects humane and knowledgeable assessment of the problem. It is my considered opinion that harsh penalties for the user or addict present no deterrent whatsoever and do little to solve the overall problem.

I am also heartened to see that this bill provides authority for the Department of Health, Education, and Welfare to increase its efforts in rehabilitation, treatment, and prevention of drug abuse.

Mr. Chairman, I urge all my colleagues to support this measure in a bipartisan effort in order that we may take a great step forward in the fight against drug abuse.

Mr. OTTINGER. Mr. Chairman, today we have the opportunity to strike a telling blow at the menacing growth of drug abuse in our society.

There can be no doubt about the alarming potential that the use of narcotics poses for America. In a floor speech earlier this year I revealed that there are 25,000 teenage addicts in New York City alone, with an increase of 7 to 10 percent each month. Drugs have penetrated down to the elementary school level, and every week new deaths from overdoses are reported. Crime on the streets of our cities has grown apace, and we have substantial evidence that much of this is drug-related.

The Federal Government has been too little involved in this pernicious development. The $50 to $60 million annual appropriation scratches only the surface. We need to expand the Federal commitment, both through new initiatives and through assistance to existing programs such as that at Horizon House in New York City where dedicated ex-addicts are helping young people to overcome their drug dependency and move back into the mainstream of normal life.

The bill we are considering today, the Comprehensive Drug Abuse Prevention and Control Act of 1970, provides some of the necessary tools. It will authorize $403 million for a 3-year effort to upgrade rehabilitation, treatment, and prevention of drug abuse; more effective and rational enforcement of the law; increased criminal penalties for manufacture, distribution and sale of dangerous drugs; and tighter controls on imports and exports.

Each facet of the narcotics problem demands urgent action. A significant part of H.R. 18583 is the $75 million authorization for rehabilitation and treatment of addicts in community health centers and public health service hospitals and facilities. An additional $29 million will go to drug abuse education, and $60 million will be authorized for special facilities in areas with a high incidence of drug abuse. Another $1 million is authorized for a Commission on Marihuana and Drug Abuse, which I have been advocating for years.

H.R. 18583 places tight controls on the most dangerous drugs by providing for intensive oversight on imports and exports and by requiring recordkeeping by those individuals, such as physicians and druggists, whose business entails the legitimate purveying of drugs for medical purposes. Possession for personal use will be a misdemeanor, but stiff penalties are authorized for manufacturers and pushers who profit from the human misery and degradation that drug addiction creates.

Mr. Chairman, I have introduced my own bill, H.R. 18936, which embodies the above provisions. It is imperative, however, in our justifiable eagerness to attack drug abuse at its source that we do not enact measures of dubious constitutionality that infringe on basic civil liberties. I refer to the onerous no-knock provision in H.R. 18583 which would allow law enforcement officers to enter premises at any time of day or night unannounced, when they have probable cause to believe that evidence may be destroyed or that their lives will be endangered by announcement of their presence. This clause strikes at the elemental right to privacy of the individual in his own home, securely enshrined in the Bill of Rights, and places an ominous power in the hands of the officer whose natural inclination will be to secure a conviction regardless of the cost in personal liberty. There is no justification for such power to be given to any official in our society.

I would also hope, Mr. Chairman, that we can remove the continuing criminal enterprise section of this bill, which in its thrust for prosecution of narcotics pushers includes such vague and broadly worded terminology that it violates completely our rules of due process and judicial discretion in imposing sentence on convicted criminals. We can take resolute action against drug abuse by approving H.R. 18583, but we cannot afford diminution of our guaranteed civil liberties by including the no-knock and continuing criminal enterprise sections of the bill before us.

Mr. Chairman, my longstanding concern over the problem of drug abuse has been translated into many bills. I have introduced or cosponsored H.R. 18400, calling for suspension of foreign aid to any country which fails to take appropriate steps to prevent narcotics from leaving its borders to enter the United States; H.R. 17566, the Federal Drug Abuse and Drug Dependence Prevention, Treatment, and Rehabilitation Act of 1970; H.R. 16730, the Narcotics Education Act, authorizing Federal funds for the hiring of ex-addicts to educate youngsters in our Nation's schools to the dangers of drug abuse; H.R. 14479, to increase appropriations for drug research; H.R. 14534, to establish a Commission on Marihuana; and H.R. 13341, to establish a National Drug Testing and Evaluation Center.

I am gratified that the legislation we

will approve today contains so many of the proposals I have long advocated. Hopefully, enactment of this bill will mark the turning point in what has been till now a downward trend in our handling of the nationwide narcotics menace, and will enable us to demonstrate our commitment to ending the destruction of human potential by the blight of dangerous drugs.

Mr. PRICE of Texas. Mr. Chairman, this afternoon the House is scheduled to begin consideration of the Comprehensive Drug Abuse Prevention and Control Act of 1970. While the floor debate on the act will be quite lengthy, I urge my colleagues to give this vital matter their utmost attention.

It is clear to one and all that the drug abuse problem has reached crisis proportions. Estimates of the number of active hard narcotics addicts in America range between 65,000 and 125,000. Between one-quarter and one-half million people habitually abuse sedatives, stimulants, tranquilizers, and related drugs. And between 8 million and 12 million juveniles and adults have used marihuana at least once; this includes approximately one-third of the entire college population in this country.

The human and social cost of this drug abuse is just as staggering. Between 1960 and 1968, arrests for narcotics violations increased 322 percent. Between 1967 and 1968 alone, there was a 64-percent increase in arrests for the illegal possession or use of narcotics and marihuana. Moreover, addicts are often forced to resort to crime to support their drug habits which cost as much as $100 per day; crimes which cost the American people nearly $541 million last year, plus an incalculable amount of heartbreak, terror, broken families, and ruined lives.

Drug abuse has become a particular problem for the young. Faced with social and competitive pressures and lured by the exotic sounds of acid rock music, young people are turning in ever increasing numbers to drugs. An index of the extent of this condition is evidenced by the fact that drug arrests have increased 778 percent in the under 18-age group during the last decade, and 50 percent of all those currently being arrested on drug charges are under the age of 21. These statistics tells only part of the story, however, because experience shows that only a small percentage of offenses are discovered, not all offenders are identified as such, and not all offenders who are identified are arrested. In fact, in some locales it has become the practice, if not the official policy, for law enforcement officials to absent themselves from large gatherings of young people where marihuana and narcotics are likely to be used.

Mr. Chairman, the social manifestations of the drug problem are immense, indeed. What must not be forgotten though is that at their most basic level, drugs enslave people. They drive persons into a nether world somewhere between light and dark and reason and insanity. It is this aspect of drug abuse that is the most horrible to contemplate.

Mr. Chairman, this afternoon I have confined my remarks to some of the results of drug abuse. Tomorrow I plan to comment on what the Federal Government is doing about this menace; at that time, I will address myself to some of what I think are the more controversial sections of the Drug Abuse Prevention and Control Act of 1970.

Mr. FOREMAN. Mr. Chairman, I rise in support of H.R. 18583, a bill to amend the Public Health Service Act and other laws to provide increased research into, and prevention of, drug abuse and drug dependence; to provide for treatment and rehabilitation of drug abusers and drug dependent persons; and to strengthen existing law enforcement authority in the field of drug abuse, on this important battle against the pollution of young people's minds. I strongly support effective, tough Federal laws and administrative measures that are being utilized to crack down on the dope pushers and halt the illegal importation of dangerous drugs and narcotics into this country, and I am grateful and appreciative of the concern and positive attitude of the SOS youngsters who are working to help others understand the tragic dangers of drug abuse and the pitfalls and heartaches of narcotics experimentation. Although this legislation certainly may not be the whole or best answer to the drug problem, it is certainly a needed start in the right direction. I commend the chairman and members of the Committee on Interstate and Foreign Commerce for their work and efforts in bringing forth such an important and necessary piece of legislation.

Mr. DON H. CLAUSEN. Mr. Chairman, I rise today in strong support of the Comprehensive Drug Abuse Prevention and Control Act of 1970.

Mr. Chairman, in my judgment, this particular measure is one of the most important pieces of legislation to come before this 91st Congress and, if passed, will stand out as a hallmark in the fight against drug addiction and drug abuse.

The statistics are absolutely shocking. One out of every 3,000 persons in this country is a known addict and almost half of these known addicts are under 30 years of age. These figures include only the so-called "recorded addicts" and do not include those using marihuana, hallucinogens, depressants, and stimulants.

Some studies indicate that there may well be as many as 20 million "drug abusers" in this Nation or nearly 10 percent of the total population of the United States. Shocking as these statistics are, there are some in this country who refuse to recognize or choose to ignore the seriousness of the drug problem and attempt to pass it off as a "stage" or "phenomenon," one which we will "quickly pass through."

Is the heroin addiction of an 8-year-old girl in Harlem a "stage?" Is the total dependency on narcotics of a 7-year-old boy in Los Angeles a "phenomenon?"

The legislation now before us finally establishes penalties to fit the crime. We can and must provide Federal and State law enforcement officials with the necessary tools to crack down hard on the "pushers" and those who are trafficking in drugs, thus, preying on the weaknesses of human beings.

Drugs are literally everywhere, in high schools, colleges, and even grammar schools and are apparently easier to acquire than liquor. Pills of all types are being produced in apartments, basements, alleys, and in the attics of homes. Cocaine, hashish and other narcotics are being brought in from every corner of the globe—by both professional traffickers and by unsuspecting tourists and students.

Another most urgent problem is the treatment and rehabilitation of the addict. The Narcotic Addict Rehabilitation Act of 1966 recognized this need and provided for greater emphasis on treatment and rehabilitation than on disciplinary action as the primary role of society in coping with addicts. While these programs are constantly being improved, the gains made by the patients are seriously limited by the lack of so-called aftercare services available in so many of our communities.

However, the basic issue of the drug abuse problem continues to be "awareness." A White House conference stated some years ago:

> The general public has not been informed of most of the important facts related to drug abuse.

This was true then, and it is, unfortunately, still true.

Peter Gamble, author of an informative and valuable series on drugs on Washington radio station WWDC, has taken as the theme of his documentary, "If you are not part of the drug solution then surely you are part of the drug problem."

Quite frankly, Mr. Gamble has hit at the real heart of the drug problem today, namely, there are simply too few people concerned enough about the problem to do anything constructive about it. I congratulate Mr. Gamble for his frank and open approach to the problem.

As a parent, citizen, and legislator, I view the drug problem in America as part and parcel of the rising specter of moral, social, and national decay that is creeping over America. As I see it, we can and must educate our young people to the true hazards of drug abuse if we are to put down this threat to American youth.

This measure before us gives a tremendous boost to drug abuse education, and, until and unless we develop a hard-hitting educational program for our young people it will be impossible for us to eliminate the problem before the damage is done.

Therefore, I strongly urge favorable and immediate action on this proposal in the deep belief that it is both imperative and mandatory that we in the Congress do, in fact, become a part of the "solution," not part of the "problem."

Mr. PODELL. Mr. Chairman, the drug bill before this House today is unique: it is a comprehensive bill that is the first attempt to deal with the varied and the complex aspects of the Nation's drug problem. For this I pay tribute to the House Committee on Interstate and Foreign Commerce and to its illustrious chairman.

This bill marks a step out of the dark ages by the Federal Government and an

effort to view the entire drug problem in the light of recent events. The Congress has been forced to change its medieval conception of the problem. It sees it not as a small and limited one, but as a problem having serious consequences for our entire society.

The increase in crime is directly related to the rise in drug abuse. Figures demonstrate that a drug habit costs at least $50 per day to maintain, and the addict must have his supply of the drug 7 days per week and 365 days per year. If this amount is multiplied by 270,000—the approximate number of addicts in the United States—we come up with an astounding $5 billion per year in crime.

The increase is taking its toll in our society. The use of heroin and other drugs is rising among our youth. Drugs have invaded the high schools; death from overdose has become increasingly prevalent. And although large cities still have the greatest problem with drugs, no community is immune from the drug invasion.

I am pleased to see that in the bill before us today, there has been definite movement away from a strict interpretation of drug abuse as purely a criminal matter. The health and the medical aspects of the problem are crucial to any solution and must be given dedicated effort and adequate funds if there is to be an alleviation of the problem.

Given the magnitude and varied nature of the problem, we require a multifold approach—one that includes regulation of the sale of drugs, regulation of the criminal aspects of drug abuse, and rehabilitation and treatment of existing addicts as well as prevention through education. Each part of the program is necessary, but each is insufficient in and of itself to solve the problem. As we know, patchwork remedies have merely prolonged the problem, and a comprehensive approach is needed.

The bill we are considering has a provision for increased funding for drug education programs, but the programs must be creative and must be relevant to the constituency they seek to reach and affect. The fact that the National Institutes of Mental Health has jurisdiction over the program gives me reason to believe it might prove effective. NIMH will also be in charge of training the much needed professionals to carry out this technical program.

The expansion of treatment programs, including detoxification services, institutional services—such as medical, psychological, educational, and counseling services—and community-based aftercare services is sorely needed. Once again we see that the medical aspects of the problem may finally be getting the recognition that they warrant.

As yet, no method or program of rehabilitation or treatment has proved universally effective. I would, therefore, caution against closing our minds to other solutions. For exmaple, the benefits of methadone treatment have become increasingly documented by such groups as Dr. Dole's at Rockefeller University and Beth Israel Hospital and by the Vera Foundation.

For those individuals for whom cold turkey, methadone, or other standard programs prove ineffective, we might even consider providing carefully administered doses of heroin by physicians in licensed centers while providing these patients with psychiatric help and other care. I believe that at this time no avenue of potential treatment can be summarily dismissed.

Still another aspect of the drug problem must be dealt with if we are to decrease the incidence of abuse. In the committee bill, we talk of regulating the production and distribution of "controlled substances." I believe that we must also look toward instituting a broader program to insure that illegal drugs are not smuggled into our country from abroad. I have introduced legislation proposing the establishment of an international consortium to deal with the problem of illegal drug traffic on a worldwide basis.

Unilateral attempts at controlling this traffic have not been successful. Drugs continue to find their way to our shores; our program in Turkey, although limited, was denounced by that country because of its unilateral basis. I have therefore called upon the President to press for the establishment of an international consortium under the aegis of the United Nations that would control the growing of opium in the world through a system of penalties and incentives. It would essentially be a program where farmers would be paid to grow foodstuffs instead of the poppy. I believe that Congress should make its support of such a program known.

There is, however, one aspect of the bill with which I am at serious odds. This is the no-knock provision which poses a grave threat to the freedoms of the American people. The reasons I now give are similar to my objections to the same provision as contained in the District of Columbia crime bill.

Our citizens must be guaranteed security in their homes. They should not be subject to intrusion of any sort without, at least, the courtesy of a knock on the door. The fourth amendment to the Constitution clearly protects the individual from "unreasonable searches and seizures"

The no-knock provision makes residents vulnerable to police abuse. It also puts the policeman in a dangerous position, for he is subject to the actions of a resident protecting himself from an unannounced intruder.

The increased incidence of drug abuse with the increase in related crime is one of the most serious domestic problems facing this country. Our citizens should be able to live without fear or danger. Yet, we must not substitute one fear for another, which is what we would be doing if no-knock were passed.

I believe we must recognize the problem as extraordinarily complex. It is one that seriously undermines both the health and the safety of our population. It is a job, therefore, for both the Department of Health, Education, and Welfare, as well as the Department of Justice. Each agency can contribute useful expertise to the ultimate goal—the elimination of drug abuse in the country.

To close, I would like to quote an official statement by the American Psychiatric Association that I believe summarizes the direction our efforts must take:

> For the coordination of a comprehensive and well-coordinated attack on the causes and consequences of narcotic and other drug abuse, the separation of enforcement and health-related education and research is imperative.

The bill before us today is therefore a step in the right direction.

Mr. ANDERSON of California. Mr. Chairman, I rise in support of H.R. 18583, the Comprehensive Drug Abuse Prevention and Control Act of 1970, and I commend the committee for taking firm action in this regard.

The facts show that we are facing a drug epidemic in this country. There was a 322-percent increase in State and local drug violations between 1960 and 1968. This increase in the illegal use of drugs is predominately among the young. For example, the California Youth Authority reported a 2,000 percent increase in juvenile drug arrests from 1961 to 1968. Drug abuse, however, is not merely a problem restricted to the young. It exists at all social and economic levels and it affects both rich and poor, young and old, black and white, men and women.

Marihuana is perhaps the most widely abused drug. Of the increase in drug violations arrests between 1967 and 1968, marihuana accounted for nearly 64 percent of the total. Estimates show that between 8 and 12 million persons have tried marihuana.

Another major area of abuse is the illegal use of stimulant and depressant drugs. Of the 9 billion amphetamines and barbiturates produced legitimately in this country, nearly 50 percent were diverted into illicit channels.

The Comprehensive Drug Abuse Protection and Control Act of 1970 attacks the drug problem on all fronts—medical, educational, control, and enforcement.

First, the bill seeks to aid those who are narcotic addicts and bring them back to society. I am extremely pleased that the committee adopted a rehabilitation section which is similar to my bill, H.R. 13136. Title I provides authority for the Department of Health, Education, and Welfare to increase its efforts in the rehabilitation, treatment, and prevention of drug abuse through both community mental health centers and public health service hospitals.

The narcotic addict must be detected and taken off the streets. It is estimated that heroin addicts alone account for an economic cost of approximately $6 billion annually to society through committing burglaries, larcenies, and robberies. In order to curb crime, we must find the narcotic addict and rehabilitate him, until he is able to return to society without the need to feed a "$100 a day habit."

Second. H.R. 18583 authorizes grants for the collection, preparation, and dissemination of educational materials on

drug abuse and its prevention. Last year, I introduced H.R. 9674 which served as the basis for H.R. 14252, the Drug Abuse Education Act. This measure passed the House and is currently pending in the Senate. I strongly support this provision and I am confident that we will see a drug education provision in the law books this year. Drug abuse education will help eliminate the misconceptions, fallacies, and ignorance which leads a person to "experiment" with drugs.

Third. H.R. 18583 deals realistically with the control and enforcement of the illicit use of drugs. This bill cracks down hard on the pusher.

Mr. Chairman, when an individual encourages another to take drugs, when an individual sells drugs to another, he is torturing that person and ruining that person's life and we should have no sympathy for him. The penalty for the "pusher" should be equal to the misery he causes his fellow man.

In cases not involving drug traffickers, penalties are flexible, permitting judges to tailor the period of imprisonment, as well as the fine, to the circumstances involved in the individual case.

The existing penalties, involving rigid mandatory sentences, have led in many instances to reluctance to prosecute, where the penalties seem to be out of line with the seriousness of the offense.

In addition, the bill, H.R. 18583, doubles the penalty for selling to minors, while it allows a judge the flexibility to give a minor a break for illegal possession for his own personal use.

Again, Mr. Chairman, I commend you and the committee, and I endorse this necessary legislation.

Mr. HENDERSON. Mr. Chairman, I rise in support of H.R. 18583, the Comprehensive Drug Abuse Prevention and Control Act of 1970, along with my colleagues here today.

It is imperative that we as Members of Congress take the necessary legislative action to curb drug abuse in our Nation, reducing the number of heinous and destructive crimes that can be attributed directly to our rampant drug problem.

I urge every Member of Congress to rise in unanimous support of this urgently needed legislation.

Mr. CHAMBERLAIN. Mr. Chairman, I rise in support of H.R. 18583, the Comprehensive Drug Abuse Prevention and Control Act of 1970.

There may well be no more important piece of legislation in the 91st Congress than the bill before us today, particularly in terms of the welfare of far too many of our young people, and the effort to combat crime.

In his message to the Congress on July 14, 1969, urging legislative action against drug abuse President Nixon provided a startling picture of the gravity of the present situation when he noted:

> Between the years 1960 and 1967, juvenile arrests, involving the use of drugs rose by almost 800 percent; half of those now being arrested for the illicit use of narcotics are under 21 years of age. New York City alone has records of some 40,000 heroin addicts, and the number rises between 7000 and 9000 a year. These official statistics are only the tip of an iceberg whose dimensions we can only surmise.

The extent of the current drug problem was made unmistakably clear to Michigan citizens at a recent Rock Festival held at Goose Lake where there were gross violations of Federal and State narcotic laws.

The President proposed a 10-point program of legislative and executive action, H.R. 18583 contains many of these recommendations. They cover a wide range of efforts including better programs of rehabilitation for narcotic addicts and drug-dependent persons, the revision and strengthening of Federal control of the manufacture, sale and distribution of drugs; reform of criminal penalties with a special emphasis on more severe punishment for the drug pusher; a tightening of Federal laws covering the import and export of drugs and intensified research and drug abuse education programs. I urge adoption of the bill.

Mr. KEITH. Mr. Chairman, the cities and towns of my district—and, I am sure, every Member's district—are facing an increasingly serious problem of drug use and abuse by the young. Marihuana and dangerous hallucinatory drugs are becoming common in high schools. Addictive drugs are finding increasing popularity in the streets of our major cities. Unless we act to curb the drug abuse problem, a large segment of our young people could be trapped in lives of desperation and aimlessness.

The bill before us today correctly recognizes that the solution does not lie in imposing stiff penalties on the youngster who may be tempted to experiment with drugs for a lark. It rightly provides the stiffest punishment for those who cynically traffic in drugs to the detriment and injury of their fellow human beings. The Comprehensive Drug Abuse Prevention and Control Act is a progressive measure. It goes beyond punishment to rehabilitation and education. More community facilities in community mental health centers will be provided and information about the danger of drug abuse will be more widely disseminated.

And, under this legislation, a rational schedule of drugs and penalties is set up according to the potential for harm posed by each type of narcotic. Finally, and importantly, H.R. 18583 establishes a Commission on Marihuana to review this controversial substance objectively and recommend any modifications in existing law which might be desirable. I would hope that the members of this Commission would be from varying age groups to enhance the credibility of the report of the study commission amongst young and old alike.

Mr. Chairman, I commend my colleagues on the Interstate and Foreign Commerce and the Ways and Means Committees for their work on this important and needed measure. I urge all of my colleagues to support H.R. 18583.

Mr. BLANTON. Mr. Chairman, I urge approval of H.R. 18583. Perhaps drug abuse is one of the most critical problems facing our Nation today, because it directly affects our human resources. It is sapping the potential of our youth, contributing the climate of fear and crime, and literally ruining the lives of thousands upon thousands of persons.

The legislation we consider today is comprehensive and realistic. We have applied the band-aid approach too long. With this bill, I believe we are confronting the problem head on. How it is administered will be the ultimate test of its success, for the framework within which to work is definitely supplied here.

I particularly laud the title I approach to rehabilitation. To attempt to combat drug abuse without supplying rehabilitative measures for those already victimized with be to cut off the tops of the weeds without damaging the roots.

I believe the new authority given the Justice Department under title II is sufficient at this time, and while I have some misgivings about the criminal penalties section, it is sufficient. As for the creation of a commission on marihuana and drug abuse, this one feature seems to me somewhat depressing. I am growing weary of commissions and expensive studies by the Federal Government, for it appears as if little ever comes from them. We had a Presidential commission to determine the causative factors in civil disturbances and riots a few years ago, and its findings were ignored by that administration. We had a commission on student and campus disorders, and the current administration was attacking it before it was even officially concluded. We had a commission on pornography, and the current administration has already served notice that this million-dollar-plus study will be rejected. We have had commissions set up to determine whether there should be a volunteer army to replace the draft, another to determine whether the Joint Chiefs of Staffs in the Pentagon would be restructured, and so on down the line. You name a subject, and there has been a Federal commission to study it, and the batting average on carrying out the commission findings, or even implementing sections of it, is so low as to question the justification for expenditures from the public treasury for these costly luxuries of our Federal Government.

The concept of appointing a Presidential or Federal commission has degenerated into a gimmick—to make people think we are actually going to do something about the problem, and to relieve the pressure from constituents who want action.

I think title III of this bill, which deals with the control of imports and exports of drugs subject to abuse is a good start, but more authority needs to be given in this field.

Mr. Chairman, drug abuse has reached down into even small rural communities in my district. It is no longer an exclusive problem with urban centers and metropolitan areas. It has even affected the armed services of our Nation, and I was shocked to find on a recent visit to Vietnam to study the drug problem for the Interstate and Foreign Commerce Committee that perhaps as many as 35 percent of our servicemen use illegal drugs.

Therefore, the need for responsive legislation is mandatory, and I feel the pas-

sage of this bill is a good start in the right direction.

Mr. BROTZMAN. Mr. Chairman, I am pleased to rise in support of H.R. 18583, the Comprehensive Drug Abuse Prevention and Control Act of 1970. That drug abuse has become one of our Nation's leading problems can scarcely be denied. H.R. 18583, I believe, demonstrates a keen awareness of this problem, both from the standpoint of health and rehabilitation and from the standpoint of law enforcement. In other words, the bill makes it harder to get started on drugs and easier to break the drug habit.

Title I of the bill establishes rehabilitation programs relating to drug abuse. The $75 million in increased authorizations are provided for community mental health center facilities to deal with narcotic addicts and drug dependent persons, $29 million is authorized for critically important drug education programs, and $60 million is authorized for special facilities in areas having unusually acute drug problems.

Title II of the bill deals with the other side of the drug problem: Law enforcement. Five schedules of narcotics and dangerous drugs are established. Penalties correspond to the schedules so that stiffer sentences may be imposed where more serious drug violations are involved. Persons who illegally manufacture, distribute, or dispense the hard narcotics listed in schedules I and II would be liable to serve prison terms of up to 15 years and pay fines of up to $25,000. Those who illegally manufacture, distribute, or dispense the nonnarcotics listed in schedules I and II, including marihuana and the hallucinogens, and those who illegally manufacture, distribute, or dispense the drug contained in schedule III, including amphetamines and barbiturates, would be subject to 5 years in prison and a $15,000 fine. Schedule IV, which deals mainly with minor tranquilizers, carries penalties of 3 years in prison and a fine of $10,000 for illegal manufacture, distribution, or dispensation. The penalties for violations dealing with schedule V, which consists of medical preparations containing limited amounts of narcotics, would be subject to 1 year in jail and a fine of $5,000. If distribution to minors is involved, the maximum penalties are doubled.

These penalties are harsh, and they should be. Any one who has had the experience of having a child or a loved one addicted to narcotics or drugs can testify to this. Those who manufacture for illicit distribution and those who illegally distribute the items contained in this bill will stop at nothing to make a dollar. They are enslaving many Americans who first get hooked on drugs, and must then turn to a life of crime to feed their habits.

Among the more ominous aspects of the drug problem is the involvement of organized crime. I am pleased that we will soon have an organized crime bill on the floor, but I call attention to a feature in H.R. 18583 which bears a close relationship to that subject. The bill provides that where an individual engages in a continuing criminal enterprise involving a continuing series of violations undertaken by him, in concert with five or more other persons, and from which he derives substantial income, he is punishable by a mandatory minimum sentence of not less than 10 years and up to life imprisonment, together with a fine of up to $100,000 and forefeiture to the United States of all profits derived from the enterprise.

Mr. Chairman, I think it is also important to note several other features contained in the bill which will help law enforcement officials stop the traffic in drugs. For example, a procedure is established for the classification of future drugs which create abuse problems. If the Attorney General feels that a drug should be controlled, he will, after gathering appropriate data, ask the Secretary of Health, Education, and Welfare to conduct a scientific and medical evaluation. If the latter determines the drug should not be regulated, the matter is closed. But, if he agrees that regulation is in order, the Attorney General may publish notice in the Federal Register and proceed to implement controls in accordance with established procedures which permit, among other things, an opportunity for a hearing.

The bill provides for registration of manufacturers, wholesalers, retailers, and all others in the legitimate drug distribution chain. Transactions outside of the legitimate chain are made strictly illegal. In the case of those drug listed in schedules I and II, even tighter controls are imposed. Quotas are established for imports and for domestic manufacture. Sales or other transfers of these drugs may only be made through the use of officially prescribed order forms, copies of which must be sent to the Attorney General.

One of the serious defects in our existing drug control programs, from the law enforcement standpoint, has been a lack of adequate information on the part of the local officials who deal with the problem daily. To remedy this, the bill permits the Attorney General to authorize research and education programs relating to the law enforcement aspects of drug abuse. Cooperation between Federal and State and local officials is encouraged. Also, authority to execute search warrants to enter premises without giving notice of authority and purpose is extended to judges and U.S. magistrates if there has been a judicial determination of probable cause to believe that notice would lead to a destruction of evidence or that notice would immediately endanger the life or safety of the person executing the search.

As a former U.S. attorney for Colorado, I can say, from my own experiences, that these new enforcement devices are necessary if we are to mount a successful drive against drug abuse.

In addition to increasing the penalties for illicit manufacturers and pushers and in addition to improving the tools of law enforcement, H.R. 18583 takes a more modern and realistic approach to the problems of the user than has ever been the case before. I have already mentioned the important upgrading accorded the rehabilitation programs by title I of the bill. There is more. Possession of controlled drugs, where there is no attempt to distribute to others, is made a simple misdemeanor with a maximum jail term of 1 year and a maximum fine of $5,000. Also, with the exception of those engaged in continuing criminal enterprises, all mandatory minimum sentences are eliminated. If our goal is to solve the drug problem, courts need flexibility, and minimum sentences deny that.

In the case of a first offender, probation is available, and successful completion of the probationary period can result in a dismissal of the original charge without the adjudication of guilt. Indeed, if the offender is under 21, a successful probationary period can result in having all accounts of the incident expunged from the record. This feature is similar to a provision in the LSD bill passed in the 90th Congress and is based on the Colorado drug law.

Mr. Chairman, H.R. 18583 represents an important part of the President's program to combat crime. Inamuch as drug abuse invariably leads to other crimes and provides a ready source of revenue for organized crime, it seems to me that this bill represents the keystone of any successful Federal crime fighting program. It is, at the same time, appropriately harsh on illegal manufacturers and pushers, and appropriately compassionate and understanding toward the pusher's victim.

Before voting, Mr. Chairman, I hope every Member of this body will reflect on the news stories carried in the papers from his own district on the problems caused by and compounded by drug abuse. Any Member who does that will, I am confident, join me in voting "aye" on this measure.

Mr. HELSTOSKI. Mr. Chairman, as a cosponsor of the Comprehensive Drug Abuse Prevention and Control Act of 1970, I rise in support of this important legislation and commend the members of the committee for bringing it to the floor for House action.

I believe that this is one of the most important pieces of legislation to be considered by the Congress during this session.

Mr. Chairman, this bill deals with one of the most important health problems existing in the United States today, the problem of drug abuse. There is little disagreement upon the need to adopt a stringent measure to combat this social and health problem in a number of ways. This legislation provides for rehabilitation programs for drug abusers; it will change existing criminal penalties with respect to illegal drugs and their uses; it will provide the Department of Justice additional control over the manufacturing and distribution of drugs for legitimate uses through a system of registration and reporting; and will provide a better control of imports and exports of drugs through registration and permits for legitimate businesses.

I support this legislation because it represents an effective approach to combatting this problem of drug abuse. The

size and scope of the problem make it clearly evident that the Federal Government must take an active and powerful approach to attack this menace to society. The Federal Government must have the power to take this action without further delay.

It certainly seems that the Comprehensive Drug Abuse Prevention and Control Act of 1970 is the logical and necessary step in the battle we are waging against drug abuse. In addition to this bill we should consider legislation which would cut off economic and military aid to those countries who send illegal narcotics to this country. To effectuate this program, I have introduced H.R. 18399 which should be enacted by this Congress as a companion measure to the legislation we are presently discussing.

Let us wait no longer on taking action to prevent this social menace and pass this bill for effectively controlling this serious situation which is currently sweeping the country.

Mr. BROOMFIELD. Mr. Chairman, in the context of the drug crisis, generation gap and credibility gap usually bear the same meaning. Our young can conveniently, if not justly, ignore our advice, because they are aware that our information on drugs is neither extensive nor conclusive. They have more reason to doubt their parents, who know even less than we. It is easy for the young to rationalize the use of a drug whose dangers have not yet been proven. Drugs are everywhere in our society. Television ads promise that there are pills to relieve tension, acid indigestion, falling hair, loss of energy, and lack of sex appeal. Truck drivers and college students take pep pills to stay awake. Housewives and businessmen calm their nerves with tranquilizers. These drugs can be dangerous—yet they are widely used. What, our children ask, is so much more dangerous about marihuana or speed or mescaline? And we have no hard facts with which to answer them.

The problem is only aggravated by the lack of programs to educate the young and their parents to the known dangerous effects of certain drugs.

Lack of information or misinformation provides silent encouragement to experimenters. We know that over half of our young have tried drugs. We know that college students and now high school students are using drugs with increasing regularity. We know that our Armed Forces are finding substantial numbers of their troops smoking marihuana or shooting heroin. This uninformed and uncontrolled use of drugs cannot continue: Tragedy is its only result.

I know specifically of a case in my own district which demonstrates clearly the need for massive research and educational programs. Six teenagers from the Birmingham-Southfield area of Michigan were sold capsules that supposedly contained THC—tetrahydrocannabinol, the active ingredient of marihuana—mixed with cocaine. They were not aware that this mixture is impossible to produce in the first place. They knew something of THC and something of cocaine, so they assumed the capsules would be no more than normally dangerous.

Their reactions to the drugs were especially severe, and they were immediately hospitalized. The original diagnosis attributed their adverse reaction to the presence of strychnine in what were thought to be LSD capsules. Several days later, an analysis of the pills by the State health department revealed that they were neither THC nor LSD, but phenacyclidine hydrochloride—a tranquilizer for animals with a hallucinogenic effect upon human beings.

Four of the youths took only mild doses and were released within days. The other two remained in serious condition for some time. One of those two is still suffering from emotional and psychological problems.

The case provides graphic evidence for my argument. Not only were the teenagers tragically uninformed about the drug, but so were the hospital personnel. We will never know what the pusher thought he was selling.

The Comprehensive Drug Abuse Prevention and Control Act meets our desperate need for more research and better educational programs. It creates a National Addiction and Drug Abuse Research Center and the Commission on Marihuana and Drug Abuse to examine these drugs for possible harmful effects. Further, this bill authorizes HEW grants to States or agencies for the development and evaluation of programs in drug abuse education on the school and community levels.

One problem with which the proposed National Addiction and Drug Abuse Research Center must certainly deal is that of recidivism. Why do so many supposedly cured addicts return to even harder and more harmful narcotics? Apparently, the treatment of known drug addicts has been unsuccessful—and will continue to be until we improve our present programs for rehabilitation. This bill appropriates $75 million for the treatment of drug dependents. I believe this will be money wisely spent.

Enforcement and control is the final critical area with which the measure deals. Our laws should be an effective deterrent to those who would abuse drugs. In the past they have not been.

The difficulty with our laws is twofold. First, there exists much confusion as to what exactly constitutes a crime and what penalty such a crime would draw. Simply stated, our laws in the area of drugs are too many and too widely dispersed to be effective. This bill would consolidate and codify the widely varying legislation pertaining to drug abuse.

The second and more important problem is that the penalties for drug crimes are unrealistic. At present, an 18-year-old using marihuana for the first time could receive the same sentence as a person convicted of robbery with a deadly weapon. This only fosters a grave disrespect for the law not only on the part of our young, but, strangely, on the part of our district attorneys and judges as well, who are naturally reluctant to prosecute or sentence a young person under a needlessly harsh measure. In an age of increasing lawlessness we cannot tolerate such utter disrespect, even if that disrespect is justified. The Comprehensive Drug Abuse Prevention and Control Act would fit penalties more closely to the crime. The seller would still receive the highest sanctions of law; the user, however, would be treated less severely. Provision is even made for a judge to erase the conviction of a first offender from the police record following a satisfactory probationary period. The merely curious, the one-time experimenter, will no longer be stigmatized for life by a conviction under an outmoded law. This in itself will prove a useful means for rehabilitation.

Mr. Chairman, the abuse of drugs contributes to problems in more than one area of American society. Organized crime flourishes on the illegal entry and sale of hard drugs. Most street crimes are committed by addicts in desperate need of cash. Civil disobedience in our campuses is often provoked by students who are outlaws already by virtue of their use of drugs.

Can we continue to operate as a democratic society with such a large number of our citizens engaged in criminal activity of this type? Can we allow the abuse of drugs to encourage such dangerous, if subliminal, lawlessness? I am not saying that the drug crisis lies at the root of all our ills. I am arguing, Mr. Speaker, that this particular problem has brought us squarely to the issue of our times: Whether our society can continue to rely upon the responsible participation of all its members. Too many of our citizens have ignored the boundaries of law and too many are "dropping out" of legitimate society to join the drug subculture.

I believe the Comprehensive Drug Abuse Prevention and Control Act of 1970 will be an effective tool in our fight against the drug problem. It will inform the young of the dangers of drugs and it will help those who have already experienced those dangers. Finally, Mr. Chairman, it will establish once more the respect for law upon which our society depends.

Mr. BROYHILL of Virginia. Mr. Chairman, this legislation represents not only an important, but an absolutely necessary, step forward in drug and narcotics control, which is a field of great and understandable concern to millions of parents and young people.

One of the worst problems we have encountered as a nation, in attempting to deal effectively with traffic in these substances, has involved importation and exportation.

Present law simply has been inadequate in this regard. Too many dangerous substances have found, and are continuing to find, their way into the United States through a variety of illegal pipelines.

And once inside, they quickly move into another multichanneled network which leads all too often to outlets which prey upon our young.

But this tragic story has been told and retold, not only before this Congress, but in every mass medium available, and

there is no point in my elaborating further upon this theme now.

Suffice it to say that title III of H.R. 18583 is designed specifically to provide the regulation of imports and exports which has been so sadly lacking in the past.

Primarily, title III would bring together, and integrate, the now scattered laws governing incoming and outgoing shipments of virtually all known narcotics and dangerous drugs and other substances.

Second, title III provides for a number of changes, including penalties, aimed at producing a more flexible, more realistic, and therefore more effective, system of controls.

Just as it moves toward shutting off the unlawful entry and exit of dangerous substances, title III also offers adequate safeguards to those who need to transport legitimate drugs in a legitimate way.

In short, title III—and the rest of H.R. 18583—would unify the statutes on narcotics and drugs, much as the Government's reorganization plan has unified enforcement by placing prime responsibility in the Justice Department's Bureau of Narcotics and Dangerous Drugs.

If this House does nothing else during the 91st Congress, it should enact this legislation.

Mr. TAYLOR. Mr. Chairman, I regard this as one of the most important bills to reach the House floor this year, and I rise in its support. This is the most far-reaching effort to deal with the problems of drug traffic and drug abuse ever undertaken by Congress.

The legislation faces that problem in many ways. It increases penalties and tools for dealing with those who traffic in drugs and try to make money by destroying other people's lives through drug addiction.

The bill gives the Department of Justice additional controls over the manufacture and distribution of drugs for legitimate uses. It provides a better system of control over imports and exports of drugs through a system of registration and permits for legitimate businesses. It encourages research into the causes of drug abuse and provides better information as to the dangers and effects of drugs. It also provides rehabilitation programs for drug users.

This legislation brings the various laws affecting drugs together in order to consolidate them and in order to make law enforcement more uniform. Law enforcement under the legislation is the responsibility of the Department of Justice, while rehabilitation of addicts and medical judgments are left with the Department of Health, Education, and Welfare.

I have often said that in my opinion the most serious problem facing our country is crime which is increasing at an alarming rate. Illegal drugs constitute one of the prime causes of crime. One-half of all violent street crimes in our country are committed by people under 25 years of age, and one-half of these are attributed to the use of drugs. The drug addict is the most dangerous criminal on the streets. He is desperate and has no judgment and will kill the victim in a $2 robbery. This is not only a drug control bill—it constitutes important crime control legislation.

This bill alone will not solve the drug problem, but it will help. The drug problem is so large that all units of Government, all institutions and organizations in the country must join in committing their resources to the elimination of illegal drug traffic and use.

Mr. MIZELL. Mr. Chairman, I rise today to commend the members of the Interstate and Foreign Commerce and Ways and Means Committees, for their outstanding work in reporting the Comprehensive Drug Abuse Prevention and Control Act of 1970. This bill contains sections dealing with the manufacture, commerce, and usage of drugs and dangerous substances. The legislation, which clarifies, and extends our existing laws controlling the use of drugs, will provide much-needed equipment to help put an end to the drug abuse which has become so blatant in our Nation today.

The present penalty of up to 1 year's imprisonment and a possible $5,000 fine or both, is maintained for first offenses of possession of illegal drugs. I feel that this provision of the legislation is significant, for it expresses the belief of Congress, that especially in this period of rampant drug abuse, no action should be taken which will, in any way, condone the casual usage of dangerous drugs or substances about which we know very little.

The legislation contains provisions directed at one of the primary contributors to drug abuse—the illegal pusher who is ruthlessly capitalizing on the destruction of many of our young people. Under this bill, a punishment of up to 10 years imprisonment and a fine of $100,000 for a first offense can be levied on professional criminals trafficking in drugs. Second offenses carry a possible 20 years in prison and a fine of $200,000.

Also important in this bill are the provisions for enforcement of the drugs laws it establishes. The Attorney General is given the badly needed tools to effectively fight the illegal traffic and usage of drugs.

In conclusion, I urge Congress to support this legislation, which I feel, will prove to be a significant weapon to fight the drug problem in our country and protect innocent persons from the destruction of body and mind which so tragically accompanies drug abuse.

Mr. ANDERSON of Illinois. Mr. Chairman, I rise in strong support of H.R. 18583, the Comprehensive Drug Abuse Prevention and Control Act of 1970, because I believe that the drug problem is so widespread in our society today that it is imperative that Congress take positive action to bring it under control. The use of drugs is on the rise, especially by our young people and the drug culture has even permeated the halls of many of our grade schools, enticing thrill-seeking youngsters wishing to experiment. It has taken us in the Congress too long a time to realize that the statistics we read of those suffering the physical and psychological effects of drug abuse reflect a deep-seated national problem that must be dealt with vigorously and immediately. We can procrastinate no longer for the sake of our national welfare.

The bill before us effectively confronts the multifaceted aspects of the drug problem. It attacks the core of the problem by controlling the manufacture and distribution of drugs and by tightening the import-export restrictions on drugs subject to abuse. Drugs have become a big business in our country. A 10 kilogram of raw opium, worth about $400 at its overseas source, can bring nearly $250,000 in the United States when cut, reduced to heroin, and sold in $5 packets. This profitable enterprise must be stopped.

The bill completely overhauls the entire structure of criminal penalties for drug abuse. There is a realistic recognition of the temptations facing our young people today by establishing a procedure whereby an offender, under 21 years of age, may have the facts of his arrest and conviction erased. The purveyors of drugs, those who are guided by their greed and visions of the great profits their efforts will yield, with no thought of the damage, they are inflicting on their victims, are subject to heavy prison sentences and fines.

The bill also establishes rehabilitation and treatment programs for drug abusers. This is in the interest of the user since it increases the funds available to community health facilities to be used in ridding him of his self-defeating dependence; it also serves the interest of society which requires physically and psychologically healthy and stable citizens for its own well-being. Greatly expanded drug abuse research and education programs are also provided for, acknowledging that the solution to the drug problem cannot be accomplished simply by legislative fiat.

Mr. Chairman, we are faced with a national problem, one that is growing in scope and intensity. While local community groups and organizations, more aware of the peculiar needs of their particular areas, must bear a large part of the burden, we in the Congress cannot evade our own responsibility. We no longer have a choice of whether we wish to act. This problem demands action and cannot be ignored. No amount of wishing it away will bring us closer to its eventual disappearance.

Mr. HANNA. Mr. Chairman, the use and abuse of drugs in our society has long been a matter of deep concern to me. Many times have I made my feelings known in this Chamber regarding this serious problem. My concern, however, has not been limited to the illegal use of drugs by our young people, but also includes the legal abuse of drugs by their parents. That is why today I am expressing my firm support of H.R. 18583, the Comprehensive Drug Abuse Prevention and Control Act of 1970.

I am particularly pleased with certain aspects of this measure: First, increased funds for drug abuse education activities; second, more National Institute of Mental Health funds earmarked for research into drugs and drug abuse; third, control by the Justice Department of

the registration of manufacturers, wholesalers, retailers, and all others in the legitimate distribution chain of drug sales; and fourth, establishment of Presidential Commission on Marihuana and Drug Abuse.

Earlier in this Congress I introduced legislation calling for increased emphasis by the National Institute of Mental Health on research concerning the physical and mental effects of drug abuse on an individual. Until we really know what happens to a person who is addicted to or dependent on drugs, we are a long way from a final solution to this problem and from an adequate way to deal with it.

Almost 50 percent of the 9 billion mood control drugs produced in this country last year were diverted into illicit channels. That is why title II of the measure we are considering today is so important. The bill allows the Department of Justice to keep track of drugs subject to abuse which are manufactured or distributed in the United States and prevent their diversion into illegitimate channels. This is a most important step toward alleviating a major part of the drug problem.

In this same context, I would like to bring to the attention of my colleagues a bill I plan to introduce in the very near future. Last year we produced enough amphetamines for 40 legal doses for every man, woman, and child in the country. Over half of this supply has found its way into illicit channels. My bill would place a penny a pill manufacturers tax on amphetamines and other mood control drugs, thereby cutting down on the overproduction of these drugs because of the expense involved.

The bill also authorizes the establishment of the Commission on Marihuana and Drug Abuse. This commission would be required to report within 1 year on the problems involved in marihuana use, and since arrests for possession of marihuana increased 200 percent from 1967 to 1969, this is obviously a question for which an answer must be found soon. The commission would also report within 2 years on the causes of drug abuse. There is no way we can bring a halt to the rapidly increasing number of drug addicts and drug dependents in America today without getting to the causes behind the skyrocketing use of drugs by all economic and age groups in our society. I am hopeful that the commission proposed by H.R. 18583 will give us a solid foundation on which to build future drug abuse legislation.

These are only a few of the many problems and unanswered questions regarding drugs and their use and abuse which are dealt with in this bill. I am not saying that this measure is a cure-all and that once it is enacted we will have solved the drug problem in America. As has been said many times in the past, by myself and others, the problem is much too diverse and complex for one bill to accomplish everything. However, this bill does begin to delve into areas which we have not yet touched in our previous drug control legislation and which must be dealt with soon. It is a major step forward, but let me caution once more against complacency and remind my colleagues of the long, hard road which still lies before us and which must yet be traveled before we can sit back and congratulate ourselves on curing one of America's greatest social ills, drug abuse.

Mr. DONOHUE. Mr. Chairman, I most earnestly hope that this bill, H.R. 18583, the Comprehensive Drug Abuse Prevention and Control Act of 1970, is speedily and resoundingly approved by the House.

This wholesome measure is designed to more effectively control and eliminate one of the greatest domestic tragedies in all our history, the frightening increase in drug abuse among great numbers of our American youth.

The chief provisions in this bill authorize and inspire strengthened efforts in drug abuse prevention and rehabilitation of users, more effective means for law enforcement related to drug abuse prevention and control, and establish an overall balanced listing of criminal penalties for offenses involving drugs with the most severe penalties projected upon the drug peddlers and pushers.

Mr. Chairman, I think it is commonly agreed there are very, very few, if any, subjects waiting upon congressional action that are more vitally important to the national welfare than the control and elimination of the dangerously unlawful dissemination and abuse of drugs among and at nearly every level of youthful life in this country. To save our own children and our neighbor's children, it is absolutely essential that we join together in strengthening our Federal law to prevent this evil plague from spreading its infectious poisons any deeper into the moral fabric of our youth and, indeed, into the more mature levels of American life.

Mr. Chairman, the evidence that has been revealed in committee hearings and recited by the managers of this bill is, indeed, frightening and we are authoritatively reminded that the problem is, tragically, approaching epidemic proportions. Certainly, there is no need for me or anyone else to attempt to expand upon or emphasize what everyone of us already knows about this modern American curse. The real need is, of course, to do something to control and stop it, and that is the purpose of this bill. Let us, then, get on with whatever strengthening amendments are acceptable to the majority; let us get on with this vitally urgent legislative obligation; let us enact it.

It can be truly said that, in large measure, the future of America rests in our hands today, in our action to help the afflicted and stop this drug abuse disease that is destroying the foundations upon which rests the wholesome development of American youth.

By any standard, this bill represents a timely, prudent investment in the public interest and the lasting destiny of this Nation, let us begin the investment now and let us stand by to strengthen it, if necessary.

Mr. ROTH. Mr. Chairman, there is little doubt that a reconstruction and review of our Federal narcotic and dangerous drug statutes such as provided in H.R. 18583 is long overdue. The increasing incidence of drug abuse in this country poses such a threat to our citizens and their children that prompt Federal action is vital.

The Comprehensive Drug Abuse Prevention and Control Act not only revamps the Federal law relating to the control of dangerous substances and combines it into one statute, but also it revises the penalty structure for violations, and establishes extended authority for the Federal Government in areas of rehabilitation, education, and research. There are several provisions of this bill which I think are important to point out in considering its merits.

I am particularly pleased with the revision in the penalty structure. It is appropriate that the most heinous breed of criminal who promotes drug abuse for his own profit, and who causes the misery of others, be dealt with harshly. Under section 408 of the bill, the so-called "continuing criminal enterprises" section, such persons involved in a profitmaking enterprise in continuous violation of Federal law, are subject to a minimum of 10 years in jail and up to $100,000 in fines for a first offense; a second conviction under this section carries a minimum 20-year prison sentence and up to $200,000 in fines. Not only will this section serve as a deterrent to those who might be tempted by the vast profits which may be derived from illicit drug traffic, but it will also keep the convicted away from the society which they would corrupt. There are those who would criticize the establishment of a minimum mandatory sentence, but if their children became drug addicts they might change their minds about being soft on this kind of criminal.

It has always been my feeling that much more should be done with the tremendous resources of the Federal Government in the area of researching the effects of dangerous drugs on the individual, the reasons why people seek drugs, and how the problem of drug abuse should be controlled. This proposal offers several opportunities for the expansion of such an effort.

A Commission on Marihuana and Drug Abuse is established with an authorization of $1 million to study available information on those subjects. It would report to the President and Congress including its recommendations for legislative and administrative action. The first report would be submitted within a year and it would cover all questions relating to that controversial drug, marihuana. The second report on the general causes of drug abuse would appear within a year after that. I believe that the intensive study that Commission would provide would give us solid ground on which to base future action. Certainly the whole question of marihuana control will never be settled without such a project.

Research is also encouraged through granting the Secretary of Health, Education, and Welfare the authority to protect the privacy of drug research subjects by nondisclosure of identification data. This would give qualified researchers connected with public and private organizations the flexibility they require to assure those with whom they ex-

periment that they are immune from prosecution for narcotic and dangerous drug violations.

Finally, research in methods of drug abuse prevention is encouraged with the establishment of a grant program under an amendment to the Community Mental Health Centers Act. Funds for the development and evaluation programs of drug abuse education for all groups including school age children would be released by this provision.

In my remarks today, I have reviewed only a few of the many valuable proposals offered in the Comprehensive Drug Abuse Prevention and Control Act. This bill represents the blending of opinions of the law enforcement and scientific communities which is often a difficult task to achieve. It is certainly a most worthwhile measure, and accordingly, I offer my support for its passage.

Mr. HOGAN. Mr. Chairman, I rise in support of the Comprehensive Drug Abuse Prevention and Control Act of 1970. Drug misuse and abuse are increasing at an alarming rate in America. Early in 1969 the U.S. Department of Health, Education, and Welfare issued a statement warning that drug abuse had reached almost epidemic proportions. Once a problem of the ghetto, this plague now strikes all segments of society, regardless of age, racial, social, and economic background. Particularly susceptible, however, are the young people of this Nation.

The figures associated with drug abuse among the young paint a frightening word picture.

In the FBI's annual crime report issued in August 1969, the Bureau of Narcotics and Dangerous Drugs revealed that since 1960 the number of arrests for drug violations for persons under 18 years of age was up 1,800 percent. This compares with 235 percent for persons over 18 years. In 1969, three of every four arrests for drug abuse were of persons under the age of 25.

The number of casualties from drug abuse is alarming. New York City has an estimated 100,000 heroin users who spend $850 million a year on that drug and many times that number who take other dangerous drugs. In the past 3 years New York has spent $250 million on drug problems and has increased the number of beds available for the medical treatment of drug dependent persons from 375 to 5,000. Heroin caused 730 deaths in New York in 1968 and an estimated 900 more in 1969. In a 3-month period in 1969, 71 teenagers died from overdoses of drugs.

The New York Times reported that, in New York City, marihuana can be found in virtually all secondary schools. Of 30 student leaders in the city's schools, more than half said they smoked marihuana occasionally, and the remainder said they had friends who did. Students there estimated that at the average high school in the city, marihuana use ranged from 30 to 80 percent of the student bodies. Estimates of nationwide experimentation with marihuana among teenagers ranges from 2 to 10 million.

Across the Nation reports of drug abuse are similar. In a Los Angeles suburb, police found 13-year-olds shooting methedrine under their tongues. Hospital care for 4,967 San Francisco teenage drug users in 1967 cost the city $3.75 million, and drug use has increased since that time.

According to a newspaper report in January 1969, about one-sixth of the high school students in San Mateo County, Calif., had used "speed"—amphetamines—and more than one-third of them had tried hallucinogens or barbiturates. In San Mateo County juvenile arrests for dangerous drugs jumped 1,448 percent in 8 years and 324 percent in 6 months. Drug arrests in California's larger counties more than doubled during a 6-month period.

Even more alarming is the fact that experimenting with drugs is not limited to teenagers. One member of the New York State Narcotic Control Commission reported that his agency had made arrests of 7-year-old children and even had a 9-year-old heroin addict. Slum residents in New York say that some 8-year-olds are experimenting with heroin bought in the schoolyards.

According to Dr. Richard Blum, a San Francisco sociologist and former consultant to the President's Commission on Crime, many California fifth graders have already been exposed to marihuana and LSD.

He says:

> In the last eight years we have watched the age level of drug users in California drop from adults to elementary school children. We can't go much lower.

He adds:

> And generally what happens in California happens elsewhere sooner or later.

In some parts of my home State of Maryland, drug use has reached almost epidemic proportions. There is evidence of children in the second grade experimenting with drugs.

With the doubling of arrests for drug violations last year, many suburban and rural communities throughout the Nation are finding out that drug abuse can happen here. And subsequently individuals and communities are waking up to the problem and taking action to confront this plague. Even so, the task ahead is awesome.

One university psychiatrist, testifying before the House of Representative's Select Subcommittee on Crime, expressed concern that it may already be too late for many of our young people. He then made this frightening comment:

> This generation of drug users might just as well be written off because it costs $25,000 to keep an addict off a drug for a single year.

And the director of community development for a halfway house project in Chicago said that only about 35 percent of the "graduates" of this rehabilitative project stay off drugs permanently. He contends, as do I, that the real answer lies in educating youngsters against drugs before they are "hooked."

This is not to say that we can forget those already dependent on drugs. We cannot afford to write off this generation. And if only 35 percent of our drug users can be rehabilitated, that 35 percent is well worth saving. Every effort must be made to help those who are "hooked" to kick the habit and find meaningful, rewarding lives. At the same time, however, it is of prime importance that we concentrate our future efforts toward our youth before they begin experimenting with drugs. It is imperative that they have a full understanding of what it means to become an addict, to see what these drugs will do to the body and mind—to realize that, if abused, drugs "turn on you" rather than "turn you on."

Furthermore, we must inform our youth about those slave-masters who sell narcotics. There is no word in the lexicon repugnant enough to describe those who lure others into drug use for profit and destroy without pity. This criminal element is busily recruiting its clientele, primarily from our youth. While this drug crisis worsens, we hear all sorts of excuses for inaction and complaints of the difficulty we have in bridging the gap between generations. Turned away from parental communication and authority, the young frequently seek guidance elsewhere. Somehow this criminal element seems to have little trouble communicating across the generation gap.

How tragic to think what it forbodes for the future of this country if the criminal mind is capable of rapport and communications with our young, and the responsible segments of our society are not.

Somehow we must open the channels of communication—particularly in the area of drug abuse. We must point out the consequences and dangers of taking drugs without medical supervision. We must emphasize that all drugs, no matter what category, often lead not only to permanent physical damage, but also to psychological damage if abused and misused. In other words, a constant user ceases to be a productive member of society as he withdraws into this nether world, a slave to his addiction, a human vegetable. The life which could have been well spent in a conscious appreciation of reality is wasted. The talents remain unused, undeveloped. The mind is reduced to impotence. This is especially tragic for young people who stand on the threshold of life, facing the challenges, opportunities, and wholesome pleasures which a vibrant existence makes possible. What a calamity if a transitory puff of a weed or an experimental drop of acid snuffed out forever the rewards and joys and accomplishments of a bright young person. What a loss for the individual and for society.

For this reason, enlightened educational efforts aimed at all strata of society are needed at once. We must prevent a further rise in drug use and pave the way for a society free of this plague. To do so we must inoculate potential users with sophisticated and factual information and education rather than misinformation and veiled threats on the effects of drugs.

Young people themselves can and must play a key role in this war on drug abuse. However, we cannot succeed with this war until we enlist the active assistance of every citizen. Parents, counselors, administrators, teachers, nurses, social workers, law enforcement officers,

civic and community leaders, and any others who have occasion to work with the young must arm themselves with the facts on drugs.

Mr. Chairman, as a Member of Congress concerned and deeply disturbed about crime in general and narcotics in particular, I urge my colleagues to dedicate themselves to solve this grave problem. At the same time, however, I urge that all Americans take prompt action to prevent us from becoming a nation of "hopheads."

The future can be a nightmare or the fulfillment of a wonderful dream. It is largely in our hands to make the choice. Let us, therefore, go forth, armed with information, to wage a war against drug abuse to insure that this dream is not an impossible one for your youth.

Mr. Chairman, the bill before us is designed to deal in a comprehensive fashion with the growing menace of drug abuse, first, through providing authority for increased efforts in drug abuse prevention and rehabilitation of users; second, through providing more effective means for law enforcement aspects of drug abuse prevention and control; and third, by providing for an overall balanced scheme of criminal penalties for offenses involving drugs.

As the sponsor of three bills, H.R. 18051, H.R. 18050, and H.R. 18433 which generally provide for the same multifaceted attack on the drug problem as H.R. 18583, I am pleased to see action on this legislation today, giving every indication that it will be successfully enacted into law during this session of Congress.

Title I of this bill provides authority for the Department of Health, Education, and Welfare to increase its efforts in the rehabilitation, treatment, and prevention of drug abuse, through community mental health centers and through public health service hospitals and facilities. Over a 3-year period $75 million in increased authorizations are provided for community mental health center facilities to deal with narcotic addicts and drug dependent persons, $29 million is authorized for drug abuse education activities, and $60 million is authorized for special facilities in areas having percentages of narcotic addicts and drug dependent persons.

Title II of the bill contains another facet of needed action—that of control by the Justice Department of problems related to drug abuse through registration of manufacturers, wholesalers, retailers, and all others in the legitimate distribution chain, and makes transactions outside the legitimate distribution chain illegal.

The drugs with respect to which these controls are enforced initially are listed in the bill and include all hard narcotics and opiates, marihuana, all hallucinogens, amphetamines, barbiturates, and tranquilizers subject to abuse.

A procedure is established for classification of future drugs which create abuse problems, under which the Attorney General and the Secretary of Health, Education, and Welfare coordinate to determine if a drug should be or not be controlled.

In the case of drugs providing serious addiction or abuse problems tighter controls are provided which include the establishment of quotas for imports and for domestic manufacture.

All persons in the distribution chain are required to be registered, and, with certain exceptions, must keep records regarding all transfers of controlled drugs. Practicing physicians are required to keep records of schedule I substances; keep records of narcotic drugs in other schedules which they dispense to patients; and if they charge for other controlled drugs regularly, keep records of these transactions.

The bill revises the entire structure of criminal penalties involving controlled drugs by providing a consistent method of treatment of all persons accused of violations. Possession of controlled drugs is made a misdemeanor, except where possession is for the purpose of distribution to others, and in the case of a first offense of simple possession, the court may place the offender on probation for not more than 1 year. If the offender is below the age of 21 when the offense occurs he may obtain a court order expunging from all official records all recordation relating to his arrest, indictment, trial, and finding of guilt. This may only be utilized in regard to a first offense.

Manufacture or distribution of illicit drugs is punishable by up to 15 years in prison in the case of schedule I or II narcotic drugs, and by up to 5 years in the case of non-narcotic schedule I or II drugs or any other controlled drugs in schedule III.

Second offenses carry double the penalty for first offenses. Where a person over 18 sells drugs to a person below 21, the first offense punishment is twice that otherwise prescribed.

The bill specifies a number of administrative authorities for the Attorney General, including research and education programs relating to enforcement of drug abuse laws, cooperation with State and local law enforcement officials, inspections, forfeitures, and execution of search warrants, including authority to enter premises without giving notice of authority and purpose if a judge or U.S. magistrate has authorized a "no-knock" entry in the warrant after determining there is probable cause to believe that—

(1) property sought may and, if notice is given, will be easily and quickly destroyed or disposed of, or

(2) the giving of such notice will immediately endanger the life or safety of the executing officer or another person.

I will strenuously oppose efforts to delete the "no-knock" entry authority from this bill inasmuch as I believe no-knock entries are necessary to combat organized gambling and narcotics traffic and also necessary in certain circumstances to protect the life of the officer. The "no-knock" has aided in combating illicit drug traffic in all of the 29 States where this authority exists by statute or by common law. The conclusion that "no-knock" legislation is constitutional is based on the decision in Ker against California which upheld unannounced entry and seizure of narcotics without a warrant primarily on the basis of the officer's need to prevent destruction of evidence. The Ker decision is still controlling law with respect to the constitutionality of unannounced entry. Therefore, I have no doubt in mind as to the constitutionality of this authority as contained in H.R. 18583.

Title III of the bill provides for control of imports and exports of drugs subject to abuse through a system of registration of importers and exporters.

Mr. Chairman, today we have an opportunity to provide the Federal Government the tools with which to lead the way and assist State and local governments in waging a comprehensive attack on the drug problem.

I urge the Members' approval of this legislation.

Mr. RANDALL. Mr. Chairman, I rise in support of H.R. 18583, entitled the "Comprehensive Drug Abuse Prevention and Control Act." There are three key words in the title of the bill alone which are most significant. The words are, "comprehensive," "prevention," and "control." It is a comprehensive measure because it covers just about everything from importation or exportation of drugs, simple possession, legitimate drug distribution, illegal drug possession, rehabilitation, appropriations including their division between the Department of Health, Education, and Welfare and the Department of Justice and, finally, punishment for offenses provided in the bill.

H.R. 18583 is not only comprehensive, but as the title indicates, one of the purposes is the prevention of drug abuse through educational activities with emphasis upon programs in communities with high percentages of drug addiction and usage and programs under the National Institute of Mental Health for research and training activities in the area of drug abuse.

The word "control" in the title, of course, simply means enforcement by the Justice Department in problems related to drug abuse, by any person or corporation whether a manufacturer, wholesaler, or retailer. These controls cover all the hard narcotics and opiates, marihuana, and hallucinogens such as LSD, amphetamines, barbiturates, and even any tranquilizers subject to abuse.

It is interesting to note under the control for enforcement provisions the bill makes transactions outside the legitimate distribution process a misdemeanor.

In my opinion, the committee has done an excellent job in providing for offenses punishable by a series of mandatory penalties with emphasis on the sale of drugs or what has been called the pushing of drugs. For instance, when any person over 18 years of age, even though he may not have attained his majority, sells a drug to a person under 21, the penalty is automatically doubled. In other words, the emphasis is upon attacking commerce in drugs or to prevent drugs changing hands.

Most of us will stand in approval of the provisions of the bill which provides that as long as it is simple possession only and where no sale is involved and where it happens to be the first offense of a person under 21, such person may be

placed on a one year's probation. In the event that probation is not violated, such person may later obtain a Court Order expunging from the record all information of his arrest, trial and findings of guilt. Certainly such provision makes sense. They mean an offender is given a way to write his own ticket or chart his own future. Certainly a young man who is determined to turn over a new leaf should not have to have the results of one unfortunate and lamentable act dog him all the rest of his life.

Mr. Chairman, the Committee on Interstate and Foreign Commerce is to be commended for the kind of bill they have brought before us today. As good as it is, I am sure we would all have preferred that it had been acted upon earlier in this session.

Should there be any slight doubt in the minds of any Members or should there be any possible question about the need for a comprehensive drug bill, a recitation of the following considerations should erase any such doubts.

Drug usage leads to a physical or psychological dependence, or both, and leads the user into a state where frequently his life begins to center around drugs to the exclusion of all other things, including self respect. Thereupon, the drug user has imposed not one but two problems on society.

Continued use of drugs creates a growing dependence upon them and the tolerance against them builds up to require heavier usage in order to satisfy this dependence. It has been the policy of society in general to prevent the taking of one's own life—the commission of suicide. But the confirmed drug user is headed for certain death unless a reversal is made in his way of life. If he does not willingly seek such a change, the enormous quantities of drugs he will eventually need, and the continued and growing danger of his getting contaminated materials, or the unsanitary methods by which addicts satisfy their cravings, one or the other of these will surely kill him. Or, if he does not willingly and in an enlightened way turn away from drugs the time will come when the addict's utter dependence upon them will come face to face with a situation in which they are unavailable and the addict will die from either the physiological complications of withdrawal or he will commit suicide in his frustration. In either event, society holds to a policy of preventing self-destruction.

Second, as all other things fade into oblivion for the user except getting the drugs he wants or needs, he becomes counterproductive; unable to perform any jobs that will support his habit from legitimate earnings, even if he were willing to remain gainfully employed. It is then that he turns to crime to support his habit. Not only is such a person dangerous on the streets and highways and totally irresponsible to his simplest obligations to family or public, but he then falls into one of crime's largest categories, that part of criminal activity conducted by the nation's addicts in support of their drug cravings, the cost of which is estimated variously from $4 to $20 billion a year from holdups, robberies, shoplifting and other dollar-producing activities for the illegal purchase of illegal drugs.

Before I conclude my remarks I wish to pay tribute to Kiwanis International for what it describes as Operation Drug Alert and which has generated intense interest among all Kiwanians. Its main thrust or primary effort is educational programs directed to the early teenage child, to give support to educators by the furtherance of drug education within our schools.

These and other service organizations know and emphasize that while some think LSD turns a person on, a little later down the road in point of time LSD turns on you.

It is encouraging to know that more and more thinking people in America are beginning to realize that drugs like marihuana can lead to experimentation with hard drugs. While it is true that the charge may be somewhat speculative and thus at this point in time a matter of conjecture, marihuana does cause bronchitis and emphysema and the clear possibility of carcinoma or cancer of the lungs. The fact that marihuana may cause cancer should be a red light that any potential user should be willing to respect.

Let us hope and pray that with more education our young people will not have to learn the hard way what it is like to turn themselves off by turning on with drugs. H.R. 18583 is a good bill. As far as I can see, it should enjoy the support of every Member of the House of Representatives.

Mr. MOORHEAD. Mr. Chairman, I rise in support of H.R. 18583, the Comprehensive Drug Abuse Prevention and Control Act of 1970, which while not a perfect bill, is a realistic recognition of both the punitive and rehabilitative aspects of the devastating global problem of drug abuse.

It provides needed resources to deal with drug abuse prevention and rehabilitation, including education and research, as well as increased funds for law enforcement and improved ways to reach and control the source of supply.

In the United States incidences of drug abuse have reached epidemic proportions. Obviously new and drastic steps must be taken to cope with the problem.

For example, while no one really knows how many drug abusers there are in this country, it is estimated that there is one narcotic addict for every 3,000 persons and the number is growing. One indication of the upsurge can be found in arrest statistics. The 1968 figures indicate that 162,177 persons were arrested by State and local authorities for drug violations, constituting a 322-percent increase over the number of drug arrests made in 1960.

In my city of Pittsburgh, statistics show an increase of arrests for illegal sale and possession of hard drugs of from 334 adults in 1968 to 520 in 1969. In the white population this jumped from 94 in 1968 to 176 in 1969. Arrests for youths under 18 have nearly doubled. Arrests for hard drugs among blacks remained about the same, but figures show that among white youths it has jumped considerably. The major increase in the number of arrests is accounted for in the synthetic narcotics category.

Administrators of the black action drug abuse program in Pittsburgh—the best-developed comprehensive social and rehabilitative program in Pennsylvania and the tri-State area, estimate that the number of drug users is anywhere from 10,000–15,000, in Pittsburgh and Allegheny County, and of course not all cases are reported. For example, as opposed to the hard drug users such as heroin, the users of marihuana, hallucinogens such as LSD; stimulants and depressants are seldom discovered unless they are involved in a criminal action and arrested. The sobering fact remains that in Pittsburgh we have had 21 drug-abuse related deaths this year alone.

Although we are becoming more knowledgeable about the effects of drugs with abuse potential, the abuser himself remains an enigma. True dependency does not exist as we all know just in the slum neighborhoods, but is born of problems that are sometimes family related, school related, or world related; in the case of many of our youth, the war and the draft, which has turned off many of them toward society and turned them on in another very dangerous direction.

Thousands of people caught in the web of drug abuse are not just costly in terms of the waste of human resources, but are feeding millions of dollars into organized crime and causing hundreds of thousands of dollars in property loss. The average addict spends approximately $15 a day for his drug; that means that 7 days a week, 52 weeks a year, he would require about $5,464. Some of the hard narcotic addicts require $100 a day, instead of $15. To satisfy this craving the addicts must produce money, which is the cause for most street crime and the money is fed right into the organized crime structure. Of course the taxpayer pays to rehabilitate the addict. Do we have a choice?

Clearly a total comprehensive effort is needed in every community across the country if one is to be safe to walk the streets at night. Or even in the daytime. Along with this new and better ways must be found to rehabilitate rather than incarcerate the individual who can be helped back into society.

By passing this legislation, programs such as the 1-year experimental project, which has given $140,000 to the State educational department in Pennsylvania can be continued. This project has enabled six colleges, one of them the University of Pittsburgh in my district, to set up training workshops for teams composed of teachers, doctors, lawyers, pharmaceutical representatives, and youth representatives to go back into the community with greater knowledge of how to understand and handle the drug problem.

It would also provide increased funds for community mental health centers which act as a catalyst for coping with the total problems of drug abusers—medical care, group therapy, job opportunity, housing, and so forth. This would mean that programs such as that sponsored by Black Action, Inc., and the

Craig House-Technoma Workshop, who have treated 300 hardcore heroin addicts in Pittsburgh and Allegheny County on a methadone maintenance program, and have a large waiting list, could be expanded, as could other programs now limited by funds which have operated under the Western Pennsylvania Council on Drug Abuse, and the Allegheny County Medical Society.

Mr. Chairman, I urge support for the drug abuse bill which will help enforce our laws and statutes relating to narcotic drugs, meanwhile insuring an adequate supply for medicine and research, and prevent diversion of drugs into illicit channels. It is a step forward in eliminating the social, economic, and medical menace caused by drug abuse.

Mr. COHELAN. Mr. Chairman, I rise in support of the Comprehensive Drug Abuse Control Act of 1970.

In many ways, this bill represents an enlightened approach to the increasing problem of drug abuse in this Nation. I am especially pleased with the provisions that attempt to strengthen rehabilitation and research—two fields that have been very neglected in the past.

Title I of this bill provides $75 million over a 3-year period for community health facilities and the treatment of drug-dependent citizens. In addition, there is $29 million authorized for drug education and $60 million for special facilities in areas having high percentages of persons addicted to narcotics or drugs. Representing two major urban areas—Oakland and Berkeley—I am intimately aware of the drug problem and the inability of the local government to singlehandedly meet the rehabilitation problems that face them. This money for new facilities is necessary and long overdue. The problems of drug usage are nationwide; and it is only fitting that national resources be mobilized to confront these problems.

The problem of the treatment of drug abuse remains a continuing paradox. There are no widely accepted methods for treatment of the addict. Much more remains to be done. A constructive provision in this bill in section 4 of title I gives a Secretary of HEW the authority to set guidelines for private physicians to treat patients who are dependent on drugs. This is a definite advance over existing practice. Given the legal restrictions of treatment for drug addicts, many physicians refuse to treat them for fear of becoming involved in a legal action which could result in termination of their accreditation.

I am also happy to see that $1 million will be given for the Commission to study marihuana. I am a cosponsor of the bill to establish this Commission because more research has to be done in this area. The widespread use, and I might add parenthetically, acceptance of the use of marihuana, presents one of the most significant problems not only for law enforcement but also respect for the law in general. For too long, this Nation has been operating under the assumption that marihuana and the opiates were commensurate and should be treated accordingly in a court of law. This has resulted in some horrendous sentences, the most notorious being a 25-year sentence for possession for a student in Virginia. Much remains to be done to find out the effects of marihuana. Assertions from both sides are not hard to find, but there is precious little hard clinical data on this subject. The authorization of $1 million is a beginning to improve our knowledge in this area.

I have reservations about some of the law-enforcement features in this bill. In the main, the bill, however, has distinct advantages over existing law. The major advantages in the enforcement section of this bill are that there are no mandatory penalties which gives the courts more discretion in judging the guilt or innocence of a person. This is a progressive step forward. I find congenial the idea of setting up schedules for drugs. However, I have serious reservations about the criteria used for setting up the initial schedules within this bill. In the bill there are five schedules for drugs which, in turn, determine the amount of control and penalties. The categorizations are based on "drug's potential for abuse and nonmedical use." This criteria does not take into account the amount of harm to an individual caused by each drug. The result of this oversight is that marihuana is classified in the first schedule with heroin. It seems even with only preliminary data on marihuana that this is inadvisable. However, it should be noted that the drug schedules are not fixed and that the Attorney General can propose changes subject to the veto of the Secretary of Health, Education, and Welfare.

The Secretary of Health, Education, and Welfare, charged with the responsibility for understanding the latest clinical data and the effect of certain drugs, is to use this information to correct the decisions by the Attorney General as to what schedule each substance should be placed in.

This bill makes the attempt to separate simple possession from distribution in allocating penalties. This I feel is a valid distinction. Also, there is a distinction in the bill based on the type of drug distributed. For example, the penalty for hard drugs—for example, heroin—is 15 years, and distribution of drugs that are non-narcotic—for example, marihuana—is 5 years.

There are two provisions of the penalty section which are disturbing. First is the nationwide application of the so-called "no-knock" provision. There is great legal ambiguity about this provision, but I feel it is the political and social effect of this provision that carries the greatest liabilities. No-knock will exacerbate tensions in the inner city because it is a potentially provocative practice. It can be interpreted as destroying the right to privacy guaranteed under the Constitution. There is also no data showing the effectiveness of no-knock in halting the drug traffic.

Also, the continuing criminal enterprise section partially reinstates mandatory sentencing. Mandatory sentence of 10 years to life is imposed on individuals "involved in a continuing series of violations in consort with five or more persons, from which he derives substantial income." I fear that this is vaguely worded and might provide mandatory penalties for minor violations.

My decision in handling these two sections was to vote for the amendments to delete them. On balance, this bill represents significant answers in many aspects of our treatment of drug addiction and distribution. I voted also for the Pepper amendment which would limit the production of amphetamines. There seems to be little reason why these drugs should be produced in such great numbers that far exceed the demand. This overproduction only creates the potential for abuse.

It is my hope in voting for this bill that the rehabilitation and research aspects of this bill as well as the criminal provisions will moderate the increasing illegal use of drugs in our Nation. This bill represents a beginning and attempts to deal with this large and complex problem. It is not the final answer but it is a necessary beginning. I am hopeful that the no knock provisions and the Poff amendment will be removed in conference. I feel that these two features contribute very little to the enforcement features of the bill and detract from the bill's many constructive features.

Mr. MINISH. Mr. Chairman, as the House considers H.R. 18583, the Comprehensive Drug Abuse Prevention and Control Act of 1970, I think it necessary to point out that we are extremely concerned about the growing menace of drug abuse in the United States. Today's measure tries to provide increased drug abuse prevention and rehabilitation, in combination with more effective law enforcement and control and a balance of criminal penalties for drug offenses.

Today's measure provides authority for the Department of Health, Education, and Welfare to increase drug rehabilitation, treatment, and prevention through community mental health centers and public health service hospitals and facilities. Increased authorizations, it is hoped, will provide an improved community mental health program dealing with narcotic addicts and drug dependent persons, drug abuse education activities, as well as improved special facilities in certain areas.

The enforcement provisions of H.R. 18583 provide for control and enforcement by the Justice Department of drug abuse related problems through registration of manufacturers, wholesalers, retailers, and all others in the distribution chain. Included among the drugs controlled by this section are hard narcotics and opiates, marihuana, hallucinogens, amphetamines, barbiturates, and tranquilizers subject to abuse.

Future drugs with a potential for drug abuse are also considered in this legislation. The Secretary of Health, Education, and Welfare has the responsibility of determining whether or not the Attorney General should control the drug, thereby placing it under the jurisdiction of the Justice Department.

This measure revised the entire structure of criminal penalties. The concept of a continuing criminal enterprise is herein introduced. A continuing criminal enterprise involves a continuing series of

violations undertaken in concert with five or more other persons. It was provided in this measure to separate the professional criminal from the youthful offender who is himself enmeshed in the drug abuse trap. The professional criminal stands to receive a mandatory minimum sentence of not less than 10 years and up to life imprisonment. Moreover, while today's legislation does away with certain mandatory sentences, it provides that a person over 18 selling drugs to another person below the age of 21 is subject to twice the first offense punishment prescribed in this bill.

A worthwhile feature in H.R. 18583 establishes a Presidential commission on marihuana and drug abuse, to study and report to the Congress within 1 year on marihuana and within 2 years on the causes of drug abuse.

This is an incorporation of a measure I had cosponsored to execute extensive and reliable marihuana research.

Mr. Chairman, we cannot act swiftly enough to handle the burgeoning problem of drug abuse and addiction. According to committee testimony, a leading cause of death among teenagers in many major metropolitan areas in the United States is heroin overdosage. Although reliable statistics are not available, it is apparent that drug abuse is increasing. It is similar to an infectious disease; one drug abuser can cause many others. One addict will provide addictive drugs to his friends in order to pay for his own habit. Moreover, addicts who cannot legitimately obtain the large sums of money needed to support their drug craving will resort to theft, mugging, and housebreaking as a source of income. Even drugs that do not cause an actual physical dependence, we have found, create a dangerous psychological dependence that medical treatment alone is insufficient to cure.

It is my belief, therefore, that the illegal traffic in drugs should be attacked with the full power of Government, while we attempt to rehabilitate the youthful abuser. That is a goal we all must seek. The Comprehensive Drug Abuse Prevention and Control Act attempts to achieve this goal.

Mr. PICKLE. Mr. Chairman, this legislation puts teeth into our laws where I firmly believe the most incisive teeth are needed. It cracks down on the pusher. The bill doubles the penalties for most pushers, including in the case of a first offense if the drug is sold to a person under 21 years of age. Simultaneously, the bill lightens the penalty for mere possession to a misdemeanor. I favor this new approach of putting the emphasis on the pusher and drying up the source. Because of the availability of drugs, many of our young people succumb to the temptation to try them—and then face the rest of their lives with a felony on their record whether or not they had ever become serious, practiced users of drugs.

The scope of this bill is much broader than mere punitive measures. The bill substantially increases the authorizations for efforts to deal with the rehabilitation of drug users. Getting these folk back on the track of being healthy, useful citizens is a responsibility which I think the Government should welcome and give a major priority in the list of services which we can offer to the citizens of this country.

The bill also establishes a Presidential Commission on Marihuana to untangle the confusion surrounding current medical and legal debates on this drug. I should hope that the findings of this Commission will give us many tools with which to deal with this major drug problem.

The bill provides for the necessary backup for the goals it contains by increasing aid to law enforcement and drug education programs, and by strengthening the judicial tools by which our law-enforcement officers may work to stop the use of drugs. Although I do not favor the principle of the "no knock" provision, overall this is a most important bill.

Mr. Chairman, I submit that this is a strong bill, it is a needed bill, and it is a good bill. I urge the support of my colleagues for this measure. With this legislation, we attack the organized crime behind the dope rackets. Equally important, we recognize the human needs of their victims—the young users. Perhaps we can redeem some young lives by helping them before they become addicts.

Mr. O'NEILL of Massachusetts. Mr. Chairman, I rise in support of the Comprehensive Drug Abuse Prevention and Control Act of 1970. This is a good bill. It is a much better bill than that passed by the Senate which was essentially a crime bill and not a treatment bill.

The drug abuse problem in the United States is of mammoth proportions and affects every segment of our society, all age groups and every area of the country. There is no family that is naturally immune to the dangers of drug abuse. All of us are particularly concerned about the extensive use of drugs by the young people of America. Again, this is not confined to any one group of people. It hits college students and soldiers alike, teenagers and children still in grade school. The human tragedy of drug abuse is made more clear perhaps when we read of the deaths of 12- and 13-year-old children from overdoses of hard narcotics, but less dramatic damage is going on all the time.

Three major aspects of the drug problem are covered in this bill, perhaps most importantly, rehabilitation programs as created and described in title I. Title II covers the law-enforcement aspects of the problem and title III attempts to regulate the importation and exportation of drugs subject to abuse.

This is a comprehensive bill. This supplements the massive drug education program already passed by the House. This bill is not perfect to be sure. I disagree with the no-knock provision and will oppose it, just as I opposed it in the District of Columbia crime bill. I understand that certain amendments will be offered, some of them I believe will strengthen and perfect the bill.

I do commend the committees for producing such comprehensive and detailed legislation, and I am hopeful that this legislation will be one of the first steps in controlling and preventing drug abuse.

Mr. KOCH. Mr. Chairman, I would like to comment briefly on section 601 of the bill; this section provides for the establishment of a Commission on Marihuana and Drug Abuse. I think that the need for a comprehensive study of marihuana is evident in the great disagreement that exists in our country over the effects of marihuana smoking both to the individual and society.

An estimated 12 million people have already smoked marihuana. Many pot smokers claim that marihuana is their recreational weed, and the number of marihuana smokers continues to grow in the face of still severe penalties for marihuana possession in many States. Marihuana smokers now represent over 60 percent of the student body in some of our urban schools with similar statistics now rising in our high schools.

At this time there is great confusion in the public's mind over just what marihuana is all about with misinformation existing on both sides of the issue. I think, however, that we all agree that it is time we get the facts and the answers to some of the fundamental questions that really make this issue so difficult—such as how much responsibility a society has to protect people from harmful actions affecting only themselves. And most perplexing may be the question of what we do about a drug that some allege is no more injurious to a person than alcohol—in a society in which 80 million people drink, knowing that 6 million are alcoholics as a result of that drinking; 50 million people smoke cigarettes, knowing they lead to cancer and heart disease and shorten one's life an average of 7 years; and 25 to 30 million people rely on sedatives, stimulants, and tranquilizers. Support for the Commission has come from both those who believe marihuana is harmful and those who do not.

I hope that the Members appointed to the Commission will approach this matter with an open mind, sorting fact from myth, and considering the subject in the perspective of our past and what kind of society we want for the future. It is important that the Commission give this subject the kind of total examination it requires so that it can make recommendations that will receive the wide acceptance that is necessary if they are to be accepted by the public and the Congress.

Mr. Chairman, I am particularly pleased that this section has been included in the comprehensive drug bill since I introduced the original legislation in April of 1969 providing for the establishment of a Commission on Marihuana. I am indebted to the distinguished chairman of the Judiciary Committee, Mr. CELLER and his distinguished subcommittee chairman, Mr. KASTENMEIER; it was their committee that first considered this proposal and favorably reported it to the House. And I am most grateful that the distinguished chairman of the Interstate and Foreign Commerce Committee, Mr. STAGGERS and his subcommittee chairman Mr. ROGERS of Florida, to include it in the bill we are considering today.

Mr. RYAN. Mr. Chairman, in considering H.R. 18583, the Comprehensive Drug Abuse Prevention and Control Act of 1970, we are faced with a problem which is of the utmost concern to all Americans—the problem of drug use and abuse. The specter hangs over our communities and our children. Drug abuse and addiction has become increasingly prevalent, extending to teenagers and even younger children.

High crime rates reflect the desperate acts committed by drug addicts to obtain the money necessary to sustain their habits. As a result of this relationship between drug addiction and crime, in the past the drug addict has been dealt with as, ipso facto, a criminal. It belabors the obvious for me to reiterate, once again, that criminal acts—whoever the perpetrators—must be dealt with firmly and effectively. But in our surge toward combating crime, we must not fail to search out and employ the methods of education and treatment which are feasible and available to deal with the identifiable, tragic problem of drug addiction.

Drug addiction, like alcoholism, is a sickness. The addict has some psychological need for drugs and becomes the victim of physical or psychological dependence, or both. Thus, the answer to the crime drug problem is not only punitive measures—when such are necessary—but also understanding, education, and rehabilitation.

I am pleased to see that H.R. 18583, the Comprehensive Drug Abuse Prevention and Control Act of 1970, takes into account these perceptions and provides some of the needed assistance. For example, the bill provides authorization for funding of community mental health centers and other facilities for the treatment, rehabilitation, and prevention of drug abuse. In addition, the bill revises the present penalty system, and makes possession of all controlled substances a misdemeanor. Further, it provides that in the case of a person under 21 who is found, or pleads, guilty as to a charge of possession, the court may, after dismissal or discharge and upon application, issue an order expunging from all official records all recordation relating to the arrest, indictment, or information, trial, finding of guilty, and dismissal or discharge.

However, this bill's worthwhile aspects, unfortunately, are couched amid provisions which assail basic constitutional rights. The bill contains an invidious no-knock provision and a continuing criminal activity provision which is of dubious wisdom. Perhaps most perilous, an amendment has been adopted today for the sentencing of so-called dangerous special drug offenders which simply refutes the very basics of due process which have marked ours as a system of rule by law and not by arbitrary men.

As the representative of a city which has the highest number of drug addicts in the Nation, I am particularly aware of the twin evil of drug addiction and crime. I have particularly addressed these problems by supporting such projects as Phoenix House and Odyssey House, as well as methadone treatment programs. In my own district, I have worked closely with Mothers Against Drugs—MAD—and ABLE in their efforts to establish meaningful, effective programs to combat drug abuse. Obviously, I would support wise prudent, forceful Federal legislation. This bill misses the mark.

Before discussing the major constitutional defects of H.R. 18583, I would note one flaw of a technical, albeit substantively important, nature. Title II, part B, section 202 of the bill deals with the scheduling of controlled substances. These substances are based on the "drug's potential for abuse and nonmedical use." Unfortunately, these criteria do not also include the drug's potential for harm to the individual who uses it. Thus, marihuana is found on schedule I with such drugs as heroin, morphine, and LSD, and is subject to the same penalties.

I am sure that all of my colleagues agree that additional research is needed regarding the effects of marihuana on its users. However, I think they will also agree that the studies which have thus far been completed show that whatever harmful effects marihuana may have, they are not comparable to the effects of the other drugs on schedule I.

My major dispute with this bill, however, goes to the incursions upon the Constitution and upon wisdom which several of its provisions essay. These incursions have been devastatingly compounded by the amendment which has been adopted regarding sentencing of dangerous special drug offenders.

The provision dealing with the punishment of persons engaged in continuing criminal enterprises authorizes a mandatory minimum 10-year-to-life imprisonment sentence for an individual involved in a continuing series of violations committed in concert with five or more persons, from which he derives "substantial income or resources."

The additional views offered in the committee report (H. Rept. 91–1444) on H.R. 18583 very cogently point out the severe shortcomings of this provision. As the authors of these views—my distinguished colleagues from California (Mr. Moss), from Michigan (Dr. DINGELL), from Washington (Mr. ADAMS), and from Texas (Mr. ECKHARDT)—note:

> Suppose, for instance, that six young men attending a college reside together in a cooperative boarding house. All of them have engaged in the practice of smoking marihuana cigarettes and there has been, on a day or more, free exchange between them of such forbidden drug. Each incident of giving a cigarette to another constitutes a felony. How long must this practice continue in order to constitue a "continuing series of violations"? Would a single day's experiment with smoking "pot" constitute a "continuing series of violations," or would it require a week, a month, or a year of such activities to make the offenses "continuing"? . . .
>
> Suppose one of the young men is the house manager of the boarding house. As such he is in a general "supervisory position" or "other position of management" in the ordinary affairs of the House, but he has not ordinarily obtained any "income or resources" connected with the sale of marijuana. He has only been paid for his general house management. On one occasion he purchases $100 worth of marijuana and divides it with the other five members, selling it to them at cost. Has he then obtained "substantial income or resources" in connection with the enterprise?
>
> Or what if such common purchase by one of the group is done each week? Also, does "substantial income or resources" relate to profits or, on the other hand, to mere receipt of money? Would "income or resources" include the advantage to the house manager of obtaining his own share of the marihuana at a cheaper rate because it was bought in bulk?

The very serious defects of the continuing criminal enterprise provision of H.R. 18583 are not limited to these flaws, however. Again, as the distinguished authors of the additional views on this bill state:

> The very severe penalty of the continuing criminal enterprise section (a minimum of ten years and a maximum of life imprisonment) is applicable to a broad range of criminal activities, some of which are very mild and some of which are very serious, without discrimination.

Finally, the mandating of severe minimum penalties is self-defeating. One of the major phenomena of the last 5 years in the judicial process has been the effort to evade the imposition of stringent penalties for activities involving marihuana. Most courts, juries, and citizens recognize that the penalties are incommensurate with the evil being penalized. Yet this provision, by eradicating flexibility and requiring at the minimum a 10-year sentence of imprisonment, works entirely against this perception. It encourages the hypocrisy, born of sympathy and understanding, which undermines the prestige of our laws and of our courts.

H.R. 18583 also embodies a no-knock provision—a pernicious device which I have constantly opposed. A similar provision was contained in the District of Columbia Court Reform and Criminal Procedure Act of 1970—H.R. 16196—which was before this House last March. This provision permits arbitrary police action which endangers the privacy of every family's home, as well as actually imperiling the life of the entering policeman who may meet the resistance of a frightened householder believing himself endangered by invading strangers.

Finally, an amendment has been adopted to the Comprehensive Drug Abuse Prevention and Control Act of 1970 which, in authorizing so-called sentencing for dangerous special drug offenders, rides roughshod over due process in its eager rush to substitute revenge for reason. This provision is inexcusable; it adds the final touch of repression to a bill already very much tainted.

In light of my sincere desire to support a bill which effectively deals with the drug problem, and my very deep disappointment that this bill so definitely abuses the rights of every citizen, directly or indirectly, I feel that I cannot allow this amendment to go by without detailed comment.

The amendment authorizes a special sentence of up to 25 years for any person over 21 convicted of a violation of title III or title IV of this bill, who is also found by the judge to be a "dangerous special drug offender." To be so found,

the defendant need only fall within one of the three definitional phrases of the amendment and be deemed "dangerous." That is, a defendant is a special drug offender if:

(1) the defendant has previously been convicted in courts of the United States or a State or any political subdivision thereof for two or more offenses involving dealing in controlled substances, committed on occasions different from one another and different from such felonious violation, and punishable in such courts by death or imprisonment in excess of one year, for one or more of such convictions the defendant has been imprisoned prior to the commisison of such felonious violation, and less than five years have elapsed between the commission of such felonious violation and either the defendant's release, or parole or otherwise, from imprisonment for one such conviction or his commission of the last such previous offense or another offense involving dealing in controlled substances and punishable by death or imprisonment in excess of one year under applicable laws of the United States or a State or any political subdivision thereof; or

(2) the defendant committed such felonious violation as part of a pattern of dealing in controlled substances which was criminal under applicable laws of any jurisdiction, which constituted a substantial source of his income, and in which he manifested special skill or expertise; or

(3) such felonious violation was, or the defendant committed such felonious violation in furtherance of, a conspiracy with three or more other persons to engage in a pattern of dealing in controlled substances which was criminal under applicable laws of any jurisdiction, and the defendant did, or agreed that he would, initiate, organize, plan, finance, direct, manage, or supervise all or part of such conspiracy or dealing, or give or receive a bribe or use force in connection with such dealing.

The element of dangerousness is established by the judge's finding that "a period of confinement longer than that provided is required for the protection of the public from further criminal conduct by the defendant."

These hearings by the judge in what is disguised as a sentencing hearing are made by him after the defendant's conviction for the current crime. The amendment provides:

If it appears by a preponderance of the information, including information submitted during the trial of such felonious violation and the sentencing hearing and so much of the presentence report as the court relies upon, that the defendant is a dangerous special drug offender, the court shall sentence the defendant to imprisonment for an appropriate term not to exceed twenty-five years and not disproportionate in severity to the maximum term otherwise authorized by law for such felonious violation.

I will not stop to discuss the vagueness of the definitional language, which itself raises very serious constitutional questions.

Nor will I dwell on the constitutional defects arising from the language allowing that, in support of findings that the defendant engaged in a "pattern of dealing," "it may be shown that the defendant has had in his own name or under his control income or property not explained as derived from a source other than such dealing." Suffice it to say that this violates the fifth amendment privilege against self-incrimination by penalizing the defendant for refusing to testitfy (see, generally, *Marchetti* v. *United State,* 390 U.S. 39 (1968) as well as does it fail to meet the requisite nexus between unexplained income and the presumption that it must have come from an illegal source (see *Leary* v. *United States,* 395 U.S. 6 (1969)).

Nor will I more than note the standard offered by this amendment—"preponderance of the information"—a standard less than the "beyond a reasonable doubt" requirement at a trial, which, in the case of this egregious amendment, is a far less significant event than the post-trial hearing.

Nor will I more than condemn in passing the fact that the defendant at this hearing is not even accorded the right to cross-examine the sources of the information in the presentence report—the very information which may be the peg on which the judge hangs a 25-year sentence.

But let me be blunt and say that this amendment is a subterfuge designed to allow the Government to incarcerate defendants whom it cannot prove beyond a reasonable doubt have engaged in the past acts which will be taken into account in the hearing. This hearing, disguised as a procedure for sentencing, is in fact an unconstitutional trial on the issue of guilt, which need only be proved by a preponderance of the information, and which is divested of the rules of evidence which attend a trial.

Even if this were to be construed as merely a special sentencing provision, it would still require a higher standard of due process than the normal sentencing procedure. *Specht* v. *Patterson,* 386 U.S. 705 (1967). But it is, in reality, "the making of a new charge leading to criminal punishment." *Id.,* at 610. To the extent that the judge is determining whether the defendant committed certain acts, the inquiry cannot be distinguished in any way from the criminal charges which must be proved in a criminal trial—which is guarded by all the safeguards of due process.

I must mention also, the appeals provision of this amendment to H.R. 18583, for it is likewise severely defective. It enables the Government to both appeal the length of a dangerous special drug offender sentence, and the trial court's decision that a defendant is not a dangerous special drug offender.

I strongly support the recommendation of the advisory committee of the American Bar Association project on minimum standards for criminal justice that no appellate court should be empowered to set a harsher sentence than that imposed by the trial court. In effect, this procedure of allowing the Government to seek a harsher sentence penalizes the defendant. As the ABA advisory committee stated:

The existence of such a power could well have the effect of preventing the defendant from appealing even on the merits of his conviction. The ability to seek an increase could be a powerful club, the very existence of which—even assuming its good faith use—might induce a defendant to leave well enough alone. ABA Standards on Appellate Review of Sentences 57 (1967).

Moreover, allowing the Government to appeal a finding that the defendant is not a dangerous special drug offender contravenes the constitutional bar against double jeopardy. As I have explained, the so-called sentencing hearing is really a trial on the issue of guilt. The trial judge's finding that the defendant is not a dangerous special drug offender is in effect an acquittal. And it is clear that the double jeopardy clause prohibits the Government from appealing an acquittal. *Kepner* v. *United States,* 195 U.S. 100 (1904). *Cf., Green* v. *United States,* 355 U.S. 184 (1957).

I sincerely regret the gross defects of the Comprehensive Drug Abuse Prevention and Control Act of 1970, H.R. 18583. They fatally damage what would otherwise be a welcome and enlightened approach to the problem of drug use and abuse.

Mr. PRICE of Illinois. Mr. Chairman, I appreciate having this opportunity to speak in support of H.R. 18583. I am deeply concerned with the necessity for more effective legislation to combat the problem of drug abuse.

It is a complex and very serious problem. The widespread dependence on drugs is a fact that cannot be ignored. Drug traffic has become a big business in this country. Drug abuse has become a fad. There is no cause for delay. There must be a reformation of the control and prevention procedure in this area of legislation. In my opinion, the overall effect of this bill as reported from committee will produce this result.

To be effective, legislation must recognize that this is a two-pronged problem. There must be a competent handling of both the health-medical aspect as well as the legal enforcement aspect. I am quite pleased with the attempt of this bill to balance these aspects by giving the Secretary of Health, Education, and Welfare veto power for scientific and medical reasons yet retaining the control mechanism in the Justice Department. This defining of roles should result in a very effective means for controlling the use and quotas of all substances without overemphasizing one aspect.

The reformation of the treatment-rehabilitation provisions is also of great merit and long overdue. If the problem of drug addiction is to be adequately countered, all persons with drug-dependent problems and not only narcotic addicts should have the benefit of treatment at community health centers.

If there is to be any hope of combating drug abuse, legislation must embrace all areas of the problem. Viewed in toto, this bill is comprehensive—covering enforcement, prevention, research, and rehabilitation.

This concludes my statement. Again, I wish to reiterate my support of this bill and urge its adoption.

The CHAIRMAN. Under the rule, title III of the committee amendment in the nature of a substitute shall be considered as having been read for amendment. No amendments shall be in order to title III of said substitute except amendments offered by direction of the Committee on Ways and Means.

Title III is as follows:

## TITLE III—IMPORTATION AND EXPORTATION; AMENDMENTS AND REPEALS OF REVENUE LAWS

### SHORT TITLE

SEC. 1000. This title may be cited as the "Controlled Substances Import and Export Act".

### PART A—IMPORTATION AND EXPORTATION

### DEFINITIONS

SEC. 1001. (a) For purposes of this part—

(1) The term "import" means, with respect to any article, any bringing in or introduction of such article into any area (whether or not such bringing in or introduction constitutes an importation within the meaning of the tariff laws of the United States).

(2) The term "customs territory of the United States" has the meaning assigned to such term by general headnote 2 to the Tariff Schedules of the United States (19 U.S.C. 1202).

(b) Each term defined in section 102 of title II shall have the same meaning for purposes of this title as such term has for purposes of title II.

### IMPORTATION OF CONTROLLED SUBSTANCES

SEC. 1002. (a) It shall be unlawful to import into the customs territory of the United States from any place outside thereof (but within the United States), or to import into the United States from any place outside thereof, any controlled substance in schedule I or II of title II, or any narcotic drug in schedule III, IV, or V of title II, except that—

(1) such amounts of crude opium and coca leaves as the Attorney General finds to be necessary to provide for medical, scientific, or other legitimate purposes, and

(2) such amounts of any controlled substance in schedule I or II or any narcotic drug in schedule III, IV, or V that the Attorney General finds to be necessary to provide for the medical, scientific, or other legitimate needs of the United States—

(A) during an emergency in which domestic supplies of such substance or drug are found by the Attorney General to be inadequate, or

(B) in any case in which the Attorney General finds that competition among domestic manufacturers of the controlled substance is inadequate and will not be rendered adequate by the registration of additional manufacturers under section 303,

may be so imported under such regulations as the Attorney General shall prescribe. No crude opium may be so imported for the purpose of manufacturing heroin or smoking opium.

(b) It shall be unlawful to import into the customs territory of the United States from any place outside thereof (but within the United States), or to import into the United States from any place outside thereof, any nonnarcotic controlled substance in schedule III, IV, or V, unless such nonnarcotic controlled substance—

(1) is imported for medical, scientific, or other legitimate uses, and

(2) is imported pursuant to such notification or declaration requirements as the Attorney General may by regulation prescribe.

(c) In addition to the amount of coca leaves authorized to be imported into the United States under subsection (a), the Attorney General may permit the importation of additional amounts of coca leaves. All cocaine and ecgonine (and all salts, derivatives, and preparations from which cocaine or ecgonine may be synthesized or made) contained in such additional amounts of coca leaves imported under this subsection shall be destroyed under the supervision of an authorized representative of the Attorney General.

### EXPORTATION OF CONTROLLED SUBSTANCES

SEC. 1003. (a) It shall be unlawful to export from the United States any narcotic drug in schedule I, II, III, or IV unless—

(1) it is exported to a country which is a party to—

(A) the International Opium Convention of 1912 for the Suppression of the Abuses of Opium, Morphine, Cocaine, and Derivative Drugs, or to the International Opium Convention signed at Geneva on February 19, 1925; or

(B) the Convention for Limiting the Manufacture and Regulating the Distribution of Narcotic Drugs concluded at Geneva, July 13, 1931, as amended by the protocol signed at Lake Success on December 11, 1946, and the protocol bringing under international control drugs outside the scope of the convention of July 13, 1931, for limiting the manufacture and regulating the distribution of narcotic drugs (as amended by the protocol signed at Lake Success on December 11, 1946), signed at Paris, November 19, 1948; or

(C) the Single Convention on Narcotic Drugs, 1961, signed at New York, March 30, 1961;

(2) such country has instituted and maintains, in conformity with the conventions to which it is a party, a system for the control of imports of narcotic drugs which the Attorney General deems adequate;

(3) the narcotic drug is consigned to a holder of such permits or licenses as may be required under the laws of the country of import, and a permit or license to import such drug has been issued by the country of import;

(4) substantial evidence is furnished to the Attorney General by the exporter that (A) the narcotic drug is to be applied exclusively to medical or scientific uses within the country of import, and (B) there is an actual need for the narcotic drug for medical or scientific uses within such country; and

(5) a permit to export the narcotic drug in each instance has been issued by the Attorney General.

(b) Notwithstanding subsection (a), the Attorney General may authorize any narcotic drug (including crude opium and coca leaves) in schedule I, II, III, or IV to be exported from the United States to a country which is a party to any of the international instruments mentioned in subsection (a) if the particular drug is to be applied to a special scientific purpose in the country of destination and the authorities of such country will permit the importation of any particular drug for such purpose.

(c) It shall be unlawful to export from the United States any nonnarcotic controlled substance in schedule I or II unless—

(1) it is exported to a country which has instituted and maintains a system which the Attorney General deems adequate for the control of imports of such substances;

(2) the controlled substance is consigned to a holder of such permits or licenses as may be required under the laws of the country of import;

(3) substantial evidence is furnished to the Attorney General that (A) the controlled substance is to be applied exclusively to medical, scientific, or other legitimate uses within the country to which exported, (B) it will not be exported from such country, and (C) there is an actual need for the controlled substance for medical, scientific, or other legitimate uses within the country; and

(4) a permit to export the controlled substance in each instance has been issued by the Attorney General.

(d) Notwithstanding subsection (c), the Attorney General may authorize any nonnarcotic controlled substance in schedule I or II to be exported from the United States if the particular substance is to be applied to a special scientific purpose in the country of destination and the authorities of such country will permit the importation of the particular drug for such purpose.

(e) It shall be unlawful to export from the United States to any other country any nonnarcotic controlled substance in schedule III or IV or any controlled substance in schedule V unless—

(1) there is furnished (before export) to the Attorney General documentary proof that importation is not contrary to the laws or regulations of the country of destination;

(2) a special controlled substance invoice, in triplicate, accompanies the shipment setting forth such information as the Attorney General may prescribe to identify the parties to the shipment and the means of shipping, and

(3) two additional copies of the invoice are forwarded to the Attorney General before the controlled substance is exported from the United States.

### TRANSSHIPMENT AND IN-TRANSIT SHIPMENT OF CONTROLLED SUBSTANCES

SEC. 1004. Notwithstanding sections 1002, 1003, and 1007—

(1) A controlled substance in schedule I may—

(A) be imported into the United States for transshipment to another country, or

(B) be transferred or transshipped from one vessel, vehicle, or aircraft to another vessel, vehicle, or aircraft within the United States for immediate exportation.

if and only if it is so imported, transferred, or transshipped (i) for scientific, medical, or other legitimate purposes in the country of destination, and (ii) with the prior written approval of the Attorney General (which shall be granted or denied within 21 days of the request).

(2) A controlled substance in schedule II, III, or IV may be so imported, transferred, or transshipped if and only if advance notice is given to the Attorney General in accordance with regulations of the Attorney General.

### POSSESSION ON BOARD VESSELS, ETC., ARRIVING IN OR DEPARTING FROM UNITED STATES

SEC. 1005. It shall be unlawful for any person to bring or possess on board any vessel or aircraft, or on board any vehicle of a carrier, arriving in or departing from the United States or the customs territory of the United States, a controlled substance in schedule I or II or a narcotic drug in schedule III or IV, unless such substance or drug is a part of the cargo entered in the manifest or part of the official supplies of the vessel, aircraft, or vehicle.

### EXEMPTION AUTHORITY

SEC. 1006. (a) The Attorney General may by regulation exempt from sections 1002 (a) and (b), 1003, 1004, and 1005 any individual who has a controlled substance (except a substance in schedule I) in his possession for his personal medical use, or for administration to an animal accompanying him, if he lawfully obtained such substance and he makes such declaration (or gives such other notification) as the Attorney General may by regulation require.

(b) The Attorney General may by regulation except any compound, mixture, or preparation containing any depressant or stimulant substance listed in paragraph (a) or (b) of schedule III or in schedule IV or V from the application of all or any part of this title if (1) the compound, mixture, or preparation contains one or more active medicinal ingredients not having a depressant or stimulant effect on the central nervous system, and (2) such ingredients are included therein in

such combinations, quantity, proportion, or concentration as to vitiate the potential for abuse of the substances which do have a depressant or stimulant effect on the central nervous system.

PERSONS REQUIRED TO REGISTER

SEC. 1007. (a) No person may—

(1) import into the customs territory of the United States from any place outside thereof (but within the United States), or import into the United States from any place outside thereof, any controlled substance, or

(2) export from the United States any controlled substance in schedule I, II, III, or IV, unless there is in effect with respect to such person a registration issued by the Attorney General under section 1008, or unless such person is exempt from registration under subsection (b).

(b)(1) The following persons shall not be required to register under the provisions of this section and may lawfully possess a controlled substance:

(A) An agent or an employee of any importer or exporter registered under section 1008 if such agent or employee is acting in the usual course of his business or employment.

(B) A common or contract carrier or warehouseman, or an employee thereof, whose possession of any controlled substance is in the usual course of his business or employment.

(C) An ultimate user who possesses such substance for a purpose specified in section 102(25) and in conformity with an exemption granted under section 1006(a).

(2) The Attorney General may, by regulation, waive the requirement for registration of certain importers and exporters if he finds it consistent with the public health and safety; and may authorize any such importer or exporter to possess controlled substances for purposes of importation and exportation.

REGISTRATION REQUIREMENTS

SEC. 1008. (a) The Attorney General shall register an applicant to import or export a controlled substance in schedule I or II if he determines that such registration is consistent with the public interest and with United States obligations under international treaties, conventions, or protocols in effect on the effective date of this section. In determining the public interest, the factors enumerated in paragraph (1) through (6) of section 303(a) shall be considered.

(b) Registration granted under subsection (a) of this section shall not entitle a registrant to import or export controlled substances in schedule I or II other than those specified in the registration.

(c) The Attorney General shall register an applicant to import a controlled substance in schedule III, IV, or V or to export a controlled substance in schedule III or IV, unless he determines that the issuance of such registration is inconsistent with the public interest. In determining the public interest, the factors enumerated in paragraphs (1) through (6) of section 303(d) shall be considered.

(d) No registration shall be issued under this part for a period in excess of one year. Unless the regulations of the Attorney General otherwise provide, sections 302(f), 304, 305, and 307 shall apply to persons registered under this section to the same extent such sections apply to persons registered under section 303.

(e) The Attorney General is authorized to promulgate rules and regulations and to charge reasonable fees relating to the registration of importers and exporters of controlled substances under this section.

(f) Persons registered by the Attorney General under this section to import or export controlled substances may import or export (and, for the purpose of so importing or exporting, may possess) such substances to the extent authorized by their registration and in conformity with the other provisions of this title and title II.

(g) A separate registration shall be required at each principal place of business where the applicant imports or exports controlled substances.

(h) Except in emergency situations as described in section 1002(a)(2)(A), prior to issuing a registration under this section to a bulk manufacturer of a controlled substance in schedule I or II, and prior to issuing a regulation under section 1002(a) authorizing the importation of such a substance, the Attorney General shall give manufacturers holding registrations for the bulk manufacture of the substance an opportunity for a hearing.

MANUFACTURE OR DISTRIBUTION FOR PURPOSES OF UNLAWFUL IMPORTATION

SEC. 1009. It shall be unlawful for any person to manufacture or distribute a controlled substance in schedule I or II—

(1) intending that such substance be unlawfully imported into the United States; or

(2) knowing that such substance will be unlawfuly imported into the United States.

This section is intended to reach acts of manufacture or distribution committed outside the territorial jurisdiction of the United States. Any person who violates this section shall be tried in the United States district court at the point of entry where such person enters the United States, or in the United States District Court for the District of Columbia.

PROHIBITED ACTS A—PENALTIES

SEC. 1010. (a) Any person who—

(1) contrary to section 1002, 1003, or 1007, knowingly or intentionally imports or exports a controlled substance,

(2) contrary to section 1005, knowingly or intentionally brings or possesses on board a vessel, aircraft, or vehicle a controlled substance, or

(3) contrary to section 1009, manufactures or distributes a controlled substance,

shall be punished as provided in subsection (b).

(b)(1) In the case of a violation under subsection (a) with respect to a narcotic drug in schedule I or II, the person committing such violation shall be imprisoned not more than fifteen years or fined not more than $25,000, or both. If a sentence under this paragraph provides for imprisonment, the sentence shall include a special parole term of not less than three years in addition to such term of imprisonment.

(2) In the case of a violation under subsection (a) with respect to a controlled substance other than a narcotic drug in schedule I or II, the person committing such violation shall be imprisoned not more than five years, or be fined not more than $15,000, or both. If a sentence under this paragraph provides for imprisonment, the sentence shall, in addition to such term of imprisonment, include (A) a special parole term of not less than two years if such controlled substance is in schedule I, II, or III, or (B) a special parole term of not less than one year if such controlled substance is in schedule IV.

(c) A special parole term imposed under this section may be revoked if its terms and conditions are violated. In such circumstances the original term of imprisonment shall be increased by the period of the special parole term and the resulting new term of imprisonment shall not be diminished by the time which was spent on special parole. A person whose special parole term has been revoked may be required to serve all or part of the remainder of the new term of imprisonment. The special term provided for in this section is in addition to, and not in lieu of, any other parole provided for by law.

PROHIBITED ACTS B—PENALTIES

SEC. 1011. (a) Any person who violates section 1004 shall be subject to the following penalties:

(1) Except as provided in paragraph (2), any such person shall, with respect to any such violation, be subject to a civil penalty of not more than $25,000. Sections 402(c)(1) and (c)(3) shall apply to any civil penalty assessed under this paragraph.

(2) If such a violation is prosecuted by an information or indictment which alleges that the violation was committed knowingly or intentionally and the trier of fact specifically finds that the violation was so committed, such person shall be sentenced to imprisonment for not more than one year or a fine of not more than $25,000 or both.

SECOND OR SUBSEQUENT OFFENSES

SEC. 1012. (a) Any person convicted of any offense under this part is, if the offense is a second or subsequent offense, punishable by a term of imprisonment twice that otherwise authorized, by twice the fine otherwise authorized, or by both. If the conviction is for an offense punishable under section 1010(b), and if it is the offender's second or subsequent offense, the court shall impose, in addition to any term of imprisonment and fine, twice the special parole term otherwise authorized.

(b) For purposes of this section, a person shall be considered convicted of a second or subsequent offense if, prior to the commission of such offense, one or more prior convictions of him for a felony under any provision of this title or title II or other law of the United States relating to narcotic drugs, marihuana, or depressant or stimulant drugs, have become final.

(c) Section 409 shall apply with respect to any proceeding to sentence a person under this section.

ATTEMPT AND CONSPIRACY

SEC. 1013. Any person who attempts or conspires to commit any offense defined in this title is punishable by imprisonment or fine or both which may not exceed the maximum punishment prescribed for the offense, the commission of which was the object of the attempt or conspiracy.

ADDITIONAL PENALTIES

SEC. 1014. Any penalty imposed for violation of this title shall be in addition to, and not in lieu of, any civil or administrative penalty or sanction authorized by law.

APPLICABILITY OF PART E OF TITLE II

SEC. 1015. Part E of title II shall apply with respect to functions of the Attorney General (and officers and employees of the Bureau of Narcotics and Dangerous Drugs) under this title, to administrative and judicial proceedings under this title, and to violations of this title, to the same extent that such part applies to functions of the Attorney General (and such officers and employees) under title II, to such proceedings under title II, and to violations of title II. For purposes of the application of this section to section 510, any reference in such section 510 to "this title" shall be deemed to be a reference to title III, any reference to section 303 shall be deemed to be a reference to section 1008, and any reference to section 302(d) shall be deemed to be a reference to section 1007(b)(2).

AUTHORITY OF SECRETARY OF TREASURY

SEC. 1016. Nothing in this Act shall derogate from the authority of the Secretary of the Treasury under the customs and related laws.

PART B—AMENDMENTS AND REPEALS, TRANSITIONAL AND EFFECTIVE DATE PROVISIONS

REPEALS

SEC. 1101. (a) The following provisions of law are repealed:

(1) The Act of February 23, 1887 (21 U.S.C. 191–193).

(2) The Narcotic Drugs Import and Export Act (21 U.S.C. 171, 173, 174–184, 185).

(3) The Act of March 28, 1928 (31 U.S.C. 529a).

(4) Sections 2(b), 6, 7, and 8 of the Act of June 14, 1930 (21 U.S.C. 162(b), 173a, 197, 198).

(5) The Act of July 3, 1930 (21 U.S.C. 199).

(6) Section 6 of the Act of March 28, 1928 (31 U.S.C. 529g).

(7) The Opium Poppy Control Act of 1942 (21 U.S.C. 188–188n).

(8) Section 15 of the Act of August 1, 1956 (48 U.S.C. 1421m).

(9) The Act of July 11, 1941 (21 U.S.C. 184a).

(10) The Narcotics Manufacturing Act of 1960 (21 U.S.C. 501–517).

(b)(1)(A) Chapter 68 of title 18 of the United States Code (relating to narcotics) is repealed.

(B) The item relating to such chapter 68 in the analysis of part I of such title 18 is repealed.

(2)(A) Section 3616 of title 18 of the United States Code (relating to use of confiscated motor vehicles) is repealed.

(B) The item relating to such section 3616 in the analysis of chapter 229 of such title 18 is repealed.

(3)(A) Subchapter A of chapter 39 of the Internal Revenue Code of 1954 (relating to narcotic drugs and marihuana) is repealed.

(B) The table of subchapters of such chapter 39 is amended by striking out

"SUBCHAPTER A. *Narcotic drugs and marihuana.*"

(4)(A) Sections 7237 (relating to violation of laws relating to narcotic drugs and to marihuana) and 7238 (relating to violation of laws relating to opium for smoking) of the Internal Revenue Code of 1954 are repealed.

(B) The table of sections of part II of subchapter A of chapter 75 of the Internal Revenue Code of 1954 is amended by striking out the items relating to such sections 7237 and 7238.

(5)(A) Section 7491 of the Internal Revenue Code of 1954 (relating to burden of proof of exemptions in case of marihuana offenses) is repealed.

(B) The table of sections for subchapter E of chapter 76 of the Internal Revenue Code of 1954 is amended by striking out the item relating to such section 7491.

CONFORMING AMENDMENTS

SEC. 1102. (a) Section 4901(a) of the Internal Revenue Code of 1954 is amended by striking out the comma immediately before "4461" and inserting in lieu thereof "or", and by striking out ", 4721 (narcotic drugs), or 4751 (marihuana)".

(b) Section 4905(b)(1) of the Internal Revenue Code of 1954 (relating to registration) is amended by striking out ", narcotics, marihuana," and ", 4722, 4753,".

(c) Section 6808 of the Internal Revenue Code of 1954 (relating to special provisions relating to stamps) is amended by striking out paragraph (8).

(d) Section 7012 of the Internal Revenue Code of 1954 (relating to cross references) is amended by striking out subsections (a) and (b).

(e) Section 7103(d)(3) of the Internal Revenue Code of 1954 (relating to bonds required with respect to certain products) is amended by striking out subparagraph (D).

(f) Section 7326 of the Internal Revenue Code of 1954 (relating to disposal of forfeited or abandoned property in special cases) is amended by striking out subsection (b).

(g)(1) Section 7607 of the Internal Revenue Code of 1954 (relating to additional authority for Bureau of Narcotics and Bureau of Customs) is amended—

(A) by striking out "The Commissioner, Deputy Commissioner, Assistant to the Commissioner, and agents of the Bureau of Narcotics of the Department of the Treasury, and officers" and inserting in lieu thereof "Officers";

(B) by striking out in paragraph (2) "narcotic drugs (as defined in section 4731) or marihuana (as defined in section 4761)" and inserting in lieu thereof "narcotic drugs (as defined in section 102(16) of the Controlled Substances Act) or marihuana (as defined in section 102(15) of the Controlled Substances Act)"; and

(C) by striking out "BUREAU OF NARCOTICS AND" in the section heading.

(2) The item relating to section 7607 in the table of contents of subchapter A of chapter 78 of the Internal Revenue Code of 1954 is amended by striking out "Bureau of Narcotics and".

(h) Section 7609(a) of the Internal Revenue Code of 1954 (relating to cross references) is amended by striking out paragraphs (3) and (4).

(i) Section 7641 of the Internal Revenue Code of 1954 (relating to supervision of operations of certain manufacturers) is amended by striking out "opium suitable for smoking purposes,".

(j) Section 7651 of the Internal Revenue Code of 1954 (relating to administration and collection of taxes in possessions) is amended by striking out "and in sections 4705(b), 4735, and 4762 (relating to taxes on narcotic drugs and marihuana)".

(k) Section 7655(a) of the Internal Revenue Code of 1954 (relating to cross references) is amended by striking out paragraphs (3) and (4).

(l) Section 2901(a) of title 28 of the United States Code is amended by striking out "as defined by section 4731 of the Internal Revenue Code of 1954, as amended," and inserting in lieu thereof "as defined by section 102(16) of the Controlled Substances Act".

(m) The last sentence of the second paragraph of section 584 of the Act of June 17, 1930 (19 U.S.C. 1584), is amended to read as follows: "As used in this paragraph, the terms 'opiate' and 'marihuana' shall have the same meaning given those terms by sections 102(17) and 102(15), respectively, of the Controlled Substances Act."

(n)(1) The first section of the Act of August 7, 1939 (31 U.S.C. 529a), is repealed.

(2) Section 3 of such Act (31 U.S.C. 529d) is amended by striking out "or the Commissioner of Narcotics, as the case may be,".

(2) Section 4 of such Act (31 U.S.C. 529e) is amended by striking out "or narcotics" each place it appears.

(3) Section 5 of such Act (31 U.S.C. 529f) is amended by striking out "or narcotics" in the first sentence.

(o) Section 308(c)(2) of the Act of August 27, 1935 (40 U.S.C. 304m) is amended by striking out "Narcotic Drug Import and Export Act" and inserting in lieu thereof "Controlled Substances Act".

(p) Paragraph (a) of section 301 of the Narcotic Addict Rehabilitation Act of 1966 (42 U.S.C. 3411) is amended by striking out "as defined in section 4731 of the Internal Revenue Code of 1954, as amended," and inserting in lieu thereof "as defined in section 102(16) of the Controlled Substances Act".

(q) Paragraph (a) of the first section of the Act of July 15, 1954 (46 U.S.C. 239a) is amended to read as follows:

"(a) The term 'narcotic drug' shall have the meaning given that term by section 102 (16) of the Controlled Substances Act and shall also include marihuana as defined by section 102(15) of such Act."

(r) Paragraph (d) of section 7 of the Act of August 9, 1939 (49 U.S.C. 787) is amended to read as follows:

"(d) The term 'narcotic drug' shall have the meaning given that term by section 102 (16) of the Controlled Substances Act and shall also include marihuana as defined by section 102(15) of such Act;

(s) Paragraph (a) of section 4251 of title 18, United States Code, is amended by striking out "as defined in section 4731 of the Internal Revenue Code of 1954, as amended," and inserting in lieu thereof "as defined in section 102(16) of the Controlled Substances Act".

(t) The first section of the Act of August 11, 1955 (21 U.S.C. 198a), is amended to read as follows: "That for the purpose of any investigation which, in the opinion of the Secretary of the Treasury, is necessary and proper to the enforcement of section 545 of title 18 of the United States Code (relating to smuggling goods into the United States) with respect to any controlled substance (as defined in section 102 of the Controlled Substance Act), the Secretary of the Treasury may administer oaths and affirmations, subpena witnesses, compel their attendance, take evidence, and require the production of records (including books, papers, documents, and tangible things which constitute or contain evidence) relevant or material to the investigation. The attendance of witnesses and the production of records may be required from any place within the customs territory of the United States, except that a witness shall not be required to appear at any hearing distant more than 100 miles from the place where he was served with subpena. Witnesses summoned by the Secretary shall be paid the same fees and mileage that are paid witnesses in the courts of the United States. Oaths and affirmations may be made at any place subject to the jurisdiction of the United States."

PENDING PROCEEDINGS

SEC. 1103. (a) Prosecutions for any violation of law occurring prior to the effective date of section 1101 shall not be affected by the repeals or amendments made by such section or section 1102, or abated by reason thereof.

(b) Civil seizures or forfeitures and injunctive proceedings commenced prior to the effective date of section 1101 shall not be affected by the repeals or amendments made by such section or section 1102, or abated by reason thereof.

PROVISIONAL REGISTRATION

SEC. 1104. (a)(1) Any person—

(A) who is engaged in importing or exporting any controlled substance on the day before the effective date of section 302,

(B) who notifies the Attorney General that he is so engaged, and

(C) who is registered on such day under section 510 of the Federal Food, Drug, and Cosmetic Act or under section 4722 of the Internal Revenue Code of 1954,

shall, with respect to each establishment for which such registration is in effect under any such section, be deemed to have a provisional registration under section 1008 for the import or export (as the case may be) of controlled substances.

(2) During the period his provisional registration is in effect under this section, the registration number assigned such person under such section 510 or under such section 4722 (as the case may be) shall be his registration number for purposes of part A of this title.

(b) The provisions of section 304, relating to suspension and revocation of registration, shall apply to a provisional registration under this section.

(c) Unless sooner suspended or revoked

under subsection (b), a provisional registration of a person under subsection (a)(1) of this section shall be in effect until—

(1) the date on which such person has registered with the Attorney General under section 1008 or has had his registration denied under such section, or

(2) such date as may be prescribed by the Attorney General for registration of importers or exporters, as the case may be,

whichever occurs first.

EFFECTIVE DATES AND OTHER TRANSITIONAL PROVISIONS

SEC. 1105. (a) Except as otherwise provided in this section, this title shall become effective on the first day of the seventh calendar month that begins after the day immediately preceding the date of enactment.

(b) Sections 1000, 1001, 1006, 1013, 1103, 1104, and this section shall become effective upon enactment.

(c)(1) If the Attorney General, pursuant to the authority of section 704(c) of title II, postpones the effective date of section 306 (relating to manufacturing quotas) for any period beyond the date specified in section 704(a) and such postponement applies to narcotic drugs, the repeal of the Narcotics Manufacturing Act of 1960 by paragraph (10) of section 1101(a) of this title is hereby postponed for the same period, except that the postponement made by this paragraph shall not apply to the repeal of sections 4, 5, 13, 15, and 16 of that Act.

(2) Effective for any period of postponement, by paragraph (1) of this subsection, of the repeal of provisions of the Narcotics Manufacturing Act of 1960, that Act shall be applied subject to the following modifications:

(A) The term "narcotic drug" shall mean a narcotic drug as defined in section 102(16) of title II, and all references, in the Narcotics Manufacturing Act of 1960, to a narcotic drug as defined by section 4731 of the Internal Revenue Code of 1954 are amended to refer to a narcotic drug as defined by such section 102(16).

(B) On and after the date prescribed by the Attorney General pursuant to clause (2) of section 703(c) of title II, the requirements of a manufacturer's license with respect to a basic class of narcotic drug under the Narcotics Manufacturing Act of 1960, and of a registration under section 4722 of the Internal Revenue Code of 1954 as a prerequisite to issuance of such a license, shall be superseded by a requirement of actual registration (as distinguished from provisional registration) as a manufacturer of that class of drug under section 303(a) of title II.

(C) On and after the effective date of the repeal of such section 4722 by section 1101(b)(3) of this title, but prior to the date specified in subparagraph (B) of this paragraph, the requirement of registration under such section 4722 as a prerequisite of a manufacturer's license under the Narcotics Manufacturing Act of 1960 shall be superseded by a requirement of either (i) actual registration as a manufacturer under section 303 of title II or (ii) provisional registration (by virtue of a preexisting registration under such section 4722) under section 703 of title II.

(d) Any orders, rules, and regulations which have been promulgated under any law affected by this title and which are in effect on the day preceding enactment of this title shall continue in effect until modified, superseded, or repealed.

AMENDMENTS OFFERED BY MR. BOGGS

Mr. BOGGS. Mr. Chairman, on behalf of the Committee on Ways and Means, I offer several amendments and ask unanimous consent that they be read and considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

The Clerk read as follows:

Amendments offered by Mr. BOGGS: Page 230, line 22, insert "or section 1012" after "this section".

Page 231, line 5, insert "and in section 1012" after "this section".

Page 231, line 9, strike out "(a)".

Page 240, line 10, strike out "Substance" and insert in lieu thereof "Substances".

Page 241, line 14, strike out "302" and insert in lieu thereof "1007".

Page 242, line 24, strike out "1013" and insert in lieu thereof "1015, 1016".

Mr. BOGGS. Mr. Chairman, the purpose of these amendments is to correct several clerical errors in title III. Only the last amendment has any substantive effect. This last amendment provides that section 1013—relating to attempts and conspiracies—and section 1015—relating to the applicability of title II enforcement and administrative provisions—will take effect at the same time as the comparable provisions of title II. The amendment also provides that section 1016, which provides nothing in the bill which will derogate from the authority of the Secretary of the Treasury, will take effect on the enactment of the bill.

In other words, Mr. Chairman, these are perfecting amendments.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Louisiana (Mr. BOGGS).

The amendments were agreed to.

AMENDMENT OFFERED BY MR. BOGGS

Mr. BOGGS. Mr. Chairman, I offer one further amendment on behalf of the Committee on Ways and Means.

The Clerk read as follows:

Amendment offered by Mr. BOGGS: Page 232, line 15, strike out "409" and insert in lieu thereof "411".

Mr. BOGGS. Mr. Chairman, this, too, is a perfecting amendment. It is necessary in order to conform with the Poff amendment which was earlier adopted in the Committee of the Whole.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Louisiana (Mr. BOGGS).

The amendment was agreed to.

(Mr. STEED asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. STEED. Mr. Chairman, for many years I have been chairman of the Subcommittee of the House Appropriations Committee responsible for the Department of the Treasury and in that capacity I have become well acquainted with the manifold activities of the Bureau of Customs. I need not recount the splendid record of this most venerable of all our agencies, for its accomplishments are well known to all of you.

Last March, when Secretary Kennedy appeared before our subcommittee, a number of Members expressed serious concerns over the possibility that certain repealers in the Senate-passed version of the bill, which is now before you, would have the effect of stripping Customs of its investigatory jurisdiction in enforcing the laws against the unlawful importation of narcotics, marihuana, and other controlled dangerous substances.

The subcomittee's concerns were enhanced by the fact that only shortly before the March hearings; namely, in December 1969, your committee and Congress, following the recommendation of the President, approved the largest supplemental appropriation in the 180-year history of the Bureau of Customs. The sum of $8,750,000 was appropriated to enable that agency to mount a major effort against smuggling of marihuana and narcotics into the United States. The 915 additional positions requested were specifically approved and the committee urged the Department to move ahead on this crucial program as rapidly as practicable. If the concerns regarding the administration's bill were well founded, we were prepared to take necessary steps to rectify the situation.

I am pleased to report, however, that those concerns were unfounded and the provisions of this bill do not detract from the authority of the Secretary of the Treasury to enforce the law against the unlawful importation of narcotics, marihuana, and controlled substances. This is made celar by section 1016 which reads:

AUTHORITY OF SECRETARY OF TREASURY

SEC. 1016. Nothing in this Act shall derogate from the authority of the Secretary of the Treasury under the customs and related laws.

Thus, the authority of the Secretary of the Treasury to enforce the basic "smuggling" statute—18 United States Code 545—would continue unimpaired by any provision of this bill. The Treasury will continue to have statutory authority for law-enforcement efforts against smuggling.

(Mr. VANIK asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. VANIK. Mr. Chairman, in general, I support the provisions of H.R. 18583, the Comprehensive Drug Abuse Prevention and Control Act of 1970, which the House is considering for final passage today. This bill is a joint product of the hearings and deliberations of the Interstate and Foreign Commerce Committee and the Ways and Means Committee on which I serve.

I am particularly pleased that the bill authorizes $75 million to be spent over the next 3 years by community mental health centers and public health service hospitals and facilities for treatment, rehabilitation, and prevention of drug abuse. In addition, some $29 million would be authorized for drug abuse education and $60 million for special facilities for communities with certain percentages of addicts and drug-dependent persons.

It is absolutely vital that the thousands of persons who are dropping out of our society through drug use and abuse have a place where they can go to receive counseling and aid. It is probable that we need more methadone centers and methadone research run by specially trained medical personnel. It is certain that we need more mental and psychiatric aid centers which can help the addict and drug user understand the reasons which have caused him to drop out

of society, can help him come to grips with the inner forces which have made him rely on the illusions created by drug use.

But, Mr. Chairman, I question, I seriously question the adequacy of the rehabilitation services provided by this bill.

First, the narcotic and drug problem has grown to staggering dimensions. In New York City alone there are between 100,000 and 200,000 heroin addicts with only 7,000 in any kind of treatment center. The seriousness of the problem there can be seen by the fact that there are an average of three deaths per day by overdose. The problem is spreading. In the District of Columbia there are now three deaths per week from overdose. In my city of Cleveland one of the two major newspapers featured a story in which its reporters were easily and openly able to buy narcotics on the street. Heroin is everywhere and the pushers, the vultures of death, are relentless.

I have great concern about the language in this proposal as it relates to the right of "no-knock" entry where violation of the law is suspected. On a teller vote, I voted against the "no-knock" language because of my grave concern about its constitutionality and by concern that the provisions might be subject to possible abuse.

I had the same objections to the similar language in the District of Columbia crime bill which I had to support because of the other features of the legislation which provided for court reform, increased number of judges, and codification of the District of Columbia Criminal Code.

Although the "no-knock" language in this bill is an improvement over the language in the District of Columbia statute, as a former judge and as a lawyer, I find this provision of questionable constitutionality. It is my hope that there will be an early court test of this language so that the courts, the enforcement officers, and the citizen may be fully apprised as to the operation of this law.

I am, of course, happy that I was able to prevail on my colleagues in the Ways and Means Committee to include language in the trade bill of 1970 which will go to the root source of the hard drug problem. These provisions in section 346 of the trade bill give the President of the United States the power to exercise trade sanctions against any country which either produces opium or processes heroin into hard drugs for illicit use in the United States. If nations engaged in production and processing of hard drugs failed to provide adequate policing and control over the production and processing of hard drugs which tend to contaminate life in every sector in this country through illicit use, the penalty of trade sanctions or embargo is certainly justified.

My amendment to the trade bill, section 346, reads as follows:

SEC. 346. TRADE WITH FOREIGN COUNTRIES PERMITTING UNCONTROLLED PRODUCTION OF OR TRAFFICKING IN CERTAIN DRUGS

The President of the United States shall have the authority to impose an embargo or suspension of trade with a nation which permits the uncontrolled or unregulated production of or trafficking in opium, heroin, or other poppy derivatives in a manner to permit these drug items to fall into illicit commerce for ultimate disposition and use in this country.

Discussion in committee about this amendment, even before it was accepted, resulted in agreement by Turkey, where some 80 percent of the illegal heroin which enters this country comes from, to drastically tighten up its policing of the narcotics laws. In addition, the French Government has begun to take vigorous efforts against smugglers in southern France who bring the opium from Turkey into the Marseilles area and process it into heroin for shipment to New York and other American ports. As a result of these increased efforts on the part of these foreign governments, the Ways and Means Committee was able to include the following section in the report on the trade bill:

TRADE WITH FOREIGN COUNTRIES PERMITTING UNCONTROLLED PRODUCTION OF OR TRAFFICKING IN CERTAIN DRUGS

Under section 346 the President would be authorized to impose an embargo or suspension of trade with a nation which permits uncontrolled or unregulated production or trafficking in opium, heroin, or other poppy derivatives in a manner to permit these drug items to fall into illicit commerce for ultimate disposition and use in this country.

The committee is greatly concerned that certain countries which commercially produce poppies for pharmaceutical uses, have not adequately controlled, regulated or otherwise policed surplus poppy crops which eventually have fallen into illicit commerce in a derivative form for ultimate disposition and use in the United States.

The language in this provision is designed to give the President the authority to restrain trade with any nation which does not exhibit a willingness to control illegal production or trafficking in opium or heroin. The testimony of John E. Ingersoll, Director, Bureau of Narcotics and Dangerous Drugs, Department of Justice, established that the great preponderance of illicit heroin entering the U.S. results from diversion of Turkish produced opium and its processing into heroin in southern Europe and elsewhere in the Middle East.

We are pleased that on its own initiative, Turkey has set in train a series of actions aimed at minimizing, or eliminating, the harmful effects of Turkish opium in the world. The committee has been advised that by 1971 Turkey will have reduced to four (from 21 in 1967) the number of provinces where farmers may grow opium poppies, and that production will be limited to a more easily controlled area. The committee has also been advised that Turkey is making intensive efforts to keep its opium out of illicit channels, that the amounts should be substantially reduced this year, and that it is in the process of enacting legislation providing for better control.

It is noted that the French Government is also cooperating to bring a halt to the illicit processing and merchandizing of heroin on French territory which eventually finds its way into the United States, creating a drug-abuse problem which is controllable with this kind of cooperation from abroad. The best place to control the critical drug problem in the United States is at the source of supply.

If all the countries in the world continue to provide increased cooperation to end this flow of poison into the United States—and other Nations—it will mean a dramatic step forward in ending this deadly flow of narcotics.

Mr. DENNEY. Mr. Chairman, I want to take this opportunity to express my support of H.R. 18583, the Comprehensive Drug Abuse Prevention and Control Act of 1970. On the whole, it is a sound piece of legislation, which will substantially assist our law-enforcement agencies in their efforts to curb the growing drug menace in this country.

Briefly, the bill under consideration consists of three titles. The first two deal with rehabilitation activities and the registration of most legitimate distributors of controlled drugs.

Title III—the most controversial and perhaps most important section of this legislation—revises the entire structure of criminal penalties in this area by providing a consistent method of treatment for all persons accused of violations.

One of the most humane aspects of the title has to do with our children. Simple possession of drugs is made a misdemeanor, and there is a provision which would allow young people who are convicted just once of possessing a drug to remove that blot from their record later in life in order to make a new beginning.

Significantly, this legislation also attacks the source of the problem strongly. Anyone over 18 who is convicted of peddling drugs to a minor will face a first-offense punishment twice that which is otherwise prescribed.

And as for the so-called no-knock authority which is included in title III, I would only remind my colleagues that this is in no way a blank check to the police to break down anyone's door. Before entering a home without knocking, the law-enforcement officer must first obtain from a U.S. magistrate or a judge a special warrant on the grounds that, first, the drugs sought would be quickly destroyed if the policeman gave notice of his presence, or, second, the giving of notice would endanger the life of the officer involved.

This is a sensible, tightly drawn provision which in no way would usher in the wholesale attack on the individual's constitutional rights which some have predicted.

As I said at the outset of my remarks, H.R. 18583 is an even-handed, humane piece of legislation which will go a long way toward protecting society from the drug pusher and his allies. For once, the emphasis is not on the victim, but rather on the individual who commits the crime.

The CHAIRMAN. The question is on the committee amendment in the nature of a substitute, as amended.

The committee substitute amendment, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. MOORHEAD, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill (H.R. 18583) to amend the Public Health Service Act and other laws to provide increased research into, and prevention of, drug abuse and drug dependence; to provide for treatment and rehabili-

tation of drug abusers and drug dependent persons; and to strengthen existing law enforcement authority in the field of drug abuse, pursuant to House Resolution 1216, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the committee amendment in the nature of a substitute? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. CUNNINGHAM

Mr. CUNNINGHAM. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. CUNNINGHAM. I am, Mr. Speaker, in its present form.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. CUNNINGHAM moves to recommit the bill H.R. 18583 to the Committee on Interstate and Foreign Commerce.

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

Mr. SPRINGER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 341, nays 6, answered "present" 1, not voting 81, as follows:

So the bill was passed.

The Clerk announced the following pairs:

On this vote:

Mr. Lujan for, with Mr. Cunningham against.

Until further notice:

Mr. Addabbo with Mr. Adair.

Mr. Hébert with Mr. Gubser.

Mr. Edwards of Louisiana with Mr. Schneebeli.

Mr. Celler with Mr. Widnall.

Mr. Edmondson with Mr. Conte.

Mr. Brooks with Mr. Brown of Michigan.

Mr. Casey with Mr. Ashbrook.

Mr. Waggonner with Mr. Kleppe.

Mr. Mikva with Mr. Diggs.

Mr. Fallon with Mr. Hawkins.

Mr. Clark with Mr. Stokes.

Mr. Dorn with Mr. Burton of Utah.

Mr. Adams with Mr. Minshall.

Mr. Murphy of New York with Mr. Reifel.

Mr. Rees with Mr. Powell.

Mr. Yatron with Mr. Johnson of Pennsylvania.

Mr. Teague of Texas with Mr. Mailliard.

Mr. Hull with Mr. Roudebush.

Mr. Henderson with Mr. Blackburn.

Mr. Cabell with Mr. Cowger.

Mr. Daddario with Mr. Meskill.

Mr. Long of Louisiana with Mr. Lukens.

Mr. Moss with Mr. Wold.

Mr. Fisher with Mr. Brock.

Mr. Pike with Mr. Crane.

Mr. Sikes with Mr. Talcott.

Mr. Olsen with Mr. Bush.

Mr. Kluczynski with Mr. Mize.

Mr. Clark with Mr. Casey.

Mr. Culver with Mr. McCloskey.

Mr. Davis of Georgia with Mr. Whitehurst.

Mr. Mills with Mr. Devine.

Mr. McMillan with Mr. Foreman.

Mr. Patman with Mr. Mathias.

Mr. Ottinger with Mr. McKneally.

Mr. Landrum with Mr. Tunney.

Mr. Flynt with Mr. Symington.

Mrs. Griffiths with Mr. Farbstein.

Mrs. Hansen of Washington with Mr. Dowdy.

Mr. CUNNINGHAM. Mr. Speaker, I have a live pair with the gentleman from New Mexico (Mr. LUJAN). If he had been present, he would have voted "yea." I voted "nay." I withdraw my vote and vote "present."

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

---

## GENERAL LEAVE

Mr. JARMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous matter on H.R. 18583.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 17123, ARMED FORCES PROCUREMENT AND PERSONNEL STRENGTH OF RESERVES

Mr. RIVERS. Mr. Speaker, I ask unanimous consent that the Committee on Armed Services may have until midnight Saturday, September 26, to file a conference report on H.R. 17123, to authorize appropriations during the fiscal year 1971 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength of the Selected Reserve of each Reserve component of the Armed Forces, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

---

LEGISLATIVE PROGRAM

(Mr. GERALD R. FORD asked and was given permission to address the House for 1 minute.)

Mr. GERALD R. FORD. Mr. Speaker, I take this time to ask the distinguished majority leader the program for the balance of this week, if any, and the program for next week.

Mr. ALBERT. Mr. Speaker, will the gentleman yield?

Mr. GERALD R. FORD. I yield to the gentleman from Oklahoma.

Mr. ALBERT. Mr. Speaker, in response to the inquiry of the distinguished minority leader, we will have no further business for this week.

The program for next week is as follows:

Mr. Speaker, we are listing all the bills under the heading of Monday and balance of the week in order that we may pick up some if we quickly dispose of those listed first.

Monday is District day and there are no District bills.

Then we will have:

S. 2264, Communicable Disease Control Amendments of 1970, which is a conference report;

S. 3558, Public Broadcasting Financing Act of 1970, which is a conference report; and

S. 1933, Railroad Safety and Hazardous Materials Control, which is a conference report.

Mr. Speaker, there may be other conference reports from the Committee on Interstate and Foreign Commerce.

Also, we will have:

House Resolution 1209, to disapprove Reorganization Plan No. 3;

House Resolution 1210, to disapprove Reorganization Plan No. 4;

H.R. 17123, military procurement authorization, fiscal year 1971, which is a conference report, which will be considered on Tuesday;

H.R. 18185, Urban Mass Transportation Assistance Act of 1970, subject to a rule being granted;

H.R. 18679, to amend the Atomic Energy Act of 1954, which is subject to a rule being granted; and

H.R. 17538, high-speed ground transportation extension, which is subject to a rule being granted.

This announcement is made subject to the usual reservation that any other program may be announced at a later time and that other conference reports may be brought up at any time.

---

ADJOURNMENT OVER TO MONDAY, SEPTEMBER 28, 1970

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

Mr. GROSS. Mr. Speaker, reserving the right to object, I do so only to see if we can get some information as to when we might reach adjournment of some kind or another, either a recess or sine die adjournment?

Mr. ALBERT. The communication which we have had between this body and the other body has not resulted yet in a specific date. That is the best answer I can give the gentleman at this time. We will keep the Members informed officially and unofficially as best we can.

Mr. GROSS. I know; but it is a little hard to plan on getting away from here and getting out on the campaign trail.

Mr. ALBERT. I can assure the gentleman we will have some free time before election.

Mr. GROSS. Some free time?

Mr. ALBERT. Yes.

Mr. GROSS. A day or two?

Mr. ALBERT. More than a day or two.

Mr. GROSS. I thank the gentleman. Mr. Speaker, I withdraw my reservation.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

---

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that any business in order under the Calendar Wednesday rule may be dispensed with on Wednesday next.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

---

PERMISSION FOR COMMITTEE ON WAYS AND MEANS TO FILE REPORT ON H.R. 19444 UNTIL MIDNIGHT FRIDAY

Mr. ALBERT. Mr. Speaker, on behalf of the distinguished chairman of the Committee on Ways and Means, I ask unanimous consent that the Committee on Ways and Means may have until midnight Friday, September 25, 1970, to file a report on H.R. 19444, a bill to authorize for a temporary period the expenditure from the Airport and Airway Trust Fund of amounts for the training and salary and expenses of guards to accompany aircraft operated by U.S. air carriers, to raise revenue for such purpose, and to amend section 7275 of the Internal Revenue Code of 1954 with respect to airline tickets and advertising.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

---

NIX PROTESTS STONE MOUNTAIN STAMP

(Mr. NIX asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. NIX. Mr. Speaker, a resolution sent to me by Mr. Frank Sullivan, president of the Philadelphia Federation of Teachers, is of significant interest to me chiefly because the resolution opposes the printing and distribution of a Stone Mountain Memorial Commemorative Stamp.

I applaud this resolution because of the significance Stone Mountain, Ga., has to millions of Americans.

It has been the site of countless demonstrations by the Ku Klux Klan and other racists.

Such a commemorative stamp will do nothing to bind up the Nation's wounds in Lincoln's phrase, since we still suffer from the effects of the 100-year-old Civil War.

The romanticizing of bloody brotherly strife is not proper.

The resolution asks the U.S. postal system to end its plan to distribute these stamps and destroy the copies already printed.

I support that resolution.

I would like to add my own objections to the use of commemorative stamps to aid a political strategy.

It is not the business of the new Postal Service to serve as a springboard for political propaganda.

I believe that commemorative stamps and other Government projects should be used to bring us together, not drive us apart.

I have for 2 years recommended that a commemorative stamp be issued honoring Dr. Martin Luther King, a man who devoted his life to reuniting this Nation so that all of its citizens shared equally the rights and privileges of American citizenship. So far, I have received a letter of acknowledgment to my request and nothing else.

The administration of the present Postal Service is blind to its duty in this case and in others. Apparently even commemorative stamps are to be used to turn back the clock in America.

The aforementioned material follows:

PHILADELPHIA FEDERATION OF TEACHERS,
*Philadelphia, Pa., August 31, 1970.*

DEAR FELLOW CITIZEN: You will find, enclosed, a copy of a resolution adopted by the Philadelphia Federation of Teachers, August 27, 1970. We are asking for immediate action to prevent issuance of a United States Postage Stamp honoring the Confederate heroes portrayed in the memorial at Stone Mountain, Georgia (the site of the revival of the Klu Klux Klan in 1915).

We urge you to take appropriate steps in furtherance of the intent of this resolution.

September 19, 1970 has been announced as the stamp issuance date.

We would appreciate receiving a copy of any letter you send for this purpose.

Sincerely yours,

FRANK SULLIVAN,
*President.*

---

RESOLUTION ON THE STONE MOUNTAIN MEMORIAL POSTAGE STAMP

(Adopted August 27, 1970, by the Executive Board of the Philadelphia Federation of Teachers, on the recommendation of the Human Relations Committee.)

Whereas, the dream of Martin Luther King, "Let freedom ring from Stone Mountain," has not yet come true, and

Whereas, the Stone Mountain Memorial does honor to generals who fought against our government to prevent by force and violence the march of free labor against slavery in America, and

Whereas, Stone Mountain was the site at which the Ku Klux Klan was revived as an instrument of violent and constitutional repression of the freedom and rights of blacks, Catholic, Jewish and other minority citizens in 1915, and

Whereas, the United States Post Office has announced the forthcoming issuance of a postage stamp in honor of this infamous site, thereby educating the public to acceptance rather than abhorrence of the cause they espoused, and

Whereas, the issuance of this stamp implies the approval of the United States Government for their aims, to the humiliation of all freedom-loving, law abiding and more especially black citizens and to the further alienation of the youth of our nation who continue to believe in the ideals of liberty and justice for all, and

Whereas, the Philadelphia Federation of Teachers has traditionally upheld the cause of free labor and equal employment opportunities for all, now therefore be it

Resolved, that the Philadelphia Federation of Teachers condemn the use of the Stone Mountain Memorial on a United States postage stamp as an act dishonoring the memory of those who gave their lives that this nation might live as the land of the free, and be it further

Resolved, that we urge the cancellation of plans to introduce this stamp and the immediate destruction of all copies, and be it further

Resolved, that we recommend to the United States Post Office that it establish a permanent policy of honoring only those persons who have stood firm for liberty and justice for all, and be it further

Resolved, that we call upon all citizens and public officials of good will to join with us in support of such a policy, and be it finally

Resolved, that we communicate this resolution to all our members, to the members of the Board of Education of the School District of Philadelphia, to the Philadelphia AFL–CIO Council, to the Fellowship Commission, to the local branches of the NAACP, to the Urban League, to the Commission on Human Relations, the Mayor and Council of the City of Philadelphia, to the press and other news media of Philadelphia, to the Pennsylvania Equal Rights Council, to the Pennsylvania Human Relations Commission, to the State Representatives and Senators from Philadelphia, the Majority Leader Representative K. Leroy Irvis and the Governor of the Commonwealth of Pennsylvania, to our ten largest brother locals in the AFT, to the Director of the Civil Rights Department of the AFT, to the members of the Executive Council and the President of the AFT, to the Civil Rights Department of the AFL–CIO, to the U.S. Commission on Civil Rights, to the Representatives from Philadelphia and the Senators from Pennsylvania in the U.S. Congress, Representatives William Clay, William L. Dawson, John Conyers, Shirley Chisholm, Louis Stokes, Charles C. Diggs, Senator Edward W. Brooke, to the Postmaster-General, the Attorney-General, and the President of the United States, calling upon them to take action in furtherance of the provisions of this resolution.

---

## RUSSIA'S ACCOMPLISHMENTS WITH LUNA 16

(Mr. MILLER of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MILLER of California. Mr. Speaker, the world should take note of what the U.S.S.R. has accomplished with Luna 16, which has just returned to earth from a trip to the moon. We Americans should congratulate the U.S.S.R.—and indeed we have—for demonstrating that an automated, unmanned spacecraft can go up from earth, soft land on the moon, pick up samples of the soil, and return to the "blue planet" with its precious cargo. It is the first demonstration of a landing and takeoff from another celestial body without benefit of man's presence on the scene.

Scientists around the world are pleased that the Soviet spacecraft went to the Sea of Fertility to collect its samples. This complements the exploration of the Apollo astronauts and adds to man's knowledge of the moon. It is a great scientific achievement. The United States looks forward to sharing in the information which the Soviet capsule has returned to earth.

Despite this Soviet accomplishment with an unmanned spacecraft, we should reflect on the advantages to manned exploration of the moon. Man can make a free choice between samples to be returned to earth and, of significant scientific importance, he can document the samples as they are collected. He can deploy scientific instruments which, after his return to earth, can continue to produce valuable information about the moon to supplement the knowledge which can be gained from returned lunar samples.

The enhanced capability of a roving vehicle, which will be used on the later Apollo missions, will greatly increase the mobility of the astronauts and thus the scientific return from these missions. Despite the marvels of what can be done with an automated spacecraft, man is and will continue to be a better sensing device than any instrument we can put together. His unique decisionmaking ability, on the spot, is essential to our answering the first-order scientific questions on the Earth-Moon relationship and hopefully on the nature of the universe.

I regret that NASA was forced to cancel two of its remaining lunar missions, but I understand the reasons which led to this hard decision. We do have four remaining missions and the scientific data from these missions, together with the vast amount of knowledge we have already gained in the past Apollo flights, will give scientists the world over a deep insight into the nature of man's environment—the universe.

Mr. Speaker, the Russian accomplishment serves to focus attention on the direction of their goals in space exploration. They have indicated that for the present they will place emphasis in their manned program on earth orbital space stations. This is very much in accord with our own plans. The beginning of a space station—Project Skylab—will be launched in 1972. We contemplate proceeding from there in orderly fashion to the space shuttle and space station. We and the Russians alike understand the significant purposes that men can achieve in earth orbit. In my view, the United States must keep up with the Soviet Union in the utilization of men in earth orbit. NASA is requesting a minimum budget to proceed in this direction. We must continue to demonstrate our preeminence in space. Luna 16 shows clearly that the U.S.S.R. is not abandoning, or even chipping away, at its space program. We should do no less.

---

## TO AUTHORIZE THE PROCUREMENT OF A BUST OR STATUE OF THE LATE REVEREND MARTIN LUTHER KING, JR.

(Mr. BINGHAM asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BINGHAM. Mr. Speaker, I am introducing today a concurrent resolution to authorize the procurement of a bust or statue of the Reverend Martin Luther King, Jr., to be placed in a suitable location in the Capitol in recognition of his outstanding contribution to America and to all mankind.

Martin Luther King, Jr., focused national attention on the reality of injustice in America. He dedicated his life to the struggle of providing equal justice to all Americans, black and white. He believed that nonviolence would prove to be the only effective means to abolish injustices in our society. In opening a new era in the struggle for freedom he spoke out strongly against poverty, discrimination, and hatred, and his leadership was a major force behind the historic enactment of the Voting Rights Act of 1965 and the Civil Rights Acts of 1964 and 1968. From the fateful days in Montgomery in 1955 when he organized a year-long bus boycott, Martin Luther King dedicated himself to bring about a new American commitment to righting the inhuman humiliations and sufferings which plague millions of Americans. He believed in America and he believed that it could one day be a place where all would be free, where the color of one's skin need not engender prejudice, bigotry, or hate; he envisioned a strong nation, yet one at peace with all people of the world. His philosophy was constructive, his methods nonviolent.

As a result of his noble ideals and inspiring leadership he enriched the lives of millions and gave fresh hope to those threatened by hopelessness. He achieved the esteem of people throughout the world, and in 1964 he received the Nobel Peace Prize. As a result of his struggle, he was imprisoned countless times. He

was misunderstood, hated, vilified, stoned, and beaten; yet he continued to fight for what he believed this great Nation of ours should symbolize. Sorrowfully, it was not until after his death that many became aware of the true goodness, devotion to cause, and patriotism of this man who once lived among us.

Today his picture hangs in millions of homes throughout the country. But no such portrait memorializes him in the Capitol. In fact, although many great black Americans have made important contributions to America, not a single black American has been remembered and honored by a painting or statue in the Capitol.

On the House side of the Capitol, each State is allowed two statues of its favorite citizens, but no State has seen fit so to honor a black American. None of the artwork in the Capitol depicts any of our accomplished black Americans.

Martin Luther King's contribution to America is surely beyond question. His goals, his ideals, his aspirations are ones which we should all continue to embrace; his struggle must be carried on until his dreams, the dreams of all men, become a reality. This will be the way to render true honor to this great American. The placing of a bust or statue of Martin Luther King, Jr., in the Capitol would serve simply as a symbol of America's esteem for him and as a reminder to future Americans, who will not remember him as we do, of his contribution to mankind.

I urge other Members of the Congress to join me in support of this legislation.

## ILLICIT TRAFFIC IN DANGEROUS DRUGS

(Mr. CHARLES H. WILSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CHARLES H. WILSON. Mr. Speaker, last year the Los Angeles Police Department seized 275,877 amphetamine tablets and 309,531 barbiturate capsules. These seizures represent only a fraction of the illicit traffic in dangerous drugs that goes on today.

Last November, the Select Committee on Crime under the chairmanship of my distinguished colleague from Florida (Mr. PEPPER) printed testimony entitled "Crime in America—Why 8 Billion Amphetamines?" At that time Dr. Sidney Cohen, Director of the Division of Narcotic Addiction and Drug Abuse of the National Institute of Mental Health stated that there were 8 to 10 billion amphetamines produced in the United States yearly. Dr. Cohen also stated that legitimate medical needs would amount to figures in the thousands, not the billions. While authorities may be split on the amount of pills needed, they all agree that a disgusting proportion of those manufactured by legitimate pharmaceutical firms wind up in the illicit drug traffic trade.

Recently the Southern California Pharmaceutical Association—SCPA—passed a resolution urging that the U.S. Congress take steps to halt current abuses in the mail order drug trade. They called my attention to the ease with which unauthorized individuals can obtain massive quantities of restricted drugs by mail. The ease with which dangerous drugs can be obtained is frightening. As far back as 1962, the Food and Drug Administration determined that over 100,000 pounds of amphetamine and methamphetamine products were available in the United States. The amount in this 1-year inventory is enough to supply 250 milligrams of these stimulants or 25 to 50 doses to every person in this country.

These drugs are prescribed for a few valid medical reasons; that is, to control narcolepsy and to control certain hyperkinetic disorders of children. They may have some use in treating mild depressions, and to help these people who have taken overdoses of barbiturates or alcohol. Too often the drug is used to control appetite but is not really effective.

For narcolepsy treatment and for the treatment of children with hyperkinetic disorders there is no argument, but with the others in susceptible people the dangers are too great because it can induce psychic dependence and tolerance.

Amphetamine drugs are inexpensive, simple to manufacture, and patent rights on the basic drugs, d- and dl-amphetamine have long since expired. For this reason, most drug houses realize profits of less than one-tenth of 1 cent a tablet on the sales of these drugs. Because of this small profit margin companies simply cannot afford to scrutinize their sales.

Some companies do hold patents on amphetamine-like drugs and advertise them as superior to amphetamines. There is little scientific evidence that this is so. However, their position allows them to market these drugs at a considerably higher price than generic brands of d-amphetamine. These companies do not want their drugs to acquire the reputation for abuse. Nevertheless, most advertise their product as a weight control item. This is where the money is.

Another marketing technique is to heavily advertise a brand name. Once this name is well recognized it will be widely prescribed and can be sold for several times the cost of its generic equivalent. In reality, these drugs can be nothing more than warmed-over items from the 1930's.

Another practice is to sell a tablet which contains an amphetamine plus some other drug, usually a barbiturate or a minor tranquilizer. The rationale offered by the company is that the drugs tend to neutralize one another. Evidence obtained from addicts and from laboratory studies indicates that these combinations are much more attractive and, therefore more addictive. It has been shown that addicts offered amphetamine alone—without barbiturates and/or alcohol—find the amphetamines quite unpleasant in large doses.

Unfortunately, most pharmaceutical firms, especially those who specialize in the mail-order trade, have been almost criminal in neglecting their duty to screen those who order dangerous drugs. The Bureau of Narcotic and Dangerous Drugs in the Department of Justice informed me that while those who illegally order drugs can be prosecuted, the firms that calculatingly fill those orders are not so clearly accountable. In reality, this is a gray area of the law with penalties and restrictions unclear. The Bureau is, however, doing all within its power to combat the problem. While it needs both increased funding and manpower, as do the concerned HEW agencies, it is conducting accountability investigations and has embarked upon instituting a voluntary compliance program. Even so, the problem still remains overwhelming.

While it must be recognized that mail-order prescriptions should not be forbidden since many senior citizens and shut-ins order their prescriptions by mail and report being charged as little as one-third to one-half of what the corner drugstore charges, some improved method of control is needed to cut down on abuses.

The Southern California Pharmaceutical Association has pointed out numerous blatant violations of the law that occur daily in this area. A perfect example is the case of a California customer who signed his name to a mail-order form, wrote "Dr." in front of it, and mailed it off with a money order requesting 1,000 amphetamines and 1,000 barbiturates. A few days later he received in the mail all 2,000 tablets. The customer turned out to be a 10-year-old boy.

Even more frightening is the fact that it is reported that youngsters as young as that are getting into the drug culture by popping such pills. Some even get started at school during lunch break. Apparently it has become a game for fifth and sixth graders to raid their parents' medicine chests and grab some pills from it. Then they bring these pills to school with them. At lunchtime, they gather in a group and each child contributes the pills he has brought from home into a central pot. The pills are mixed, and then grab-bag style, each youngster picks out one or two and swallows. Results: sometimes immediate disaster, always long-range trouble. Parents who presently are worrying whether their children smoke marihuana or not, had better check their medicine chests and mailboxes. Danger lurks there as well.

For these reasons, I am supporting the amendment offered today by the gentleman from Florida (Mr. PEPPER) and other members of the Select Committee on Crime. In addition to the sad state of affairs I have already outlined, the committee reports that in their estimation over 50 percent of legally manufactured amphetamines are diverted into illegal channels. Since voluntary compliance to quotas is not working, enactment of the amendment offered is needed. There is just no excuse for production of billions of amphetamines when the legitimate need for them runs only in the hundreds of thousands. Amphetamines used for weight problems, on the average, result in a loss of only 6 pounds before becoming ineffective in combating that problem. In addition, fortunately, the number of persons suffering from narcolepsy and children suffering from hyperkinetic conditions is minuscule. Consequently, an end must be put to production of such large quantities of amphet-

amines, most of which are abused. Accordingly, I urge my colleagues to support the amendment before us.

## POSITIVE ACTION TO STOP CAMPUS RIOTS AND DESTRUCTION

(Mr. FOREMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. FOREMAN. Mr. Speaker, it is time to bring the riotous behavior of small student minorities to an end. Necessary means should be taken to require that the individuals on campus who destroy and burn property in the name of "peaceful demonstrations," who throw rocks, break and smash furniture and equipment, and totally disrupt a whole university pay for the havoc they have created. It is time to levy a charge against every single one of them for the total cost of the destruction for which they are responsible.

I have been shocked, as I believe has the vast majority of Americans, at the magnitude of recent campus disorders—disorders in which small groups of dissident students have taken over control of a campus—halted classes, and generally wrecked everything they could reach. In too many of these campus riots, the administration and faculty have been hesitant to act. Not only have they failed to take immediate and positive action to halt these destructive demonstrations but in some cases openly sympathized with unruly protesters.

If officials of a university or college are unable to maintain order, or restore order when a disturbance begins, and are also reluctant to call for assistance—it is time to give these reluctant administrators an incentive to act.

As an added measure to bring peace to the campus scene, and to assure that future demonstrations on campus by sincere young people who are capable of self-discipline and respect for the rights of others can be carried out without the disruptive acts of those intent upon violence, individuals who have participated in violent acts should be banned from the universities permanently or for a sufficient period to prevent any recurrence of violence at their hands.

Most of the universities and colleges in the United States are receiving financial support from the Federal Government. Because of the expenditure of Federal funds at these schools, the Congress has the right and obligation to take appropriate action to protect the Federal investment in higher education for our young people. The vast majority of students attend college to learn and to prepare for the careers they will pursue upon graduation. These young people have the right to receive their education without disruption by rioting and violence.

Also, in this discussion about campus violence, it is important that we keep the campus disruptions and student violence in the proper perspective. Out of some 2,400 colleges and universities in this country, only about 400 of them experienced disruption and/or suspension of the academic program during the recent student unrest. And reliable research on the situation reveals that less than 10 percent of the students were involved in the campus disorders at the 400 affected institutions. Therefore, only 10 percent of one-sixth, or one-sixtieth—less than 2 percent are creating 100 percent of the havoc and doing a grave disservice to the reputation of the overwhelming majority of our fine, respectable young Americans of today.

The hope for order in our society goes far beyond the intelligent use of restraint in keeping the peace; it draws upon the natural revulsion to violence on the part of the American people, which is making itself felt now within every group and each generation.

I am introducing today three bills proposing positive action to bring campus violence to a halt at those universities and colleges which are receiving financial assistance from the Federal Government.

The first of these bills will levy a legal liability against those who destroy to pay the bill for the damage, not the harassed taxpayer, not the student who has no part in the violence, but those students, and any others, who actively take part in the destructive activities.

The second bill will ban, from colleges and universities receiving Federal financial assistance, students who have taken part in destruction of property for a specified period.

The third bill will withhold Federal funds, equal to any damage resulting from campus disorders and violence, from any college or university receiving such funds where the administration cannot maintain or restore order, and fails to call for assistance when it becomes apparent this action is necessary if order is to be restored and further destruction of property avoided.

These proposals may not be the whole answer to campus violence. But they certainly are a start in the right direction. The sooner we stop tolerating violent troublemakers on the campus the sooner we will restore order and thereby prevent further destruction and the tragic loss of life.

The bills follow:

H.R. 19457

A bill to establish liability of persons engaging in destruction of property at educational institutions

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That, any person or persons who shall willfully engage in the wanton destruction and/or unauthorized defacement of the property, real or personal, of any educational institution receiving federal financial support, or of any federally owned installation or agency, or any person or persons who actively assist in or incite others to such destruction or unauthorized defacement of said property, shall be held, individually and collectively liable and responsible for the total cost of replacement, restoration, and/or repair of said property.

H.R. 19456

A bill to provide a period of suspension, from attendance at any institution of higher education receiving federal funds, of students who engage in destruction of property during campus disorders

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That, any student, graduate or undergraduate, of an institution of higher learning which receives federal funds, who willfully engages in the destruction of property upon the campus of said institution, and/or unauthorized defacement of such property, or who actively assists in, or incites others to such destructive activities, shall be barred from attendance at any institution of higher learning which is the recipient of federal funds for a period of no less than one year from the date of said act.

At the termination of this period, an individual so banned may apply for admission to said institutions of higher learning at which time the appropriate admission authority shall determine eligibility for admission folowng a review of applicant's conduct during that period as a factor in determining eligibility for admission.

H.R. 19455

A bill to require administration officials of institutions of higher education receiving federal funds to maintain order on campus

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That, upon the outbreak of violence and disorder on the campus of any institution of higher education receiving any federal funds, accompanied by destruction or unauthorized defacement of property, real or personal, administrative officials of the institution shall immediately restore order.

If administrative and security personnel of the institution are inadequate for this purpose, the appropriate authority shall request local, state, and/or federal assistance.

Any institution of higher education failing to make such request will forfeit federal funds which otherwise would be available to said institution in an amount equal to the damage to property real and/or personal, on the campus resulting from said disorder.

## PRISONERS OF WAR

(Mr. RIVERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. RIVERS. Mr. Speaker, on Tuesday, September 22, the Congress gave recognition to a very important and difficult problem. At that time the two Houses met in a joint meeting to hear Col. Frank Borman, special representative to the President on prisoners of war. Seated on the floor of the Chamber during that joint meeting were nine American servicemen who have served their country most honorably and have, in my opinion, fully met General MacArthur's definition of the American soldier as related by Colonel Borman. Those nine men were former prisoners of war in Southeast Asia.

I feel it also appropriate to point out that there were present in the gallery more than 100 wives and parents of men who are missing in action or held prisoner in Southeast Asia. Some of those families traveled from such far places as Dayton, Ohio; Syracuse, N.Y.; and Tampa, Fla., to attend the meeting. I am sure many other wives would have been in attendance had it been possible to make arrangements to be away from their home and children.

The Members may know that the National League of Families was responsible for winning approval of the leadership for this unique meeting. They met for the first time with the Speaker on

July 10 and subsequently with Senators MANSFIELD and SCOTT, and with Representatives ALBERT, FORD, ARENDS, and BOGGS, among others. And I might add the ladies called on me to enlist my support, which I wholeheartedly gave them.

Although the families' presence in the gallery and the former prisoners' presence on the floor was known to all of us assembled in this Chamber on September 22, through an oversight the men were not introduced and the names were not read into the RECORD. Among them were such outstanding examples of American manhood as Navy Lt. Bob Frishman who was shot down over North Vietnam, held almost 2 years under horrifying conditions of imprisonment, and was released in August 1969; and Air Force Lt. Col. Norris Overly shot down over North Vietnam in 1967 and released the following year. Another was Army Maj. Nick Rowe who was a prisoner of the Vietcong for 5 years prior to his escape under the most harrowing circumstances.

By way of interpolation, he never would have escaped, and he would have been killed, but for a B–52 raid which accidentally killed his captor; and he was freed.

Mr. Speaker, I ask unanimous consent to place the names of these men in the RECORD, to indeed let them know how much we appreciate their service to their country and what they are doing for this great country.

I would like at this time to place into the RECORD a brief statement about each of these men who have served, and indeed continue to serve, their country so honorably.

The statements follow:

BIOGRAPHICAL STATEMENTS

LT. COL. NORRIS M. OVERLY

Lt. Col. Norris M. Overly was born on November 3, 1929 and is a native of Wheeling, West Virginia. He is currently a student at the National War College. He entered the Air Force in June 1952 and was commissioned upon graduation from the Aviation Cadet Program. The majority of his Air Force career was in the Strategic Air Command as Aircraft Commander on B–47 and KC–135 aircraft. In Southeast Asia, Col. Overly was assigned to Phan Rang Air Base, South Vietnam where he flew B–57 fighter bomber aircraft. He was shot down on September 11, 1967 in North Vietnam, near Dong Hoi, while on a night road reconnaissance mission. He was subsequently captured and interned. He was released by the North Vietnamese in February 1968 and until the time of his release was officially listed as Missing in Action.

MAJ. JAMES F. LOW

Major James F. Low was born on September 10, 1925, in Mill Valley, California. He attended the University of California, receiving a B.S. degree in 1953. Entering the Air Force in December 1951, Major Low served in a number of Air Force assignments until his assignment to Southeast Asia on October 26, 1967. In Southeast Asia Major Low was assigned to the 555 Tactical Fighter Squadron, 8 Tactical Fighter Wing, Ubon Royal Thai Air Force Base, Thailand. On December 16, 1967, while flying a combat mission over North Vietnam, Major Low's F–4C aircraft was observed to receive a direct hit from intense hostile fire during egress from the target area. After a large explosion the aircraft was seen to go into a descending spin and crash. Major Low successfully ejected and was subsequently captured and interned by the North Vietnamese. He was released by the North Vietnamese on August 1968.

MAJ. JOE V. CARPENTER

Major Joe V. Carpenter was born on February 24, 1931, in Sadis, Kentucky. He attended the University of Kentucky, receiving a B.S. degree in 1954. Entering the Air Force in June 1954, he served in a number of Air Force assignments until his assignment to Southeast Asia on June 7, 1967. In Southeast Asia Major Carpenter was assigned to the 389 Tactical Fighter Squadron, 366 Tactical Fighter Wing, Da Nang Air Base, South Vietnam. On February 15, 1968, while flying a combat mission in North Vietnam, Major Carpenter's F–4D aircraft was downed by hostile fire. Major Carpenter was subsequently captured and interned by the North Vietnamese. He was released by the North Vietnamese in August 1968.

MAJ. JON D. BLACK

Major Jon D. Black was born on March 23, 1937 and is a native of Johnson City, Tennessee. He graduated from the U.S. Air Force Academy in June 1959 with a Bachelor of Science Degree. In Southeast Asia, Major Black was assigned to the 8th Tactical Fighter Wing and flew F–4C aircraft. He was shot down over North Vietnam on October 27, 1967 while on an operational mission as number two in a flight of four F–4Cs. His aircraft was struck in the engine area by hostile anti-aircraft fire causing it to begin burning rapidly. He successfully ejected and was subsequently captured and interned. He was released by the North Vietnamese in February 1968.

LT. ROBERT E. FRISHMAN, USNR

Born on 18 December 1940 in Long Beach, California. His parents, Mr. and Mrs. Harry Frishman still reside there. After graduating from Long Beach City College, he attended the University of California Dental School and San Francisco State College. On 24 August 1963 in Burlingame, California he was married to the former Janet Lynn Nelson. He enlisted in the Naval Reserve in October 1963, was commissioned an Ensign in June, 1964, and was designated a naval aviator in October 1965. Lt. Frishman reported to Fighter Squadron 151 in May 1966 and was captured when his aircraft was shot down while on a combat mission over North Vietnam in August 1969 and is presently residing with his wife in La Jolla, California, while undergoing treatment at the Naval Hospital, San Diego, California. He has been awarded the Distinguished Flying Cross, Air Medal, Navy Commendation Medal, Purple Heart and the Navy Unit Commendation Medal.

LT. DAVID P. MATHENY, USNR

Born on 24 January 1944 in South Bend, Indiana. His family moved to Bakersfield, California when he graduated from East Bakersfield High School. He attended Bakersfield College. He enlisted in the Naval Aviator Cadet Program in 1965 and was designated a Naval Aviator and commissioned an Ensign in August 1966. Lt. Matheny reported to Fighter Squadron III on April 1967 and was captured when his aircraft was shot down while on a combat mission over North Vietnam on 5 October 1967. He was released by the North Vietnamese on 16 February 1968. He is presently residing with his wife in Pensacola, Florida where he is assigned to duty. He has been awarded the Air Medal and the Navy Commendation Medal, the Purple Heart.

MAJ. JAMES NICHOLAS ROWE

Born in McAllen, Texas, on 8 February 1938. Graduate of the West Point Military Academy, Class of 1960. Entered active service on 8 June 1960. Major Rowe, then a first lieutenant, was reported missing in action on 29 October 1963 while manning a permanent outpost which was overrun by a hostile force. At the time, he was serving with Detachment A–23, 5th Special Forces Group. On 13 November 1967, his status was changed from missing in action to captured based on information received from three Army returnees who had been released by the Viet Cong. Major Rowe subsequently escaped from capture and returned to military control on 31 December 1968. Currently, he is en route to Ft. Holabird, Maryland where he will attend the career course of the United States Army Intelligence School.

M. SGT. DANIEL LEE PITZER

Born in Fairview, West Virginia on 23 November 1930. Entered military service at Ft. Benning, Georgia on 22 August 1957. MSG Pitzer, then a Sergeant First Class, was reported missing in action on 29 October 1963 while manning a permanent outpost which was overrun by a hostile force. At the time, he was assigned to Detachment A–23, 5th Special Forces Group. Information that he was captured was not known until the Viet Cong announced his pending release. He was released by the Viet Cong and returned to military control on 13 November 1967. Currently, MSG Pitzer is assigned to the 6th Special Forces Group, Ft. Bragg, North Carolina.

S. SGT. KENNETH RAY GREGORY

Born in Mangum, Oklahoma on 1 May 1946. Entered military service on 18 May 1964. SSG Gregory, then a sergeant, was reported missing in action on 24 August 1968 as a result of a hostile force attacking a vehicle in which he was a passenger. Information that he was captured was received in a Missing Board of Inquiry Report which included intelligence source information indicating that he was seen in the hands of the Viet Cong. SSG Gregory escaped from the Viet Cong and returned to military control on 30 May 1969. He is currently assigned to the 2d Battalion, 10th Infantry, Ft. Carson, Colorado.

Mr. FULTON of Pennsylvania. Mr. Speaker, will the gentleman yield?

Mr. RIVERS. I am delighted to yield to the gentleman from Pennsylvania.

Mr. FULTON of Pennsylvania. I should like to compliment the gentleman on his excellent statement, and I am glad that the names of these U.S. former prisoners of war have been put in the RECORD.

As a U.S. Congressman and former U.S. Navy serviceman with Pacific duty, I have had sustained and deep interest in the plight of our U.S. prisoners of war in Southeast Asia. Following the joint meeting of both the House and Senate on Tuesday, September 22, of this week. I joined in an extensive and thorough discussion of this situation with the good wives, fathers and mothers, and relatives of U.S. prisoners from the Pittsburgh area, who made a special trip to the Nation's Capital to witness that joint session.

Members of the Pittsburgh Chapter of the National League of Families of U.S. prisoners of war in Southeast Asia gave me this advice and made known their strong feelings about affirmative action by the President and the U.S. Congress. These relatives and friends have worked untiringly to keep this vital issue in the focus of national and international attention.

Those who traveled to Washington include Mrs. Mark Ruhling, president of the local organization, Mr. and Mrs.

John Ruhling, Mrs. Phyllis Janocha, Mrs. John Carey, Mrs. Robert Krupey, Mrs. Thomas Abraham, Mr. and Mrs. Leo R. Myers, and Mrs. Robert Pietsch. Without their indefatigable courage and devotion, which they reaffirmed at our meeting in my Washington office, the cause of American prisoners of war would not have achieved the prominence it has today.

The very presence of these wonderful dedicated people in the U.S. Capitol this week bears witness to the world that the condition, treatment, and repatriation of our captured servicemen in Southeast Asia bears a first priority in the conscience of all Americans.

As a U.S. representative in Congress, months earlier I was glad to join with the gentleman from Wisconsin (Mr. ZABLOCKI) in submitting House Concurrent Resolution 454 on November 19, 1969, a concurrent resolution calling for the humane treatment and release of American prisoners of war held by North Vietnam and the National Liberation Front. This bill received unanimous approval in the House on December 15, 1969, and was approved as well by the Senate on February 18, 1970.

It was a rewarding experience on my own personal continued concern for our U.S. prisoners of war, on December 2, 1969, I moved to recommit House Resolution 613, the bill which dealt with the peace negotiations for the Vietnam war My purpose was to add the amendment to emphasize action be taken for better treatment, identification and release of U.S. prisoners of war in Southeast Asia under the Geneva Convention. My amendment added wording to request the President to press the Government of North Vietnam to abide by the Geneva Convention of 1949 in the treatment of prisoners of war. The amendment passed the House unanimously.

I commend this presentation by the gentleman from South Carolina (Mr. RIVERS) and praise the perseverance of the National League of Families, and I strongly encourage such action to keep at the forefront this vital matter of our U.S. prisoners of war.

## NIXON-AGNEW ADMINISTRATION OPPOSED VETERANS LEGISLATION

(Mr. MADDEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MADDEN. Mr. Speaker, during my years in Congress I have consistently, as a World War I veteran, supported all practical veterans legislation. As a freshman Congressman, during the dark days of World War II, I was one of the World War I veterans who met in caucus in February 1943 in the House Chamber. This was the first meeting of several caucuses which resulted in drafting legislation for returning World War II veterans to aid them in transferring from military to civilian life. World War I veterans vividly remember upon their return from military service in 1919 the U.S. Government had passed no legislation to aid their return to civilian life. Many World War I veterans were compelled to wear their military uniforms for a year or more after their return for want of money to buy civilian clothes. These meetings held by congressional World War I veterans in 1943 resulted in the passage of the GI bill of rights. The original GI bill of rights has been improved and expanded many times in order to provide for all war veterans and their dependents. Every veterans' organization, including Members of Congress, have on numerous occasions paid tribute to the Honorable OLIN E. TEAGUE, chairman of the House Veterans Affairs Committee, for the great ability, foresight, and service he has rendered through his committee in expanding legislation for our war veterans during the last 25 years. On Monday, September 21 the Honorable OLIN E. TEAGUE, in addressing the House of Representatives reviewed the great accomplishments of this Congress in behalf of our veterans and their families.

I received permission from Chairman TEAGUE to incorporate verbatim statements he made on the floor of the House pertaining to veterans' legislation on the above date, and I quote excerpts from Chairman TEAGUE'S speech: CONGRESSIONAL RECORD, September 21, 1970:

Mr. Speaker, over the past 15 or more months I have become increasingly concerned about the apparent insensitivity of the Nixon Administration about veterans affairs. In April of 1969, the Administration attempted to reduce the medical care budget for veterans by $17.5 million when every indicator pointed to the need for much more money to meet soaring workloads in VA hospitals and clinics and correct serious staffing and operating shortages throughout the 166 VA hospital system. The Congress restored the proposed cut in medical care and Congress added $105 million to Administration requests to care for America's sick and disabled veterans for fiscal years 1970 and 1971.

On September 11, 1970 the President made a rather intemperate and uncalled for attack on the record of the 91st Congress. I, for one, believe this Congress has amassed a good record in enacting reasoned and meaningful legislation. I know this is the case in the field of veterans affairs. And yet the Nixon Administration has either opposed or recommended deferral or reduction in benefits of almost every piece of meaningful veterans legislation which has come before the Congress.

I am proud of the continuation of the bipartisanship of this Congress on veterans matters which has enabled us to pass legislation—increasing compensation rates for disabled veterans and widows and children of deceased service-connected veterans; to increase education and training allowances by 35 percent for Vietnam era veterans making this benefit meaningful to veterans heretofore discouraged by low rates from entering or continuing training; to broaden and raise the amount of insurance coverage from $10,000 to $15,000 for Vietnam and other Servicemen exposed to combat hazards; increasing housing grants for paraplegic veterans from $10,000 to $12,500 which will greatly benefit many returning seriously disabled Viet Nam veterans; increasing maximum loans under the direct loan program from $17,500 to $21,000; and preserving compensation rates for service-connected veterans who have maintained these evaluations for 20 or more years.

It is a sad fact, however, that even after criticizing Congress for not acting to help America's veterans, the Nixon Administration is actively opposing legislation now being considered by the Congress to—Protect over 2 million veterans and widows from having their pensions cut because of social security increases; provide home mortgage protection insurance for paraplegic veterans—many of whom are young seriously disabled Viet Nam veterans; use national service life insurance trust funds—funds which belong to veterans who are participating in this plan—to provide hard to get housing financing for GI home loans; and permit any war veteran age 72 or over to enter a VA hospital without signing the oath of inability to pay—the so-called "pauper's oath."

Viet Nam veterans who are injured in service receive service-connected compensation. Congress enacted legislation this year over the protests of the Nixon Administration to grant an 8 percent cost-of-living increase to disabled veterans. The Nixon Administration attempted to obstruct this legislation and urged that it be deferred. Upon seeing that Congress was determined to deal equitably with the service-connected disabled veterans and see that their compensation kept pace with the cost-of-living increases, the Administration then resorted to another maneuver which had it been successful, would have cost the disabled veterans of this country $100 million.

Earlier in the Session, the Nixon Administration attempted to block cost-of-living increases for widows and children of Viet Nam servicemen who died from service-connected causes and other veterans whose deaths were service-connected.

In an effort to realign the life insurance program covering veterans and other servicemen, Congress considered legislation to raise the amount of coverage from $10,000 to $15,000.

The increase in the VA direct loan amount from $17,500 to $21,000 was opposed by the Administration and this opposition has continued. In its latest form, the Administration has recommended against extending the direct loan program to veterans for the purchase of mobile homes.

Congress has been greatly concerned with problems relating to the veterans hospital program and has voted $105 million in additional funds to solve some of the serious problems confronting the medical and hospital program. The bill bearing this appropriation was vetoed by the President.

The Administration opposition to veteran legislation has not been restricted to legislation involving Viet Nam veterans. The Administration has also opposed legislation designed to benefit elderly veterans. While pushing a grandiose welfare scheme which would cost billions of dollars, the Administration has opposed a bill designed to prevent veterans receiving a pension from experiencing a loss in their pension as a result of the 15 percent social security rate increase voted by the Congress effective in April of this year. Despite the opposition of the Administration, Congress is proceeding with this legislation. Another bill aimed at solving problems of the elderly was the bill to permit any war veteran age 72 or over to enter a VA hospital without signing the oath of inability to pay, or the so-called "pauper's oath." The Administration opposed this legislation.

## THE MAJORITY LEADER'S PRESS RELEASE ON THE STATE OF THE ECONOMY

(Mr. WHALEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WHALEN. Mr. Speaker, I was

amused to read our distinguished majority leader's press release which crossed my desk this morning.

During the past several months the majority leader has expressed great concern about the state of our economy. In so doing he has attempted to shift to the present administration the blame for economic problems which began in 1966 with policies which he not only supported but which, in his leadership role, he helped initiate.

Yesterday's Consumer Price Index statistics, which clearly indicate the success of the administration's anti-inflationary program, apparently were too much for the majority leader to bear. Why? They deprive him of the opportunity for blame-shifting. Since the issue of inflation is evaporating, there no longer is any blame to shift.

So, in his press release, the majority leader, instead of rejoicing at today's restoration of the economy's health, continues to decry yesterday's illness. The only item missing was reference to the 1930 depression.

---

## SCHADEBERG URGES NIXON TO GO TO MOSCOW

The SPEAKER pro tempore (Mr. MILLER of California). Under a previous order of the House, the gentleman from Wisconsin (Mr. SCHADEBERG) is recognized for 30 minutes.

Mr. Speaker, I rise today to discuss an issue which I believe will become increasingly important in the months ahead, especially considering the current situation we are facing in the Middle East.

I am speaking of the relative military and political strength of the Soviet Union as opposed to our own military and political strength.

Mr. Speaker, I am concerned that while the United States is pursuing a policy of unilateral withdrawal of our military forces from strategic locations around the world, the Soviet Union is pursuing quite the opposite policy. Indeed it is expanding its military and political presence and operations.

I have consistently supported President Nixon's foreign policies and I still do. But the idea of decreasing the military forces of the United States while the Soviet Union is aggressively increasing its military forces in strategic locations is becoming increasingly hard to comprehend.

I know that President Nixon understands the danger inherent in the dangerous game which Moscow is playing. I know that the President will not be caught short.

The Soviet Union, however, because of 8 years of continuous retreat and vacillation on the part of the Democrat Kennedy-Johnson administrations, no longer is able to correctly read our intentions. Even when the United States warns them, they no longer take the warning seriously.

It is for that reason, Mr. Speaker, that I believe it is time that the United States faces up to the increasing Soviet threat in a direct and public manner.

Consequently, Mr. Speaker, this morning I have dispatched a letter to President Nixon urging him to extend his present trip abroad to include a visit with Soviet officials in Moscow. Such a visit would be particularly appropriate in view of the current Soviet involvement in the Middle East. It is a matter of course that such a visit by the President does not sanction the brutal policies of the Communist regime. He goes only to extend his policies of negotiation.

The opportunity for such a visit conveniently presents itself since French President Pompidou has already announced that he will be unable to meet with President Nixon in Paris because he will be in Moscow at that time. Perhaps Mr. Nixon and Mr. Pompidou can go to Moscow together.

Recalling as I do the great honor which the then Vice President Nixon brought America some 11 years ago when he confronted the then Soviet Premier, Nikita Khrushchev during the "kitchen debate" in Moscow, I know that such a meeting between President Nixon and Soviet officials would be on more than equal ground.

President Nixon has often said, and I agree with him, that we have moved from an era of confrontation to an era of negotation. I am not sure, however, that the Soviet Union has caught the message. However, even if they, too, agree that future settlements will be made through negotiations rather than confrontations, a visit by President Nixon would certainly help to make clear exactly what the United States will and will not negotiate, in Vietnam, in the Middle East, in Berlin, and elsewhere around the world.

I have also urged the President in my letter of today to approach the subject of the increasing Soviet posture around the world with the various leaders he will see during the already scheduled part of his visit. He could certainly take advantage of his visit with President Tito of Yugoslavia to make the United States position clear. Perhaps Mr. Tito could be of help to the United States in explaining our position to Moscow.

Most especially, however, as he meets with our allies in the West, by discussing the current situation as he sees it, Mr. Nixon could encourage support from these nations for a reasonable policy to meet the Soviet threat.

Now, Mr. Speaker, in order that Members of the House are in a position to see, all in one place, the nature of the Soviet military posture outside her borders at this time, I want to discuss—country by country—the situation as we find it at this moment:

Let us look first at the Soviet strength in the Middle East, for here is a spot where the Soviets could reduce tensions by unilateral withdrawal. It is only a short while ago that the United States removed the last of its troops from the Middle East, with the withdrawal of the final contingent from the Wheelus Air Force Base in Libya. It would cost the Soviets nothing to remove their troops.

In Egypt, today, the Soviets have 8,000 military advisers and technical personnel. They have the SA–2 and the sophisticated SA–3 missiles with Soviet crews. These ought to be removed immediately.

In Syria—the source of aggressive actions against Jordan—the Soviets maintain 4,000 military advisers and technical personnel. The tanks used by the Syrians to attack the Jordanians are Soviet-made T–34's and T–54's.

In Algeria, the Soviets have 3,000 military advisers and technical personnel.

Now let us turn to Europe, where the NATO organization was set up in order to counter the Soviet threat.

In East Germany, the Soviets still maintain 20 divisions, 10 tank divisions, and 10 motorized infantry divisions. They have 250,000 troops and 4,000 tanks. This occupation force is known as the Group of Soviet Forces in Germany—GSFC—under the command of Army General V. G. Kulikov.

Hungary is still occupied by four Soviet divisions, three tank divisions and one motorized infantry division. This adds up to 1,200 tanks, and 50,000 troops, organized into the Southern Group of Forces—SGF. The commander of these forces is Lt. Gen. B. P. Ivanov, with headquarters in Budapest.

Poland has two Soviet divisions, one tank and one motorized infantry. This makes 400 tanks, and 24,000 troops. They are under the command of Col. Gen. M. T. Ton'key if with headquarters at Lee-knee'-za.

Czechoslovakia is under the power of the Central Group of Forces—CGF—numbering eight divisions, four tank divisions, and four motorized infantry divisions. This amounts to 100,000 troops and 1,600 tanks. The commander is Col. Gen. A. M. My-yor'off, with headquarters at Matz ko' vee cha, near Prague.

Finally, let us not forget Cuba, with 8,000 known Soviet military advisers right on our doorstep. In this year alone, the Soviet Union has sent three flotillas of naval vessels into Cuban ports to demonstrate its might on the seas.

This amounts to one of the most extensive military deployments in a peacetime era in the history of the world. The Soviets are daily increasing it. We can even be certain that they have military personnel in North Korea and North Vietnam.

If the Soviets want to reduce tensions, they should begin to make real concessions—they should begin to bring these troops home again, and demobilize them.

I have confidence that President Nixon could present this situation squarely to the leaders in the Kremlin, if he were to negotiate with them face to face. It would be a great step forward for peace, and I have said so in my letter to the President today.

I have suggested no deadline for withdrawal of Soviet forces, even though there is great pressure being put upon our President to declare a specific date for withdrawal of American combat troops from Vietnam. I suggest, however, that the time to begin withdrawal of Soviet forces from the Middle East is now. This is the arena of confrontation that threatens the peace of today.

I include the full text of my letter to the President in the RECORD today.

U.S. HOUSE OF REPRESENTATIVES,
*Washington, D.C., September 24, 1970.*
Hon. RICHARD M. NIXON,
*President of The United States,*
*The White House,*
*Washington, D.C.*

DEAR MR. PRESIDENT: Your trip to several European nations and your visits with the respective heads of state, provides you, in my judgment, with an outstanding opportunity for a political initiative. I want to suggest by this that if possible your trip should not limit itself only to the countries designated so far in your itineray but should rather be extended to other important centers of political decision-making and first of all to Moscow.

The significance of a direct conference with the Soviet Union cannot be overestimated in this critical time. The crisis in Southeast Asia and in particular the most important confrontation in the Middle East are calling for an immediate, direct initiative and action on the part of the United States.

Your trip to Moscow, I think, should be directed toward specific purposes and targets, the most important of which I think, is the mutual understanding in the reduction of tensions by means of reducing mutual military presence of both superpowers on foreign territories.

Due to your initiative thus far, the United States has begun a withdrawal of its forces around the world. I support this policy, as I know the American people support it. However, the Soviet Union apparently does not clearly understand American intentions. They must be made to understand what we will and will not tolerate, or we will find ourselves having to take drastic action. . . . possibly in the Middle East.

A trip by you, possibly in connection with French President Pompidou's visit to Moscow, could make United States intentions crystal clear. I know that the hour is late and that such arrangements take time, but when you announced your plans for this trip the situation was not nearly as critical as it is at this moment.

I know that you are far more aware of the danger of the present situation vis-a-vis the Soviet Union than I am. Your experts, I know, are able to give you precise information which would be useful in such a meeting.

I also think that you might raise the matter of Soviet presence around the world with Mr. Tito of Yugoslavia because there is the possibility that he might be helpful in explaining our policies to the Soviet Union. Certainly raising such questions with our allies would help to strengthen the Western alliance, something to which I know you have devoted a great deal of attention.

Thank you for your attention to this suggestion. I wish you God speed in your mission. Ruth and I will remember you in our prayers.

Sincerely,

HENRY C. SCHADEBERG,
*Member of Congress.*

## REPORT ON 91ST CONGRESS

The SPEAKER pro tempore (Mr. MILLER of California). Under a previous order of the House, the gentleman from Indiana (Mr. MADDEN) is recognized for 15 minutes.

Mr. MADDEN. Mr. Speaker, the 91st Congress is now in the closing weeks before adjournment. During my long experience representing the First Congressional District of Indiana, I do not remember a time when the American public received more misinformation from some of its highly elected officials and news media than has been released against this Congress. Members of Congress are greatly handicapped in getting national attention in the press and on the airways as to the true facts concerning legislative enactments and accomplishments.

On the other hand, the President, members of his Cabinet and other officials controlling departments are releasing news coverage pertaining to legislation and Government decisions to the disadvantage of officials occupying lesser positions.

### REPUBLICAN CAMPAIGN FUND FABULOUS

With the congressional campaign about to start, organized political propaganda is now rampant, picturing the 91st Congress as a "spending Congress" and misrepresenting the accomplishments made on important legislation. This Congress has enacted a number of major bills to bring about a recovery of our failing economy, to curb unemployment, to educate our youth, to provide homes for families, to expand hospital and health facilities, to reduce interest rates, to expand social security, to curb air and water pollution, and so forth. I predict that in this 1970 congressional campaign more millions will be spent by predatory interests in an effort to retain or expand their fabulous profits and tax loopholes than in any election in the Nation's history. The national press has already publicized the large campaign funds that have been accumulated by the Republican political committees over the last 19 months in an effort to elect a Republican Congress in November. If they succeed, it will aid the administration in carrying out its present policies which have already embedded our Nation in an inflation network which is raising the cost of living, high interest rates, increasing unemployment, and has our economy on the brink of a devastating economical depression.

### MR. TAXPAYER: HERE IS THE RECORD

In 1968, the interest rate on building mortgages was 6 percent. Today, the interest rate has gone up to 9 percent and some as high as 10. The average purchaser of a $20,000 home, carrying a 30-year mortgage, at present interest rates, will pay approximately $38,000 in interest on his purchase. Simple addition of adding the price of his home to the interest rate, his $20,000 home will eventually cost him about $58,000.

If the interest rate were reduced only 2 percent, this homebuyer would save approximately $13,000. That explains in simple language why homebuilding has been practically at a standstill since the Nixon-Agnew administration assumed control.

### CONGRESS ACTED ON INTEREST RATES

The news media for some reason fails to remind the public that last December the Congress of the United States by a substantial vote in both the House and Senate gave the President absolute authority under Public Law 91–151 to roll back interest rates 2½ percent and control all aspects of credit transactions in order to curtail inflation. That bill was signed by the President last December and has been dormant and molding in the files of the White House up to the present hour. Evidently the New York banking power controls our economy.

Mr. Speaker, the record of the Nixon administration on interest rates illustrates in unmistakable terms, the economic failures of the past 19 months. Prices and the cost of living continue to climb and interest rates remain at record levels. The President left the law untouched while homebuilding continues to decline. I urge the President and the Secretary of the Treasury to speak directly to the banking community and demand that rates be lowered, not only to the big customers, but to all consumers and particularly to the homebuyers. Mr. Speaker, I do not believe that the 91st Congress should adjourn until these important economic matters are dealt with in an effective and lasting manner. We should stay in session, night and day, and on weekends, if necessary. None of us should agree to adjourn until we have a specific program to bring about lower prices and interest rates to revitalize our entire economy.

Recently, the House and Senate gave the President standby authority to stabilize prices, wages, rents, living costs, and so forth. The President signed this legislation on August 15. There has been no action since the President was given this authority.

### EDUCATION

Candidate Nixon, in closing his 1968 campaign said:

> My administration will be second to none in its concern for education.

His moderate budget recommendations for education was increased one billion two hundred million by the Congress.

At 9 p.m. on January 26 of this year the President commanded time on television to inform the American people that he was vetoing this moderate 10-percent increase over his educational budget. His reason for the veto was that it would set the fires of inflation aflame. Two months later the President, in another alarming broadcast, vetoed the congressional increase for hospital and welfare expansion. He vetoed this legislation because Congress increased his budget for hospital and welfare expansion by $450 million.

The President in his veto broadcast said this would rekindle additional inflation. The President failed to inform the American people in both veto broadcasts that the Congress had already reduced his 1970 budget $6 billion, $350 million. Five billion was cut from his $80 billion armament budget and the balance from his foreign aid budget. Many Members of Congress, including myself, were alarmed that he again did not inform the American people that the Congress, in reducing his mammoth armaments and foreign aid budget by approximately six billion three hundred million dollars was a great aid in curtailing inflation.

Since his veto message we have learned that his oversight in not revealing the congressional reductions might have been intentional. Almost daily we read

accounts of Vice President SPIRO AGNEW's statements in his Republican fund-raising speeches that, "the 91st Congress is a 'spending Congress' and Democrats should be defeated."

CRIME

The people also know that President Nixon has failed to deliver on his campaign promises to halt rising crime. The fear of muggings, rape, robberies, and growing violence has made an evening walk on many downtown streets an act of bravery.

The administration's own "pussyfooting" on the congressionally enacted Safe Streets Act by keeping it from being adequately funded has greatly contributed to present crime conditions. The President's opposition to key provisions and full funding to strengthen our police and the courts in our cities is curtailing law enforcement in crime-ridden areas.

The voters of this Nation are not as gullible as the political planners at the White House believe. They will not buy the cleverly designed package of "hogwash" which Vice President AGNEW is trying to sell the public in his numerous speeches to collect Republican campaign funds.

This administration has talked a great deal about legislative programs, but in all my years in Congress there has never been such a scarcity of basic and practical legislation offered by the executive department. They have made many empty promises, high-sounding pledges, but scarce action. President Nixon's Attorney General with branch offices in every State is the No. 1 law enforcer of the Nation. Why does he not act against rampant crime?

If the President is truly interested in fiscal responsibility he should join with a concerned Congress in placing priority on the Nation's greatest needs of crime, health, education, jobs, housing, antipollution, and welfare bills instead of mustering the forces of his administration to seek to provide $750 million to bail out the bankrupt Penn Central Railroad.

TAX REFORM

The tax reform bill enacted in this Congress gave "across the board" exemptions and deductions to millions of small taxpayers which will be reflected in their 1970 returns payable in 1971. Unfortunately the major tax loopholes escaped with only slight reductions made in some of their inexcusable credit exemptions and depletions. For the information of some of our taxpayers who are unfamiliar with the fabulous loopholes, especially in oil, I might record a few paragraphs from some of my speeches I made on the floor of the House in recent years opposing these loopholes:

Former Secretary of Treasury Joseph Barr, a fellow Hoosier, testified in January of 1968 that 21 persons with incomes of over $1 million paid no taxes at all, while 155 with annual income of over $200,000 escaped Federal taxes entirely. Big oil corporations enjoying the 27½ percent oil depletion bonanza, plus other exemptions in credits on both foreign and domestic oil practically paid no taxes considering their huge profits.

The Atlantic Oil Co. from the years 1962 to 1966, with annual income ranging from $61 million in 1962 to approximately $127 million in 1966, paid no Federal taxes whatsoever during that period.

In 1964, Standard Oil of New Jersey, with a net income of approximately $1 billion 630 million paid 1.7 percent tax to the Federal Government. These are but a few examples of Federal tax "Loopholes".

Some companies are not protected by huge high-priced lobbies like big oil. As an example, three coal companies, the Consolidated Coal Co., Pittston Coal Co., and Island Creek Coal Co. have paid annual taxes on their gross profits in figures ranging between 18 and 28 percent annually.

Other less publicized tax loopholes were: The 7 percent tax credit for new machinery involving $2.3 billion.

The accelerated depletion on new buildings worth $500 million annually to its beneficiaries. The corporate surtax exemption of $1.8 billion. The estate tax which will cost the Government approximately $2.5 billion annually.

I could name many other tax loopholes less spectacular which were revenue losers for Uncle Sam.

The tax reform bill which was enacted in this Session of Congress was merely a "slap on the wrist" to some of the fantastic loopholes similar to the ones mentioned herein.

In the House of Representatives we succeeded in cutting the 27½ percent oil depletion to 20 percent but the Senate, in its generosity increased this figure to 22 percent.

I do hope that in the 92d Congress next year we can again take up the further reduction of some of the major loopholes which should have been curtailed in the present Congress. Anyhow we are making progress on tax reform.

$3.5 BILLION FARM SUBSIDY REDUCED

Mr. Speaker, 3 years ago when the House Agriculture Committee appeared before the Rules Committee to secure a rule on their $3½ billion annual farm subsidy, I was the lone voice in carrying on the fight against this huge annual tax gift for idle acres. Almost 75 percent of this fabulous sum which is annually paid to a group of large corporate farms are generally located in the South and West. I presented to the Rules Committee members a 1,240 page volume from the Senate hearings revealing the thousands of farms which received annual checks of over $5,000 per year from the Government on idle acreage. Many corporate farms received Government checks in six figures.

We succeeded that year in placing a $20,000 limitation to any one farm operation. Later when the Senate debated the bill they rejected the $20,000 limitation. When the legislation came before the House this year we again united to fight against this $3.5 billion subsidy in the Rules Committee and on the floor of the House. We again succeeded in limiting annual payments to any one farm operation to the amount of $20,000. By reason of our previous success this year the Senate cooperated to the extent that they limited payments to any one farmer to $55,000.

I know that several of my constituents have asked and written regarding the outcome of this farm subsidy battle, and I am happy to say that we have been crowned with a substantial victory in reducing these payments. During the legislative fights curtailing this farm subsidy, I had the cooperation and help of the Indiana Farm Bureau.

It is considerable consolation for the Nation to know that by reason of our consistent fight we have succeeded in saving the American taxpayer millions of dollars by reducing and curtailing the vast subsidies which the Government was paying to large individual and corporate farmers.

AIR AND WATER POLLUTION

During the last 12 years I have been a Member of the congressional group fighting for effective legislation curbing both air and water pollution. In 1966 we passed the Clean Water Restoration Act providing for a 5-year program. The Calumet region of Indiana, with its industries and also pollution from the adjacent Chicago area, is certainly interested in cleaning up our waters.

President Nixon, in his 1968 campaign, spoke very emphatically of the necessity to clean up air and water pollution. For some reason the news media failed to let the public know that President Nixon in this year's 1970 budget did not provide for the $1 billion called for in the Clean Water Act, but he merely recommended $214 million. The Congress raised the President's request into an appropriation of $800 million. For some reason the powers behind the Republican Party seem to be opposed to spending money for these necessary environmental programs. Possibly the public has forgotten that 10 years ago, in 1960, the Congress passed the Federal Water Pollution Act but it was vetoed by President Eisenhower. It was again passed by the Congress and enacted under President Kennedy in 1961 and expanded under President Johnson in 1966.

CONGRESSIONAL DUTIES

Unfortunately, it is impossible in one brief report to convey to the public the information on all important legislation considered by the Congress during the session. Most people have an idea that a Congressman's duties are confined to Federal legislation, committee hearings, and other matter pertaining to legislative activities. However, a great deal of time is devoted to working on requests from constituents, such as, matters pertaining to veterans, social security problems, cost of living, environment, immigration, medicare, taxes, housing, school requests, and so forth. In this, the 91st Congress, it seems that the abovementioned duties of a Congressman have increased many times from the congressional activities of 10 or 15 years ago.

Nevertheless, it is indeed a great satisfaction to the average Member of Congress to be in a position to aid his constituents who, on occasion, possibly through no fault of their own, and in an emergency need help from their Government in Washington.

---

## HILARY SANDOVAL, JR., A GOOD SBA ADMINISTRATOR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. WILLIAMS) is recognized for 5 minutes.

Mr. WILLIAMS of Pennsylvania. Mr. Speaker, I have been greatly concerned with certain news reports which, at times

viciously, have derrogated Mr. Hilary Sandoval, Jr., as Administrator of the Small Business Administration.

I have been particularly concerned by a recent broadcast and column which claimed that President Nixon had concluded that since Mr. Sandoval was "only a second-rate administrator," Mr. Nixon had decided to offer Mr. Sandoval, "his administration's most highly-placed Mexican-American—ambassadorship in a Latin American country sometime after the November elections."

In my concern over this matter, I, as a member of the House Committee on Banking and Currency, have acquired certain facts which demonstrate, quite clearly, that the nature and sources of these attacks upon Mr. Sandoval constitute his greatest badge of merit; that it may be suggested that it is precisely for the great progress of the Small Business Administration under Mr. Sandoval's stewardship that he is being victimized.

In a letter dated September 14, 1970, I have conveyed this thought to the President in concert with certain rather self-evident facts which, as a member of the House Committee on Banking and Currency, I have acquired with reference to the nature and character of the Sandoval administration of SBA.

I suggested to the President that, in consideration of these things, "the fact remains—that Mr. Sandoval's outstanding performance—coupled with SBA's previous suffering of too many short-term Administrators, renders it mandatory that he remain on the job."

The findings which I commended to the President's attention were these:

Mr. Sandoval's record of taking his programs to the people is unmatched by any other Washington official. He has traveled thousands of miles and has talked with hundreds of businessmen, bankers and community people and organizations in an effort to create better understanding of SBA's programs.

Under his leadership, SBA has shown creativity and innovation. In an landmark action, Mr. Sandoval has instituted a revolving line of credit that promises to help overcome the bonding problems that have long plagued small contractors.

He has inspired confidence in a staff whose increased productivity has resulted in record assistance to small firms. With 360 fewer employees than SBA had two years ago, SBA has made more loans, attracted more private dollars, negotiated more 8A contracts and provided more investment company assistance than ever.

Last fiscal year, more small business firms received more money in SBA loans than at any time in SBA history. Banks provided the largest bank-dollar ratio ever: five to one. That, certainly, was abundant demonstration that banks respect Mr. Sandoval's integrity and leadership and respect SBA and its program under his leadership.

That it is equally thus within the business community, both large and small, is demonstrated by the fact that, last year, more management and technical assistance than ever was made available to small firms. This was due to Mr. Sandoval's ability to enlist the volunteer services of several thousand businessmen.

Equally vital is the fact that, under Mr. Sandoval, SBA is making a major contribution to your efforts to bring minorities into the mainstream of our free enterprise way of life. This is documented by the fact that, last fiscal year, SBA made more loans than ever to minorities, and for more dollars. Specifically, some 41 percent of all SBA loans went to minorities.

Nor is it unimportant nor insignificant that Mr. Sandoval's personal direction of SBA disaster activities is unprecedented in SBA history; particularly in those instances of major disaster which you have officially declared. His great, human compassion for victims of disaster has gained him, and your Administration, untold numbers of friends in many parts of the Nation. There are, for example, the children of Waveland, Mississippi, whose library was restored personally by Mr. Sandoval.

Thus, Mr. Speaker, Hilary Sandoval has proved himself to be the man in whom the President believed when he nominated him for this job which he has done so well at SBA; a man of deep compassion, sensitivity, integrity, and sound administration; a leader dedicated to the needs of "the little guy," the small businessman who, in great part, is so much of the backbone of America.

It goes without saying that, in voting to establish and to fund the Small Business Administration, the Congress recognized, beyond doubt, the absolutely essentiality of preserving and protecting the small businessman; the essentiality of helping him to prosper as the key and the symbol of the so-called middle class which has preserved the necessary balance between the "haves" and the "have nots" in America—the balance which, when lost in other lands, has led them to totalitarianism and enslavement.

Having found, in Hilary Sandoval, a man who has demonstrated his total understanding of this most essential fact of governmental, economic, and sociological life, we must do what we can to encourage him to remain on that job—serving as he has, the public interest.

Thank you.

## TAKE PRIDE IN AMERICA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. MILLER) is recognized for 5 minutes.

Mr. MILLER of Ohio. Mr. Speaker, today we should take note of America's great accomplishments and in so doing renew our faith and confidence in ourselves as individuals and as a nation. The number of bachelor's and first professional degrees granted by U.S. colleges increased from 311,000 in 1956 to 540,000 in 1966 and is expected to reach over 930,000 in 1976.

## ENVIRONMENTAL ACTIVISTS ATTACK 12 CONGRESSMEN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. AYRES) is recognized for 60 minutes.

Mr. AYRES. Mr. Speaker, 2 weeks ago an article appeared in the Washington Star entitled "Environmental Activists Attack 12 Congressmen." The article read as follows:

ENVIRONMENTAL ACTIVISTS ATTACK 12 CONGRESSMEN

(By Roberta Hornig)

A congressional "dirty dozen," accused of consistently voting against environmental and social legislation, today was singled out for defeat in the fall elections by Environmental Action, a group of young activists.

The list of 10 Republicans and two Democrats, all supporters of the war in Vietnam, includes Rep. George Fallon, D-Md., of Baltimore, chairman of the House Public Works Committee. The group called him the "chief spokesman for the highway lobby."

The second Democrat on the list is Rep. Byron Rogers of Denver, third ranking member of the Judiciary Committee and up for his 11th term.

Others on the "dirty dozen" list, all Republicans, are:

Rep. E. Ross Adair of Fort Wayne, Ind., the senior Republican on the Foreign Affairs Committee.

Rep. William H. Ayres of Akron, a member of the House Education and Labor and Veterans Affairs Committees.

Rep. William Cowger of Louisville, a member of the Banking and Currency and Government Operations Committees.

Rep. David Dennis of Muncie, Ind., of the Judiciary Committee.

Rep. John Kyl of Ottumwa, Iowa, a member of the Administration and Interior committees.

Rep. Earl Landgrebe, of Lafayette, Ind., who is finishing out his first term and is a member of the Education and Labor Committee.

Rep. Odin Langen of Moorhead, Minn., who has served six terms and is a member of the House Appropriations committee.

Rep. Henry Schadeberg of Racine, Wis., a five termer serving on the Merchant Marine and Public Works committees.

Rep. Lawrence Winn of Lawrence, Kan., a member of the District and space committees.

Rep. Roger Zion of Evansville, Ind., a two termer who sits on the House Public Works committee.

Environmental Action is the group which coordinated the Earth Day last April and since has lobbied for several environmental bills.

Denis Hayes, national coordinator, said the "dirty dozen," was marked for defeat after meeting a number of tests.

These include "a singularly bad record" on environmental matters and a "bad record" in such area as civil rights, the war, education, anti-poverty and general domestic priorities.

The group also sought men whose November opponents would be a marked improvement and who are "running in a race where our efforts could make a difference."

Mr. Speaker, every Member of Congress knows very well that he cannot please everyone and that he may be criticized for his actions. This is part of the job, it is expected and understood. But my purpose in coming before this body today is to point out that this criticism was totally unfounded and, in fact, Environmental Action actually distorted and misrepresented many fine congressional records and in effect slandered Members of this body. Had they criticized me or the other Members listed on our full voting records and had they shown that these records were weak, then their claims would have held some legitimacy.

Shortly after the article appeared, I sent a member of my staff down to their offices in an attempt to find out the basis of the charges made against me and, when they could not list specifics, even suggested that an apology from them might be in order.

Mr. Speaker, I did not receive an apology, but another distortion of facts. Furthermore, in attempting to find out

more about Environmental Action, I learned that they share an office with a group called Environmental Resources, Inc., and although Environmental Action is not tax exempt, Environmental Resources, Inc., is. In checking further, I learned that Environmental Resources pays 70 percent of the total rent for the office space, that they share 70 percent of telephone costs and have other shared duplicating expenses. This in itself would not have been irregular, but I have since discovered that Environmental Resources is supported exclusively by a grant from the Office of Education. Therefore, it appears, on the surface at least, that the Federal Government is supporting a campaign of political propaganda being waged against Members of Congress.

Mr. Speaker, other environmental groups such as the Sierra Club and Friends of the Earth—according to an article in Des Moines Register of September 10, 1970—not only disassociated themselves with the "Dirty Dozen" listing, but suggested that their organizations were greatly embarrassed by the press statement. I am proud of my record and I will stand up to any honest appraisal of it. It is my hope that in the future, organizations such as this will be fair, will be accurate, and will be responsible when they engage in this type of activity. The following is the full text of the letter and its attachments that I sent to Denis Hayes today.

SEPTEMBER 24, 1970.

MR. DENIS HAYES,
*National Coordinator, Environmental Action, Washington, D.C.*

SIR: I was curious to see how far you would go in attempting to justify an attack upon me which you must know is a misrepresentation of my record in Congress. This is why I had requested from you the criteria by which I was selected for your attack and an apology for your misrepresentation of my record. Your letter of September 14th contains neither and leaves me satisfied that you have no intellectual honesty.

You stated that civil rights is not your "primary concern." Indeed, civil rights could scarcely be a concern at all of your group. Otherwise, you would not have singled out a Member who has supported virtually every civil rights proposal during the last 20 years, but would have chosen many dozens of Members who have opposed every such position.

In criticizing my civil rights record, it was interesting that you brushed past my support for acceptance of the Senate amendments to the Voting Rights Bill this June—which included giving the vote to 18 year olds. Clarence Mitchell, Chairman of the Legislative Committee of the Leadership Conference on Civil Rights, did not ignore this key vote. On July 2, 1970, he sent me a congratulatory letter (attached) saying "millions of young people and millions of minority group members will have renewed faith in our [democratic] system because of your vote."

Because your organization apparently has difficulty in researching voting records, or are not concerned with accuracy, I am enclosing my complete civil rights voting record for the last 18 years as compiled by the NAACP. Had you bothered to contact them, I am sure that they would have made it available to you also. Your letter is a painful example of awkward reaching to justify the unjustifiable. Certainly I have had a few disagreements with civil rights groups, as has almost any independent Congressman with any group, but no civil rights leader has ever attacked my overall record.

As to my record on "social legislation," you found it convenient to ignore the fact that I sponsored many pieces of legislation in this area which have been enacted into law—including many of the major Federal programs in education. Such organizations as the National Education Association and the National Council for Exceptional Children are among those which have given me awards for my work on behalf of education. An attack on this record could come only from someone wholly unconcerned and uninformed about American education. For your information, I am attaching summaries of legislation that I have sponsored and/or supported which have been enacted into law.

I note also that in your criticism of my actions on antipoverty legislation you neglected to mention that it was I, along with Chairman Perkins, who co-sponsored H.R. 12321, which extended the entire anti-poverty program under OEO for two more years. In addition, your suggestion that my substitute proposal was a negative action designed to hurt the poor and "short change" them could not be further from the truth. The substitute, in my opinion, would have facilitated and upgraded the entire program with the ultimate benefits going to the poor.

Then we come to your alleged "main area of interest"—environmental protection. Surely in your meticulous "research" you could not have overlooked the fact that I have voted for every major piece of environmental and natural resources legislation which has come before this session of the Congress—with the single exception of the Clean Air Act which was voted upon when I was attending the meeting of the International Labor Organization in Geneva, Switzerland, as an official delegate of the United States. Of course, I would have voted for the Clean Air Act as I very much favor it.

Your careful research on environmental matters in Congress could not possibly have missed the fact that early in August—nearly a month before your ill-advised attack on me (and before I had ever heard of your "organization")—I was a co-sponsor of five major environmental bills (H.R. 18947, H.R. 18948, H.R. 18949, H. Con. Res. 706, and H.R. 18779). The first four deal with the hazards of dumping contaminants into the oceans (particularly by the military) and the fifth would strengthen the Federal Water Pollution Control Act by providing funds for the construction of waste treatment facilities.

I think that my overall voting record in this area reflects a proven concern. This concern can be found in my votes made long before ecology came into vogue. For your information, a copy of my votes cast on major environmental and natural resources legislation since 1964 (as compiled by the Library of Congress) is enclosed and should prove to be enlightening reading for you.

This is not a record which anyone could single out as being opposed to the improvement of the natural environment, and you know this very well. In truth, it appears that you have no interest in my Congressional record on any of these issues. Therefore, it seems obvious that your "main area of interest" is in fact a mask for something else and to use genuine and warranted concern about environmental and ecological dangers to mask political support for other causes is contemptible.

My concern is the distinct possibility that your actions might injure and discredit the genuine conservation and environmental groups in this country. You should share this concern. I regret that a group, such as yours, has opted to launch broadside attacks arbitrarily against Members of Congress—the justification for which is impossible. I regret, too, that you have not elected to apply your resources in a concerted effort to define some of the key environmental protection issues and, perhaps, to set forth what you believe are feasible approaches to meeting the critical environmental problems now confronting our Nation. Had you so done, you could have rendered an invaluable public service in this election year.

Fortunately, concerned environmentalists such as Congressman Paul McCloskey recognize the potential threat your imprudent, uninformed accusations pose to the total environmental effort, and he has officially disassociated himself with your cause. I quote from a letter he sent to me on September 10, 1970:

"I have just learned of the press release and political action against you by an organization called 'Environmental Action, Inc.' This organization has no relationship whatsoever to the organization which sponsored Earth Day last spring, and for which Senator Gaylord Nelson and I were cochairmen. The Earth Day effort was operated by a nonprofit corporation, Environmental Teach-In, Inc., specifically formed for the Earth Day activities and subsequently inactivated.

"Neither Senator Nelson nor I have had any relationship with the group which has come out against you.

"If you feel it would be helpful, I will be glad to hold an appropriate press conference or issue an appropriate press release disavowing any connection between Earth Day and Environmental Action, Inc., and further expressing affirmative support for your own conservation record in the House during this past year.

"I would also be glad to write a letter to any newspaper in your district which you feel would correct any erroneous information which has already been published. Please let me know your desires, and any suggestions you may have on specific action I can take to be of help."

Finally, you express concern about my interest in "Environmental Resources, Inc." Yet, you were totally unconcerned when you distorted my voting record and challenged 20 years of leadership, service and dedication to my district, my State and my country. But, when I review material given by a staff member of Environmental Resources, Inc. (letter of agreement between Environmental Action and Environmental Resources, Inc., attached), it appears on the face of it that there is an intimate connection between that organization and yours. Environmental Resources, Inc., pays 70% of the rent for the office space you share in common, 70% of the telephone costs and a major share of other office expenses. Since you co-mingle office space, share identical interests and information, and are otherwise inter-related, it would appear that the claim of "separation" of your two organizations is a fiction.

Because the Committee on Education and Labor has oversight responsibility for the Office of Education, which made a grant to Environmental Resources, Inc., and because there are indications that we have a situation wherein a tax exempt organization with a Federal grant may be helping to pay for a campaign of political propaganda which is contrary to law, as ranking Minority Member of the Committee I am concerned about a possibly illegal use of $33,000 of Federal education funds. I feel that it is my responsibility and obligation, therefore, to look into this matter and to assure that the full facts are disclosed. Several Members of our Committee find it is, at the very least, a matter of bad judgment that there is even the appearance that Office of Education funds are being used for political purposes.

If these appearances are misleading, then

a complete review of the grant and circumstances surrounding it should be welcomed by you. On the other hand, if you have something to hide, you have reason to be concerned. My office is open to all and thousands of individuals pass through each year; they visit, take photographs and come and go as they wish. You, for reasons known only to yourself, felt it necessary to forbid photographers from taking pictures of individuals being paid with Federal money while working.

I find great irony in the fact that it was you who initiated the challenge against me. It was you who made unwarranted, unjustified and unfounded charges against me. It was you, serving as judge and jury, who attempted to discredit 20 years of effective service. Yet, when I raised a question of propriety about a working relationship between your organizations after reading a document given to me by one of them, it is you who implies that there is an attempt to intimidate.

While I regret that any group would attempt to mislead the public on vital issues, I welcome the opportunity you have afforded me to again call attention to my legislative record in these fields because I am proud of it. You will find that I am a person who does not duck the issues.

Very truly yours,

WILLIAM H. AYRES,
*Member of Congress.*

P.S.—Environmental Resources, Inc. hereby subleases 70% (1890 sq. ft.) of 2700 total sq. feet for $612.50 (70% of $875.00 total rent) from Environmental Action, Inc. at 2000 P Street, N.W., Washington, D.C. for 3 months (from July 1, 1970, to October 1, 1970). In addition, Environmental Resources, Inc. agrees to pay 70% of all local phone service equipment rental, and other operating expenses for 3 months (from July 1, 1970, to October 1, 1970) to Environmental Action, Inc. Long-distance service will be paid on the basis of usage.

STEPHEN E. COTTON,
*Co-director,*
*Environmental Resources, Inc.*
BARBARA REID,
*Co-director,*
*Environmental Action, Inc.*

---

YEA AND NAY VOTING RECORD OF HON. WILLIAM H. AYRES ON ENVIRONMENTAL ISSUES—88TH-91ST CONGRESSES

(Compiled by Mary D. Arthur, American Law Division, Library of Congress)

88TH CONGRESS

March 10, 1964.—H.R. 8070. Establishes a Public Land Law Review Commission. On passage, p. 4703; (339–29); Vote: Yea.

July 2, 1964.—S. 2. Water Resources Research Center Act. On agreeing to conference report, p. 15373; (347–0); Vote: Yea.

July 22, 1964.—H.R. 3846. Establishes a Land and Water Conservation Fund. On agreeing to H. Res. 738, the rule providing for the consideration of and 4 hours of debate on H.R. 3846, p. 15963; (338–8); Vote: Yea.

July 30, 1964.—H.R. 9070. Establishes a National Preservation System. On passage, p. 16875; (374–1); Vote: Yea.

August 3, 1964.—H.R. 1096. Authorizes the Secretary of the Interior to cooperate with the State of Wisconsin in the designation and administration of the Ice Age National Scientific Reserve in the State of Wisconsin. On suspending the rules and passing the bill, p. 17224; (164–154); (rejected); Vote: Nay.

H.R. 3672.—Provides for the construction, etc., of the Savery-Pot Hook, Bostwick Park, and Fruitland Mesa participating reclamation projects under the Colorado River Storage Project Act. On suspending the rules and passing the bill, p. 17237; (250–67); Vote: yea.

September 1, 1964.—H.R. 4487. Prevents or minimizes injury to fish and wildlife from the use of insecticides and pesticides. On suspending the rules and passing the bill, p. 20530; (235–111); Vote: nay.

September 23, 1964.—H.R. 1096. Authorizes the Secretary of the Interior to cooperate with the State of Wisconsin in the designation and administration of the Ice Age National Scientific Reserve in the State of Wisconsin. On passage, p. 21938; (180–118); Vote: nay.

89TH CONGRESS

March 3, 1965.—S. 3. Appalachian Regional Development Act of 1965. On motion to recommit, designed to replace the text of S. 3 with the provisions of H.R. 4466, p. 3930; (100–323); Vote: yea. On passage, p. 3930; (257–165); Vote: nay.

April 28, 1965.—S. 4. Water Quality Act of 1965. On passage, p. 8400; (396–0); Vote: yea.

September 14, 1965.—H.R. 2091. Establishment of concession policies in areas administered by National Park Service. On motion to recommit, p. 22802; (73–298); Vote: nay. Voted aye on final passage (voice vote).

September 21, 1965.—S. 4. Water Quality Act of 1965. On agreeing to conference report, p. 23699; (381–0); Vote: yea.

September 23, 1965.—H.R. 10232. Water and sanitation systems in rural areas. On ordering the previous question on H. Res. 580, the open rule providing for 2 hours of debate on the bill. On passage, p. 24067; (326–10); Vote: yea.

September 24, 1965.—S. 306. Clean air pollution program. On motion to recommit designed to delete the provisions for solid waste disposal, p. 24166; (80–220); Vote: Yea. On passage, p. 24166; (294–4); Vote: yea.

October 7, 1965.—H.R. 2020. Nevada Water Project. On pasasge, p. 25330; (240–134); Vote: Yea.

S. 2084.—Highway Beautification Act of 1965. On motion to recommit, p. 25404; (153–230); Vote: Yea. On passage, p. 25405; (245–138); Vote: Yea.

October 20, 1965.—S. 2300. Rivers and Harbors Act of 1965. On agreeing to conference report, p. 26740; (221–139); Vote: Nay.

July 21, 1966.—S. 602. Small Reclamation Projects Act. On agreeing to conference report, p. 15886; (136–204); Vote: Nay.

September 19, 1966.—H.R. 8678. Pictured Rocks National Lakeshore, Michigan. On suspension of rules and passage, p. 21960; (248–70); Vote: Yea.

October 14, 1966.—H.R. 51. Indiana Dunes National Lakeshore. On Udall amendment designed to add 478 acres to the Indiana Dunes National Lakeshore, p. 25853; (183–147); Vote: Nay. On passage, p. 25854 (204–141); Vote: Nay.

October 17, 1966.—S. 2947. Clean Water Restoration Act of 1966.—On agreeing to conference report, p. 26079; (247–0); Vote: Yea.

90TH CONGRESS

June 19, 1967.—Roll Call No. 141. H.R. 480. Relates to the acquisition of wetlands for the conservation of migratory waterfowl. On suspending the rules and passage, p. H. 7428; (329–8); Vote: Yea.

June 19, 1967.—Roll Call No. 142. H.R. 482. Relates to hunting stamps for the taking of migratory waterfowl and other migratory birds. On suspending the rules and passage, p. H74334 (238–97); Vote: yes.

July 12, 1967.—Roll Call No. 165. S. 20. Provides for a comprehensive review of national water resource problems and programs. On passage, p. H8559; (369–19); Vote: yea.

August 14, 1967.—Roll Call No. 208. H.R. 43. Authorizes the Secretary of the Interior to construct, operate, and maintain the San Felipe division, Central Valley project, California. On passage, p. H10413; 235–83); Vote: yea.

September 11, 1967.—Roll Call No. 242. H.R. 8775. Increases the appropriation authorization for continuing work in the Missouri River Basin. On motion to suspend rules and pass, p. H11624; (225–83); Vote: yea.

September 14, 1967.—Roll Call No. 253. S. 602. Revises and extends the Appalachian Regional Development Act of 1965, and amends title V of the Public Works and Economic Development Act of 1965. On Cramer amendment to reduce the authorization by $50 million, p. H11904; (199–161); Vote: yea.

Roll Call No. 254.—S. 602. See above. On motion to recommit regarding—Funds to be provided to the Secretary of Transportation; proposed housing projects under section 221 of the National Housing Act; and Great Lakes fish projects, p. H11905; (178–184); Vote: yea.

Roll Call No. 255.—S. 602. See above. On passage, p. H11906; (189–168); Vote: nay.

September 18, 1967.—Roll Call No. 258. S. 1657. Extends for 1 year the authority of the Secretary of Agriculture to make indemnity payments to dairy farmers who are directed to remove their milk from commercial markets because it contains residues of chemicals registered and approved for use by the Federal Government. On motion to suspend rules and pass, p. H12003; (320–7); Vote: yea.

November 6, 1967.—Roll Call No. 370. S. 423. Authorizes the use of additional funds to defray certain increased costs associated with the construction of the small-boat harbor at Manele Bay, Lanai, Hawaii. On motion to suspend rules and pass, p. H 14630; (291–25); Vote: yea.

November 20, 1967.—Roll Call No. 400. H.R. 12010. Grants the consent of the United States to the Wheeling Creek Watershed Protection and Flood Prevention District compact. On motion to suspend rules and pass as amended, p. H15591; (356–2); Vote: yea.

April 1, 1968.—Roll Call No. 78. H.R. 15979. Prevents or minimizes injury to fish and wildlife from the use of insecticides, herbicides, fungicides and pesticides. On suspension of rules and passage, p. H 2391; (333–25); Vote: yea.

May 13, 1968.—Roll Call No. 135. S. 3033. Increases the authorization for appropriations for continuing work in the Missouri River Basin. On passage, p. H. 3690; (296–18); Vote: yea.

July 1, 1968.—Roll Call No. 219. S. 2837. Authorizes the Secretary of Agriculture to establish the Cradle of Forestry in America in the Pisgah National Forest in North Carolina. On suspension of rules and passage, p. H 5826; (280–71); Vote: yea.

July 3, 1968.—Roll Call No. 227. H.R. 17134. Federal-Aid Highway Act of 1968. On amendment regarding the beautification program, p. H 5979; (211–145); Vote: yea.

July 15, 1968.—Roll Call No. 253. S. 3710. Authorizes the construction, repair, and preservation of certain public works on rivers and harbors for navigation and flood control. On suspension of rules and passage, p. H 6580; (307–86); Vote: yea.

Roll Call No. 254. S. 2515. Authorizes the establishment of the Redwood National Park in California. On suspension of rules and passage, p. H 6681; (389–15); Vote: yea.

Roll Call No. 257. H.R. 5117. Constructs, operates, and maintains stage 1 of the Palmetto Bend Reclamation project, Texas. On suspension of rules and passage, p. H 6692; (295–104); Vote: yea.

Roll Call No. 258. H.R. 4865. Establishes a nationwide system of trails. On suspension of rules and passage, p. H 6703; (378–18); Vote: yea.

Roll Call No. 259. S. 6. Constructs, operates, and maintains the initial stage of the Oahe unit, James Division, Missouri River Basin

project, South Dakota. On suspension of rules and passage, p. H 6716; (264–128); Vote: yea.

September 12, 1968.—Roll Call No. 320. S. 2515. Establishes Redwood National Park, California. On agreeing to conference report, p. H 8595; (329–1); Vote: Yea.

Roll Call No. 321. H.R. 18260. The National Scenic Rivers Bill. On passage, p. H 8614; (267–7); Vote: yea.

September 16, 1968.—Roll Call No. 323. H.R. 551. Authorizes the establishment of the Biscayne National Monument, Florida. On suspension of rules and passage, p. H 8686; (235–92); Vote: yea.

Roll Call No. 329.—H.R. 16771. Designates certain lands in the Great Swamp National Wildlife Refuge, Morris County, N.J., as wilderness. On suspension of rules and passage, p. H 8758; (271–22); Vote: yea.

October 7, 1968.—Roll Call No. 371. S. 3206. Amends the Federal Water Pollution Control Act. On motion to suspend rules and pass, p. H 9546; (279–0); Vote: yea.

91ST CONGRESS

April 16, 1969.—Roll Call No. 37. H.R. 4148. Amends the Federal Water Pollution Control Act. On passage, p. H 2717; (302–1); Vote: yea.

July 15, 1969.—Roll Call No. 106. H.R. 4018. Provides for the renewal and extension of certain sections of the Appalachian Regional Development Act of 1965. On passage, p. H 5926; (273–103); Vote: yea.

September 23, 1969.—Roll Call No. 181. H.R. 12549. Amends the Fish and Wildlife Coordination Act to provide for the establishment of a Council on Environmental Quality. On passage, p. H 8285; (372–15); Vote: yea.

September 24, 1969. Roll Call No. 183. S. 574. Authorizes the Secretary of the Interior to engage in feasibility investigations of certain water resource development. On passage, p. H 8377; (364–16); Vote: yea.

February 16, 1970.—Roll Call No. 12. H.R. 1049. Relates to the conservation and enhancement of the Nation's anadromous fishing resources, and encourages certain joint research and development projects. On passage, p. H 819; (300–19); Vote: yea.

February 26, 1970.—Roll Call No. 34. H. Res. 799. Provides for consideration of 2 hours of debate on H.R. 12025 to provide for the more efficient development and improved management of national forest commercial forest land, to establish a high timber yield fund. On agreeing to resolution, p. H1341; (150–228); Vote: Nay.

March 16, 1970.—Roll Call No. 49. H.R. 14896. Establishes a program for the preservation of additional historic properties throughout the Nation. On suspension of rules and passage, p. H 1794; (317–9); Vote: Nay.

April 20, 1970.—Roll Call No. 86. H.R. 780. Authorizes the Secretary of the Interior to construct, operate, and maintain the Merlin division, Rogue River Basin project, Oregon. On suspending the rules and passage, p. H3266; (271–15); Vote: Yea.

April 27, 1970.—Roll Call No. 91. H.R. 14714. Amends authority of the Secretary of the Interior under the Act of July 19, 1940, to encourage through the National Park Service travel in the United States. On motion to recommit the bill to the Committee on Interstate and Foreign Commerce, p. H 3483; (111–222); Vote: Nay. Voted Aye on final passage (voice vote).

May 25, 1970.—Roll Call No. 141. H.J. Res. 1117. Establishes a Joint Committee on the Environment. On passage, p. H 4796; (285–7): Vote: yea.

June 15, 1970.—Roll Call No. 169. H.R. 15361. Establishes a pilot program designated as the Youth Conservation Corps. On passage, p. H 5545; (255–54); Vote: yea.

June 22, 1970.—Roll Call No. 182. S. 2315. Restores the Golden Eagle program to the Land and Water Conservation Fund Act. On passage, p. H 5877; (314–1); Vote: yea.

June 23, 1970.—Roll Call No. 184. H.R. 11833. Amends the Solid Waste Disposal Act in order to provide financial assistance for the construction of solid waste disposal facilities and improves research programs pursuant to such act. On passage, p. H 5915; (337–0); Vote: yea.

August 3, 1970.—Roll Call No. 250. H.R. 18260. Authorizes the Secretary of Health, Education, and Welfare to establish educational programs to encourage understanding of policies and support of activities designed to preserve and enhance environmental quality and maintain ecological balance. On suspension of rules and passage, p. H 7593; (289–28) Vote: yea.

August 13, 1970.—Roll Call No. 281. S. 3547. Authorizes the Secretary of the Interior to construct, operate, and maintain the Narrows unit, Missouri River Basin project, Colorado. On agreeing to conference report, p. H 8262 (337–4); Vote: yea.

---

ADDITIONAL VOTES CAST BY HON. WILLIAM H. AYRES ON MAJOR ENVIRONMENT AND NATURAL RESOURCES LEGISLATION NOT LISTED BY THE LIBRARY OF CONGRESS

ENVIRONMENTAL QUALITY EDUCATION ACT

*S. 3151, H.R. 18260*

Authorized the United States Commissioner of Education to establish educational programs to encourage understanding of policies and support of activities designed to enhance environmental quality and maintain ecological balance.

Passed House under suspension of the rules by a record vote of 288 yeas, August 3, 1970.

Ayres—yea.

WATER QUALITY IMPROVEMENT ACT OF 1969

*(S. 7), H.R. 4148*

Amended the Federal Water Pollution Control Act to improve the means available to control pollution of offshore waters and rivers of the United States; to provide for the control of oil and other sea-carried pollutants; sewage from vessels; acid and other pollutants from mines; and pollution from any federally-operated source. To direct the Secretary of the Interior to make a study of any and all methods of financing the cost of preventing, controlling, and abating water pollution.

Passed House with Committee amendments by a record vote of 392 yeas to 1 nay, April 16, 1969.

Ayres—yea.

House agreed to conference report (H. Rept. 91–940) by a record vote of 358 yeas, March 25, 1970.

Ayres—yea.

CLEAN AIR ACT

*H.R. 17255*

Established national air quality standards due to pollution by automobiles, plants, fuels, and planes. To authorize the Secretary of Health, Education, and Welfare to set ambient air quality standards on a nationwide basis for the five pollutants on which criteria has been published.

Note: H.R. 15848, the original bill, was an Administration bill.

Passed House amendment by a record vote of 374 yeas to 1 nay.

Ayres—not voting (among 54 not voting). Attending the ILO Conference in Geneva, Switzerland upon appointment as a delegate by the Speaker of the House of Representatives.

YOUTH CONSERVATION CORPS ACT OF 1969

*S. 1076 (H.R. 15361)*

To establish a three-year pilot program, the Youth Conservation Corps, for youth between the ages of 15 and 19, regardless of race and family income.

Passed House amended by a record vote of 256 yeas to 54 nays, June 15, 1970.

Ayres—yea.

House agreed to conference report, July 30, 1970.

INTERNATIONAL BIOLOGICAL PROGRAM

*H.J. Res. 589*

To express the support of the Congress, and to urge the support of the Federal Departments and agencies as well as other persons and organizations, both public and private, for the international biological program.

Passed House amended by a voice vote, November 12, 1969.

H. Res. 603, the rule under which the bill was considered, was adopted earlier, after the previous question was ordered, by a record vote of 230 yeas to 99 nays.

Ayres—yea.

---

(Voting record, September 1970)

CONGRESSMAN WILLIAM H. AYRES, ELECTED TO 82D CONGRESS—NOVEMBER, 1950, REPUBLICAN, OHIO

1970

The 1965 Voting Rights Act's ban against literacy tests resulted in nearly a million new Negro registrants in the South. It also made possible the election of over 500 black public officials. The ban against literacy tests was scheduled to expire in August, 1970. The Nixon Administration sought to weaken the law by killing a provision which made it apply automatically to some of the various areas of racial discrimination in voting. The Senate refused to follow the Nixon proposal and instead, on March 13, 1970, by a vote of 64 to 12, approved a bi-partisan bill which contains the strong provisions of the existing law and also gave 18 year olds the right to vote, effective January 1, 1971. The House Rules Committee granted a rule making it in order for the House to accept the Voting Rights Act as amended by the Senate. The first vote was on adoption of this rule. On June 17, 1970, the House by a vote of 224 to 183, adopted the rule. This was the key vote. Congressman Ayres voted for the motion.

On the same day the House voted for the Voting Rights Act as amended by the Senate which included giving the vote to 18 year olds. Congressman Ayres voted for the bill on final passage.

1968

Part of the Administration's original civil rights package in the 90th Congress was a bill to reform the Federal jury system by prohibiting discrimination in the selection of juries. The NAACP worked for this reform for a long time. The bill passed the House by a vote of 307 to 45 on February 26, 1968. Congressman Ayres voted for this bill.

The Civil Rights Act of 1968 first passed the House but was strengthened in the Senate by the inclusion of an open housing amendment. When the bill returned to the House, Representative Madden (D.-Ind.) offered a resolution that made it possible to adopt the Senate bill without change. Had the Madden resolution failed, the bill would have gone to conference where the housing title could have been emasculated or killed. This was the most important House vote on civil rights in the 90th Congress. The Madden resolution carried by a vote of 229 to 195 on April 10, 1968. Congressman Ayres voted for the Madden resolution.

On the same day the House passed the Civil Rights Bill with its open housing provisions by a vote of 250 to 172. Congressman Ayres voted for the bill.

1967

A bill to extend the life of the U.S. Civil Rights Commission for five years to January 1, 1973, passed the House for a vote of 284 to 89 on July 11, 1967. Congressman Ayres voted for the extension.

The NAACP has for years sought passage of a bill that would make it a Federal crime to use force or threats to interfere with the exercise of civil rights. Such a bill passed the House by a vote of 326 to 93 on August 16, 1967. (This bill became the 1968 Civil Rights

Act when it was returned to the House with a fair housing amendment added by the the Senate. Congressman Ayres voted for the bill.

1965

The 1965 Voting Rights Act, as sent to Congress by the Administration was a strong proposal, but most of the civil rights groups felt that it needed many strengthening and perfecting changes. Civil rights supporters in and out of Congress succeeded in adding language which was incorporated into the final bill. The final version of the bill banned literacy tests for five years, established a system of Federal examiners to aid in voter registration, branded the poll tax as discriminatory and instructed the Attorney General to institute court action to eliminate the tax. On July 6, 1965, the House by a vote of 333 to 85, passed the Voting Rights Act of 1965. Congressman Ayres voted for the bill.

1964

The Civil Rights Act of 1964 was the most sweeping civil rights legislation considered by the Congress since the passage of the 13th, 14th and 15th Amendments. Its passage fulfilled many of the legislative objectives that the NAACP has pursued for over fifty years. Although Congress has passed civil rights laws in 1957 and 1960, the passage of the 1964 law marked the first time since the post-Civil War period that it had acted comprehensively to protect civil rights. On July 2, 1964, by a vote of 289 to 126, the House adopted a resolution providing for House approval of the bill as amended by the Senate. The bill was then sent to the President for his signature. Congressman Ayres voted for the resolution.

1960

The Civil Rights Bill of 1960 passed by the Congress failed to meet the NAACP's standard of a meaningful civil rights bill because the Congress failed to strengthen the "skeleton" bill by adding any significant amendments. On April 21, 1960, by a vote of 288 to 95, the House passed the Civil Rights Bill of 1960. Congressman Ayres voted for the bill.

1958

The House Appropriations Committee failed to recommend any appropriation for the operation of the Civil Rights Commission. When the Appropriation Bill reached the floor. Congressman Rabaut (D.-Mich.) offered an amendment to appropriate $750,000 for the Commission's budget for 1958–1959. Congressman Ayres voted for this appropriation on April 1, 1958. The appropriation was approved by the House.

On July 17, 1958, the House passed H.R. 3, the so-called "states rights bill." Many who supported this bill did so in order to reverse some of the liberal decisions of the Supreme Court and other Federal courts. Congressman Ayres voted against H.R. 3.

Pursuant to Convention resolutions, the NAACP supported Statehood for Alaska and Hawaii. Congressman Ayres voted for Alaska Statehood on May 28, 1958.

1957

Opponents of civil rights sought to attach a sweeping jury trial amendment to H.R. 6127, the Civil Rights Bill, on June 18, 1957. This was a much broader and more damaging amendment than that which the House and Senate finally agreed upon when the bill came up for final passage. Congressman Ayres voted against the jury trial amendment and voted for the Civil Rights Bill when it came up for final passage on August 27, 1957.

1956

The NAACP prepared an amendment, which Mr. Powell offered on the floor, prohibiting the use of Federal funds for racially segregated schools. Congressman Ayres voted for this amendment on July 5, 1956. The amendment was approved and Mr. Ayres voted for the entire bill on the same day.

On July 23, 1956, the southern bloc made an attempt to send the Civil Rights Bill, H.R. 627, back to committee as it neared final passage in the House. Congressman Ayres voted against sending the bill back to committee. He voted for passage of the bill on the same day.

1955

On July 29, 1955, Mr. Powell offered an NAACP sponsored antisegregation amendment to the Housing Bill. Mr. Ayres voted for this amendment. (This vote was not a record vote because the House was in the Committee of the Whole. However, observers in the Gallery reported how the Congressmen voted.)

The NAACP has consistently supported public housing and opposed attempts to cut the number of housing units that could be built. Congressman Ayres supported public housing on July 29, 1955.

Congressman Ayres voted for Hawaii-Alaska Statehood on May 10, 1955.

1953

Congressman Ayres voted for Hawaii Statehood on March 10, 1953.

Congressman Ayres supported public housing on April 22, 1953, July 21, 1953, and April 2, 1954.

1952

President Truman vetoed the McCarran-Walter Immigration Act because it was too restrictive. The NAACP also opposed the Act and urged that the President's veto be upheld. On June 26, 1952, the House overrode the veto. Congressman Ayres voted to uphold the veto.

Prepared by: Washington Bureau, NAACP, the Congressional Building, Washington, D.C.

---

CONGRESSMAN AYRES' OUTSTANDING LEGISLATIVE RECORD

Congressman Ayres is well known for his personalized service to the people of the 14th Congressional District. Literally thousands of constituents over the years have been helped in problems with the Federal Government. The slogan "Ayres Cares" expresses this willingness to serve.

Fewer people in the 14th District, however, are aware of the fact that their Congressman is one of the most skilled and successful legislators in Washington. For example: in the 90th Congress (1967–68) over 20,000 bills were introduced but only 1,002 were enacted into law. Even then, 640 of these were public laws which affect us all; the rest were private laws for the relief or compensation of an individual with a claim against the government. So the chance of a bill becoming law in the 90th Congress was about one in thirty. Ayres did far better.

Congressman Ayres sponsored 26 bills during the 90th Congress, of which 11 were enacted into public law. This is a "legislative batting average" of over .400—which is great in baseball and in Congress is *15 times better than average!* In this Congress (91st) nine Ayres-sponsored bills already have become law, so he probably will surpass his great record in the 90th Congress.

Ayres-sponsored bills actually enacted into law—as shown in the attached list—include major measures in such vital fields as vocational-technical education, improved programs for older Americans, the education of handicapped children, Federal guarantees of student loans, better safety standards for workers, rehabilitation of handicapped persons, veterans education, and national security.

AYRES-SPONSORED BILLS ENACTED INTO LAW

1. Cold War G.I. Bill, approved March 3, 1966: This Act—which benefits millions of Korean and Vietnam veterans—was first suggested by Ayres with H.R. 2962, introduced in January of 1955 and reintroduced as H.R. 11862 in January 1966. While the bill that became law bears the name of the Chairman of the Committee on Veterans Affairs, it was Congressman Ayres who led the fight for this legislation.

2. Education Professions Development Act (H.R. 10943—signed into law June 29, 1967—Public Law 90–35): This Act established a wide range of Federal programs to help train both public and private and parochial school teachers and college faculty, including fellowships, summer institutes, inservice education, special training for teachers of handicapped children, and the Teachers Corps.

3. Vocational Rehabilitation Act (H.R. 12257—signed into law Oct. 3, 1967—Public Law 90–99): This Act made the most extensive improvements in the history of Federal legislation to provide job training and rehabilitation for handicapped persons, including the establishment of a National Center for Deaf-Blind Youth and Adults. It represents a major contribution to "helping people to help themselves".

4. Improvement of Library Services (H.R. 13048—signed into law Nov. 24, 1967—Public Law 90–154): This Act made technical amendments to improve the operation of the highly successful programs under the Library Services and Construction Act.

5. Internal Security Act Amendments (H.R. 12919 is identical to Senator Dirksen's S. 2171—enacted into law January 2, 1968—Public Law 90–237): This strengthens the Internal Security Act of 1950 to deal more effectively with Communist and Communist Front organizations.

6. National School Safety Patrol Week (H.J. Res. 1053 identical to S.J. Res. 72—signed into law March 29, 1968—Public Law 90–277): Designates second week of May in each year as National School Safety Patrol Week.

7. Ohio Education Funds (H.R. 13176—signed into law May 13, 1968—Public Law 90–304): Authorizes the State of Ohio to utilize the proceeds of the sale of certain public lands for educational purposes.

8. Extension of Student Assistance (H.R. 16729—signed into law August 3, 1968—Public Law 90–460): This Act provided a necessary extension of the NDEA student loan program, the insured loans for students, and vocational student loans, with technical amendments to improve the operation of the programs.

9. Early Education for Handicapped Children (H.R. 18763—signed into law September 30, 1968—Public Law 90–538): This Act provides Federal assistance for programs to encourage preschool education for America's six million handicapped children, giving them a much-needed "head start" in overcoming physical and mental handicaps.

10. White House Conference on Aging (H.J. Res. 1371—signed Sept. 28, 1968—Public Law 90–526): Provides for a White House Conference on Aging to concentrate national attention on problems of older citizens and to seek solution to these problems.

11. Eisenhower College Memorial (H.R. 19831—signed into law Oct. 12, 1968—Public Law 90–563): This Act establishes a living memorial to President Dwight David Eisenhower by the endowment of Eisenhower College.

12. Vocational Education Act Amendments of 1968 (H.R. 18366—signed into law Oct. 16, 1968—Public Law 90–576): This is the most important and comprehensive revision and modernization of the Federally-supported vocational education programs since the original Smith-Hughes Act of 1917. It includes benefits for private and parochial school pupils who need vocational training. It more than carries out Congressman Ayres' pledge to double funds for occupational

training; it will authorize over $3.5 billion in Federal funds for vocational education over the next five years, and is of vital importance to industrial areas such as Summit County and Akron. This Act will help bring education into the Age of Space and Technology where all young people must have a chance to "learn to earn."

13. Correctional Rehabilitation Study Act of 1965 (H.R. 8438—signed into law March 28, 1969—Public Law 91–6): Extends the time for filing final reports under the Correctional Rehabilitation Study Act of 1965 until July 31, 1969.

14. Construction Safety Act (H.R. 10946—signed into law Aug. 9, 1969—Public Law 91–54): This Act promotes the health and safety in the building trades and construction industry in all Federal and federally financed or federally assisted construction projects.

15. Economic Opportunity Act of 1964 (H.R. 12321) (Enacted under Senate bill S. 3016—signed Dec. 30, 1969—Public Law 91–177): This Act provides for the continuation of programs authorized under the Economic Opportunity Act of 1964, and for other purposes. This authorizes a two-year extension of the "War on Poverty" as requested by President Nixon.

16. National Center on Educational Media and Materials for the Handicapped (H.R. 11785 is identical to S. 1611—signed into law August 20, 1969—Public Law 91–61): To amend Public Law 85–905 to provide for a National Center on Educational Media and Materials for the Handicapped. This Center should result in major improvements in education for handicapped children in schools all over the Nation.

17. Gifted and Talented Children Educational Assistance Act (H.R. 13304—Passed House Oct. 6, 1969): This Act provides for educational assistance for gifted and talented children; included in Public Law 91–230.

18. Children With Learning Disabilities Act of 1969 (H.R. 13310—Passed House October 6, 1969): This Act provides for special programs for children with specific learning disabilities; included in Public Law 91–230.

19. Amend Vocational Education Act of 1968 (H.R. 13630—Passed House Dec. 16, 1969): To extend expiring programs authorized by the Vocational Education Act of 1968; included in Public Law 91–230.

20. President's Council on Youth Opportunity (H.J.Res. 764—signed into law Dec. 30, 1969—Public Law 91–176): To authorize appropriations for expenses of the President's Council on Youth Opportunity.

21. National Commission on Libraries (Enacted under Senate bill S. 1519—signed July 20, 1970—Public Law 91–346): This Act established a National Commission on Libraries and Information Science, and for other purposes.

---

CONGRESSMAN AYRES' RECORD ON LEGISLATION FOR VETERANS

(Compiled by the Veterans Affairs Committee Counsel)

The Honorable William Hanes Ayres was first elected to the 82nd Congress of the United States on November 7, 1950. The fact that his election was a wise choice has been reaffirmed time and again as the voters of the 14th District of Ohio have returned him to Washington to represent them in each succeeding Congress.

Because of his 20 years of dedicated public service, Congressman Ayres is one of the senior Republican Members in the House of Representatives. With seniority, of course, comes continually increasing responsibility. First, he became the top ranking minority Member of the Committee on Veterans' Affairs and now he is the senior Republican Member of a Committee that deals in several of the most difficult and controversial fields of national legislation, the Committee on Education and Labor.

His actions during the past 20 years as a Member of the Committee on Veterans' Affairs have truly reflected a sincere regard for the best interests of the Nation and its veterans. In fact, Ayres' record prompted the Chairman of the Committee on Veterans' Affairs (Mr. Teague) to state recently, "Because you have always shown the courage to place the national welfare and the best interests of veterans above political expediency, I am honored to have you on my Committee."

As a freshman Congressman in the 82nd Congress, Ayres played a leading role in the enactment of legislation providing educational benefits and home loans for almost five million veterans of the Korean conflict—the so-called Korean G.I. Bill.

In the 84th Congress, when Ayres was informed that the President intended to issue a Proclamation on January 31, 1955, terminating entitlement to the benefits of the Korean G.I. Bill, he immediately introduced a bill to provide educational benefits for those who served after January 31, 1955. Ayres introduced his bill on January 25, 1955, thus, becoming the first of a long list of distinguished Congressmen and Senators calling for a Peacetime G.I. Bill. His continuing, sometimes single-handed effort finally paid off in March of 1966, when the 89th Congress enacted a new G.I. Bill for veterans and active duty personnel with service after January 31, 1955.

In that same 84th Congress, Ayres joined the Chairman of the Veterans' Affairs Committee in spearheading the successful drive that resulted in the now famous War Orphans' Educational Assistance Act. This legislation has permitted thousands of children of men who were killed in action or died of service connected disabilities to receive free college education.

Not entirely satisfied with the scope of the new G.I. Bill or the War Orphans' Educational program, Ayres pressed for legislation to provide job training, farm training and flight training and increases in monthly training allowances and educational benefits for widows and wives of totally disabled veterans. His efforts culminated successfully in the enactment of P.L. 90–77, the Veterans' Pension and Readjustment Assistance Act of 1967, and P.L. 90–631, a bill authorizing educational benefits for widows and wives of totally disabled service connected veterans.

His efforts on behalf of the Nation's veterans are not limited to education. He, more than any other Member of Congress, is responsible for assuring a continuing supply of mortgage capital, both private and government direct, into the World War II and Korean conflict home loan programs. He has taken a leading role in providing file insurance coverage for today's servicemen and is making certain that the rates of compensation for disabled veterans and the widows and orphans of deceased veterans have kept pace with the cost of living. Just a short time ago, President Nixon approved P.L. 91–376, a bill co-sponsored by Ayres, that increased the monthly rates of compensation payable for service connected disability.

Ayres is presently leading the fight to obtain additional funds for veterans' hospitals, and to obtain increased payments and more generous benefits for veterans on the pension rolls. In the housing field, he has sponsored legislation to remove the deadline dates for entitlement to G.I. home loan benefits.

His record of success in veterans' legislation has earned for Congressman Bill Ayres the right to be called "a true champion in the cause of the Nation's veterans."

---

CONGRESSMAN AYRES' LEGISLATIVE RECORD ON BEHALF OF THE HANDICAPPED

(Compiled by the Council for Exceptional Children)

Bill Ayres has long been a friend of the handicapped and his voting record on their behalf speaks for itself. He has voted for every legislative proposal that has been designed to benefit the handicapped and he has been the prime sponsor or co-sponsor on many of them.

Here is a listing of the legislation for which he worked to secure House approval which adequately reflects the extent of his concern and involvement on behalf of the handicapped:

1957: P.L. 83–531 which earmarked moneys for the retarded.

1958: P.L. 85–905 which established a program of captioned films for cultural enrichment and recreation for the deaf; P.L. 85–926 which made grants for training leadership personnel in education for the mentally retarded.

1959: P.L. 86–158 which added authorization for support grants to institutions of higher learning.

1961: P.L. 87–276 which made grants for training basic instructional personnel in education of the deaf; P.L. 87–715 which provided for the production and distribution of films.

1963: P.L. 88–164 which expanded authority to train personnel for handicapped conditions not previously included; P.L. 88–164 providing for grants for research and demonstration projects in the area of education of the handicapped.

1965: P.L. 89–36 which created a new source of higher education for the deaf; P.L. 89–105 which extended basic authorities, allowed development of research and demanstration centers; P.L. 89–313 which amended Title I of the Elementary and Secondary Education Act of 1965 to provide grants to States for children in State-operated or supported schools for the handicapped.

1966: P.L. 89–694 which created a model high school in Washington, D.C.; P.L. 89–750 which made grants to States for preschool, elementary and secondary school children; National Advisory Committee; Bureau of Education for the Handicapped.

1967: P.L. 90–170 which extended basic training authority, added new authority for training and instructing of personnel and for research in area of physical education and recreation for handicapped children; P.L. 90–247 Regional Resource Centers; Centers for Deaf Blind Children; expansion of media services and grants for recruitment and information dissemination; earmarking 15% Title III ESEA for handicapped children; intramural research and contracts for research; increased funds for State schools; changes in Title VI grants to States formula and authorizations.

1968: P.L. 90–302 which extended the School Lunch Act to provide lunches for public and private nonprofit day care centers serving the handicapped; P.L. 90–391 providing for vocational rehabilitation of the handicapped; P.L. 90–538 which provided for the establishment of innovative, model, preschool programs for all handicapped children; P.L. 90–575 which provided programs to assist handicapped children to attend college; P.L. 90–575 Vocational Education Amendments of 1968 which provided that 10% of funds be earmarked for the handicapped.

1969: P.L. 91–61 to provide for a National Center on Educational Media and Materials for the Handicapped; P.L. 91–230 which included provision for programs for the learning disabled and the gifted.

Mr. Speaker, I would like to point out that although my record in the areas of environment, civil rights, and education are ones to which I can point with pride, all of the other Members on the list could do so as well. I point to the conservation record of my colleague, DAVID DENNIS, who is criticized for not being concerned about the environment. Yet, he is a member of several environmental organizations and has been intimately

concerned with conservation, the environment, and related subjects for many years.

The following is a letter along with a press release sent by Congressman DENNIS to an ecology group in which he is a member. The letter and the press release speak for themselves:

SEPTEMBER 16, 1970.

SOCIETY FOR PRESERVATION AND USE OF RESOURCES,
*Hayes Arboretum, Richmond, Ind.*

DEAR FELLOW MEMBERS OF SPUR: It has come to my attention that members of SPUR are interested—as is only natural—in the position of members of Congress, and of aspirants to that office, on matters involving conservation, the environment, and related subjects. I am happy to comply with the suggestion, which has been made by some of my friends, that I contribute a brief statement as to my own position and record in this regard.

As many of you know, Tresa and I have been members of SPUR since early in its existence, and it has been our pleasure also to contribute to SPUR's program of land acquisition in the Richmond area. As some of you know I have also been for many years a member of the Wilderness Society, and my family and I have, at various times, camped, hiked, back-packed, and climbed in the Tetons and in the Wind River Range in Wyoming, in the Front Range of the Rockies in Colorado, in the Bear Tooth and Bitter Root Mountains in Montana and Idaho, and also—since we have been in Washington—in the Blue Ridge Mountains of Virginia. I therefore believe that I can honestly claim a long standing involvement with an appreciation for the areas of interest in which SPUR and the members of SPUR are active and concerned.

My record in the Congress is consistent with this background. I have voted for the Water Quality Improvement Act, the Clean Air Act, the creation of the Council on Environmental Quality, the Clean Air Act Amendment of 1970, and the Environmental Education Act. I actively supported the successful efforts to defeat the proposed National Forest Timber Act of 1969, which act was designed to greatly increase the logging of unprotected virgin timber in our National Forests. As to this measure I stated in the Congressional Record: "This bill is to increase as rapidly as it can be done timber cutting in the remaining and presently unprotected virgin forests of America. This, I submit, is wrong; this, I strongly suggest, is a thing which we ought not to do."

Recently an effort was made by a self-styled group of alleged environmentalists to classify me, along with some other members of Congress, as an opponent of environmental causes. This obviously politically inspired and politically dishonest effort, which was actually based upon opposition to my views in non-environmental fields, broke down in the face of my well-known personal and Congressional record.

I, of course, regard the environment as a fundamental matter, as any thoughtful person must do. Reconciliation and adjustment of pressing, important, and essential environmental requirements and of the legitimate needs of the complex industrial society in which we live and through which we make our living presents one of the basic challenges of our era. As a member of Congress I have supported, and I shall continue to support, necessary and appropriate action to preserve, protect and improve the environment; and I shall give increasing attention to the adequate and successful meeting of this challenge. Like other challenges, I believe its satisfactory solution to be entirely within the American competence and genius, now that it has begun to receive our long over-due attention. I look forward to the opportunity to continue to work with and for my fellow members of SPUR in this vital undertaking.

Sincerely yours,

DAVID W. DENNIS,
*Member of Congress.*

---

DENNIS VOTING RECORD ON ENVIRONMENTAL ISSUES

In response to inquiries concerning his stand on legislation dealing with environmental problems, Congressman David W. Dennis (R.-Ind.) published today his voting record in Congress on environmental issues.

April 16, 1969.—Voted for Water Quality Improvement Act of 1969. Six-part measure for better control of oil spillage (H.R. 4148).

Sept. 4, 1969.—Voted for Clean Air Act. To extend for one year the program of research relating to fuel and vehicles by the Department of Health, Education and Welfare (H.R. 12085).

Sept. 23, 1969.—Voted for Council on Environmental Quality. Creates a five-member council to advise the President on our national environment (H.R. 12549).

Sept. 24, 1969.—Voted against the Water Resources Development Act. Authorized the investigation of eight water resource projects by the Secretary of Interior. Several such studies had been completed but had not been funded. There did not appear to be a need to authorize additional studies on projects that would not be funded. None of the eight projects were in Indiana (S. 574).

Feb. 26, 1970.—Paired against National Forest Timber Act of 1969. "The bill is to increase as rapidly as it can be done timber cutting in the remaining and presently unprotected virgin forests of America. This, I submit, is wrong; this, I strongly suggest, is a thing which we ought not to do", Dennis stated in a speech in the House opposing the bill (H.R. 12025).

March 25, 1970.—Voted for conference report on H.R. 4148. Previously passed by the House on April 16, 1969.

June 10, 1970.—Voted for Clean Air Act Amendment of 1970. Allows Secretary of Health, Education and Welfare to regulate national air quality standards (H.R. 17255).

August 3, 1970.—Voted for Environmental Education Act. Provides environmental education at elementary and secondary education levels (H.R. 18260).

Congressman David W. Dennis has recently been criticized for voting against environmental legislation. The record above speaks for itself.

Evidently the attacks on Congressman Dennis are due to his support of President Nixon's "Vietnamization" program which is progressing well in Southeast Asia. Various other issues were also mentioned as the campaign season begins.

---

## THE COTTON PROTECTION ACT OF 1970

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. FINDLEY) is recognized for 5 minutes.

Mr. FINDLEY. Mr. Speaker, yesterday I called upon the House conferees on the Agriculture Act of 1970, the so-called Cotton Protection Act, to reject two amendments added by the Senate which would add at least $90 million to the tax burden of this outrageous program. Actually, the increased cost would be more on the order of $190 million, according to the U.S. Department of Agriculture, thus making the program even more outrageous.

The increase in base acreage from 11.5 million acres to 14.5 million acres would increase the cost of the cotton program by $150 million per year, not $50 million as I stated yesterday. Thus the pittance saved by the House in enacting a $55,000 payment limit has evaporated in the eagerness of the Senate to sweeten up the cotton section of the bill.

I urge the House conferees to reject the Senate amendments and not to accept any compromise which would make the bill any more expensive.

---

## NATIONAL COMMISSION ON INDIVIDUAL RIGHTS NEEDED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. PRICE) is recognized for 15 minutes.

Mr. PRICE of Texas. Mr. Speaker, I rise to introduce a bill to create a National Commission on Individual Rights. At the outset, however, I would like to acknowledge my debt of gratitude to the distinguished gentleman from Delaware (Mr. ROTH) who has authored the authoritative compilation of Government programs, a compilation that has brought to light, really for the first time, just how extensively the Federal Government is involved in social and economic programs.

As is evident from the Roth report, the operations of the Federal Government intimately touch the lives of all Americans. Moreover, a careful reading of the report raises in my mind, as I am confident it does in the minds of others, certain questions regarding the state of individual rights in the United States today.

I think, Mr. Speaker, it is obvious that to raise questions regarding the condition of individual rights, is not to answer them. What is less obvious though, is that there is no clear or even reasonably clear answer to these questions at all. Public officials, educators, and interested persons throughout the land can and do make sweeping generalizations regarding individual rights and liberties but nowhere, I repeat nowhere, is there any definitive evaluation as to what the real condition of these liberities and freedoms are.

One approach to providing such an evaluation would be to form a congressional committee to investigate this matter. This method, although feasible, would have certain shortcomings in my mind. Perhaps most significant would be that since Congress operates inside the federal system as a cornerstone of the federal system, Congress may not be capable of providing the clearest expression of objectivity on this vital matter.

A second and possibly more feasible approach would be to establish a national commission and empower it to investigate and evaluate Federal laws and practices as they relate to individual rights. Such a body would contain Members of Congress, as well as private citizens from all walks of life. Its activities and reports could spell out guidelines for focused congressional action. It could provide reference points from which congressional committees could investigate legislative proposals designed to foster

and protect the individual rights our people hold so dear.

Mr. Speaker, I urge all my colleagues to join with me in this effort to provide a mechanization by which the state of individual freedoms can be assessed. Such action may mark a historic point in the development of our society.

---

## ARMY BURNS TEXTBOOKS ON COMMUNIST PARTIES OF THE UNITED STATES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Louisiana (Mr. RARICK) is recognized for 10 minutes.

Mr. RARICK. Mr. Speaker, recent reports of book burning by the Department of the Army caused me to make an inquiry of the author Lt. Col. Clyde W. Hill, who is now a retired Army officer. Colonel Hill has answered my inquiry stating he was a training specialist in the office of doctrine development and was assigned the job of compiling a textbook on communism. His manuscript was approved for publication in May of 1969, and sent for printing under Government contract. Two days after receipt of the printed books, all copies were confiscated and secured under double lock. In fact, Colonel Hill states he was not aware that the Army had destroyed all copies of the book until he learned of this action through the gossip column of Jack Anderson on August 29, 1970.

Suffice to say, many American people will find this strange behavior on the part of our U.S. Army, at a time when American men are being killed by Communist bullets and the entire free world threatened by communism. Apparently those in the high echelons of Army command do not want their troops to know the enemy or to understand what our men are fighting for by understanding what communism is against.

It would seem that the book burners have proven the need for the volume they have destroyed. One wonders if those officers are familiar with the controversial books on the Army Contemporary Military Reading List, required by the officers who attend the U.S. Army War College. See my remarks in the CONGRESSIONAL RECORD, volume 113, part 18, page 24353.

Mr. Speaker, Colonel Hill's letter and several newsclippings follow:

ASBURY PARK, N.J.,
*September 19, 1970.*

Hon. JOHN R. RARICK,
*Congress of the United States,*
*House of Representatives,*
*Washington, D.C.*

DEAR MR. RARICK: I am in receipt of your letter dated September 14th, 1970, in which you requested information as to the compilation of a book entitled, "Communist Party, USA," and its subsequent suppression.

During the month of December 1968, while employed by the United States Army as a Training Specialist in the Office of Doctrine Development, Literature and Plans, I was given a task of compiling a text book on the Communist Parties of the United States. This text was requested by the Department of Command Communications, United States Army Signal Center and School, and was to be utilized by that Department in a course of instruction entitled "Communism."

The text book which was compiled was based on a correspondence course of instruction from the Army Intelligence School, Fort Holabird, Maryland, entitled "Communist Party U.S.A. and has as its objectives the aims and goals of the Communist Party of the United States. It was also requested that I incorporate other documents into the text. The other documents which were incorporated into the book were all previously published by the Government, and consisted of Reports published by the House Committee on Un-American Activities, Senate Internal Security Sub-Committee Reports, FBI Reports, un-classified Army Intelligence Reports, and one article taken from the Congressional Record, (Translation of Lavia Baria's Text Book on Psycho-Politics). In addition propaganda pamphlets from the Progressive Labor Party, the Black Panther Party, the Students for a Democratic Society, the Student Mobilization Committee, the Socialist Labor Party, and the Communist Party of the United States was contained in a chapter entitled Propaganda.

The book was approved for publication in May 1969, and was sent to the print plant for printing. I understand that the book was printed by a civilian print shop under government contract. The book was returned to the Signal School in December 1969, the exact date I don't remember. However I do remember the afternoon that it was returned, there was an immediate request for copies to be distributed. Two days later, all copies were confiscated and secured under double lock. I was unaware that the book had been destroyed until Mr. Anderson released it in his column on August 29th, 1970. I was not given any reason as to the cause for the book being collected, and any reason that I could give you would only be my own opinion.

Unfortunately, I cannot forward to you a copy of the book as requested since the copies I had, as well as the draft manuscript in my possession were also confiscated. However I will provide you with an outline of the chapters based on memory.

Chapter 1.—History of the Communist Party to include its formation and ties with the Comintern.
Chapter 2.—Communist Fronts.
Chapter 3.—Communism and Labor.
Chapter 4.—Communism and Youth.
Chapter 5.—Communism and Religion.
Chapter 6.—Communism and Minorities.
Chapter 7.—Communism and Government.
Chapter 8.—Communism and Military.
Chapter 9.—The Current Party Line.
Chapter 10.—Communist Propaganda.

In addition there were Appendices littered from A thru O.

Due to the lapse of time and the volume of material contained in the text book, I cannot tell you each and every paragraph that was contained therein, however I can assure you that the book was not as described by Mr. Anderson, and no material was used in compiling the book which had not previously been published by the government. Any individual who was not aware of the aims and objectives of the Communist Party and their associated fronts and organizations, as well as their methods of operation might have considered it to be extremist material, even though it was previously published by the Government.

Looking back in retrospect however, I cannot help but be amazed that this book was not put to use especially when we see the activities taking place in our society today. It is beyond my comprehension that we must not provide any instruction against the Communist Party which might be considered to be biased, and simultaneously under the guise of academic freedom, we find Marxist-Socialist and Communist professors subverting and perverting our youth, and in many instances they are being subsidized by the taxpayer for doing it.

Hoping that this information will be of some value and will provide you with the answer to your inquiry.

Sincerely yours,
Lt. Col. CLYDE W. HILL,
*U.S. Army, Retired.*

---

[From the Las Vegas Review-Journal, Sept. 1, 1970]

ARMY "BOOK" VIEWS WITH "BIRCH" EYES

(By Jack Anderson)

WASHINGTON.—In an outrageous goof, the U.S. Army has published a madcap 433-page encyclopedia which sees the world through John Birch Society glasses and ties the Nixon administration to the "communist conspiracy."

Entitled "Communist Party, U.S.A.," it lumps the administration, the United Nations, the Supreme Court, Dr. and Mrs. Martin Luther King, Health, Education, and Welfare Assistant Secretary James Farmer and many others into the same communist cauldron.

The 1,045-copy edition was so extreme that when Army Signal Center Commander Brig. Gen. Richard Horne III—whose unit published the book—finally read it, he ordered every copy immediately recalled.

Horne quickly ran down the 137 copies given to school instructors and to his staff. The general thought he had collected most of the others, but one of the volumes was smuggled to this column.

The thick book cost $2,425 to print, plus many more dollars to prepare. It was issued by the Center's "Office of Doctrine Development, Literature and Plans," a sort of Stone Age "think tank," to judge by the encyclopedia.

The Doctrine developers begin ominously: "The Communist threat is not, as some would have us believe, a red herring—it is a red barracuda awaiting its chance to destroy us."

What value the book may have is destroyed when it makes "red barracudas" of the Kings, Farmer, cartoonist Jules Feiffer, writer George Plimpton and other liberals who have often harshly condemned the Soviet system.

The text reaches the height of absurdity by quoting a Communist defector—who once claimed he was heir to the Czarist throne—as an expert on State Department matters. The State Department was full of Reds in the 50's, says the volume, and "very little has changed."

"The Executive branch was and is the most vulnerable for Communist infiltration," conclude the writers, speaking of the present administration where the most famous Red-hunter of them all, Richard Nixon, is firmly in the White House.

The experts at Fort Monmouth Signal headquarters also dismiss the United Nations as "Soviet-oriented," an opinion that will no doubt surprise the Soviets.

And the U.S. Supreme Court gets an earboxing from the Signal Corps pundits for making it easy for the communists to "infiltrate all branches of government."

In fact, the only three organizations in America free of communist odors, to judge by the book, are the FBI and those relics of the McCarthy era, the House and Senate Internal Security committees.

Brig. Gen. Horne told my associate Les Whitten that he had destroyed all volumes he could find except for two file copies.

"I felt that the material . . . could very easily be misunderstood," he explained. "It was never used . . . by students."

Horne contended he did not know for sure who wrote the book and said no disciplinary action has been taken.

[From the New Brunswick (N.J.) Home-News, Sept. 3, 1970]

ARMY DESTROYS EX-OFFICER'S BOOK ON U.S. COMMUNISTS

NEW SHREWSBURY.—A retired Army lieutenant colonel said Wednesday he compiled a book on the aims and activities of the Communist party in the United States that was later destroyed because it could be construed to have a right-wing bias.

Clyde W. Hill, who is now seeking a seat in Congress, said he worked on the book while serving as an education consultant at the Army Signal School in Ft. Monmouth. This was in 1969 shortly before he retired, he said in an interview with the Asbury Park Evening Press.

"I did compile the book and I can't understand how anybody could say it was one-sided. It contained a well balanced text," Hill said.

He said almost all the material used in the book came from government agencies such as the FBI and the Senate Internal Security Committee, the House Committee on Internal Security (formerly the House Un-American Activities Committee) and the Congressional Record. He denied a report that any of the material came from John Birch Society literature.

Last Saturday, Washington political columnist Jack Anderson reported that Brig. Gen. Richard C. Horne, commandant of the signal school, had ordered 1,045 copies of the book destroyed. Anderson said the book "lumps the Nixon administration, the United Nations, the Supreme Court, Dr. and Mrs. Martin Luther King . . . and many others into the same Communist cauldron."

Horne said in a statement that he had ordered the books destroyed because they could be "interpreted, or misinterpreted, as a collection of documents that would give the impression we were giving the students only the views of the far right."

A spokesman for the signal school said most copies were destroyed nine months ago.

The book was published by the Army at a cost of $2,425 and was intended for use in an advanced elective course for officers.

Hill, a National Conservative party candidate for Congress in New Jersey's 3rd District said: "I've got several questions for Mr. Anderson; I think his interpretation was a lot of garbage."

---

ARMY BURNS TEXT ON REDS, FEARS A MISUNDERSTANDING

FORT MONMOUTH.—Brig. Gen. Richard C. Horne III, commandant of the Army Signal Center and School, ordered destroyed 1,045 copies of a book to be used in an officers' seminar on communism because he believed the text could be misconstrued as giving only the views of the far right.

The incident, which occurred last December, was brought to light in a column written by Jack Anderson, Washington newspaperman and released Saturday.

Gen. Horne said last night "The book could be interpreted, or misinterpreted, as a collection of documents that would give the impression we were giving the students only the views of the far right."

Capt. Daniel Walden, Signal School information officer, said that the book was a compilation of the activities and aims of the Communist party in the United States. He said that the book was issued by the Signal School's Office of Doctrine Development, Literature and Plans for use in an elective seminar for officers. The information officer said that the contents of the book were taken from previously published material, and that one of the book's sources was the Congressional Record.

"Due to the manner in which a portion of the contents of the book was presented," Capt. Walden said, reading from a prepared statement, "the text could be misconstrued by persons not taking the course who would not be constrained by the perspective of the students taking the course."

The books, which cost a total of $2,425 to print, were destroyed and never used in the seminar.

In his column Anderson wrote the book "sees the world through John Birch Society glasses and ties the Nixon administration to the Communist conspiracy.

"It (the book) lumps the administration, the United Nations, the Supreme Court, Dr. and Mrs. Martin Luther King, Health, Education, and Welfare Assistant Secretary James Farmer and many others into the same Communist cauldron.

"The experts at Ft. Monmouth Signal headquarters also dismiss the United Nations as Soviet-oriented, an opinion that will no doubt surprise the Soviets."

Mr. Anderson wrote that he was in possession of a copy of the book.

Capt. Walden said that the Command Group at the Signal School approves the texts used in courses offered there. The Command Group is comprised of senior officers stationed at the School.

He said that Gen. Horne received a copy of the book as a courtesy usually shown to senior officers when a new book is published. Gen. Horne is not usually involved in the approval of course texts, Capt. Walden said, and otherwise might not have learned of the book's content.

Capt. Walden said the book was requested by the Department of Command Communications, which administers the school's curriculum. He said that no disciplinary action will be taken against those who compiled the book.

---

## LIGHTS OUT IN THE CAPITOL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Tennessee (Mr. FULTON) is recognized for 15 minutes.

Mr. FULTON of Tennessee. Mr. Speaker, we have all viewed the lovely shadows which draw so beautifully across the Capitol. However, for the past few days we have been experiencing some additional shadows around here that are not only alarming but needless.

The shadows I refer to are those that darken the corridors because half the lights are out. The reason the lights are out, we all know, is because the entire east coast from here north is suffering a severe power shortage.

The reason for this, in turn, is due to a power fuel shortage which I am firmly convinced is more imaginary than real and which should and is going to be investigated by the Congress.

In the meantime, however, this problem could be alleviated over the short run by the administration. The President has executive power at his disposal to take positive action. To date he has failed to respond. Meanwhile, the lights go down and consumer power rates go up.

Yesterday, I wrote the President outlining some of the options open to him to alleviate this critical situation.

Mr. Speaker, I ask consent to place a copy of that letter in the RECORD at this point.

SEPTEMBER 23, 1970.

The PRESIDENT,
*The White House,*
*Washington, D.C.*

DEAR MR. PRESIDENT: This morning I and other Members of the Congress from the Tennessee Valley Region received a disturbing if not distressing letter from TVA Board Chairman Wagner. A copy of that letter is enclosed.

Because of a shortage of fuel it has been made crystal clear the Nation faces the distinct threat of a severe power shortage this winter unless immediate action is taken.

This fuel shortage has already forced the announcement of an intended October 1st 23 percent increase in rates to Tennessee Valley Authority power consumers and consumers of both public and private power across the country are, or soon will be, suffering similar inflationary rate increases.

The full story behind the fuel shortage has not been told but will be, I have been assured, brought to light and treated in Congressional Hearings over the weeks ahead.

At this time, however, the underlying causes of the shortage are not as important as their potentially dire effects and something must be done immediately to prevent major power shortages in the cold weeks ahead.

It is my understanding there are three actions available to you, two of which would ease the fuel shortage and power price spiral nationally and one of which would alleviate the need for a 23 percent rate increase for TVA power consumers.

By executive action you have the power to limit the export of coal. This would significantly ease the coalcar shortage which is delaying shipment of coal to power plants nationwide. It would also make coal available for domestic power production though I realize that a considerable amount of export coal is not suited for this purpose.

Second, you have the power to increase or temporarily suspend import quotas. Unfortunately, foreign oil today is not as plentiful as it normally is because of unexpected but hopefully temporary adverse conditions existing in some of the primary foreign export fields. Nonetheless, the opportunity for increased exports by these foreign producers, with the promise of greater revenues to the foreign nations wherein lie these fields, should provide strong incentive to remedy the causes of current production restrictions in foreign export capability.

An increase in available foreign fuel oil supplies, even a temporary one, would significantly ease the tremendous demand for coal which has sent prices skyrocketing and resulted in highly inflationary consumer price increases.

Finally, it is my understanding you have the power to approve a suspension of payments to the Federal Government by the TVA for a two-year period. Such an action on your part would, I am informed, greatly alleviate the necessity for the 23 percent TVA consumer rate increase scheduled to become effective next week.

Mr. President, Chairman Wagner points out in his letter that if coal costs continue to rise, rates will increase again. The time to stop this inflationary cost spiral is now. I am certain if you implement the actions available to you, you will find the Congress more than cooperative and the people of the Nation most appreciative.

Respectfully,

RICHARD FULTON,
*Member of Congress.*

---

## FAIR PLAY FOR THE TOBACCO FARMER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. PREYER), is recognized for 20 minutes.

Mr. PREYER of North Carolina. Mr. Speaker, the small tobacco farmer only asks for fair play in the smoking and health controversy. He is anxious to get a final scientific answer on the question of whether smoking is a serious health

hazard. If it is, he will abide by the decision of the scientific evidence.

But instead of fair play and scientific facts, he gets only the antismoking public relations blitz. The latest example of this comes from the American Cancer Society, a well-intentioned and effective group which seems to lose its cool when it gets on the subject of tobacco.

On February 5 of this year, the ACS announced with great fanfare that they had at last produced lung cancer in laboratory animals through inhalation of smoke. For years, many laboratory animals have spent their lives smoking cigarettes—without a single case of lung cancer being produced. The ACS experiment, therefore, would be an important breakthrough, for the first time offering clinical evidence—rather than statistical evidence only—of the relation of smoking to lung cancer. The ACS described this as a "landmark" study, extending over 3½ years, and purporting to have shown evidence of cancer in 12 beagle dogs out of 97 dogs used in the experiment.

What has happened to this "landmark" experiment since February 5?

In the first place, the experiment was announced in an unusual way. Normally, most scientific studies of this importance are first presented to a scientific body, followed by publication in a medical journal, with full statistics and photographs. The ACS bypassed this procedure by going the press conference route. Front-page headlines predictably resulted. The ACS did promise that the complete study would be published "in the very near future."

The tobacco industry understandably was anxious to see the data. The industry suggested that the data be submitted to a panel of distinguished scientists. Three separate requests were refused.

What about publication in the medical and scientific journals? The study was first submitted to the New England Journal of Medicine. It was rejected out of hand.

It was then offered to the Journal of the American Medical Association whose editors turned it over to a special reviewing panel of 12 authorities in the field. This panel unanimously recommended that the manuscript be rejected.

Tobacco stands condemned in the press by a study that has yet to be submitted to the judgment of the scientific community. Fair play has once again been denied to the tobacco farmer.

In October I proposed that a commission be appointed to get to the bottom of the smoking and health controversy, once and for all. The history of the ACS "landmark" is one more example of the need for such a study.

I call on the ACS to submit its study to an independent panel of scientists for evaluation, or to withdraw, publicly, all claims for the study.

Recently Columnist James J. Kilpatrick wrote a very interesting account of the dog study which follows:

HAS THAT CIGARETTE-BEAGLE STUDY GONE UP IN SMOKE?

Back on February 5, it may be recalled, the American Cancer Society staged a remarkable press conference at the Waldorf Astoria in New York. With all the trappings of publicity men at work, a landmark study was unveiled for the first time, it was announced, lung cancer had been induced in dogs subjected to intensive cigarette smoking.

Whatever became of that landmark? Almost unnoticed by the general press—though the story is arousing much talk in trade journals and in scientific circles—a shocking contretemps has developed. It is beginning to appear that the landmark may not be such a landmark after all.

By way of background, it should be said that this study was the greatest single study ever made to establish a causal relationship, in a laboratory, between cigarette smoking and lung cancer. The investigation was conducted jointly by Dr. Oscar Auerbach, a pathologist at the Veterans Administration Hospital in East Orange, N.J., and Dr. E. Cuyler Hammond, a Cancer Society vice president for statistical research.

Their investigation, conducted over a period of three and a half years, was financed jointly by the Cancer Society and by United States taxpayers through a federal grant. Ninety-seven male beagle dogs provided the source material.

Holes were opened in the windpipes of the animals, and except for a control group, cigarette smoke in various concentrations was pumped into their lungs. Twelve dogs died during the study. Two of them, it was announced, were found to have lung cancer. At the end of 875 days, all the surviving animals were killed and examined. Ten additional cases of lung cancer reportedly were discovered.

Now, in the normal course of events, a scientific study of this importance would have been published by a formal presentation before a scientific body, followed by printed publication, with full statistical evidence and photographic slides, in a major medical journal.

This is how such things are done; and when the Cancer Society bypassed such established procedures, in order to plunge into front-page headlines by the press conference route, a number of eyebrows were raised.

Nevertheless, the Society announced that the complete study, with all supporting evidence, would indeed be published "in the very near future." Such publication, said the board chairman, William B. Lewis, would show "the meticulous work that went into this latest scientific experiment which we believe meets the highest traditions and protocol of scientific investigation."

The tobacco industry understandably was eager to get its hands on the data. On February 27, Joseph F. Cullman 2d, chairman of the executive committee on the Tobacco Institute, proposed that the relevant material be submitted at once to a panel of distinguished scientists.

On March 12, Mr. Lewis refused such a professional review. In a follow-up letter on March 20, Mr. Cullman persisted.

The press release of February 5 had been widely publicized; the Congress had just completed action on the stringent tobacco labeling and advertising act. Mr. Cullman wanted the facts.

On April 17, Mr. Lewis again refused. "We do not intend to ask that these two eminent men submit their findings to any selected committee . . . their work will be judged in the traditional manner of American science . . . that is to say, the study would be judged upon its formal publication. With this exchange of correspondence, the story dropped out of the news.

What is not generally known, outside the immediate community of interest, is that the Society submitted the Auerbach-Hammond study first to the prestigious New England Journal of Medicine—which rejected it out of hand, reportedly because its editors were offended by the Society's publicity-seeking conference in February.

The manuscript then was offered to the Journal of the American Medical Association, whose editors, recognizing the importance of the study, turned it over to a special reviewing panel of 12 authorities in the field.

And this is the shocking fact: the panel unanimously recommended that the manuscript be rejected. One of the objections, it is said, was that the photographic slides submitted as proof of the cancers were of such poor quality that malignancy could not be determined.

All this happened in July. Two more months have passed, but the study still has not been submitted to the judgment of the scientific community. Is it not reasonable to ask, again, whatever became of that landmark?

---

## SELECTIVE SERVICE DIRECTOR RETREATS ON THE MATTER OF SELECTIVE CONSCIENTIOUS OBJECTORS

(Mr. KOCH asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. KOCH. Mr. Speaker, on May 31, 1970, the New York Times reported the Director of Selective Service, Curtis W. Tarr, as saying that he would be willing to recommend enlarging the definition of conscientious objection so as to include those who for reasons of conscience oppose a particular war, if someone could tell him how to separate the honest objectors from the dishonest ones.

Because of my interest in this matter and because I take the position that under existing law the President could, by Executive order, establish the selective conscientious objector classification, I wrote to Mr. Tarr setting forth my recommendations for how such a classification could be administered.

I now have a response from Mr. Tarr which provides essentially nothing more than a retraction of his May 30 statement. His letter makes it clear that the Selective Service System is not giving any further consideration to providing selective conscientious objector status and that legislation is needed to specifically include selective conscientious objector status in our statutes.

This morning I testified before the Armed Services Committee's Special Subcommittee on the Draft on behalf of the legislation I have introduced, H.R. 7885 and H.R. 10501, to clarify the law's definition of conscientious objector so as to specifically include conscientious opposition to military service in a particular war.

At this time I would like to submit for printing in the RECORD a copy of my testimony before the Special Subcommittee on the Draft; this statement includes my correspondence with Selective Service Director Curtis W. Tarr.

STATEMENT BY REPRESENTATIVE EDWARD I. KOCH ON THE MATTER OF SELECTIVE CONSCIENTIOUS OBJECTION

Mr. Chairman and Members of the Committee.

I do appreciate your giving me this opportunity to appear before you today on the matter which is at the core of so much of the turmoil and student unrest on the cam-

puses; the draft and the fact that young men are being forced to kill other human beings in a war that many of them cannot in good conscience support.

While I have introduced legislation to replace the draft with a volunteer Army, I would like to limit my remarks today to those Selective Service regulations affecting conscientious objectors.

It is my position that the present Selective Service law permits a local draft board to grant Selective Conscientious Objector status to any young man who is opposed to participation in a particular war based on his religious or ethical revulsions against that war. Therefore, last year when I first came to Congress, I wrote to President Nixon urging that he direct the Selective Service System to establish the Selective Conscientious Objector classification under its rules and regulations. I am submitting for the record a copy of this letter of February 9, 1969 addressed to the President.

Since no Executive action was taken by the President, I introduced H.R. 7885 on February 27, 1969 to clarify the law's definition of conscientious objector so as to specifically include conscientious opposition to military service in a particular war. And on April 23, 1969, I introduced a complementing bill, H.R. 10501 to apply to those young men already affected by the Selective Service regulations—whether they be in combat against their conscience, in exile in another country, or in prison. H.R. 10501 would give these young men a "second chance" to offer information to their local boards in support of their claim of conscientious objection to participation in a particular war.

On May 31st of this year, the New York Times reported Selective Service Director Curtis W. Tarr as saying that he would be willing to recommend enlarging the definition of conscientious objection so as to include selective conscientious objectors if someone could show him how to separate the honest objectors from the dishonest ones.

Upon reading of Mr. Tarr's interest, I gave this matter further study, taking into consideration the June 15th Supreme Court decision in *Welsh* v. *United States*, and on July 28th I submitted to Mr. Tarr my recommendations. I would like to submit for the record both my letter to the Selective Service Director and the response of August 21st which I received from him.

Unfortunately, Mr. Tarr's response provides nothing but a retraction of his stated interest in broadening the conscientious objector regulations, making it clear that the only way that we will be able to provide Selective Conscientious Objector status during this Administration is to amend the law.

I commend both H.R. 7885 and H.R. 10501 to the Committee, and I would submit that the basic justification for enacting this legislation at this time lies in the fact that the opposition to the Vietnam War for many people has gone beyond politics; it has become a matter of morality and of deep conviction and conscience. It is time that we update our laws so as to respect such conscientious objection. Just as we can understand those who say they cannot kill in any war, we should also be able to understand and recognize the moral judgment and the position of conscience that is involved when a man refuses to kill in a particular war.

---

FEBRUARY 9, 1969.

Hon. RICHARD M. NIXON,
*The White House,*
*Washington, D.C.*

DEAR PRESIDENT NIXON: I respectfully request that you take immediate action to grant exemption from military service to young men who are conscientiously opposed to the Vietnam War. As a corollary to this policy, men who have been convicted of draft evasion or who have fled the country to avoid military service in Vietnam should be given an opportunity to demonstrate that they were conscientiously opposed to the War. In all cases, those excused from military service should be required to perform alternative service comparable to that now asked of conscientious objectors traditionally exempt from military service.

It is now plain that the war in Vietnam is the most unpopular engagement in American history. Once there were only scattered protests to the War; now there is national momentum in favor of liquidating the conflict—one of the saddest chapters in our foreign policy. But although the question of the war is of vital importance to all of us, it is of special and poignant concern to the young men who are subject to military service. They stand to lose their lives or take the lives of others in a cause that a growing portion of Americans believe to be mistaken.

As President, you have already taken a very important step in recognition of the opposition to enforce service in the military by requesting the Defense Department to develop plans to establish a voluntary army as soon as circumstances permit. I applaud this step because I believe that the draft constitutes a severe and unnecessary deprivation of individual liberty and because our military needs can be satisfied by a program which pays for itself.

I understand why you are postponing implementation of the concept of a volunteer army.

But there is one major action that you can take right now if you recognize the moral basis to the war protest and really intend to bring the nation together again.

Immediate executive action should be taken by granting exemptions from military service to young men who conscientiously oppose the Vietnam War even though they are not opposed to service in all wars.

The nation has long exempted conscientious objectors because of their sincere opposition to service in war or the military. It is increasingly recognized that objection to engaging in a particular war may stem from the same depth of conscience as resistance to participation in all wars; that it is not mere political protest; that it is based on a religious and ethical revulsion against a particular conflict.

Many leading religious and moral leaders have supported this position. Shortly before his tragic death, the Reverend Martin Luther King, Jr. said that "Every young man who believes (the Vietnam) war is abominable and unjust should file as a conscientious objector." The late Father John Courtney Murray took a similar position. He said that:

"We all owe some debt of gratitude to those who, by raising the issue of selective conscientious objection, have undertaken to transform the tragic conflict in South Vietnam into an issue not simply of political decision and military strategy, but of moral judgment as well.

Moreover, delegates to the World Council of Churches voted almost unanimously last year that "the churches should give spiritual care and support . . . to those who, especially in the light of the nature of modern warfare, object to participation in particular wars they feel bound by conscience to oppose." And in a recent pastoral statement, the National Council of Catholic Bishops of the United States recommended that consideration be given those whose "reasons of conscience are more personal and specific" than "total rejection of military force."

I agree with these sentiments. I ask that you take immediate action to implement them by requesting the Director of the Selective Service System and local boards to grant exemptions in such cases. The President has the legal power to act, because the governing statute on conscientious objection can be interpreted to include the selective C.O. Indeed, several lower courts have already reached this result as a matter of judicial construction; and legal scholars have defended it.

This significant moral issue should be decided by you as Chief Executive. The Director of Selective Service, General Hershey, appears to have a closed mind on the matter. His approach is typified by his statement that "the Conscientious Objector by my theory is best handled if no one hears of him." This seems to me to be an insensitive as well as impractical attitude to a vital question of national policy.

Although I fervently hope that you will act, if you decline to do so, the Congress should amend the law to require local boards to grant exemptions for selective conscientious objectors. I shall myself introduce such a bill or join with other Members of the House in taking this action.

Whether the President or the Congress acts in this matter, it should be understood that all who are exempted from the military will be required to perform an acceptable form of alternative service such as that now performed by traditional conscientious objectors.

Some people who sympathize with the claim of selective conscientious objection have expressed the understandable concern that spurious claims will flourish if an exemption is recognized. But there is little basis for this fear. As in the case of the conscientious objector to all wars, a rigid investigation is required of each applicant. Experience shows that feigning of conscience is extremely difficult and is not the likely escape for those who wish to evade the draft through loopholes in the law.

The young men who have asserted the claim of selective objection are not lawbreakers or unpatriotic. On the contrary, they include some of our finest youth. As Father Murray said, they should be praised for raising a moral issue of profound significance. At present they are forced into the heartrending dilemma of service in a war they deeply oppose or prison or flight from the country. I believe that we have an obligation to free decent and ethical young men from this terrible choice.

As a part of the new policy, I ask that you instruct appropriate government bodies to give young men who have already suffered because of our previous policy an opportunity to demonstrate that they are sincere objectors to the Vietnam War. Men who have been convicted for avoiding the draft or who have fled the country to avoid service should be given a chance to show that they harbor a sincere conscientious objection to service.

This is only fair. Although most men who have been convicted or have fled may find it difficult to demonstrate their motivation, they should have the chance. There will be no automatic amnesty, but there will, I hope, be justice.

Sincerely,

EDWARD I. KOCH,
*Member of Congress.*

---

[From the New York Times, May 31, 1970]

TARR WOULD ENLARGE DEFINITION OF OBJECTOR

WASHINGTON.—Curtis W. Tarr, director of the draft, says he would not mind allowing conscientious objectors to choose which wars they refuse to fight, if only someone could show him how to separate honest objectors from dishonest ones.

Mr. Tarr indicated that he would be willing to recommend enlarging the definition of conscientious objection if a workable definition could be provided.

He says also the Federal Government should organize Federal work programs for conscientious objectors in which they could be of real service, adding that in many communities there are now no useful programs for such people.

Mr. Tarr concedes the war in Southeast Asia has caused young people to lose respect for military service without which, he says, it will not be possible to achieve President Nixon's goal of an all-volunteer Army.

---

JULY 28, 1970.

Mr. CURTIS W. TARR,
*The Director of Selective Service, Selective Service System, Washington, D.C.*

DEAR MR. TARR: In light of recent United States Supreme Court decisions and your subsequent Local Board Memorandum No. 107 issued July 6, 1970, I ask that you consider amending Selective Service Regulation 1662.11 and recognize selective conscientious objection as a basis for a Class I–A–O deferment under the Military Selective Service Act of 1967.

It has been my long held position that the Director of Selective Service has the power to recognize selective conscientious objector status without any amendment of Section 6(j) of the Military Selective Service Act of 1967. I enclose a copy of my letter to President Nixon dated February 9, 1969 in which I set forth the reasons for my position.

Beginning with *U.S. v. Seeger*, 380 U.S. 163 (1965) and more recently *Welsh v. U.S.*, 38 U.S.L.W. 4486 (June 15, 1970) the Supreme Court has all but eliminated the need of any "religious" prerequisite as a basis for claiming C.O. status. Your Local Board Memorandum No. 107 recognized this new approach to conscientious objection by stating that "the primary test that must be used is the test of sincerity" and that "the conscientious objector must hold his beliefs with the strength of traditional religious conviction" and "demonstrate that his ethical or moral convictions were gained through training, study, contemplation or other activity comparable in rigor and dedication to the processes through which traditional religious convictions are formulated." The Supreme Court decisions and your recent memorandum make it apparent that the characteristics of "religious belief" have been relegated to a position of being useful analogies only.

With sincerity, rather than the source of belief, now the basis of the conscientious objector exemption, the strongly held views of a particular objector who claims no opposition to all wars should receive recognition and be eligible for I–A–O exemption and the protection of Selective Service System Regulation 1622.11.

The sincerity of the selective conscientious objector should be determined in the same way as that of the objector who claims opposition to all wars. However, in order to guard against fraudulent claims, the following points should be included in providing guidelines for all local draft boards:

1. The basis of selective conscientious objection to a particular war cannot rest solely upon sincere disagreement with the political purposes underlying the nation's involvement. However, the "political" factor, if one of many other considerations, should not preclude the exemption. The Supreme Court has recognized that Section 6(j) which denies conscientious objector status to those persons with "essentially political, sociological or philosophical views should not be read to exclude those who hold strong beliefs about our domestic and foreign affairs" *Welsh v. U.S.*, U.S.L.W. at 4488–89.

2. The primary prerequisite which the selective conscientious objector (SCO) should meet is whether the basis of the claim is grounded upon a sincere objection to the taking of another life by force of arms. The SCO's refusal to kill in a particular war would preclude his service in a combatant capacity. If the SCO demonstrates that his opposition to the purposes of a particular war is based on ethical or moral convictions which compel him to refuse to kill, the I–A–O exemption should be made available. The vital prerequisite of sincere objection to kill would be the primary condition for the exemption. The local boards would recognize a valid reluctance to kill but not a declared refusal to serve in a noncombatant capacity.

I believe the Selective Service System can strike the balance between individual conscience and national interest. I would appreciate your comments on my proposal at your earliest convenience.

Sincerely,

EDWARD I. KOCH.

SELECTIVE SERVICE SYSTEM,
*Washington, D.C., August 21, 1970.*

Subject: Selective conscientious objection.

Hon. EDWARD I. KOCH,
*House of Representatives.*

DEAR MR. KOCH: This is in response to your letter dated July 28, 1970, in regard to amending the Selective Service Regulation 1662.11, and to recognize selective conscientious objection as a basis for a Class I–A–O deferment under the Military Selective Service Act of 1967.

Compulsory military service legislation in the United States has always recognized conscientious objection. The law as it exists today, in statutory form requires that a registrant's objection must be to all wars rather than to a specfic war. The Supreme Court in Welsh v. United States (No. 76–October Term, 1969) emphasized by repetition the prerequisite for conscientious objection as an objection "to all wars". It is the obvious duty of the Selective Service System, in its regulations and practices, to follow the law, and the construction of the law which has been placed on it by the highest court of the land.

Proposals to recognize selective objection to particular wars, have been considered by study commissions and the Congress, and have been rejected. Among the less complex reasons on which such proposals have been rejected are: (1) that selective nonparticipation in war is essentially a political position and should be advanced through recognized democratic processes; (2) recognition of selective non-participation in war accepts a general theory of selective disobedience of law and destroys the fabric of government; (3) the decision of whether a Nation is justified in engaging in a particular war is a foreign policy decision and properly the responsibility of the government. This decision should not, and cannot, be placed upon the individual. If such a proposal were recognized, the right to determine the justness of any particular war would place an intolerable burden on the man in uniform when the war began. As a practical matter, his decision could result in disaster to himself, his unit and the Nation. It can be well argued that it would be better to have no military force, than one whose effective use is subject to such a paralyzing rule.

Selective conscientious objection is a matter of public discussion. I have thought much about it and have concluded that the Selective Service System could not carry out its mission of insuring the maintenance of adequate armed forces if the law were to recognize selective objection.

I am unable to see the morality of a proposition which would permit the selective objector to avoid combat service by performing service in support of a war which he, theoretically, is opposed to.

I appreciate your interest in the Selective Service System and I trust my comments will be of interest to you.

Sincerely,

CURTIS W. TARR.

## STUDY OF ELEMENTARY AND SECONDARY EDUCATION PROGRAMS AND NEEDS—PART I

(Mr. PERKINS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter and tables.)

Mr. PERKINS. Mr. Speaker, last week the Office of Education released a report, "Education of the Disadvantaged," on the operation of title I of the Elementary and Secondary Education Act during fiscal 1968. Headlines proclaimed "U.S. Aid Fails To Help School of Poor," Washington Post, September 7, 1970, and "Study Calls U.S. School Aid Inadequate and Inequitable," Evening Star, September 7, 1970. A reading of the report, however, tells quite a different story. It is a story of accomplishment in the face of great odds. In the words of the study itself:
